Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Ellis moved for the adoption of Resolution No. 02-4. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 41

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of December 14, 2001 – January 3, 2002: Kenneth Faulkner (Sanitation), Werner Ent. (Streets), Santas L. Jackson (Water) and Terry Smathers (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

B. LAWSUIT

The City was served with the following Complaint on December 21, 2001, which is generally described as follows: Connie C. Jones. The nature of proceeding is ESC claim for unemployment insurance denial. This matter will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

A. COMMENTS BY KEVIN NUTTELL

Mr. Kevin Nuttell, representing NC AIDS Policy Center, talked about his involvement in exposing the integrity of the AIDS industry. He stressed the need for consumer and public involvement in the oversight of AIDS service organizations at the local level. It is his goal to work in partnership with the Mayor's Office to develop language expanding Asheville's "sunshine ordinance," thereby ensuring the taxpayer has a specific right to participate in local oversight functions of any corporation which is registered in the City of Asheville, in particular local AIDS Service Organizations.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 6:33 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – January 15, 2002 - 3:00 p.m.

Worksession

Present:	Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson
Absent:	None

CONSENT:

Street Milling Contract

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Asphalt Unlimited to prepare for pavement resurfacing of various streets in Asheville, North Carolina.

The City is in need of a contractor to provide milling services to city streets in the Asheville city limits. In accordance with N.C. Gen. Stat. sec. 143-131, informal bids for milling services were solicited and one qualified response was received. The bidders are as follows: Asphalt Unlimited at $85,085.09 and no response from Slurry Pavers.

Funding for this project has already been allocated in the Public Works Department's Capital Improvement budget.

The Public Works Department staff recommends City Council adopt a resolution to authorize the City Manager to enter into a contract with Asphalt Unlimited to mill streets in the Asheville area.

Upon inquiry of Councilman Peterson, Mr. David Foster, Public Works Project Coordinator, said that the contractor is responsible for disposing the material.

Security Enhancements at Water Resource Facilities

Summary: The consideration of a resolution authorizing execution of a contract with Sentry Alert Security Service Inc. for adequate security and protection for the Mills River Water Treatment Plant, the Water Maintenance Facility and the North Fork Water Treatment Plant and watershed.

Increased security measures are needed to provide adequate security and protection of the water system. Specifications and security needs were identified for each Water Resources Facility, with the exception of the Bee Tree Water Treatment Plant which is off-line due to spillway modifications. This area will be looked at approximately 60 days prior to completion of the spillway project in August 2003 for security requirements.

Requests for bids were sent to local security firms with only two firms responding. The bids received were $137,642.00 (low bid) from Sentry Alert Security Services, Inc. and $436,600.00 from Haynes Technologies. Bids were not received from Carolina System and Services, Inc. and Hayes and Lunsford Technologies.

Facility entry will be by card control (same system now used at City Hall). Controlled entry at all Water Resources Facilities will be tracked at the various facilities using the same security software that is currently in use in City Hall. Controlled gate entrance/exit will enable staff to limit access to possible vulnerable areas of the water plants and maintenance facility. All gates and other key points will have closed-circuit television monitoring. All entry/exit doors will have limited card control access. All Water Resources Facilities have been on heightened security since the September 11, 2001, terrorist attacks. Installation of the requested security equipment will provide the added security measures required to protect our water sources, facilities and employees. The Regional Water Authority of Asheville, Buncombe and Henderson approved increased security measures at its October 2001 meeting. Funds have been allocated from the Water Maintenance operational budget to fund these security enhancements.

Staff recommends the Council approve the contracts to Sentry Alert Security Service, Inc. in the amounts of $39,840.00 for the Mills River Water Treatment Plant, $10,652.00 for the Water Maintenance Facility, and $87,150.00 for the North Fork Water Treatment Plant.

Interim Water Resources Director David Hanks responded to Council's questions regarding what now is being done for security.

Grant Application for Azalea Road Park Phase I

Summary: The consideration of a resolution to apply for and enter into an agreement with the N. C. Dept. of Environment and Natural Resources, Division of Parks and Recreation for funds through the North Carolina Parks and Recreation Trust Fund, to assist with the development of parks and greenways.

Azalea Road Park represents the City of Asheville's first phase of a major greenway and park system being developed along the Swannanoa River on Azalea Road in east Asheville. This first phase will include the development of two fields of the four field soccer complex, restrooms, concession, kayak launch, two picnic shelters, a large playground, disc golf, fitness and greenway trails, river observation decks, restoration of the Thomas Wolfe cabin, and parking areas.

The Parks and Recreation Department, Western North Carolina Soccer Foundation and RiverLink are in partnership to implement an ambitious fundraising plan to raise $3 million to build the first phase of the park.

If the grant funds are received, they will be used to assist with the construction of the first phase of Azalea Road Park.

The Parks and Recreation Department is requesting $250,000 in grant funds from the N. C. Parks and Recreation Trust Fund, which requires a 50% cash or in-kind match. The cash match is available through the Western North Carolina Soccer Foundation via the John B. Lewis Family Foundation.

The Parks and Recreation Department recommends the City of Asheville to apply for and enter into an agreement for grant funds with the North Carolina Parks and Recreation Trust Fund to assist with the construction of Azalea Road Park Phase I.

Clerk to Advertise for Upset Bids for Lot in East Riverside – Tract 2 on Choctaw Street

Summary: The consideration of a resolution directing the City Clerk to advertise an offer to purchase property on Choctaw Street (Tract 2) in the East Riverside Redevelopment Project.

Choctaw Street Tract 2 is a residential zoned lot near the corner of Choctaw Street and Congress Street comprising 0.224 acre. A bid has been received from Tilman and Sabrina Jackson in the amount of $11,800.00 to purchase said property, which bid is not less than the appraisal of $11,800.00. The bid from the Jackson's includes the proposal to construct a single family residence on the property.

The sale of the property has been through Interdepartmental Review and all respondents concurred with no exceptions.

Approval of the resolution will initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Community Development staff recommends adoption of the resolution.

Donation from Haw Creek Neighborhood Association for Haw Creek Park Interpretive Signs

Summary: The consideration of a budget amendment to appropriate an additional $8,712.00 to the Haw Creek Park Project from the Haw Creek Neighborhood Association for interpretive signs.

The City of Asheville is continuing its development of a passive park in the Haw Creek community which includes a restroom/picnic shelter, gazebo, playground area, paved woodland trails, landscaping, and a parking lot. The last feature, interpretive signage, will be implemented through the City of Asheville Capital Improvement Budget, Parks & Recreation's Trust Fund, Adopt-A-Trail, and the Haw Creek Neighborhood Association. A budget amendment is necessary to appropriate an additional $8,712.00 to this project from the Haw Creek Neighborhood Association. The Association's commitment of these funds will enable the project to be completed.

The Parks and Recreation Department recommend approval of the budget amendment in the amount of $8,712.00 for the Haw Creek Park Interpretive Sign Project.

Sale of Right-of-Way on Brevard Road to the N. C. Dept. of Transportation

Summary: The consideration of a resolution to convey land on Brevard Road to the N. C. Dept. of Transportation.

The N. C. Dept. of Transportation (NC DOT) has offered to purchase a portion of land owned by the City on Brevard Road. The land is located approximately 300 feet north of the Blue Ridge Parkway entrance and lies between the existing east right-of-way line of Brevard Road and the west bank of the French Broad River.

The NC DOT has agreed to pay $14,550.00 for .12 acre of right-of-way, .14 acre temporary construction easement and .05 acre utility easement over the portion of the property which abuts Brevard Road. Brevard Road will be widened to four lanes with a center median in front of the property. The temporary construction easement would expire upon completion of construction. The utility easement would render the portion of land encumbered by the easement useless for any other purpose. The NC DOT's offer to purchase is subject to its authority to exercise eminent domain.

The entire parcel has an area of 1.784 acre. Compensation for the right-of-way and easements was determined by an appraisal of the portion of the property being taken in the amount of $14,550.00

Approval of the resolution will authorize conveyance of the right-of-way and easements to the NC DOT for the amount of $14,550.00.

Planning Department staff recommends adoption of the resolution.

Municipal Agreement with the NC Dept. of Transportation

Summary: The consideration of a resolution authorizing the City Manager to sign a municipal agreement with the N. C. Dept. of Transportation (NC DOT) for the replacement of a permanent bridge at East Oakview Road over Hominy Creek.

East Oakview Road is a City maintained street located off Brevard Road near the Farmers Market. Bridge #52 is located on East Oakview Road over Hominy Creek. This bridge recently collapsed due to the weight of an oversized truck. This agreement will require the NC DOT to pay 80% of the replacement of a permanent bridge. The City will be required to pay 20% of the cost of the permanent replacement bridge.

The cost of the permanent bridge was not been determined. It will most likely range from $300,000 to $500,000. The City's portion of the cost will range from $60,000 to $100,000.

This agreement costs 80% of the cost to replace a permanent bridge with two lanes of travel and a pedestrian crossing. It will not cover cost associated with a temporary bridge. Staff is currently working with the NC DOT to borrow and install a temporary bridge across Hominy Creek until the permanent structure is operational.

Staff recommends the consideration of a resolution authorizing the City Manager to sign a municipal agreement with NC DOT for the replacement of a permanent bridge at East Oakview Road over Hominy Creek.

City Manager Westbrook said that it will take approximately 3 weeks for a temporary bridge to be installed and approximately two years for a permanent bridge to be built.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

PUBLIC ACCESS CHANNEL COMMISSION UPDATE

Ms. Beth Lazer, Chair of the Public Access Channel Commission, gave Council an overview of what is public access, public access for Asheville and their progress to date. Their progress to date includes monthly meetings, planning sessions, ACM conference, visits to channels and research. She explained that public access is television by and for the people, an electronic forum for sharing information and ideas and entertainment. Public access benefits include: building community, connecting people with government and improving the quality of life. In December of 2000, the Commission presented the following recommendations to Council: (1) form a nonprofit organization ; (2) develop a management and operational plan for the station; (3) identify sources of operational funding; (4) locate a facility; and (5) enlist community groups to produce programs for public access television. Forming a nonprofit has a proven track record in other community and limits the City's liability and have the potential for funding. They have already filed Articles of Incorporation and are currently working on a 501 (c) (3) application. With regard to the operational plan they have contracted with a consultant, held a 3-day working retreat and have reviewed draft documents relating to by-laws, policies, procedures and budgets. With regard to the operational funding, they have met with Buncombe County Manager, appeared at Buncombe County's public hearing and have served on the Buncombe County Cable Franchise Agreement Task Force. They also have enlisted community groups to produce

200

programs. What they have learned to date is that the public access channel is a laboratory for skills training and that it contributes to the area's economic development.

Since this would be a win-win situation for the City and County to join forces by having one public access channel, they have been working with the County to include an operational funding request as they negotiate with Charter Communications on a new franchise agreement.

She asked for City Council's continued support and their help in finding a City-owned site for their facility.

Ms. Lazer responded to several questions from Council, some being, but are not limited to, how much is the Commission asking for in the County's franchise agreement, how many square feet are needed for their facility, who decides on programming, will the City Council still have a representative on the Board of Directors of the 501 (c) 3, how will the Board of Directors of the non-profit be selected, why does the City only provide funds for capital funds vs. operational funds, has anyone approached UNC-Asheville or A-B Tech to see if they would be interested in sharing space with the Commission,

At Vice-Mayor Bellamy's request, Ms. Lazer said that she would provide City Council with additional information on how other cities handled their development of the Public Access Channel.

Mayor Worley thanked Ms. Lazer and the Commission members for their hard work and the information presented.

UDO AMENDMENT REVIEW

Revisions to the Flexible Development Standards

City Attorney Oast said that this Unified Development Ordinance amendment is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearing, which is scheduled for Tuesday, February 12, 2002. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Chief Planner Gerald Green said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) to identify front setbacks as a category for modification using flexible development standards and to clarify the provisions regarding variances and flexible development standards.

Flexible development standards allow City staff to make administrative exceptions to certain parts of the UDO under specific circumstances. We have identified a new dimensional category for the application of flexible development standards - front setbacks.

To a great extent, front setbacks determine the character of most subdivisions. Front setbacks are generally measured from the right-of-way and, in Asheville, street pavement and right-of-way widths have not been consistent. Consequently, subdivisions in the same zoning classification may have front setbacks that measure different distances from the edge of pavement due to this variety. Additionally, in our mountainous terrain, some lots in a subdivision are differently situated than other lots due to topography. These circumstances, among others, warrant some flexibility in establishing the front setbacks for both entire subdivisions and for individual lots within subdivisions.

The ordinance provides for the application of flexible development standards in order to make adjustments to front setbacks in such circumstances. Staff believes that this ordinance will provide the needed flexibility to evaluate and approve reasonable adjustments to front setbacks in a number of cases where such flexibility is needed. The ordinance amendment also clarifies the relationship between flexible development standards and variances.

Staff has received no comments in opposition to the proposed revisions.

At their January 2, 2002, meeting, the Planning and Zoning Commission voted 6 to 0 to recommend approval of the proposed ordinance amendment. The Planning and Development staff also recommends approval of the amendment.

Mr. Green responded to various questions from Council but felt that this ordinance amendment is a good effort in providing flexibility.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to proceed with the appropriate public hearing on February 12, 2002.

NEW STATE FIRE CODE

Alignment of Fire Code with N.C. State Building Code

Fire Chief Greg Grayson said that this is the consideration of an ordinance deleting Chapter 6 of the Code of Ordinances and replacing it with an ordinance to align the Asheville Fire Code with the new North Carolina State Fire Code.

The North Carolina State Building Code Council has adopted the International Fire Code with North Carolina amendments as the Fire Code for the State of North Carolina. The new Fire Code for North Carolina went into effect January 1, 2002. Chapter 6 of the Code of Ordinances is the Fire Code for the City of Asheville. N. C. Gen. Stat. secs. 160A-174 and 160A-76 (b) authorizes the cities to adopt such codes under their general ordinance making power.

The deletion and replacement of Chapter 6 allows the Asheville Fire and Rescue Division to enforce the State Fire Code, adopts sections of the Code that are optional to locations in the State and meets the requirements of the North Carolina General Statutes. Fire Chief Grayson said that two new items include a section on violations and a section on nuisance fire alarms.

Fire protection water supply requirements for the City of Asheville were addressed by Council in the fall of 2001. These requirements are now found as Section 10 of the Asheville Standard Specifications and Details Manual.

City staff recommends City Council adopt the ordinance deleting Chapter 6 of the Code of Ordinances in its entirety and replacing it with an ordinance to align the Fire Code with the new North Carolina State Building Code.

Amendment to Fees & Charges Manual to be Consistent with new State Fire Code

Fire Chief Greg Grayson said that this is the consideration of a resolution amending the Fees and Charges Manual establishing Fire Code Permit Fees to be consistent with the new State Fire Code.

The North Carolina State Building Code Council has adopted the International Fire Code with North Carolina amendments as the Fire Code for the State of North Carolina effective

January 1, 2002. The Fees and Charges Manual establishes Fire Code Permit Fees that coordinate with Chapter 6 of the Code of Ordinances, the Fire Code for the City of Asheville.

City staff recommends City Council adopt the resolution amending the Fees and Charges Manual for Fire Code Permit Fees.

Modification to the Fire Code Violations to be Consistent with new State Fire Code

Fire Chief Greg Grayson said that this is the consideration of an ordinance revising Section C of the Code of Ordinances (Schedule of Civil Penalties) establishing Fire Code violations in order to be consistent with the new State Fire Code.

The North Carolina State Building Code Council has adopted the International Fire Code with North Carolina amendments as the Fire Code for the State of North Carolina effective January 1, 2002. Section C of the Schedule of Civil Penalties establishes Fire Code violations that coordinate with Chapter 6 of the Code of Ordinances, the Fire Code for the City of Asheville.

City staff recommends City Council adopt the ordinance amending Section C of the Schedule of Civil Penalties.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

REPORT FROM BOARDS AND COMMISSIONS COMMITTEE

City Council instructed the City Clerk to arrange interviews for the following Boards: Board of Adjustment, Community Relations Council, Fair Housing Commission, Transit Commission and Tree Commission.

City Council instructed the City Clerk to prepare the proper paperwork to reappoint Bill Schaefer to the Firemen's Relief Fund; Paula Robbins and Pauline Kaltsunis to the Greenway Commission; Brady Blackburn to the Metropolitan Sewerage District Board of Directors; and Betty Clark, Pamela Myers and Kenn Kotara to the Public Art Board.

It was the consensus of City Council that appointments to the Film Commission be opened to Buncombe County residents and that each board that is opened to County residents be reviewed on a case by case basis.

It was the consensus of City Council to advertise for two vacancies on the Civic Center Commission. Said vacancies are for former Civic Center Chair Carl Mumpower's position and also Dan Breneman's position.

After a brief discussion, it was the consensus of City Council to place on the February 26, 2002, agenda an amendment to the Rules for Appointments to Boards and Commissions. Said amendment would add the following sentence to the qualifications "in addition, appointees to boards or commissions that perform quasi-judicial functions or that have direct responsibility for governmental matters must be United States citizens." Said boards that apply will be noted in the Talent Scout: Airport Authority, Alcoholic Beverage Control Board, Board of Adjustment, Board of Electrical Examiners, Civil Service Board, Asheville-Buncombe Community Relations Council, Asheville-Buncombe Fair Housing Commission, Firemen's Relief Fund Board of Trustees, Asheville-Buncombe Historic Resources Commission, Metropolitan Sewerage District Board, Minority Business Commission, Planning & Zoning Commission, Regional Water Authority of Asheville, Buncombe and Henderson, School Board, Tourism Development Authority and WNC Regional Air Quality Agency Board.

RESOLUTION NO. 02-5 – RESOLUTION RECOGNIZING MONDAY, JANUARY 21, 2002, AS "DR. MARTIN LUTHER KING JR DAY"

Vice-Mayor Bellamy requested City Council adopt Resolution No. 02-5 recognizing Monday, January 21, 2002, as "Dr. Martin Luther King Jr. Day" in the City of Asheville, and urging citizens to commend this observance at 11:00 a.m. on that day by ringing bells for peace, nonviolence, and racial, ethnic and religious harmony.

Vice-Mayor Bellamy moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilman Peterson and carried unanimously.

Vice-Mayor Bellamy moved to adopt Resolution No. 02-5. This motion was seconded by Councilman Peterson and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 42

ADJOURNMENT:

Mayor Worley adjourned the meeting at 5:05 p.m.

Magdalen Burleson

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Councilman Joseph C. Dunn

INVOCATION

Councilman Ellis gave the invocation.

I. PROCLAMATIONS:

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JANUARY 8, 2002, AND THE WORKSESSION HELD ON JANUARY 15, 2002

B. RESOLUTION NO. 02-6 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH ASPHALT UNLIMITED TO MILL VARIOUS STREETS FOR RESURFACING

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Asphalt Unlimited to prepare for pavement resurfacing of various streets in Asheville, North Carolina.

The City is in need of a contractor to provide milling services to city streets in the Asheville city limits. In accordance with N.C. Gen. Stat. sec. 143-131, informal bids for milling services were solicited and one qualified response was received. The bidders are as follows: Asphalt Unlimited at $85,085.09 and no response from Slurry Pavers.

Funding for this project has already been allocated in the Public Works Department's Capital Improvement budget.

The Public Works Department staff recommends City Council adopt a resolution to authorize the City Manager to enter into a contract with Asphalt Unlimited to mill streets in the Asheville area.

RESOLUTION BOOK NO. 27 – PAGE 43

C. RESOLUTION NO. 02-7 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CONTRACT WITH SENTRY ALERT SECURITY SERVICE INC. FOR ADEQUATE SECURITY AND PROTECTION FOR THE MILLS RIVER WATER TREATMENT PLANT, THE WATER MAINTENANCE FACILITY AND THE NORTH FORK WATER TREATMENT PLANT AND WATERSHED

Summary: The consideration of a resolution authorizing execution of a contract with Sentry Alert Security Service Inc. for adequate security and protection for the Mills River Water Treatment Plant, the Water Maintenance Facility and the North Fork Water Treatment Plant and watershed.

Increased security measures are needed to provide adequate security and protection of the water system. Specifications and security needs were identified for each Water Resources Facility, with the exception of the Bee Tree Water Treatment Plant which is off-line due to spillway modifications. This area will be looked at approximately 60 days prior to completion of the spillway project in August 2003 for security requirements.

Requests for bids were sent to local security firms with only two firms responding. The bids received were $137,642.00 (low bid) from Sentry Alert Security Services, Inc. and $436,600.00 from Haynes Technologies. Bids were not received from Carolina System and Services, Inc. and Hayes and Lunsford Technologies.

Facility entry will be by card control (same system now used at City Hall). Controlled entry at all Water Resources Facilities will be tracked at the various facilities using the same security software that is currently in use in City Hall. Controlled gate entrance/exit will enable staff to limit access to possible vulnerable areas of the water plants and maintenance facility. All gates and other key points will have closed-circuit television monitoring. All entry/exit doors will have limited card control access. All Water Resources Facilities have been on heightened security since the September 11, 2001, terrorist attacks. Installation of the requested security equipment will provide the added security measures required to protect our water sources, facilities and employees. The Regional Water Authority of Asheville, Buncombe and Henderson approved increased security measures at its October 2001 meeting. Funds have been allocated from the Water Maintenance operational budget to fund these security enhancements.

Staff recommends the Council approve the contracts to Sentry Alert Security Service, Inc. in the amounts of $39,840.00 for the Mills River Water Treatment Plant, $10,652.00 for the Water Maintenance Facility, and $87,150.00 for the North Fork Water Treatment Plant.

RESOLUTION BOOK NO. 27 – PAGE 44

D. RESOLUTION NO. 02-8 - RESOLUTION AUTHORIZING THE CITY TO APPLY FOR AND ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES FOR A GRANT TO ASSIST WITH THE DEVELOPMENT OF AZALEA ROAD PARK PHASE I

Summary: The consideration of a resolution to apply for and enter into an agreement with the N. C. Dept. of Environment and Natural Resources, Division of Parks and Recreation for funds through the North Carolina Parks and Recreation Trust Fund, to assist with the development of parks and greenways.

Azalea Road Park represents the City of Asheville's first phase of a major greenway and park system being developed along the Swannanoa River on Azalea Road in east Asheville. This first phase will include the development of two fields of the four field soccer complex, restrooms, concession, kayak launch, two picnic shelters, a large playground, disc golf, fitness and greenway trails, river observation decks, restoration of the Thomas Wolfe cabin, and parking areas.

The Parks and Recreation Department, Western North Carolina Soccer Foundation and RiverLink are in partnership to implement an ambitious fundraising plan to raise $3 million to build the first phase of the park.

If the grant funds are received, they will be used to assist with the construction of the first phase of Azalea Road Park.

The Parks and Recreation Department is requesting $250,000 in grant funds from the N. C. Parks and Recreation Trust Fund, which requires a 50% cash or in-kind match. The cash

206

match is available through the Western North Carolina Soccer Foundation via the John B. Lewis Family Foundation.

The Parks and Recreation Department recommends the City of Asheville to apply for and enter into an agreement for grant funds with the North Carolina Parks and Recreation Trust Fund to assist with the construction of Azalea Road Park Phase I.

RESOLUTION BOOK NO. 27 – PAGE 48

E. RESOLUTION NO. 02-9 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER OF PURCHASE FOR UPSET BIDS FOR PROPERTY ON CHOCTAW STREET IN THE EAST RIVERSIDE REDEVELOPMENT PROJECT

Summary: The consideration of a resolution directing the City Clerk to advertise an offer to purchase property on Choctaw Street (Tract 2) in the East Riverside Redevelopment Project.

Choctaw Street Tract 2 is a residential zoned lot near the corner of Choctaw Street and Congress Street comprising 0..224 acre. A bid has been received from Tilman and Sabrina Jackson in the amount of $11,800.00 to purchase said property, which bid is not less than the appraisal of $11,800.00. The bid from the Jackson's includes the proposal to construct a single family residence on the property.

The sale of the property has been through Interdepartmental Review and all respondents concurred with no exceptions.

Approval of the resolution will initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

RESOLUTION BOOK NO. 27 – PAGE 40

F. RESOLUTION NO. 02-10 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY LAND ON BREVARD ROAD TO THE N.C. DEPT. OF TRANSPORTATION FOR RIGHT-OF-WAY AND EASEMENTS

Summary: The consideration of a resolution to convey land on Brevard Road to the N. C. Dept. of Transportation.

The N. C. Dept. of Transportation (NC DOT) has offered to purchase a portion of land owned by the City on Brevard Road. The land is located approximately 300 feet north of the Blue Ridge Parkway entrance and lies between the existing east right-of-way line of Brevard Road and the west bank of the French Broad River.

The NC DOT has agreed to pay $14,550.00 for .12 acre of right-of-way, .14 acre temporary construction easement and .05 acre utility easement over the portion of the property which abuts Brevard Road. Brevard Road will be widened to four lanes with a center median in front of the property. The temporary construction easement would expire upon completion of construction. The utility easement would render the portion of land encumbered by the easement useless for any other purpose. The NC DOT's offer to purchase is subject to its authority to exercise eminent domain.

The entire parcel has an area of 1.784 acre. Compensation for the right-of-way and easements was determined by an appraisal of the portion of the property being taken in the amount of $14,550.00

Approval of the resolution will authorize conveyance of the right-of-way and easements to the NC DOT for the amount of $14,550.00.

Planning Department staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE 50

G. ORDINANCE NO. 2887 - BUDGET AMENDMENT TO ACCEPT DONATION FROM HAW CREEK NEIGHBORHOOD ASSOCIATION FOR HAW CREEK PARK INTERPRETIVE SIGNS

Summary: The consideration of a budget amendment to appropriate an additional $8,712.00 to the Haw Creek Park Project from the Haw Creek Neighborhood Association for interpretive signs.

The City of Asheville is continuing its development of a passive park in the Haw Creek community which includes a restroom/picnic shelter, gazebo, playground area, paved woodland trails, landscaping, and a parking lot. The last feature, interpretive signage, will be implemented through the City of Asheville Capital Improvement Budget, Parks & Recreation's Trust Fund, Adopt-A-Trail, and the Haw Creek Neighborhood Association. A budget amendment is necessary to appropriate an additional $8,712.00 to this project from the Haw Creek Neighborhood Association. The Association's commitment of these funds will enable the project to be completed.

The Parks and Recreation Department recommend approval of the budget amendment in the amount of $8,712.00 for the Haw Creek Park Interpretive Sign Project.

ORDINANCE BOOK NO. 19 – PAGE 381

H. ORDINANCE NO. 2888 - ORDINANCE DELETING CHAPTER 6 OF THE CODE OF ORDINANCES AND REPLACING IT WITH A NEW CHAPTER 6 TO ALIGN THE ASHEVILLE FIRE CODE WITH THE NEW N.C. STATE FIRE CODE

Summary: The consideration of an ordinance deleting Chapter 6 of the Code of Ordinances and replacing it with an ordinance to align the Asheville Fire Code with the new North Carolina State Fire Code.

The North Carolina State Building Code Council has adopted the International Fire Code with North Carolina amendments as the Fire Code for the State of North Carolina. The new Fire Code for North Carolina went into effect January 1, 2002. Chapter 6 of the Code of Ordinances is the Fire Code for the City of Asheville. N. C. Gen. Stat. secs. 160A-174 and 160A-76 (b) authorizes the cities to adopt such codes under their general ordinance making power.

The deletion and replacement of Chapter 6 allows the Asheville Fire and Rescue Division to enforce the State Fire Code, adopts sections of the Code that are optional to locations in the State and meets the requirements of the North Carolina General Statutes.

Fire protection water supply requirements for the City of Asheville were addressed by Council in the fall of 2001. These requirements are now found as Section 10 of the Asheville Standard Specifications and Details Manual.

City staff recommends City Council adopt the ordinance deleting Chapter 6 of the Code of Ordinances in its entirety and replacing it with an ordinance to align the Fire Code with the new North Carolina State Building Code.

ORDINANCE BOOK NO. 19 – PAGE 383

I. RESOLUTION NO. 02-11 - RESOLUTION AMENDING THE FEES & CHARGES MANUAL ESTABLISHING FIRE CODE PERMIT FEES TO BE CONSISTENT WITH THE NEW STATE FIRE CODE

Summary: The consideration of a resolution amending the Fees and Charges Manual establishing Fire Code Permit Fees to be consistent with the new State Fire Code.

The North Carolina State Building Code Council has adopted the International Fire Code with North Carolina amendments as the Fire Code for the State of North Carolina effective January 1, 2002. The Fees and Charges Manual establishes Fire Code Permit Fees that coordinate with Chapter 6 of the Code of Ordinances, the Fire Code for the City of Asheville.

City staff recommends City Council adopt the resolution amending the Fees and Charges Manual for Fire Code Permit Fees.

RESOLUTION BOOK NO. 27 – PAGE 51

J. ORDINANCE NO. 2889 - ORDINANCE AMENDING SECTION C OF THE CODE OF ORDINANCES (SCHEDULE OF CIVIL PENALTIES) ESTABLISH FIRE CODE VIOLATIONS IN ORDER TO BE CONSISTENT WITH THE NEW STATE FIRE CODE

Summary: The consideration of an ordinance revising Section C of the Code of Ordinances (Schedule of Civil Penalties) establishing Fire Code violations in order to be consistent with the new State Fire Code.

The North Carolina State Building Code Council has adopted the International Fire Code with North Carolina amendments as the Fire Code for the State of North Carolina effective January 1, 2002. Section C of the Schedule of Civil Penalties establishes Fire Code violations that coordinate with Chapter 6 of the Code of Ordinances, the Fire Code for the City of Asheville.

City staff recommends City Council adopt the ordinance amending Section C of the Schedule of Civil Penalties.

ORDINANCE BOOK NO. 19 – PAGE 392

K. RESOLUTION NO. 02-12 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A MUNICIPAL AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR BRIDGE #52 – EAST OAKVIEW ROAD OVER HOMINY CREEK

Summary: The consideration of a resolution authorizing the City Manager to sign a municipal agreement with the N. C. Dept. of Transportation (NC DOT) for the replacement of a permanent bridge at East Oakview Road over Hominy Creek.

East Oakview Road is a City maintained street located off Brevard Road near the Farmers Market. Bridge #52 is located on East Oakview Road over Hominy Creek. This bridge recently collapsed due to the weight of an oversized truck. This agreement will require the NC

DOT to pay 80% of the replacement of a permanent bridge. The City will be required to pay 20% of the cost of the permanent replacement bridge.

The cost of the permanent bridge was not been determined. It will most likely range from $300,000 to $500,000. The City's portion of the cost will range from $60,000 to $100,000.

This agreement costs 80% of the cost to replace a permanent bridge with two lanes of travel and a pedestrian crossing. It will not cover cost associated with a temporary bridge. Staff is currently working with the NC DOT to borrow and install a temporary bridge across Hominy Creek until the permanent structure is operational.

Staff recommends the consideration of a resolution authorizing the City Manager to sign a municipal agreement with NC DOT for the replacement of a permanent bridge at East Oakview Road over Hominy Creek.

RESOLUTION BOOK NO. 27 – PAGE 53

L. RESOLUTION NO. 02-13 - RESOLUTION APPOINTING A MEMBER TO THE FIREMEN'S RELIEF FUND

Vice-Mayor Bellamy said that this is the consideration of appointing a member to the Firemen's Relief Fund to serve a two year term.

The term of Bill Schaefer, as a member of the Firemen's Relief Fund, expired on January 1, 2002.

This resolution will reappoint Bill Schaefer to serve an additional two year term, term to expire January 1, 2004, or until his successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 54

M. RESOLUTION NO. 02-14 - RESOLUTION APPOINTING MEMBERS TO THE GREENWAY COMMISSION

Vice-Mayor Bellamy said that this is the consideration of appointing two members to the Greenway Commission.

The terms of Paula Robbins and Pauline Kaltsunis, as members on the Greenway Commission, expired on December 31, 2001.

This resolution will reappoint Paula Robbins and Pauline Kaltsunis to each serve a three year term respectively, terms to expire December 31, 2004, or until their successors have been appointed.

RESOLUTION BOOK NO. 27 – PAGE 55

N. RESOLUTION NO. 02-15 - RESOLUTION APPOINTING A MEMBER TO THE METROPOLITAN SEWERAGE DISTRICT BOARD OF DIRECTORS

Vice-Mayor Bellamy said that this is the consideration of appointing a member to the Metropolitan Sewerage District Board to serve a three year term.

The term of Brady Blackburn, as a member on the Metropolitan Sewerage District Board, expires on January 19, 2002.

This resolution will reappoint Brady Blackburn to serve an additional thee year term, term to expire January 19, 2005, or until his successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 56

O. RESOLUTION NO. 02-16 - RESOLUTION APPOINTING MEMBERS TO THE PUBLIC ART BOARD

Vice-Mayor Bellamy said that this is the consideration of appointing three members to the Public Art Board.

The terms of Betty Clark, Pamela Myers and Kenn Kotara, as members on the Public Art Board, expired on December 31, 2001.

This resolution will reappoint Betty Clark, Pamela Myers and Kenn Kotara to each serve a four year term respectively, terms to expire December 31, 2005, or until their successors have been appointed.

RESOLUTION BOOK NO. 27 – PAGE 57

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilman Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

III. PUBLIC HEARINGS:

A. CONTINUATION OF PUBLIC HEARING TO REZONE A PORTION OF PROPERTY LOCATED AT 1153 SWEETEN CREEK ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT

Mayor Worley said that this public hearing was opened on October 23, 2001, and continued until December 18, 2001, in order to give staff time to work with the property owner and his realtor to refine the uses and at the same time to work with the neighborhood to coordinate the uses through them.

On December 18, 2001, the petitioner requested a continuance of this public hearing until January 22, 2002.

On January 16, 2002, a letter was received from Ms. Diane Smoak from Coldwell Banker, requesting that this public hearing be continued until February 26, 2002. "We met with citizens of the Shiloh community January 14th to discuss the seller's request that the rear portion of this property be rezoned to Commercial Industrial so the total property will have the same zoning. Mrs. Norma Baynes has been working together with us to coordinate informing the surrounding community why we are requesting this particular zoning and trying to work out with them what they find offensive. We hope we can achieve something that will be agreeable for all concerned to create a win-win situation for everyone. At the January 14th meeting in Shiloh (the January 7th meeting was rescheduled due to icy weather) Mrs. Baynes and others in attendance requested that we have another meeting on February 4th as some that had planned to attend on the 7th was not able to come on the 14th. I realize that this is an inconvenience for the council but we feel that it is better to work with the community to see if we can find a mutually agreeable plan for the owner of the property and the surrounding community. Just to keep you informed we are going to mail another package to the fifteen members that regularly attend the Shiloh community meeting as well as the names on the list that Stacy Martin faxed to us. The community in attendance this past Monday night voiced concerns about the potential for drugs (in RS-8 zoning) that have been a problem and homeowners hope that whatever future development of the property will bring pride to their neighborhood. We hope to be able to get more of the community to see if we can agree on zoning that will be agreeable. We would appreciate you rescheduling us in February so we may try to work out a satisfactory solution."

Councilman Peterson wanted to make sure that both parties were agreeable to this continuance in order to avoid unnecessary trips to the Council meeting for those who were prepared to speak on this issue.

Councilman Mumpower moved to continue this public hearing until February 26, 2002. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

B. PUBLIC HEARING TO CONSIDER THE REZONING OF 123 ACTON CIRCLE FROM NEIGHBORHOOD BUSINESS DISTRICT TO OFFICE II DISTRICT

ORDINANCE NO. 2890 - ORDINANCE REZONING 123 ACTON CIRCLE FROM NEIGHBORHOOD BUSINESS DISTRICT TO OFFICE II DISTRICT

Mayor Worley opened the public hearing at 5:11 p.m.

Mr. Jeff Tacy, Urban Planner, said that this is the consideration of an ordinance to rezone 123 Acton Circle from Neighborhood Business District to Office II District. This public hearing was advertised on January 11 and 18, 2002.

The City has received a rezoning petition requesting the rezoning of property located at 123 Acton Circle (PIN No. 9617-11-67-5257) from Neighborhood Business District to Office II District. The site is located on the southwest corner of Acton Circle and Sand Hill School Road. It is bounded on the east by RM-6 Residential Multi-Family Low Density District zoning, Neighborhood Business District to the south and Highway Business District to the west and north. A Home Depot building supply store is located north of the site and there are other relatively intense commercial uses in the immediate area. These developments have resulted in a change in the character of the area. The requested Office II zoning would provide a good transition from the Highway Business zoning to the residential zoning to the west of the site. Development standards for the Office II zoning district would assure that any development of the site would be compatible with the surrounding area. The Office II development standards permit structures of 16,000 square feet of floor area or less and allows for a variety of office, commercial, and retail uses. The site currently has a two-story 6,000 square foot structure with offices, retail and apartments.

The Planning and Zoning Commission voted unanimously to recommend approval of the rezoning of the property located at 123 Acton Circle from Neighborhood Business District to Office II District. The Planning and Development staff recommends approval of the requested rezoning.

Councilman Peterson asked if this would be considered spot zoning. City Attorney Oast said that that if it were surrounded along all sides by residential zoning, it would be different, than it being surrounded on all sides by non-residential zoning. He felt the Office II classification is not significantly different from Neighborhood Business and the way the lot is situated, it may actually be a good transition from Neighborhood Business from the south to Highway Business to the north. That kind of step by step increase in intensity seems to work well in the area that it is.

Upon inquiry of Councilman Mumpower, Mr. Tacy said that they built this building in 1999 and they are only requesting the rezoning in order to change the use on the second floor from apartments to office space, due to their inability to finding tenants.

Ms. Lynn Johnson was concerned about taking the mixed use aspect (residential apartments) out of this building.

Vice-Mayor Bellamy felt that the City needs to look at the bigger issue of whether people want to live on major corridors or in residential neighborhoods. Council needs to keep that issue in mind when they think of housing in general and when they ask people to develop housing.

City Attorney Oast noted that among the uses that are permitted in the Office II District are residential uses, so there is nothing that would prohibit that use, other than economics.

Dr. Il Sung Lee, applicant, explained that due to the commercialized development in the area he has a problem in finding tenants for the upstairs residential level and thus requested the rezoning.

Mayor Worley closed the public hearing at 5:26 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Bellamy moved for the adoption of Ordinance No. 2890. This motion was seconded by Councilman Ellis and carried unanimously.

ORDINANCE BOOK NO. 19 - PAGE 393

C. PUBLIC HEARING TO CONSIDER REZONING STONE RIDGE CONDOS LOCATED ON PINEY MOUNTAIN DRIVE FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT/CONDITIONAL USE, AND ISSUANCE OF A CONDITIONAL USE PERMIT

ORDINANCE NO. 2891 - ORDINANCE REZONING STONE RIDGE CONDOS LOCATED ON PINEY MOUNTAIN DRIVE FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT/CONDITIONAL USE

ORDINANCE NO. 2892 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR STONE RIDGE CONDOS LOCATED ON PINEY MOUNTAIN DRIVE

On January 17, 2002, a letter was received from the President of Pinecliff Condominiums Association Inc. Jennette O'Conner and the President of Pinecliff Villas Association Larry Traber requesting this public hearing be continued to a date after February 16, 2002. Said letter read: "Pinecliff Condominium Association and Pinecliff Villas Association is a residential community of 67 homeowners located on just over eleven aces of land (approx. 6 units per acre) next to the proposed Stone Ridge Condominium Project south of Chunns Cove Road. We do not object to the proposed Stone Ridge project and welcome a new neighbor with the following requests: (1) The Stone Ridge project will require wholesale destruction of existing trees and vegetation to accomplish placement of eighty homes and detached garages. The developers pretty pictures depict vegetation only as it will look twenty years after construction. We strongly recommend approval of less density necessitated by the steepness of the site; (2) The developer has purchased acreage on the opposite side of the ridge contiguous with the property but not scheduled for development; this purchase of property was approved by Planning and Zoning to meet UDO requirements. We question the legality of this additional land if it is not to be developed as part the of 'development'.; (3) Rezoning the property from RM6 to RM8 would not be in the best interest of the neighborhood from the standpoint of the topography, visual destruction of the site from Tunnel Rd, increase in vehicular traffic and accommodation of sewage discharge, etc. We strongly urge City Council to deny any increase to RM8 zoning. Due to key members of our association being unavailable for three weeks and due to the fact that notification of this agenda was not received until 01.16.02, we respectfully request that this agenda be postponed to a date after February 16, 02 to allow us to prepare and voice our opinions."

On January 17, 2001, a letter was received from Stephen D. Saleed, Executive Vice President of Saleed Construction Systems, to Mr. Gerald Green which read: "Based on our conversation today, I understand that a neighbor is requesting that the City Council meeting be delayed for an additional 30 days. Based on our 22-month involvement with the City of Asheville working closely with your staff and our construction schedule to begin construction in April, a 30-day set back would be detrimental at this time. We plan to start our road construction in April so the building foundation can start in June and have units available in the fall before bad weather sets in again. Also, our construction loan with Wachovia Bank is supposed to close next week to begin this project. Please consider our request and call with any questions."

Ms. Patricia Harvey, Treasurer of Pinecliff Condominium Association, reiterated the letter received from Jennette O'Conner and Larry Traber requesting the continuance.

Mr. Clay Mooney, landscape architect and land planner for Stone Ridge Condos, said that this project has been going on for 1-1/2 years and as a result of the numerous meetings and correspondence with Pinecliff Condominium Association, the project has now evolved into a condominium project instead of a townhouse villa concept as first was proposed. He said that since the hillside ordinance limits the amount of area that can be disturbed on a project, additional acreage was purchased. It did not change any density and that additional property will not be developed.

Mr. Terry Peterson, with Beverly Hanks and Associates, said that he has been working with the developer on this project for over two years. He said that the existing residents in Pinecliff community have had the knowledge that this was an 80 unit project for over a year. He said that Mr. Saleed initiated a meeting in April of 2000, when they met with Ms. O'Conner and presented the first set of plans. Another meeting, initiated by Mr. Saleed, was held on June 8. He said that the fourth meeting was March 30, 2001, at which time a site plan was presented to Pinecliff Condo Association. A revised site plan dated November 29, 2001, noted the only difference between the revised plan and the original plan was that the parking in front of the clubhouse changed from 12 parking spaces to 9 parking spaces. Nothing else changed on the plan. They have had this plan. He contacted Ms. O'Conner in Florida and advised her of the Technical Review Committee (TRC) meeting on December 17, 2001, and she said that Pinecliff would be represented at that meeting and Mr. Traber would probably also be there. Mr. Traber was not. At the January 2, 2002, Planning & Zoning hearing there were two people from Pinecliff but Mr. Traber did not attend that meeting either. He stressed that this project has remained the same over a year that it was going to be an 80 unit condominium development.

Ms. Sally Cheney, resident of Pinecliff, said that Larry Traber is not part of Pinecliff and his objection is separate from Pinecliff Condominium Association. She wanted to know if they are going to build on the additional property they purchased.

Upon inquiry of Councilman Peterson, Urban Planner Jeff Tacy said that the additional 15 acres was added on November 2, 2001. The site plan went through the TRC meeting and the Planning & Zoning Commission meeting with the additional acreage.

When Mayor Worley asked if there was a motion to continue the public hearing, no motion was made. After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:42 p.m.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

Mr. Tacy submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners), City Exhibit 3 (Staff Report dated 1/22/02). This public hearing was advertised on January 11 and 18, 2002.

Mr. Tacy said that this is the consideration of an ordinance to conditionally rezone Stone Ridge Condos located on Piney Mountain Drive from RM-6 Residential Multi-Family Low Density District to RM-8 Residential Multi-Family Medium Density District/Conditional Use, and issuance of a conditional use permit for the proposed use of the property as an 80 unit condominium development.

At their January 2, 2002, meeting the Planning and Zoning Commission recommended rezoning of property located on Piney Mountain Drive (PIN Nos. 9658-05-29-1232, 9658-05-28-1774, and 9658-06-28-895) from RM-6 Residential Multi-Family Low Density District to RM-8 Residential Multi-Family Medium Density District. Piney Mountain Adventures, LLC, is the owner and applicant. The 32.71-acre site is located on the east side of Piney Mountain Drive immediately adjacent to the north side of the Pinecliff Condominium site (City Exhibit 3 –Location Map). The entire project site lies within the zoning jurisdiction of the City. The site is surrounded by mixed multi-family residential, single-family residential, and vacant land. A single entrance from Piney Mountain Drive will access the project site. Surrounding zoning is RM-6 and RS-2. The development density allowed by the RM-8 zoning is consistent with the 2010 City Plan.

He said the initial application was for 15.27 acres and then it was discovered that due to the Hillside Development Standards they would have to acquire additional acreage to get the density they needed for 80 units. They did acquire an additional 17 acres in order to get the 80 units and still meet the hillside development standards.

The request is to conditionally zone the property as RM-8 Conditional Use to allow the owner to develop the project site with 80 residential condominium units, along with a clubhouse and network of pedestrian pathways. The underlying zoning district allows for a maximum density of 8 units per acre for total of 262 units. However, because of the slope of the site, the Hillside Development Standards are applied and the maximum allowed density is 2.8 units per acre. The project as proposed requests a density of 2.6 units per acre. Additionally, due to the slope of the project site, the area of disturbance and construction will be limited to the 7.92 acre portion of the property on the east side of the ridge, fronting on Piney Mountain Drive. The project will consist of 20 residential buildings, with varying combinations of two and three bedroom units. All of the buildings will be 2-stories with an average height of 33 feet. The project applicant has exceeded all of the open space, buffering and landscaping requirements of the Unified Development Ordnance (UDO). Also, the project applicant has voluntarily implemented many of the suggestions and recommendations of the local authorities not required by the UDO.

The Technical Review Committee has reviewed and approved this project. A Transportation Impact Analysis was not required for this project.

City Council must take formal action as set forth in section 7-5-5(e) of the UDO and must find that all seven standards for approval for conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case [UDO 7-16-2 (c)]. Staff's preliminary opinion, absent the benefit of public input, is that all seven standards appear to be met.

1) That the proposed use or development of the land will not materially endanger the public health or safety.

Through the cooperation of the project applicant and local authorities, all public health and safety issues a have been adequately addressed and incorporated into the project design.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

The project is designed to preserve a significant portion of the site, including the ridge top and areas with the steepest slope. The site design includes limits on the extent of grading, therefore preserving a large portion of the natural vegetation. The project applicant has designed a landscape plan that is consistent with other developments with similar topographical characteristics.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

The project design is significantly consistent with the Pinecliff Condominium development, which is immediately adjacent to the project site. The site plan depicts considerable buffering and landscaping designed to screen the development from adjacent and nearby properties.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

At present, the area surrounding the project site is mixed single-family residential, multi-family residential and vacant land. The Pinecliff Condominiums are immediately adjacent to the project site and the scale, bulk, coverage, density, and character of the two developments would be in harmony. The single-family residences in the area are screened and buffered by the natural topography of the area and the preservation of undisturbed areas.

5) That the proposed use or development of the land will generally conform to the Comprehensive Plan, smart growth policies, sustainable economic development strategic plan, and other official plans adopted by the City.

The property is currently zoned for multi-family residential and is also consistent with the land use designations of the 2010 Plan.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

The Technical Review Committee representatives have reviewed the proposal and determined that there are adequate infrastructure facilities to accommodate the proposed project.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

Due to the low impact generated from the proposed project, no traffic impact analysis was required. The traffic generated by the proposed use will not cause undue traffic congestion or create a traffic hazard.

Based on the information submitted by the applicant, the proposed project does meet all of the UDO standards required for approval. Based on a field investigation of the project site, the proposed project will function appropriately with the natural characteristics and topography. Also based on a field investigation of the surrounding area, the proposed project is consistent with other developments in the area.

The Planning and Zoning Commission reviewed the requested conditional use rezoning and the site plan for the proposed use at their January 2, 2002, meeting. The Commission unanimously voted to approve the request for RM-8 Conditional Use Zoning, subject to the conditions identified by the staff.

Based on information available to the Planning and Development Department in advance of this public hearing, staff recommends that the City Council approve the requested conditional use rezoning and issue the Conditional Use Permit with the following conditions:

1. The site design shall be in accordance with all applicable conditions of the Technical Review Committee.
2. The site design shall include a landscape installation and maintenance plan that will result in the growth of vegetation intended to make the Stone Ridge development as unobtrusive as the adjoining Pinecliff Condominiums when viewed from locations off the subject property. Such maintenance plan shall be incorporated into and recorded as part of the condominium documents for the project so that it will be observed by all future property owners of Stone Ridge.
3. There shall be no voluntary removal, topping, or other modification of any trees or natural vegetation within the undisturbed area or anywhere else on the site as shown on the grading, site plan, and/or landscaping plan without the approval of the Planning and Development Director.
4. The applicant shall install sidewalks along the portion of the property, abutting Piney Mountain Drive per Section 7-9-1(10)(b).
5. Vary the building designs and floor plan layouts to better satisfy the purpose and intent of the PUD overlay district.
6. Work with staff to provide for a means of providing an urban level of public safety for the entire site.

Vice-Mayor Bellamy asked what kind of continuity will this development have with the existing Pinecliff Condominiums. Mr. Tacy said that this development appears to be very similar to Pinecliff Condominiums, e.g., the layout of the units, the number of bedrooms per unit and the roadways.

Upon inquiry of Vice-Mayor Bellamy, Mr. Tacy explained the need to go from RM-6 to RM-8.

When Vice-Mayor Bellamy questioned why Condition No. 5 was a recommendation, Mr. Tacy said that was in error and should be deleted.

Councilman Ellis questioned the condition that the developer must install sidewalks along the portion of the property when there are no other sidewalks in the area. Mr. Tacy explained that sidewalks are required to be constructed in accordance with the City's Standard Specifications and Details Manual. He said that even though there are not a lot of sidewalks out there, as more development occurs this will provide some connectivity with the other developments.

City Attorney Oast said that the City does have a mechanism in place where the developer can pay a fee in lieu of constructing sidewalks, however, that is generally used in subdivisions. Since this is a conditional use permit, he would have to defer to the Planning Department's recommendations. Planning & Development Director Scott Shuford said that he intends to bring some revisions to our current sidewalk policy to Council in the near future and that may be an opportunity for us to address that issue. He said they could have the amount of money associated with a fee in lieu option escrowed until that issue is resolved. Then, whichever direction Council provides at that time, we would then apply that direction to this particular circumstance.

City Manager Westbrook said that unless we collect enough money to build the sidewalk now, in the future it will become the general taxpayer's burden to pay for it. He understands that it looks like a sidewalk going nowhere, but the development does provide urban amenities for urban densities. In most cities where they are developing on the outer rim you will see those sidewalks going into place and they do connect in the future, either by the City or by future developers who develop in the area.

Upon inquiry of Councilman Mumpower, Mr. Mooney said that the slope on Piney Mountain Drive varies but it's about an 8-10% grade. He said the entire frontage of the site requiring sidewalks is approximately 600 feet, but he didn't have a cost estimate. Mr. Mooney said that sidewalks are shown on their plans and they are willing to meet that requirement. However, if City Council deems it more appropriate that they pay a fee in lieu of to build sidewalks in a more appropriate area, they would have not problem with that either.

Upon inquiry of Mayor Worley, Mr. Tacy said that the existing Pinecliff Condominiums would have less than 1/3 of their units if they were to build today under our current standards.

Mr. Mooney recapped that there are 24 unit buildings and each are two story buildings (Applicant Exhibit 1). The Planning Department requested was a reduction in the parking. Originally they had 207 parking spaces and through discussions it was agreed to reduce those to 174 parking spaces. He then showed and explained the elevations of the proposed units (Applicant Exhibits 2, 3 and 4). He then showed a digital photo of what the property looks like now and a rendering of what the property will look like after the condominiums are built (Applicant Exhibits 5 and 6). He said they exceed all of the landscaping requirements set for in the UDO. It is their effort to save as much vegetation as possible. All water and sewer approvals have been obtained. He urged City Council to issue a conditional use permit for this well-designed project.

Upon inquiry of Councilman Peterson, Mr. Mooney said that the clubhouse will be approximately 3-4,000 square feet and it will be one story.

In response to Councilman Peterson, Mr. Mooney said that the additional acreage is on the back side of the slope which is more visible from the Haw Creek area and the Parkway. Again he said that property will not be developed.

218

At the request of Councilman Mumpower, City Attorney Oast explained the hillside development ordinance. Mayor Worley also said that there is a State ridge top law that applies to only development above certain elevations.

Upon inquiry of Vice-Mayor Bellamy, Mr. Shuford said that they have not discussed with the developers inclusionary housing or setting aside some affordable units in their development. He said that state law would preclude them from that, but it is something they can work on to get that legislation in the future. He noted that this will be discussed at Council's upcoming retreat.

Ms. Cheney was concerned that the entire 80 units will be crowded onto the original 15 acres.

Ms. Sharon Martin expressed concern that even though they had to buy the additional 17 acres to meet the hillside development standards, they will still disturb the same original 15 acres.

Ms. Lynn Johnson questioned if there were any greenways planned for pedestrians and bikeways and felt this development may not be sustainable economic development.

There being no request for rebuttal, Mayor Worley closed the public hearing at 6:34 p.m.

Councilman Ellis suggested Condition No. 4 be amended to read that "The applicant shall install sidewalks along the portion of the property abutting Piney Mountain Drive, or pay a fee in lieu of. That decision is to be determined by an agreement between the developer and the Planning and Development Department as the new rules are developed."

City Manager Westbrook stressed that the payment in lieu of is normally for times where it's topographically unwise to building sidewalks.

Mayor Worley suggested Condition No. 4 be amended to read that "The applicant shall comply with the sidewalk requirements set forth in City ordinances."

Upon inquiry of Councilman Mumpower about who determines the cost for sidewalks, Mayor Worley said that if the developer constructs the sidewalks, they have to be constructed to the City's standards and specifications and it's whatever that cost is for the developer to construct them. If the fee in lieu of sidewalks is paid, there is a set cost per foot that is determined by the Engineering Department.

Councilwoman Jones felt that the additional acreage purchased is trying to hold the natural resources piece in balance with the residential development.

Councilman Peterson asked if the back 17 acres are so steep that they are not buildable or could someone have built on that property. Mr. Tacy said that the additional 17 acres would have been buildable with the right engineering.

Mayor Worley said that since this is a conditional use process, whatever Council approves is it. Nothing else can be built on that land, including the undeveloped land on the back side of the ridge without going through the whole zoning process again and coming back before City Council. With respect to the back 17 acres on the back side of the ridge, by adding it to the total land mass and bringing the land mass up sufficient to allow the calculations to get 80 units built on the front side of the ridge, we have effectively protected it from future development. It also appears to him that this project is very compatible in scope, nature and size with the Pinecliff Condominiums development.

Councilman Peterson said that as we develop along some of our ridges we continually need to be sensitive to protecting the visual aspect.

Councilman Mumpower moved to adopt Ordinance No. 2891 to rezone Stone Ridge Condos located on Piney Mountain Drive from RM-6 Residential Multi-Family Low Density District to RM-8 Residential Multi-Family Medium Density District/Conditional Use. This motion was seconded by Councilman Ellis and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 395

Councilman Ellis moved to adopt Ordinance No. 2892 granting the conditional use permit for Stone Ridge Condos located on Piney Mountain Drive with the following conditions: (1) The site design shall be in accordance with all applicable conditions of the Technical Review Committee; (2) The site design shall include a landscape installation and maintenance plan that will result in the growth of vegetation intended to make the Stone Ridge development as unobtrusive as the adjoining Pine Mountain Condominiums when viewed from locations off the subject property. Such maintenance plan shall be incorporated into and recorded as part of the condominium documents for the project so that it will be observed by all future property owners of Stone Ridge; (3) There shall be no voluntary removal, topping, or other modification of any trees or natural vegetation within the undisturbed area or anywhere else on the site as shown on the grading, site plan, and/or landscaping plan without the approval of the Planning and Development Director; (4) The applicant shall comply Section 7-11-7 of the City Code with regard to the installation of sidewalks; and (5) Work with staff to provide for a means of providing an urban level of public safety for the entire site; and to instruct the City Attorney to prepare the Order for the Mayor's signature. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 397

At 6:48 p.m., Mayor Worley announced a short break.

D. PUBLIC HEARING TO CONSIDER REZONING PROPERTY LOCATED ON LONG STREET FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO COMMUNITY BUSINESS I/CONDITIONAL USE, AND ISSUANCE OF A CONDITIONAL USE PERMIT

ORDINANCE NO. 2893 - ORDINANCE REZONING PROPERTY ON LONG STREET FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO COMMUNITY BUSINESS I/CONDITIONAL USE

ORDINANCE NO. 2984 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED ON LONG STREET

City Attorney said that Ms. Lula Moon, who lives in one of the houses next to this site, contacted him to pass along to City Council her request for a continuance since she is out of the country at this time.

Planning & Development Director Scott Shuford said that Ms. Moon has been the primary person opposed to this request, although she was not the only person in opposition at the Planning & Zoning Commission meeting.

Mr. Mike Rangel, one of the owners of Asheville Pizza and Brewing Company, said that the person Ms. Moon rents from is 100% behind the rezoning and supports all the changes requested. He felt like since Ms. Moon has been the only person to contact his business to

220

complain, he felt here is the only voice against the issue and urged Council to continue with the public hearing.

Ms. Hazel Fobes asked City Council to continue with the public hearing.

A man affiliated with the Tailgate Market urged City Council to not continue the public hearing because the people who are involved in the market have to make plans to grow and produce the items for sale in the market. If this hearing is prolonged, they will not have time to readjust their agenda.

Mr. Pete Dixon, vendor at the Tailgate Market, urged City Council to not continue the public hearing because the process of relocation is very lengthy and the continuance is not good for the farmers who work at the market.

When Mayor Worley asked if there was a motion to continue the public hearing, no motion was made. After hearing no questions about the procedure, Mayor Worley opened the public hearing at 6:56 p.m.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

Mr. Shuford submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners), City Exhibit 3 (Staff Report dated 1-22-02). This public hearing was advertised on January 11 and 18, 2002.

Mr. Shuford said that this is the consideration of an ordinance to conditionally rezone property on Long Street from RM-8 Residential Multi-Family Medium Density District to Community Business I/Conditional Use, and issuance of a conditional use permit for overflow parking for the adjacent commercial use, a recycling collection center, and a farmer's market.

At their January 2, 2002, meeting the Planning and Zoning Commission recommended rezoning of property located on Long Street from RM-8 Residential Multi-Family Medium Density District to Community Business I/Conditional Use. Lowell and Marvin Pearlman are the owners and applicants. On September 27, 2001, the owners submitted an application for rezoning from RM-8 to Community Business I for an existing parking lot located on Long Street (City Exhibit 3 – Site Plan). This request was subsequently modified to request Community Business I-Conditional Use zoning for the property. The 0.72-acre site is located on Long Street between Edgewood Road and Larchmont Street (City Exhibit 3 – Location Map). The commercial development along Merrimon Avenue is located to the west of the site; and residential zoning and uses are located to the east, north, and south of the site. The existing parking lot has been located on the site and used as an overflow parking area for the adjacent commercial development (Asheville Pizza and Brewing Company) for at least 15 years. For approximately 5 years, a recycling collection center has been located on the parking lot and, in the past year, the lot has been used as the site for the North Asheville Farmer's Market.

The proposal is to conditionally zone the property as Community Business I – Conditional Use to permit the continued use of the lot for overflow parking for the adjacent commercial development (primarily the Asheville Pizza and Brewing Company), the continued operation of the North Asheville Farmer's Market, and the recycling collection center. Some improvements are proposed as a part of this application. The recycling collection center will be screened from the street and from adjacent residential uses by a 6-foot wooden fence supplemented by landscaping that would include shrubs and deciduous and evergreen trees. The Planning and Development staff will work with the manager of Farmer's Market prior to the beginning of the 2002 market season to ensure that adequate parking is provided for customers. All other operations and site characteristics would remain unchanged.

Adequate services and facilities are available to meet the needs generated by the proposed uses of the site. Due to the low volume of traffic that would be generated by the uses proposed for the site, no Traffic Impact Analysis was required. A memo regarding the proposed uses on the lot, provided by the City's Traffic Engineer, states (1) None of these uses generate significant amounts of traffic on Long Street itself (except the farmer's market but this is for a short duration once a week); (2) There aren't any issues with traffic congestion on this street; (3) There is a sight distance problem that is not easily fixable at the intersection of Long Street and Edgewood Road. Any increase in traffic exiting Long Street to Edgewood Road will have an incremental affect on this potential safety problem; and (4) The biggest potential problem is the affect of the additional traffic (especially truck traffic associated with the recycling center) on the few residents of the street. The Planning and Zoning Commission and the City Council should be made aware of this potential impact to the residents.

City Council must take formal action as set forth in section 7-5-5(e) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval for conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case [UDO 7-16-2 (c)]. Staff's preliminary opinion, absent the benefit of public input, is that all seven standards appear to be met.

1) That the proposed use or development of the land will not materially endanger the public health or safety.

The proposed uses are using the parking lot for overflow parking for the Asheville Pizza and Brewing Company, location of the North Asheville Farmer's Market, and location of a recycling collection center. All of these uses are currently located on the site. The proposed uses will not materially endanger the public health or safety provided site improvements are made in accordance with an approved site plan. The site is conveniently located for area residents who take advantage of the recycling collection center and of the Farmer's Market. Long Street is approximately 19 feet wide, but the City's Traffic Engineer has confirmed that the proposed uses do not generate significant amounts of traffic and that there are no issues with traffic congestion on the street.

2) That the proposed use is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

The site is currently developed as a paved parking lot. No additional development is proposed. Some landscaping is planned to improve the appearance of the lot and to screen the recycling collection center from adjacent properties. The proposed landscaping will increase the site's compatibility with adjacent properties.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

222

The proposed use will be low impact with no substantive changes to the existing parking lot with the exception of the construction of a 6' wooden fence and the planting of some trees and shrubs to screen the recycling collection center. It is not anticipated that the uses would injure the value of adjoining or abutting property in a substantial way. The uses proposed for the site have been located on the site for a varying numbers of years (overflow parking –approximately 15 years, recycling collection center – approximately 5 years, Farmer's Market – 1 year).

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

As stated above, the proposed use will be low impact with no substantive changes to the existing parking lot other than the buffering and landscaping. The character of the area should not be impacted by the proposed uses.

5) That the proposed use or development of the land will generally conform to the Comprehensive Plan, smart growth policies, sustainable economic development strategic plan, and other official plans adopted by the City.

The Comprehensive Plan indicates commercial and residential uses in this area. The lot is contiguous to an existing Community Business II zoning district. The uses are not addressed in any of the other plans of the City.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

The proposed use is located in an existing developed area. The project has received approval from Engineering and Public Works Departments, who are most impacted by the use of the property.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

A traffic impact analysis is not required for the proposed uses due to the low volume of traffic that is generated by them. The City's Traffic Engineer has reviewed the request and had the following comments:

- None of these uses generate significant amounts of traffic on Long Street itself (except the farmers market but this is for a short duration once a week).
- There aren't any issues with traffic congestion on this street.
- There is a sight distance problem that is not easily fixable at the intersection of Long Street and Edgewood Road. Any increase in traffic exiting Long Street to Edgewood Road will have an incremental affect on this potential safety problem.
- The biggest potential problem is the affect of the additional traffic (especially truck traffic associated with the recycling center) on the few residents of the street. The Planning and Zoning Commission and the City Council should be made aware of this potential impact to the residents.

In summary, the proposed use of the 0.72 acre parking lot is for overflow parking for the adjacent commercial use, location of a recycling collection center, and operation of the North Asheville Farmer's Market. All of these uses are currently located on the site. Use of the property for these purposes in accordance with the site plan and adherence to the conditions recommended for the approval of the Conditional Use Permit for this project would ensure that the impacts on surrounding property owners are mitigated.

The Planning and Zoning Commission reviewed the requested conditional use rezoning and the site plan for the proposed use at their January 2, 2002, meeting. Two persons spoke in opposition to and several persons spoke in support of the requested rezoning or the proposed use during the public hearing held by the Planning and Zoning Commission.

After reviewing the request and the site plans, the Planning and Zoning Commission voted unanimously (6 – 0) to recommend approval of the conditional use rezoning, subject to the conditions identified below.

Based on information available to the Planning and Development Department in advance of this public hearing, staff recommends that the City Council approve the requested conditional use rezoning and issue the Conditional Use Permit with the following conditions:

- The recycling collection center must be screened from adjacent properties and the street as required by the City of Asheville's standards for this use. A site plan meeting City requirements must be submitted and approved for the collection center.
- A zoning permit must be requested by and approved for the North Asheville Farmer's Market. The permit approval must address parking for the market's customers.
- The recycling center operation should be located to the back of the lot if feasible.
- Hours of pickup for recycled materials shall be restricted to the hours of 8:00 a.m. to 7:00 p.m.
- Recycling trucks servicing the center shall access the site through the Asheville Pizza and Brewery property rather than from Long Street.
- Signage shall be provided to encourage parking at Asheville Pizza and Brewery.
- The property owner and/or recycling contractor shall work with the Asheville Sanitation Division to improve cleanliness of the recycling center.

Mr. Shuford asked that Condition No. 5 be amended to read: "Recycling trucks servicing the center shall access the site through the Asheville Pizza and Brewery property rather than from Long Street, if deemed feasible given risk management consideration as determined by the City."

Ms. Hazel Fobes strongly voice support for this rezoning and issuance of a conditional use permit.

There being no request for rebuttal, Mayor Worley closed the public hearing at 7:10 p.m.

Vice-Mayor Bellamy moved to adopt Ordinance No. 2893 to rezone property on Long Street from RM-8 Residential Multi-Family Medium Density District to Community Business 1/Conditional Use. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 402

Councilman Mumpower felt that Condition No. 3 sounds vague. In addition, Councilman Mumpower questioned whether the amended Condition No. 5 needs to be a condition at all.

Mr. Shuford explained that the Planning & Zoning Commission placed Condition No. 5 in there in order to minimize the amount of traffic on Long Street from the recycling trucks. However, after the staff report was written and given to Council, staff realized that there may be concerns about routing the trucks through the private property in that there might have a risk management issue. If Council chooses to delete Condition No. 5, it will probably have the same effect as if Council left it in. With regard to Condition No. 3, the intent was that if the recycling center was located to the southeast corner of the property, it would have less of an effect on surrounding residential property than it would in its current location. That was a suggestion, but it would only be done if it was feasible, given buffering constraints and access constraints by the vehicles.

Upon inquiry of Councilman Ellis, Mr. Shuford said that the Farmer's Market will probably provide the signage.

Councilman Ellis asked if there was any discussion about prohibiting parking on Long Street. Mr. Shuford said that was discussed quite a bit by the Planning & Zoning Commission who saw photographs from Ms. Moon. If the City were to limit or stop parking the street would have to be posted and that could have a negative effect on some residential property that needs to use the street for its parking.

Councilman Ellis moved to adopt Ordinance No. 2894 granting the conditional use permit for property on Long Street with the following conditions: (1) The recycling collection center must be screened from adjacent properties and the street as required by the City of Asheville's standards for this use. A site plan meeting City requirements must be submitted and approved for the collection center; (2) A zoning permit must be requested by and approved for the North Asheville Farmer's Market. The permit approval must address parking for the market's customers; (3) The recycling center operation should be located to the back of the lot if feasible; (4) Hours of pickup for recycled materials shall be restricted to the hours of 8:00 a.m. to 7:00 p.m.; (5) Signage shall be provided to encourage parking at Asheville Pizza and Brewery; and (6) The property owner and/or recycling contractor shall work with the Asheville Sanitation Division to improve cleanliness of the recycling center; and to instruct the City Attorney to prepare the Order for the Mayor's signature. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 404

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 02-17 - RESOLUTION APPOINTING MEMBERS TO THE TREE COMMISSION

Vice-Mayor Bellamy said that this is the consideration of appointing two members to the Tree Commission.

The terms of Margaret Tinkler and Ginger Mahler, as members on the Tree Commission, expired on December 31, 2001. They are both interested in reappointment.

City Council interviewed Mr. Mickey Mahaffee on January 22, 2002. Mr. Mahaffee said that he was not interested in serving on the Tree Commission at this time.

Councilman Peterson moved to reappoint Margaret Tinkler and Ginger Mahler to each serve a three year term respectively, terms to expire December 31, 2004, or until their successors have been appointed. This motion was seconded by Councilman Mumpower and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 58

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of January 4-10, 2002: Dorothy A. Wood (Water), Donnella Boyd (Sanitation), Sue Arakas (Streets), Janice Payne (Streets), Neil Culbertson Jr. (Sanitation), James Barrett (Water), Joann Myers (Sanitation), Matthew Martin (Streets), Roger Young (Sanitation) and Judy Gossett (Streets).

The following claims were received by the City during the period of January 11-17, 2002: Cornelia Reeves (Water), Rick Buckner (Water), Howard Rholetter (Water), Eric Malone (Water), Josh Adams (Water) and William K. Rice (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

A. COMMENTS BY SHARON MARTIN

Ms. Sharon Martin said that views are important, however it's more important that we don't destroy the habitat of our animals. She also urged the Planning staff to encourage developers to set aside affordable housing.

B. COMMENTS BY MICKEY MAHAFFEE

Mr. Mickey Mahaffee, representing Peacemakers, said that panhandling is a serious problem in the City, but that it's not only a policing issue, but a social service issue as well. He encouraged City Council to make sure that they protect the right for people to ask other people for money as long as it's not aggressive and no one is intimidated by the process. In addition he asked Council to look at what is available for most indigent people and what alternatives Asheville has for them. He hoped Council would lean towards tolerance than a heavy hand police presence.

C. COMMENTS BY HAZEL FOBES

Ms. Hazel Fobes felt that City Council can protect our mountain ridges and still have economic development.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:42 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – January 29, 2002
Skyland Volunteer Fire Department
9 Miller Road

7:00 p.m. - Community Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

The following topics were raised by residents and addressed by City Council and City staff: request that when the City is involved with lawsuits that the outcome of the lawsuits be published; timing coordination of traffic lights on Hendersonville Road; speed limit on Hendersonville Road should be reduced to 35 miles per hour; need for crosswalks on Hendersonville Road; billboards should continue to be removed; with the new Urban Village District on Hendersonville Road, there needs to be coordination on the City's and State's part regarding safety on Hendersonville Road; demographics of south Asheville; what is the economic future of south Asheville; recognizing there are 97 neighborhoods off Sweeten Creek Road, will the planning of the widening of Sweeten Creek Road tend toward residents needs or businesses needs and how will the two blend; since Sweeten Creek Road is partly in the County, what is the City's relationship with Buncombe County, the Transportation Advisory Committee, and the Metropolitan Planning Organization; concern that City hired an Cultural Arts Superintendent at $48,000 when they could have hired two police officers; concern of Bele Chere accounting each year and that the figures should be published; request for City to make the Regional Water Authority a true authority so Asheville residents do not have to pay N.C. Dept. of Transportation non-betterment costs; Police Department should have new cars and be paid more; concern over the development of the Urban Village with regard to stormwater control; how can the City's stormwater ordinance be changed from a 10-year storm to a 100-year storm; request that the City continue to fund children programs; and concern that N.C. Dept. of Transportation projects frequently extend many months beyond their deadlines and that has major impacts on the businesses along the project area.

Mayor Worley adjourned the meeting at 8:07 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – February 5, 2002 - 3:00 p.m.

Worksession

Present:	Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson (arrived in meeting at 3:15 p.m.); City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson
Absent:	None

CONSENT:

Driveway Easement Across Youngs Cove Reservoir

Summary: The consideration of a resolution authorizing the Mayor to convey a driveway easement over a portion of the Youngs Cove Reservoir property to Bruce O'Connell.

Youngs Cove Reservoir is located on Mountain Drive, a private road off Youngs Cove Road in the Candler community. Mr. O'Connell owns land on the mountain behind Youngs Cove Reservoir and accesses his property via a driveway that crosses the Youngs Cove Reservoir property. Mr. O'Connell has requested an easement to establish his right to use the driveway across the Reservoir property. The Water Resources Department has indicated that the driveway easement would not interfere with the City's anticipated use of the Reservoir property.

The driveway easement would be 12 feet wide and 202 feet long comprising 2,424 square feet. The easement would run outside the chain link fence, which encloses the above ground tank, crossing the property along and near the northeast property boundary and running in a northwesterly direction from the entrance to the Reservoir property at Mountain Drive.

The Reservoir property contains 35,000 square feet and has a current tax value of $20,800.00. The impact of the easement is that the land within the easement area could not be developed. Generally the value of development rights would be 50% of the value of the portion of the property affected by the relinquishment of those rights. A value for the easement was calculated by applying the per square foot value of the whole to the area of the easement and reducing it by 50%. The calculated value of the easement area is $715.00

Planning Department staff recommends City Council adopt the resolution authorizing conveyance of the driveway easement to Bruce O'Connell for the amount of $715.00.

Contract for Urban Trail Decorative Crosswalks

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Young and McQueen Grading Company Inc. to install imprinted decorative crosswalks located along the Urban Trail in downtown Asheville.

The City is in need of a contractor to imprinted crosswalk installation services for crosswalks along the Urban Trail. In accordance with N.C. Gen. Stat. sec. 143-131, informal bids for crosswalk installation services were solicited and three responses were received. The bidders are listed below:

228

Company	MB Part	Drug Free	Bond	Bid
Young & McQueen Grading Company, Inc	0%	Yes	Yes	$69,000.00
Tarheel Paving, Inc.	0%	Yes	Yes	$92,006.25
Dee Williams & Co. Inc.	100%	Yes	No	$91,062.40

As part of a TEA 21 Grant, 80% of the project funding is reimbursable from the N. C. Dept. of Transportation. The City's 20% match has already been allocated in the Public Works Department's Capital Improvement Project budget.

The Public Works Department staff recommends City Council adopt the resolution to install decorative crosswalks along the Urban Trail.

Mr. David Foster, Project Coordinator, answered various questions from Council with regard to the cost of the decorative crosswalks vs. standard crosswalks.

Lighting System at Roger Farmer Park

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Wise Electric for the installation of ballfield lights at the upper field at Roger Farmer Park.

The City of Asheville Parks and Recreation is continuing to upgrade parks throughout the City of Asheville. One of the parks to be renovated is the Roger Farmer Park in West Asheville where the West Asheville Little League Association conducts practices and games throughout the year. The segment of the renovation of Roger Farmer Park is the installation of new ballfield lights at the upper field of the complex. In order to complete this portion of the project, staff has put out to bid the installation of a turn-key ballfield lighting system. This project is funded by the 1-cent tax appropriation for Parks and Recreation. The lighting system was put out to bid and the lowest responsible bidder was Wise Electric at a cost of $44,500. Wise Electric has complied with all the necessary requirements outlined in the Minority Business Plan.

The Parks and Recreation Department recommends that authorization be given to the City Manager to enter into a contract with Wise Electric to furnish and install the lighting system for the upper field at Roger Farmer Park.

Street Acceptance of St. Davids Court

Summary: The consideration of a resolution accepting St. Davids Court as a public right-of-way and City maintained street.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

St. Davids Court is a newly constructed street servicing building sites for residential structures. The street has been constructed and inspected in accordance with the City of Asheville Standard Specifications and Details Manual. The street is a dead end street that is approximately 500 feet long and has an average width of 21 feet.

Following City Council's approval of this resolution, St. Davids Court will be added to the official Powell Bill list.

Staff request City Council accept St. Davids Court as a public right-of-way and City maintained street.

Financing Purchase of Sanitation Trucks, Roll Carts & Radio Equipment

Summary: The consideration of a resolution authorizing the installment financing of two sanitation trucks, 8,000 roll carts and 150 radios with accessories.

The City of Asheville Capital Improvement Plan 2001/02 to 2006/07includes authorization in Fiscal Year 2001/02 for the installment purchase of two automated side-loader sanitation trucks, 8,000 roll carts (trash cans compatible with the side-loader trucks) and the replacement of aging public safety radios that are no longer maintainable due to obsolete technology and the fact that repair parts are no longer manufactured.

The Finance Department sought proposals from 16 firms to finance the purchase of the above listed equipment purchases. Proposals were received from ten firms, the best of which was submitted by SunTrust Leasing Corporation - - 3.748% interest for four and one half years.

The proposed resolution authorizes an installment purchase contract between the City of Asheville and SunTrust Leasing Corporation for the purchase of the two sanitation trucks, roll carts and public safety radios and authorizes the City Manager, City Attorney, Finance Director and City Clerk to execute and deliver any and all necessary documents.

City staff recommends City Council adopt the resolution.

Finance Director Bill Schaefer answered questions regarding the financing from Councilwoman Jones.

Agreement with the N. C. Dept. of Transportation for Re-Inspection of Bridges

Summary: The consideration of a resolution authorizing the Mayor to enter into a municipal agreement with the N.C. Dept. of Transportation on a bi-annual basis for the reinspection of bridges on the Municipal Street System.

In 1983 the Federal Highway Administration developed the Federal Off-System Bridge Replacement Program. Since the establishment of the program, the City has replaced 18 bridges through the program. The program is funded 80% through federal funds and 20% through City funds and administered by the N. C. Dept of Transportation (NCDOT). To remain eligible for replacement funds and avoid penalties, it is required that all public bridges are inspected every two years. The NCDOT offers three options for meeting the bi-annual inspection requirements – (1) do the inspection with City forces; (2) the City to hire a consultant to do the inspections; and (3) the City to allow NCDOT to do the inspections through a qualified private engineering firm.

Since 1983, the City has elected to execute an agreement with NCDOT to accomplish the required inspection through their personnel or engineering consultants. This process allows high numbers of bridges to be inspected under one contract or operation, and therefore, results in minimum inspection cost per bridge. The NCDOT representatives anticipate the inspection costs to be $2,400 per bridge for the upcoming inspection. The City has 25 bridges in need of inspection this year, which would bring the cost to $60,000. The City's share of 20% is $12,000. Funds for the City's share are budgeted in the Public Work's Bridge Maintenance line item.

The Public Works Department, Bridge Maintenance Division staff, recommends adoption of the resolution authorizing the Mayor to execute a municipal agreement with the NCDOT for inspection of bridges.

Mr. David Foster, Project Coordinator, answered various questions from Council with regard to bridge inspections.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

RESTRUCTURE AND INCREASE PENALTIES FOR ANIMAL CONTROL VIOLATIONS

Police Administrative Services Manager Alan Hyder said that this is the consideration of an ordinance to restructure and increase penalties for animal control violations.

The current penalty for animal control violations is $10.00 for the first offense; $20.00 for the second offense within 12 months of the first; and succeeding offenses within 12 months of a prior offense result in increased penalties in $10.00 increments per offense. Penalties of these amounts have proven ineffective in promoting voluntary compliance with animal control regulations. In addition, collection of penalties is a problem because of the costs of collecting delinquent penalties exceeds the value of the revenue.

It is proposed that the penalties be increased as follows:

- First offense --$50.00
- Second offense within 12 months -----------------$100.00
- Third offense within 12 months--------------------$150.00
- Succeeding offenses within 12 months result in increased penalties in $50.00 increments per offense. (For example the third offense within 12 months would carry a $200.00 penalty; the fourth would carry a $250.00 penalty, and so on.)
- Unpaid penalties would be declared delinquent after the 15th day from the issuance of the citation and thereafter for each additional seven-day period of delinquency.
- Delinquency fee-------$50.00.

It is believed this structure will increase the collection of penalties and, in the long run, promote citizen voluntary compliance with animal control regulations.

City staff recommends Council adopt the ordinance.

Several Council members expressed concern that the delinquency periods were too short, and it was the consensus of Council to declare unpaid penalties delinquent after 30 days from the issuance of the citation and thereafter for each additional 30-day period of delinquency.

Upon inquiry of Vice-Mayor Bellamy, Mr. Hyder explained the some different kind of violations of this ordinance.

Mr. Hyder explained that there are approximately 150 unpaid citations now and if Council increases these violations, it will make staff's efforts to collect the fines worthwhile.

Mr. Hyder explained the violation process as requested by Councilman Mumpower and explained that there is an Animal Control Appeals Board.

When Councilman Mumpower asked about a ceiling of the delinquency fee, Mr. Hyder said that there is a cap of $500 and the ordinance would be amended to reflect that amount.

Councilwoman Jones suggested that the first offense be either a $50 fine or a document stating that the dog has been spayed or neutered. City Attorney Oast said that is something staff can look at, but felt it may be difficult administratively to enforce.

There was a brief discussion on how the citizens would be notified of this change and ways in which City residents can be notified that a license is required for dog owners in the City.

Upon inquiry of Councilman Dunn about where the additional revenue would go, City Manager Westbrook explained that the City has a contract with the Asheville Humane Society which is a non-profit organization.

It was the consensus of City Council to send this issue back to staff to address the concerns and issues raised by Council at this meeting and to bring it back to another worksession.

REQUEST TO RENAME PORTION OF I-26 "MORRIS L. MCGOUGH FREEWAY"

Mr. Dan Baechtold, Metropolitan Planning Organization Coordinator, said that this is the consideration of a resolution supporting the designation of a section of I-26 in Buncombe County as the "Morris L. (Mac) McGough Freeway."

The Western North Carolina Highway Corridors Association would like to name a portion of future I-26 in Buncombe County in honor of Mac McGough. The designation would cover the portion of US 19-23 (future I-26) from the Madison County line to I-240 in Asheville. The N. C. Dept. of Transportation Division 13 Office is coordinating the effort to make the designation. The Division 13 Office is asking local governments along the path of future I-26 for resolutions in support of the designation.

Mr. McGough has earned the title of "Father of Community Development in Western North Carolina" and has been active in community development issues for over 50 years. He was instrumental in organizing groups to advocate for construction of I-26 in Buncombe and Madison Counties.

The resolution supports the designation requested by WNC Highway Corridors Association. Similar resolutions have been adopted by the Buncombe County Board of Commissioners, the Town of Woodfin, and the Town of Weaverville. These local governments, along with the City of Asheville are all along the path of future I-26 in Buncombe County.

The Division 13 Office will forward the resolutions to the Board of Transportation, the Secretary of the Department of Transportation, and the Governor's Office for appropriate action in making the designation.

City staff recommends City Council adopt the resolution.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

CRIMINAL JUSTICE INFORMATION SYSTEM INTERLOCAL AGREEMENT

Finance Director Bill Schaefer said that this is the consideration of a resolution authorizing the City Manager to execute an interlocal agreement between the City of Asheville and the County of Buncombe for the acquisition and operation of a multi-jurisdictional Criminal Justice Information System (CJIS).

In 1995, the City and County entered into the original CJIS Interlocal Agreement to *develop* and operate the initial multi-jurisdictional criminal justice information system. Due to the challenges of *developing* unique capabilities that proved beyond the capabilities of the contractor on the initial CJIS, not all of the originally envisioned system capabilities were achieved.

However, the portions that were successfully fielded are in operation today supporting such functions as: mug shots, master name index, law enforcement records, warrants & arrest, computer aided dispatch and jail management. The initial CJIS, as with virtually all seven-year-old computer systems, has grown obsolete and unsupportable and should be replaced with a more functional and efficient state-of-the-art system.

Over the past two years, City and County staff have jointly worked to define the needed capabilities and select a source for the successor CJIS system. Among the guiding criteria for the acquisition was that the system *not require a development* effort and that it currently be in operation in a multi-jurisdictional environment - -an off-the-shelf, field-proven system. After evaluation of several vendor's products, Open Software Solutions Inc (OSSI) has been selected to provide the system. Buncombe County anticipates entering into a contract with OSSI to provide CJIS for both the City and County as soon as the supporting CJIS Interlocal Agreement is approved by City Council and the County Commission. The terms of the contract with OSSI will define capabilities, cost and implementation schedule for CJIS and be used as the benchmark for assessment of the program.

Terms of the proposed CJIS Interlocal Agreement include:

a. Effective Date/Duration: Effective upon approval by City Council and County Commission for five years with provisions for automatic one-year extensions unless either party gives notice of their intent to terminate (Buncombe County Commissioners approved the Agreement on October 9, 2001);

b. Management: Day-to-day program management by the CJIS Project Manager – a County staff member – under the supervision of the County Information Technology Director. The City contact will be the Finance Director. Any issues that cannot be resolved by the County Information Technology Director and City Finance Director will be forwarded to the City and County Managers for resolution.

c. Implementation Schedule: Over the next two years as provided in the OSSI contract.

d. Users Group: Key users of CJIS and program management staff from the City and County will be included in a users group to ensure that the system is successfully implemented and goals of the program are achieved. City members of the users group are the Police Chief, Fire Chief and Finance Director.

e. Funding: The City will reimburse Buncombe County quarterly for 45% of the cost of: CJIS debt service; CJIS direct operating costs; and Central Data Entry direct operating costs. Both the City and County will seek any potential grant funding for CJIS. Grants received by either party will offset costs for both in the ratio of overall cost sharing (55% County/45% City).

City staff recommends City Council adopt the resolution which authorizes the City Manager to execute the CJIS Interlocal Agreement.

Lieutenant David Rutledge said that CJIS is comprised of the Buncombe County Sheriff's Department, Buncombe County Emergency Operations, Asheville Police Department, Asheville Fire Department, 28th Judicial District Magistrate's Court, 28th Judicial District Attorney's Office and the City-County Identification Bureau.

Lieutenant Rutledge said that CJIS has existed since 1979. This selection process involves the fourth generation of CJIS application and software. The level of cooperation among the CJIS members is unlike any we have found nationwide. Most software is not written to take advantage of the information sharing and inter-agency cooperation that is CJIS's strength.

He then explained the search process in that CJIS staff and user agencies developed a detailed Request for Information that was sent to a number of vendors. Then CJIS users attended product demonstrations and question sessions presented by vendors and conducted in-dept product interviews. Based on this review, OSSI, far more than any other vendor, met most of the CJIS requirements.

He provided the following information on OSSI (1) they are North Carolina based (home offices in Greensboro) with 101 public safety customers; and (2) 53 of the 101 public safety customers are in North Carolina and they represent a wide mix of agency sizes. He said some of their North Carolina customer base includes Burlington Police, Chapel Hill Police, Wilmington Police, Winston-Salem Police, Cumberland County Sheriff, Guilford County EMS, High Point Police and Fire, New Hanover County Sheriff and Salisbury Police and Fire. He said after contacting OSSI customer references they found that OSSI's references were almost uniformly favorable and users stated that OSSI has a "a solid, proven product."

Mr. Schaefer and Lieutenant Rutledge then answered various questions from Council, some being, but are not limited to: how was the cost-sharing arrived at, does the City anticipate any problems with follow-through on the delivery of services, how is the City going to pay for CJIS, how does the operational cost of the new system compare to the old system, does the system allow access to the NC Division of Criminal Information and also the National Crime Information Center maintained by the FBI, are there are additional hardware costs, are there plans to interface with other City departments, how does the system actually work and will be City be looking for any more grants.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

MISCELLANEOUS ITEMS

At the suggestion of City Manager Westbrook, it was the consensus of City Council to move the formal meeting of Tuesday, March 12, 2002, to Wednesday, March 13, 2002, due to a number of City Council members attending the National League of Cities conference in Washington, D.C.

At the request of Vice-Mayor Bellamy, it was the consensus of City Council to make the following board appointments on February 26, 2002, due to the anticipated length of the February 12, 2002, formal meeting: Board of Adjustment, Community Relations Council, Fair Housing Commission, and Transit Commission.

At the suggestion of Councilman Peterson, it was the consensus of City Council to put on an upcoming worksession agenda the possibility of appointing a citizen committee to look at the reform of City elections, e.g. campaign finance reform, City partial funding, terms of the election to avoid the situation which arose on December 4, 2002, when a Council member was elected Mayor and City Council had to appoint a 7th member, etc.. Councilman Peterson suggested each Council member have two names of people they wish to be on this committee. At the worksession, Council can discuss the scope of the committee.

Councilman Mumpower said that report from Heery International on the Civic Center will not be presented to City Council until March 19, 2002. Therefore, at the suggestion of Councilman Mumpower it was the consensus of City Council to hear an update from City staff on events at the Civic Center (especially basketball and hockey) since we are half-way through the season. Items to be included in said update might consist of attendance at the events, revenues, expenditures, foreseeable problems, concession sales, etc.

234

At 4:55 p.m., Vice-Mayor Bellamy moved to go into closed session (1) to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including proceedings involving the following parties: Dennis Morgan and the City of Asheville - G.S. 143-318.11(a)(3); (2) to prevent the disclosure of information that is confidential pursuant to G.S. 160A-168, the Personnel Privacy Act - G.S. 143-318.11(a)(2); and (3) to establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease - G.S. 143-318.11(a)(5). This motion was seconded by Councilman Mumpower and carried unanimously. At 5:34 p.m., Councilman Ellis moved to go out of closed session. This motion was seconded by Councilman Dunn and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 5:34 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Friday – February 8, 2002
Saturday – February 9, 2002
City Council Annual Retreat Pine Crest Inn, Tryon, N.C.

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Friday, February 8, 2002

State Budget Reduction- City Manager Westbrook said that as a result of Governor Easley's reduction of the state's fiscal year, the City will have a total revenue shortfall of $3,022,689. He recommended the following budget reductions: street paving contract - $600,000; New Haw Creek sidewalk - $190,000; stormwater study - $90,000; general sidewalks - $50,000; traffic calming - $100,000; Summer Youth Program - $50,000; Civic Center repairs - $75,000; travel/training - $50,000; outside agency contributions - $217,000; Roger K. Farmer park project - $75,000; Dr. Martin Luther King Jr. Park turf renovations - $50,000; Walton Street playground - $75,000; Broadway Greenway Master Plan - $100,000; Burton Street Recreation Center - $50,000; Neighborhood Grant Program/Asheville Honors - $15,000; small capital equipment - $65,000; vehicles - $60,689; contracted/professional services/maintenance - $500,000; operating materials - $250,000; Parking Services Fund transfer - $170,000; and positions - $190,000. He stated that the next step would have to be a direction reduction of services for the City.

City Manager Westbrook responded to questions like who makes the decision on what gets added back into the budget if revenue is received and has the City Manager looked at a one percent reduction of salaries. Should the City receive some state funding prior to the end of the end of the fiscal year, the City Manager would return to Council with recommended spending for that funding.

Councilman Ellis asked that the City coordinate with Buncombe County any outside agency funding cuts. He was concerned that if the City and the County reduce funding, it may cause agencies to go out of business.

Vice-Mayor Bellamy asked for more information on where cuts would be made because we need to make sure that some cuts are not linked to other funding.

Fiscal Year 2002-03 General Fund Budget Forecast - City Council heard a summary of major General Fund revenues from Budget Director Ben Durant. Revenue categories included property tax; sales tax; intergovernmental revenue; licenses and permits; and investment earnings. He pointed out that as a result of re-engineering, the City has saved $481,485. Funding issues for Fiscal Year 2002-03 include: Fire Station 6 construction $2,000,000; topography mapping - $750,000; Fire Station 10 land purchase - $250,000; traffic signal upgrades $500,000; sidewalks on Hendersonville Road - $250,000; streetscape improvements (Charlotte Street) - $450,000; additional 1% for 401-K - $400,000; and additional equipment/vehicles purchases - $2,000.000

Economic Development – Director of Economic Development Mac Williams briefed City Council on the City's current policies and incentives; current conditions/trends; the Sustainable Economic Development Plan; and how the Plan has been implemented. His outlined his recommendations in the future to include (1) build/enhance community quality of place; (2) aggressive, pro-active urban redevelopment; and (3) continuous improvement of the development process.

Councilman Mumpower felt the City should see first what they can do to improve the existing quality of place before spending the time, energy and money on future enhancements.

Vice-Mayor Bellamy urged City staff to work with developers and businesses on cost-sharing.

Councilman Ellis was interested in seeing the City identify property that could be developed for affordable housing.

It was the consensus of City Council to instruct the City to proceed with developing plans and strategies to redevelop property within the City limits for commercial/industrial sites. This may include public/private partnerships or possibly the City being the developer.

Affordable Housing – Planning & Development Director Scott Shuford reviewed with Council affordable housing issues. He noted that Asheville has the most expensive housing in the State. He outlined the different available resources available through the government, private non-profit and private for-profit agencies. He then reviewed the funding sources and control by the City, state and federal governments. Challenges regarding affordable housing include the declining federal funding, increased land and house prices, limited amount of multi-family zoned land, "not in my backyard" opposition to affordable housing, and very low income rental is difficult. New development already started include the increased private developer involvement, the City's Housing Trust Fund, the Employer Assisted Homeownership, and the homebuyer assistance through individual development accounts. Future developments include a increased price ceiling for fee rebates, mixed income (inclusionary zoning), and smart growth initiatives to include (1) mixed use projects, housing and retail development nodes and increased diversity of development types.

Stormwater Regulations - City Engineer Cathy Ball updated City Council on the status of the development of the City's stormwater program, which must be submitted to the State on or before March 2003. The program must describe how the City will attempt to meet six minimum requirements: (1) Public Education/Outreach; (2) Public Participation/Involvement; (3) Illegal/Illicit Discharge Detection and Elimination; (4) Construction Site Runoff Construction; (5) Post-Construction Runoff Control; and (6) Pollution Prevention/Good Housekeeping Measures. She pointed out that (1) preliminary estimates for the minimum program would be approximately $150,000 to $200,000 annually, depending on the State's final rule; (2) in Fiscal Year 2001-02, the City budgeted approximately $930,000 on stormwater related tasks, including staff, equipment and materials; (3) in Fiscal Year 2001-02, the City estimated that they would receive $95,000 in revenues from stormwater and erosion control permits; and (4) the current net spending is approximately $835,000. Ways to fund the program include general property taxes, sales tax, service districts, impact fees, increased permit fees, or a stormwater utility. She explained that a stormwater utility is (1) an enterprise fund that functions much like other utilities; (2) fees are calculated based upon impervious area; (3) fees are applied to all properties, taxable and non-taxable; and (4) fees are added onto the water bill much like sewer fees. The communities of Greensboro, Winston-Salem, Fayetteville/Cumberland County, Durham, Charlotte/Mecklenburg County and Wilmington have instituted a stormwater utility.

Discussion surrounded the need for a tier system based upon how much a person contributes to the problem.

Councilman Mumpower stressed the need to make sure that City Council voices their concerns to the state or federal government when unfunded mandates are passed down to local governments.

It was the consensus of Council to begin developing a stormwater utility and that there be a 10-20 person City Manager's Task Force to include developers, property owners, engineers, City staff, and the environmental community in order to develop the framework of a stormwater utility. Council also asked that a City Council liaison be appointed to this Task Force. The City Manager was directed to make recommendations to establish the utility as part of the Fiscal Year 2003-04 budget process.

Saturday, February 9, 2002

Legislative Issues - City Attorney Oast gave City Council a brief synopsis of the City's legislative efforts: (1) red light cameras; (2) nonbetterment waterline relocation expenses; (3) local revenue ability; (4) force account suspension and (5) annexation/ extraterritorial jurisdiction moratorium. He reviewed provided City Council with a brief summary of statewide legislation of interest to municipalities in general: (1) Senate Bill 1005 (State budget); (2) State Bill 914 (Public Construction Law Changes); (3) House Bill 1169 (Amend Local Government Purchasing Laws); (4) House Bill 115 (Public Conflicts of Interest); (5) Senate Bill 774 (Public Enterprise Customer Billing Privacy); (6) House Bill 998 (State Privacy Act); (7) Senate Bill 885 (Unsafe Buildings); (8) Senate Bill 352 (Extend Lien for Public Health Nuisance); (9) Senate Bill 1014 (Strengthen Littering Laws); (10) Traffic stop statistics; and (11) House Bill 948 (ABC Licenses/ Redevelopment Areas). Things to watch for include (1) Smart Growth legislation; (2) Continuing fiscal situation; and (3) Mandate county zoning. He also reviewed with Council some possibilities: (1) implementation of planning recommendations; (2) nonbetterment relocation costs reimbursement; (3) red light cameras; (4) local revenue ability; and (5) towing from private parking lots.

Councilwoman Jones stressed how important it is for City Council members to contact our local legislation via phone, letters, meetings, or social gatherings.

At the request of Vice-Mayor Bellamy, it was the consensus of City Council to request the local delegation to change legislation to reduce the Housing Authority members terms from five years to three years.

At the direction of Council, City Manager Westbrook said that he would arrange a meeting with our local delegation prior to the start of the General Assembly's short session.

Asheville Police Department - Police Chief Will Annarino reviewed with City Council his personnel, their educational levels, his budget, and a survey of 2001 crime comparisons. He explained their efforts with community resource centers. Accomplishments for his department include being nationally accredited through the CALEA, winner of the prestigious IACP Community Policing Award, education, Police Corps, Wellness Program, reduced crime rate and $324,000 through five state/federal grants. In the future he hopes to work toward (1) automation (CJIS and a paperless department); (2) assigned fleet; (3) service delivery (enhanced districts and staffing evaluation); (4) Downtown Business District (maintaining adequate service levels in a dynamic and growing Central Business District; (5) continued ordinance review and enhancement; and (6) continued employee professionalism (education and compensation).

Update on the Development Review Process - Building Safety Director Terry Summary reviewed with Council the following perception issues: faster to build in the County, easier to build in the County, costs less to build in the County, retribution, varying interpretations, regulatory process slows growth and not business friendly. Industry perceptions include: a cumbersome system; a difficult and inflexible Unified Development Ordinance (UDO), conflict between codes, negative image of developers, and inconsistent levels of understanding of the process. He then pointed out the departments/agencies involved in the development process, and state codes and local regulations that need to be reviewed. He then reviewed in detail the following ten strategic action recommendations arrived at by the Sustainable Economic Development's Development Process Team, along with the successes of each action step and their remaining tasks: (1) streamline the process by eliminating/combining steps; (2) advocate changes in the UDO (reformat content and presentation of publication, add flexibility) and adopt mission statement, guiding principles and goals; (3) establish a "common sense" culture among staff and commissions; (4) restructure some processes to provide for "communication" among parties earlier in the process; (5) eliminate to the extent possible conflicts between ordinances, standards and codes; (6) improve permit coordination with "outside agencies;" (7) create more effective education/informational tools (checklists, guides, etc.); (8) strengthen communication between City and industry (development forums); (9) employ technology when and where practical for both City and industry; and (10) encourage density via performance based standards and ordinances. He reviewed the following three staff tasks to be done: (1) continue efforts to streamline the processes and enhance the operations of the Permit Center; (2) implement the enforcement of the new International Codes and the Pilot of the New Jersey Rehab Code; and (3) additional computerization.

Planning & Development Director Scott Shuford reviewed with Council in detail the following: (1) streamline the UDO process (Level III reviews; eliminate repetition of technical and statutory language); (2) revamp or eliminate the Planned Unit Development review process; (3) streamline the Technical Review Committee process (less formal; improve on-site public notification); (4) reassign certain conditional use permit reviews; (5) reformat UDO (more user friendly); (6) increase size of Level I reviews for residential projects; (7) complete Comprehensive Plan update; (8) update Downtown Fire District to be consistent with the International Code; (9) Housing Code revisions; and (10) affordable housing fee rebates.

It was the consensus of City Council to instruct staff to proceed with the ten items Mr. Shuford outlined above with regard to updating various codes and growth management policies.

City Council Goals

After each member of City Council stated their goals and their reasons why their goals were important, City Council tentatively agreed upon the following Fiscal Year 2002-03 Goals:

Regulatory Programs:
1) Affordable Housing – promotion and standards
2) Development review – streaming

Fiscal Responsibility:
1) Re-Engineering
2) Incentives for employees to live in Asheville

Transportation:
1) Streets and sidewalks (basic infrastructure)
2) Transit

Public Safety & Health:
1) Improve support for police and fire
2) Drug Problem

Public Relations:
1) Regional cooperation with focus on Buncombe County & local delegation
2) Perception about affordable housing (Housing Authority oversight strengthened)

239

It was the consensus of City Council to also strongly support the issues of education, campaign finance reform, air quality and I-26 Connector.

City Manager Westbrook said that after Council's tentative goals are edited and summarized, he will bring them back to Council at an upcoming worksession for final approval.

Mayor Worley adjourned the meeting at 4:30 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – February 12, 2002 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Councilman Dunn gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING FEBRUARY 12, 2002, AS "JUNIOR LEAGUE OF ASHEVILLE DAY"

Mayor Worley read the proclamation proclaiming February 12, 2002, as "Junior League of Asheville Day" in the City of Asheville. He presented the proclamation to Ms. Julia Heinitsh, President of the Junior League, who briefed City Council on some activities taking place during the day.

B. PROCLAMATION PROCLAIMING FEBRUARY OF 2002, AS "BLACK HISTORY MONTH" IN THE CITY OF ASHEVILLE

Vice-Mayor Bellamy read the proclamation proclaiming February of 2002, as "Black History Month" in the City of Asheville.

C. RECOGNITION OF CITY CLERK MAGDALEN BURLESON

Mayor Worley recognized City Clerk Magdalen Burleson on acceptance into the First Level of the Master Municipal Clerk Academy Program of the International Institute of Municipal Clerks.

II. CONSENT AGENDA:

Mayor Worley announced that Consent Agenda Items "F" and "K" have been removed from City Council consideration due to State budget cuts.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JANUARY 22, 2002; THE COMMUNITY MEETING ON JANUARY 29, 2002; AND THE WORKSESSION HELD ON FEBRUARY 5, 2002

B. RESOLUTION NO. 02-18 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT THE BID FOR PROPERTY ON CHOCTAW STREET (TRACT 2) IN THE EAST RIVERSIDE REDEVELOPMENT PROJECT

Summary: The consideration of a resolution authorizing the Mayor to convey property on Choctaw Street in the East Riverside Redevelopment Project to Tilman and Sabrina Jackson in the amount of $11,800.

On January 22, 2002, the City Council directed the City Clerk to advertise for upset bids on Choctaw Street, Tract 2. The advertisement ran in the Asheville Citizen-Times on January 25, 2002, as provided in N. C. Gen. Stat. sec. 160A-269. No response was received. Therefore, the offer to purchase from Tilman and Sabrina Jackson in the amount of $11,800 was not upset and the sale to Tilman and Sabrina Jackson should be approved.

Community Development staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE 59

C. RESOLUTION NO. 02-19 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY A DRIVEWAY EASEMENT OVER A PORTION OF THE YOUNGS COVE RESERVOIR PROPERTY TO BRUCE O'CONNELL

Summary: The consideration of a resolution authorizing the Mayor to convey a driveway easement over a portion of the Youngs Cove Reservoir property to Bruce O'Connell.

Youngs Cove Reservoir is located on Mountain Drive, a private road off Youngs Cove Road in the Candler community. Mr. O'Connell owns land on the mountain behind Youngs Cove Reservoir and accesses his property via a driveway that crosses the Youngs Cove Reservoir property. Mr. O'Connell has requested an easement to establish his right to use the driveway across the Reservoir property. The Water Resources Department has indicated that the driveway easement would not interfere with the City's anticipated use of the Reservoir property.

The driveway easement would be 12 feet wide and 202 feet long comprising 2,424 square feet. The easement would run outside the chain link fence, which encloses the above ground tank, crossing the property along and near the northeast property boundary and running in a northwesterly direction from the entrance to the Reservoir property at Mountain Drive.

The Reservoir property contains 35,000 square feet and has a current tax value of $20,800.00. The impact of the easement is that the land within the easement area could not be developed. Generally the value of development rights would be 50% of the value of the portion of the property affected by the relinquishment of those rights. A value for the easement was calculated by applying the per square foot value of the whole to the area of the easement and reducing it by 50%. The calculated value of the easement area is $715.00

Planning Department staff recommends City Council adopt the resolution authorizing conveyance of the driveway easement to Bruce O'Connell for the amount of $715.00.

RESOLUTION BOOK NO. 27 – PAGE 60

D. RESOLUTION NO. 02-20 - RESOLUTION SUPPORTING THE NAMING OF A PORTION OF I-26 FROM MADISON COUNTY TO ITS INTERSECTION WITH I-240 "MORRIS L. MCGOUGH FREEWAY"

Summary: The consideration of a resolution supporting the designation of a section of I-26 in Buncombe County as the "Morris L. (Mac) McGough Freeway."

The Western North Carolina Highway Corridors Association would like to name a portion of future I-26 in Buncombe County in honor of Mac McGough. The designation would cover the portion of US 19-23 (future I-26) from the Madison County line to I-240 in Asheville. The N. C. Dept. of Transportation Division 13 Office is coordinating the effort to make the designation. The Division 13 Office is asking local governments along the path of future I-26 for resolutions in support of the designation.

Mr. McGough has earned the title of "Father of Community Development in Western North Carolina" and has been active in community development issues for over 50 years. He was instrumental in organizing groups to advocate for construction of I-26 in Buncombe and Madison Counties.

The resolution supports the designation requested by WNC Highway Corridors Association. Similar resolutions have been adopted by the Buncombe County Board of Commissioners, the Town of Woodfin, and the Town of Weaverville. These local governments, along with the City of Asheville are all along the path of future I-26 in Buncombe County.

The Division 13 Office will forward the resolutions to the Board of Transportation, the Secretary of the Department of Transportation, and the Governor's Office for appropriate action in making the designation.

City staff recommends City Council adopt the resolution.

RESOLUTION BOOK NO. 27 – PAGE 61

E. RESOLUTION NO. 02-21 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH YOUNG AND MCQUEEN GRADING CO. INC. TO INSTALL DECORATIVE CROSSWALKS ALONG THE URBAN TRAIL

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Young and McQueen Grading Company Inc. to install imprinted decorative crosswalks located along the Urban Trail in downtown Asheville.

The City is in need of a contractor to imprinted crosswalk installation services for crosswalks along the Urban Trail. In accordance with N.C. Gen. Stat. sec. 143-131, informal bids for crosswalk installation services were solicited and three responses were received. The bidders are listed below:

Company	MB Part	Drug Free	Bond	Bid
Young & McQueen Grading Company, Inc	0%	Yes	Yes	$69,000.00
Tarheel Paving, Inc.	0%	Yes	Yes	$92,006.25
Dee Williams & Co. Inc.	100%	Yes	No	$91,062.40

As part of a TEA 21 Grant, 80% of the project funding is reimbursable from the N. C. Dept. of Transportation. The City's 20% match has already been allocated in the Public Works Department's Capital Improvement Project budget.

The Public Works Department staff recommends City Council adopt the resolution to install decorative crosswalks along the Urban Trail.

243

RESOLUTION BOOK NO. 27 – PAGE 62

F. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH WISE ELECTRIC TO FURNISH AND INSTALL THE LIGHTING SYSTEM FOR THE UPPER FIELD AT ROGER FARMER PARK

This item was deleted from City Council consideration due to State budget cuts.

G. RESOLUTION NO. 02-22 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT ST. DAVIDS COURT AS A PUBLIC RIGHT-OF-WAY AND PUBLICLY MAINTAINED STREET

Summary: The consideration of a resolution accepting St. Davids Court as a public right-of-way and City maintained street.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

St. Davids Court is a newly constructed street servicing building sites for residential structures. The street has been constructed and inspected in accordance with the City of Asheville Standard Specifications and Details Manual. The street is a dead end street that is approximately 500 feet long and has an average width of 21 feet.

Following City Council's approval of this resolution, St. Davids Court will be added to the official Powell Bill list.

Staff request City Council accept St. Davids Court as a public right-of-way and City maintained street.

RESOLUTION BOOK NO. 27 – PAGE 63

H. RESOLUTION NO. 02-23 - RESOLUTION SETTING A PUBLIC HEARING ON FEBRUARY 26, 2002, TO CONSIDER THE VOLUNTARY ANNEXATION OF 2270 HENDERSONVILLE ROAD KNOWN AS ARDEN SQUARE SHOPPING CENTER

RESOLUTION BOOK NO. 27 – PAGE 64

I. RESOLUTION NO. 02-24 - RESOLUTION AUTHORIZING AN INSTALLMENT PURCHASE CONTRACT WITH SUNTRUST LEASING CORPORATION TO FINANCE THE ACQUISITION OF TWO SANITATION TRUCKS, 8,000 ROLL CARTS AND RADIO EQUIPMENT

Summary: The consideration of a resolution authorizing the installment financing of two sanitation trucks, 8,000 roll carts and 150 radios with accessories.

The City of Asheville Capital Improvement Plan 2001/02 to 2006/07includes authorization in Fiscal Year 2001/02 for the installment purchase of two automated side-loader sanitation trucks, 8,000 roll carts (trash cans compatible with the side-loader trucks) and the replacement of aging public safety radios that are no longer maintainable due to obsolete technology and the fact that repair parts are no longer manufactured.

The Finance Department sought proposals from 16 firms to finance the purchase of the above listed equipment purchases. Proposals were received from ten firms, the best of which was submitted by SunTrust Leasing Corporation - - 3.748% interest for four and one half years.

The proposed resolution authorizes an installment purchase contract between the City of Asheville and SunTrust Leasing Corporation for the purchase of the two sanitation trucks, roll carts and public safety radios and authorizes the City Manager, City Attorney, Finance Director and City Clerk to execute and deliver any and all necessary documents.

City staff recommends City Council adopt the resolution.

RESOLUTION BOOK NO. 27 – PAGE 65

J. RESOLUTION NO. 02-25 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR INSPECTION OF BRIDGES ON THE MUNICIPAL STREET SYSTEM

Summary: The consideration of a resolution authorizing the Mayor to enter into a municipal agreement with the N.C. Dept. of Transportation on a bi-annual basis for the reinspection of bridges on the Municipal Street System.

In 1983 the Federal Highway Administration developed the Federal Off-System Bridge Replacement Program. Since the establishment of the program, the City has replaced 18 bridges through the program. The program is funded 80% through federal funds and 20% through City funds and administered by the N. C. Dept of Transportation (NCDOT). To remain eligible for replacement funds and avoid penalties, it is required that all public bridges are inspected every two years. The NCDOT offers three options for meeting the bi-annual inspection requirements – (1) do the inspection with City forces; (2) the City to hire a consultant to do the inspections; and (3) the City to allow NCDOT to do the inspections through a qualified private engineering firm.

Since 1983, the City has elected to execute an agreement with NCDOT to accomplish the required inspection through their personnel or engineering consultants. This process allows high numbers of bridges to be inspected under one contract or operation, and therefore, results in minimum inspection cost per bridge. The NCDOT representatives anticipate the inspection costs to be $2,400 per bridge for the upcoming inspection. The City has 25 bridges in need of inspection this year, which would bring the cost to $60,000. The City's share of 20% is $12,000. Funds for the City's share are budgeted in the Public Work's Bridge Maintenance line item.

The Public Works Department, Bridge Maintenance Division staff, recommends adoption of the resolution authorizing the Mayor to execute a municipal agreement with the NCDOT for inspection of bridges.

RESOLUTION BOOK NO. 27 – PAGE 67

K. RESOLUTION RESCHEDULING THE TUESDAY, MARCH 12, 2002, CITY COUNCIL FORMAL MEETING UNTIL WEDNESDAY, MARCH 13, 2002, AT 5:00 P.M. IN THE COUNCIL CHAMBER OF THE CITY HALL BUILDING

This item was deleted from City Council consideration due to State budget cuts.

L. RESOLUTION NO. 02-26 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN INTERLOCAL AGREEMENT BETWEEN THE CITY OF ASHEVILLE AND COUNTY OF BUNCOMBE FOR THE PURPOSE OF ACQUIRING AND OPERATING A CRIMINAL JUSTICE INFORMATION SYSTEM

Summary: The consideration of a resolution authorizing the City Manager to execute an interlocal agreement between the City of Asheville and the County of Buncombe for the acquisition and operation of a multi-jurisdictional Criminal Justice Information System (CJIS).

In 1995, the City and County entered into the original CJIS Interlocal Agreement to *develop* and operate the initial multi-jurisdictional criminal justice information system. Due to the challenges of *developing* unique capabilities that proved beyond the capabilities of the contractor on the initial CJIS, not all of the originally envisioned system capabilities were achieved. However, the portions that were successfully fielded are in operation today supporting such functions as: mug shots, master name index, law enforcement records, warrants & arrest, computer aided dispatch and jail management. The initial CJIS, as with virtually all seven-year-old computer systems, has grown obsolete and unsupportable and should be replaced with a more functional and efficient state-of-the-art system.

Over the past two years, City and County staff have jointly worked to define the needed capabilities and select a source for the successor CJIS system. Among the guiding criteria for the acquisition was that the system *not require a development* effort and that it currently be in operation in a multi-jurisdictional environment - -an off-the-shelf, field-proven system. After evaluation of several vendor's products, OSSI has been selected to provide the system. Buncombe County anticipates entering into a contract with OSSI to provide CJIS for both the City and County as soon as the supporting CJIS Interlocal Agreement is approved by City Council and the County Commission. The terms of the contract with OSSI will define capabilities, cost and implementation schedule for CJIS and be used as the benchmark for assessment of the program.

Terms of the proposed CJIS Interlocal Agreement include:

a. Effective Date/Duration: Effective upon approval by City Council and County Commission for five years with provisions for automatic one-year extensions unless either party gives notice of their intent to terminate (Buncombe County Commissioners signed the Agreement on October 9, 2001);
b. Management: Day-to-day program management by the CJIS Project Manager – a County staff member – under the supervision of the County Information Technology Director. The City contact will be the Finance Director. Any issues that can not be resolved by the County Information Technology Director and City Finance Director will be forwarded to the City and County Managers for resolution.
c. Implementation Schedule: Over the next two years as provided in the OSSI contract.
d. Users Group: Key users of CJIS and program management staff from the City and County will be included in a users group to ensure that the system is successfully implemented and goals of the program are achieved. City members of the users group are the Police Chief, Fire Chief and Finance Director.
e. Funding: The City will reimburse Buncombe County quarterly for 45% of the cost of: CJIS debt service; CJIS direct operating costs; and Central Data Entry direct operating costs. Both the City and County will seek any potential grant funding for CJIS. Grants received by either party will offset costs for both in the ratio of overall cost sharing (55% County/45% City).

City staff recommends City Council adopt the resolution which authorizes the City Manager to execute the CJIS Interlocal Agreement.

RESOLUTION BOOK NO. 27 – PAGE 68

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Vice-Mayor Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Mumpower and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO REZONE 500 LONG SHOALS ROAD FROM RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO COMMUNITY BUSINESS I DISTRICT

ORDINANCE NO. 2895 - ORDINANCE TO REZONE 500 LONG SHOALS ROAD FROM RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO COMMUNITY BUSINESS I DISTRICT

Mayor Worley opened the public hearing at 5:15 p.m.

Urban Planner Paul Benson said that this is the consideration of an ordinance to rezone one lot located at 500 Long Shoals Road from RS-2 Residential Single-Family Low Density District to Community Business I District. This public hearing was advertised on February 1 and 8, 2002.

The City staff has initiated this rezoning to permit re-establishment of commercial use for this property. During the zoning process for the 1,831 acres in the "south" extra-territorial jurisdiction area adopted in August of 2001, this property was initially zoned RS-2. Although vacant at the time the extraterritorial jurisdiction was extended, the property had been previously used for a veterinary clinic.

The Planning & Zoning Commission, at their January 2, 2002 meeting, reviewed, and by unanimous vote, recommended this rezoning. The staff had originally proposed Community Business II zoning but concurs with Planning & Zoning Commission that Community Business I would be preferable. The property owner is also in agreement with this change.

Staff has received no comments of concern or opposition to the proposed rezoning.

The Planning and Development staff and the Planning & Zoning Commission recommend that City Council adopt an ordinance rezoning the property at 500 Long Shoals Road from RS-2 to Community Business I District.

Mayor Worley closed the public hearing at 5:17 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Ellis moved for the adoption of Ordinance No. 2895. This motion was seconded by Councilwoman Jones and carried unanimously.

B. PUBLIC HEARING TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE REGARDING FLEXIBLE DEVELOPMENT STANDARDS

ORDINANCE NO. 2896 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO IDENTIFY FRONT SETBACKS AS A CATEGORY FOR MODIFICATION USING FLEXIBLE DEVELOPMENT STANDARDS AND TO CLARIFY THE PROVISIONS REGARDING VARIANCES AND FLEXIBLE DEVELOPMENT STANDARDS

Mayor Worley opened the public hearing at 5:18 p.m.

Chief Planner Gerald Green said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) to identify front setbacks as a category for modification using flexible development standards and to clarify the provisions regarding variances and flexible development standards. This public hearing was advertised on February 1 and 8, 2002.

Flexible development standards allow City staff to make administrative exceptions to certain parts of the UDO under specific circumstances. We have identified a new dimensional category for the application of flexible development standards - front setbacks.

To a great extent, front setbacks determine the character of most subdivisions. Front setbacks are generally measured from the right-of-way and, in Asheville, street pavement and right-of-way widths have not been consistent. Consequently, subdivisions in the same zoning classification may have front setbacks that measure different distances from the edge of pavement due to this variety. Additionally, in our mountainous terrain, some lots in a subdivision are differently situated than other lots due to topography. These circumstances, among others, warrant some flexibility in establishing the front setbacks for both entire subdivisions and for individual lots within subdivisions.

Currently staff is authorized to grant modifications in the following rules using the flexibility standards: lot size, lot width, setbacks and off-street parking requirements. If a project is required to be reviewed by a design review board, the design review board can waive requirements for the following, if the building design is approved: building size, building height, setbacks and landscaping.

The ordinance provides for the application of flexible development standards in order to make minor adjustments to front setbacks in entire subdivisions or portions of subdivisions. The front setback may be reduced by up to 10 feet in an entire subdivision as part of the plat approval process. A minimum 10 foot setback is required. The front setback in up to 10% of the lots in a subdivision may be reduced by up to 10 feet, except in the RS-2 zoning district where the front setback may be reduced up to 20 feet. The minimum front setback of 10 feet is required.

He said the following conditions must exist that warrant approval of the reduced front setback: (1) protection of significant existing vegetation; (2) accommodation of trails and greenways; (3) provision of a more usable lot arrangement due to topographical constraints; and (4) maintenance of consistent appearance within the subdivision.

Staff believes that this ordinance will provide the needed flexibility to evaluate and approve reasonable adjustments to front setbacks in a number of cases where such flexibility is needed. Property owners/developers can request and receive minor modifications under the flexible development standards without the need to present a variance request to the Board of Adjustment. The Board of Adjustment is in agreement with this amendment. The ordinance amendment also clarifies the relationship between flexible development standards and variances.

Staff has received no comments in opposition to the proposed revisions.

At their January 2, 2002, meeting, the Planning and Zoning Commission voted 6 to 0 to recommend approval of the proposed ordinance amendment. The Planning and Development staff also recommends approval of the amendment.

Vice-Mayor Bellamy asked that staff look at the possibility of flexible development standards for developments other than residential or subdivisions. Mr. Green responded that staff continually looks for ways to increase the flexibility of our ordinances.

Upon inquiry of Councilman Dunn, Mr. Green said that any staff decision on this matter can be appealed to the Board of Adjustment.

Mayor Worley closed the public hearing at 5:36 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 2896. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 412

C. PUBLIC HEARING ON THE PLANNED UNIT DEVELOPMENT OVERLAY DISTRICT DESIGNATION AND MASTER PLAN REVIEW FOR ROSS CREEK COMMONS LOCATED AT CHUNNS COVE ROAD AND OLD CHUNNS COVE ROAD

Due to a conflict of interest, Councilman Peterson moved to excuse Vice-Mayor Bellamy from participating in this matter. This motion was seconded by Councilman Dunn and carried unanimously.

City Attorney Oast said that this matter involves two steps: (1) adoption of the Planned Unit Development (PUD) Overlay zoning classification (involves consideration of the usual issues in rezoning: appropriateness of the classification for the location, consistency with the City's master plan, compatibility with surrounding land uses, etc.); and (2) adoption of the master plan for the PUD (involves determination as to whether the master plan meets specific criteria set out in the ordinance). He said it may be helpful to think of the first step in the PUD process as establishing a zoning classification and applying it to a particular property, and the second step as adopting the regulations that apply within that newly-established zone.

He said that a valid protest petition has been filed by the property owners surrounding the property that is the subject of the application. This protest petition relates to the rezoning element only. The effect of the protest petition is that an affirmative vote of 3/4 of all the members of City Council is required in order to rezone the property. This means that six votes of the City Council will be required to approve the rezoning request. And since Vice-Mayor Bellamy has a conflict her absence does not lower the number of votes required. This, a 6-0 vote will be required in order to approve the rezoning element of the PUD application. He noted that attorneys for the applicants have objected to this ruling. He did note that the protest petition does not affect the master plan; if the rezoning is approved, the vote required to approve the master plan will be a simple majority. He said that the attorneys for the applicants have objected to this ruling as well. If the rezoning element fails to pass, the project is denied and there is no necessity for consideration for voting on the master plan. Letters from Mr. Steven L. Barden, III, and Mr. W. Louis Bissette, Jr., were entered into the record.

City Attorney Oast also said that an issue was raised regarding a possible conflict of interest with regard to Councilman Ellis' position as a member on the Board of Directors of the Blue Ridge Area Authority. He has investigated that contention and does not feel there is a disqualifying conflict, therefore, Councilman Ellis must vote in this matter.

City Attorney Oast said that in connection with the rezoning, the main question is whether the PUD Overlay designation is appropriate for this particular property. The PUD Overlay does not change the underlying zoning of the property. What it does is permit increases in density if the developer meets certain standards set out in the Unified Development Ordinance (UDO). Relevant issues on this question are whether the PUD Overlay designation, with the increased density that PUDs allow, is appropriate here. Consideration should be given to such usual rezoning considerations as to whether and to what extent the PUD designation advances the City's policy objectives, as set forth in its various plans (comprehensive plan, land use plan, smart growth policy, etc.), compatibility with surrounding land uses, adequacy of infrastructure, and other general health, safety and welfare considerations. Even though some specific information regarding the Ross Creek Commons master plan will necessarily come before Council with Council's consideration of the rezoning element, it is important to remember that the plan can change and, as with any rezoning, any information regarding its specific proposed use should be considered as an example of what could go on the property, not necessarily what will. Once the PUD Overlay is established, any of the density bonuses allowed under Section 7-9-1 may be obtained if the applicable standards are met.

With regard to the master plan approval, it would be appropriate to get into more specific issues such as the placement of buildings on the site, the number of units in each building and the total number of units, the availability of parking, landscaping and preservation of natural landscape or topographic features on the site, setbacks, pedestrian and traffic circulation within the project etc. City Council may be as specific as it wishes in asking questions about the proposed use of the property. He stressed that City Council must not take into consideration the possibility that one or more of the units may be occupied by persons with mental disabilities or any other kind of disability

Mayor Worley opened the public hearing at 5:46 p.m.

Summary: WNC Housing and Mountain Housing Opportunities, Inc., have applied for a Master Plan approval and Planned Unit Development zoning overlay designation for Ross Creek Commons, a 35 unit affordable housing development. The proposed site for the development is a 3.38 acre parcel located at the corner of Chunns Cove Road and Old Chunns Cove Road, near Buck Cove Terrace. The parcel is currently zoned RM-6 Residential Multi-Family Low Density District, 6 units per acre. The PUD zoning overlay district provides a density incentive bonus for affordable housing and conserving open space that would allow the site to be developed at a density of up to 13 units per acre. The actual development density, as proposed, would be 10 units per acre. While this density is higher than that allowed under much of the surrounding property, it is not inconsistent with multi-family development in other areas of the Chunns Cove community, including the adjacent Buck Cove Townhomes, which have a density of 9 units per acre on much steeper property. It should also be noted that the subject property is located at the entrance to the Chunns Cove community, quite near an interstate interchange, and across the street from a church use. Such locational characteristics lend support to this site as a suitable place to allow density bonuses for affordable housing and open space conservation since traffic and site activity impacts would already be at a center of activity for the Chunns Cove community and will not be directed toward the interior of the community.

The proposed project is comprised of 4 buildings with a total of 36 units, one of which will be used as a community gathering space. Two buildings will be three stories, with twelve units each. The other two buildings will be two stories high, with six units in each. The buildings will be no taller than those allowed under the current zoning of the subject property and under the surrounding residential zoning, including the single family zoned areas. The development will be clustered towards the front of the property (the least steep part of the property along Chunns Cove Road), leaving over 40,000 sq. ft. of undeveloped open space to the west side of the property. A small playground will also be provided on site. Overall the site will have over 56,000 sq. ft. of open space; open space would constitute 38% of the total site. The site will be landscaped in accordance with the City Code for this type and impact of development.

Staff has received considerable public comment on this project. Neighboring property owners are primarily concerned about increased density, traffic impacts, and water and sewer capacity. Most of these issues were addressed through the Technical Review Committee (TRC) review process. A traffic impact analysis was not required for this project because the traffic generated from the site would be below the threshold for such an analysis. The site was redesigned with a single entrance off of Old Chunns Cove Road. The applicant is working with the Transit Services Department to work out the provision of public transit via Mountain Mobility. A Letter of Commitment for water availability has been issued and MSD has issued a Wastewater Allocation, which will require the applicant to complete some minor manhole improvements.

Staff recommends approval of the PUD Master Plan and Zoning Overlay, subject to the following conditions: (1) Provide details for the playground equipment; and (2) Provide pedestrian connections between the apartments and the large area of common open space.

Planning & Development Director Scott Shuford said that this proposed zoning change comes before Council with a recommendation of denial (3-3) from the Planning and Zoning Commission. This is the first Planned Unit Development request that has included the affordable housing density bonus. This public hearing was advertised on February 1 and 8, 2002.

He said his first presentation involves the zoning change to the PUD Overlay classification. If Council approves that change, then there will be a separate presentation that deals with the applicant's master plan. He said he would not get into details about site design in this first presentation but that his comments will be limited to general compatibility and infrastructure sufficiency issues associated with the proposed zoning overlay.

As noted at the Council retreat, the PUD zoning tool is relatively cumbersome and has been largely replaced by conditional use zoning. However, the PUD regulations contain an extremely important provision that supports key community goals: density bonuses for affordable housing and for environmental protection. Also as pointed out at the retreat, Asheville has a major affordable housing problem. One of the most important incentives local government can provide for affordable housing is to allow increases in density that reduce the per-unit cost of providing housing. He then reviewed graphs and charts demonstrating the affordable housing problem in Asheville.

He said that if we are to provide affordable housing to the extent that we must provide it to meet the obvious community-wide affordable housing and economic development needs, it will have to occur in multi-family developments. In our land-short situation, we cannot expect single-family development to come close to meeting the need for affordable housing. He showed a map of what land is available for multi-family housing. He said that approximately 2,200 is available and vacant for multi-family development.

Mr. Shuford then reviewed with Council the Sustainable Economic Development Strategic Plan priorities. (1) Shortage of diverse and affordable housing within the City, including rental units; (2) Lack of developable sites; (3) Tight labor supply with a shortage of skilled workers; (4) Lack of local agreement about the type business and industry the City should try to attract; (5) The water supply is inadequate and high cost; (6) Lack of prestigious research institutions and technical graduate programs; (7) Problems with the planning, zoning, and permitting process; (8) Lack of cooperation between City and County governments; (9) Need to revitalize the riverfront; (9) High underemployment; (10) Lack of available buildings for manufacturing and distribution; and (11) City's economic development role needs to be more clearly defined.

Mr. Shuford then provided Council with the project description and discussed some of the surrounding land uses in an effort to demonstrate compatibility of this project with the overall development pattern of this part of the City. He said that Ross Creek Commons is a 35 unit multi-family complex to be located at the corner of Chunns Cove and Old Chunns Cove Roads on a 3.38 acre parcel. The project site is located about ¼ mile from the intersection of Chunns Cove Road and I-240. The property is currently zoned RM-6; prior to the UDO, the property was zoned R-2 which also allowed six residential units per acre. Surrounding zoning is almost all RM-6 although there is some RS-2 on the steep, western side of the property. It is in the proximity of nonresidential and other multi-family development – Churches; Buck Cove Townhomes; CentrePark Business Park; multi-family projects farther south and north on Chunns Cove Road (Willow Springs, 24 Old Chunns Cove Road). He described the building height, massing, scale and location (building elevations; meet maximum height limits of zoning ordinance; similar design; Laurelwood).

He said that staff feels that the project is physically compatible with the surrounding neighborhood due to (1) the amount of existing multi-family development immediately proximate to and in close vicinity to the subject property; (2) the relationship of the subject property to streets and highways; (3) the natural and topographic circumstances of the subject property; and (4) the surrounding area and the proximity of nonresidential development.

The next questions that must be answered are: whether there is adequate public services to serve this development; and whether other existing or potential development in the area will be substantially and negatively impacted if these services are used to support this proposed development. Water service has been reviewed by the Water Authority and they have no capacity concerns. Sewer service has been reviewed by the Metropolitan Sewerage District (MSD) and they have no capacity concerns. Streets have been reviewed by the City's Traffic Engineer and he has no capacity concerns. Public Safety (Fire, Police and Emergency Medical Services) have been reviewed by City staff and there are no response time concerns.

He hoped he had sufficiently demonstrated to Council the extent of our affordable housing problem, the importance of resolving that problem to the City's economic development program, the overall compatibility of the proposed development with surrounding properties, and the adequacy of public services necessary to support the development. Based on this analysis, staff recommends your approval of the PUD Overlay zoning.

Mr. Scott Dedman, Executive Director of Mountain Housing Opportunities (MHO) and City resident, asked City Council to approve the City's only land use provision that supports affordable housing for their site in Chunns Cove. On 3.38 acres they want to put 35 attractive apartments. Twenty-seven of those apartments will be affordable to families in the $15-30,000 income range. Eight of the apartments will be for individuals who have receive care from the Blue Ridge Center and are able to live independently. One additional unit, in addition to the 35 residences, will be a community meeting space. If the PUD Overlay designation is approved, they could have asked for 40 apartments with a double density bonus allowed in the UDO. With other provisions of the PUD, they could have requested up to 44 units. In fact, the did initially request 44 units and last year the City's Technical Review Committee (TRC) unanimously reviewed their proposal on all technical issues. However, after hearing concerns from neighborhood residents about the number of units and the scale of their buildings, they reduced their plan to 35 units (and one community space) and reduced the side of the buildings. If

Council approves the PUD Overlay, then the exact details of the site plan will be discussed in detail. If Council does not approve the PUD Overlay, then they will build 20 apartments on the site. Fifteen families or individuals will live somewhere else, most likely further away from convenient shopping, transportation, jobs and services. He showed slides to illustrate the location of the site, noting that the site is less than 2/10 of a mile from I-240, 1/4 of a mile from Tunnel Road and 1.5 miles from downtown. He then entered into the record a booklet entitled "The Story of Ross Creek Commons" dated February 8, 2002, which included (among other things) a timeline of communication with the neighbors. He agreed that people should care about and be involved their neighborhoods. But issues of "Not in My Back Yard" (NIMBY) are issues of concern all across our nation, many which reference inadequate infrastructure. Infrastructure is a significant reason MHO has chosen this site. Water and sewer lines are ample and right at the site, grading costs will be well below any other site they have been able to find and develop, and the land is located on a good road and a good intersection. All regulations have been met. Concerns have been raised about the height of the buildings and they will address that concern fully if the PUD Overlay is approved. But as a side note, the buildings are below the height of the City's regulations not only for multi-family development but for single-family development. Even though neighbors stress that building height is the main difference between other developments in the community and this proposed development, he showed slides to dispute that issue. Therefore, the question is density and density is people. He read various letters from residents that support the phrase "we support affordable housing, but ...." Some excerpts were (1) "if they just build 20 units and not ask for any affordable housing density bonus, they well welcome us with open arms;" (2) "hope you will look elsewhere for another piece of property;" (3) "affordable housing belongs in areas where similar housing exists just as commercial buildings belong in settings that foster other commercial enterprises;" (4) "the proposed development will house people with substance abuse and mental illness problems. Similar MHO developments may be accepted by other communities, but I do not believe it will be accepted here – certainly not by me or many of my neighbors in Buck Cove Townhouses;" (5) "children will have to spill over onto a very congested part of Chunns Cove Road and into the properties of those who are and have been established. This is a real cruelty to the people would be living under these conditions. There is plenty of land to be had to allow more space and probably cost less. Perhaps the deserted theatre at Innsbruck Mall with the space around it could be bought, along with the Heilig Meyers space." He said that after the Planning & Zoning Commission meeting of 2-1/2 hours of discussion about traffic, sewer, buffers, density and building height, a neighborhood representative asked "I just want to know one thing – why type of people will live there." The City Attorney ruled her out of order in that the question was not relevant to the rezoning issue. Mr. Dedman said their families are typically in the income range of $15-30,000. These families can afford the rent, they just can't afford Asheville's market rent which is very high. MHO does not build public housing and they do not admit residents who have had a violent history or history of sexual offense. Because of neighborhood concerns expressed, MHO will commit to having a paid person on site to keep watch and alert other professionals if a problem arises. This goes beyond what is available to any other home or property in the neighborhood. He summarized by saying that City Council unanimously approved the zoning map of six units per acre on their site and they also unanimously approved the affordable housing density bonus. MHO try to help the families who live in their apartments and homes to fulfill their highest aspirations. He asked City Council to help not just 20 families but 15 additional families to achieve their highest aspirations.

Ms. Patsy Brison-Meldrum, attorney representing MHO and extra-territorial jurisdiction resident, addressed the legal issues. She discussed the authority for a PUD Overlay District, clearly pointing out that it is authorized under North Carolina law. She then said that State law also sets out the purposes that should be considered in determining whether to adopt a zoning designation. She cited from a few cases which note that you do not have to consider all of the purposes or to adopt a zoning designation that complies with all of these purposes. One purpose is that zoning regulations shall be made in accordance with a comprehensive plan. That plan for the City is known as the 2010 Plan. She then pointed out some case law regarding zoning designations. Again, there is clearly authority in North Carolina for establishing this overlay district. City Council must consider the character of the land, the suitability of the land for the uses permitted, and the comprehensive plan or the existence of circumstances justifying the rezoning application. She asked Council to apply the law set forth in those cases in determining how they have met the rules for this zoning designation and to base their decision on those factors, not on someone's characteristic of the area or on unfounded facts set forth. She reviewed language from the City's 2010 Plan to show that this zoning designation requested will be in compliance with the comprehensive plan. Another policy adopted by the City regarding affordable housing is the Consolidated Housing and Community Development Plan for 2000-2005 adopted on June 9, 2000. In concert with the 2010 Plan and the Consolidated Housing and Community Development Plan, City Council adopted the PUD Overlay District in the UDO. She noted it has been shown how this project is compatible of the uses in the area and also the density in the area with this proposed zoning designation. This proposal fits within the uses in the area, not that this proposal would provide for about 10.4 units per acre, whereas Buck Cove Townhomes are about 9 units per acre and Willow Ridge Apartments are about 10.1 units per acre. There is clearly compliance with uses and with density in order to support this designation. Ms. Meldrum entered into the record a letter from Mr. Dan Baechtold, Urban Planner, dated May 24, 2001, noting that on May 21, 2001, the TRC reviewed the proposed site plan and took action to move forward with conditions. She believed that by the action of the TRC, that clearly shows that the infrastructure supports this zoning designation. She referred to letters in the booklet Mr. Dedman entered into the record earlier regarding water commitment; sewer allocation; adequate capacity in the fire hydrants and fire flow; and no problems with crime in the area. She then submitted into the record email correspondence from Michael Moule, the City's Traffic Engineer, regarding the analysis of the traffic in the area that it was well below the threshold of requiring an Traffic Impact Analysis. Mr. Moule also detailed that he "pulled the crash reports for Chunns Cove Road. According to our data, since 1994, there have been no crashes at the intersection of Chunns Cove Road and Old Chunns Cove Road." He did point out, however, that there have been some minor fender-benders in the vicinity. Another reason the zoning designation should be approved is because it meets the purposes of the PUD. She detailed how it encourages more open space; it retains natural features, especially on steep slopes, and to encourage developments that will be compatible with environmentally sensitive areas; facilitates more affordable housing; facilitates energy costs through clustering of dwellings; effective use of transportation system; and encourages pedestrian circulation. The project meets the location standards of the PUD in that it shall be located on a street which is capable of accommodating the projected traffic needs of the proposed development. It must meet the infrastructure standards and the infrastructure in this area supports the density proposed. There may be other issues raised, such as an environmental impact statement and also concern about whether or not there may be some history to the site related to the underground railroad. Because federal funding is involved there is approval for the project from the N.C. Dept. of Cultural Resources in a letter dated September 28, 2001, saying they have conducted a search of their maps and files and determine that this structure is not located in or adjacent to any district which is listed in or eligible for listing in the National Register of Historic Places. In addition the structure, meaning also the property, is neither listed in, nor eligible for listing in, the National Register as an individual property. "We therefore have no comment." Also a notice to the public of no significant impact to the environment was published in the Asheville Citizen-Times on October 9, 2001, pursuant to requirements of the United States Dept. of Housing and Urban Development to release federal funds under the Title 1 of the Housing & Community Development Act. Clearly there has been a determination that there is no historic designation for the property and no need for an environmental impact study under federal regulations. In summary, the UDO, the comprehensive land use plan and the Consolidated Housing Plan has set forth Council's policies. In carrying out those policies, a provision in the UDO, the PUD has been adopted to allow for an affordable housing density bonus to carry out Council's policies. We have presented evidence that this is the right location, the right size, has access to I-240 and Tunnel Road, to a major commercial strip. City Council has set out the rules and they have complied with those rules. She respectfully urged City Council to adopt this zoning designation for the site.

At 7:00 p.m., Mayor Worley announced a short break.

Mr. W. Louis Bissette, attorney representing the Chunns Cove neighborhood and City resident, started out by saying he was disappointed in Mr. Dedman's attacking the Chunns Cove. The Chunns Cove Road neighborhood is made up of good people in a diverse neighborhood with low, medium and high income residents. These are working people, retirees, minorities, single-family parents and others and they share a fierce pride in their homes and community. City Council needs to look at the compatibility of this project to the neighborhood. The neighborhood is asking that Council deny the appeal of the developers for the proposed Ross Creek Commons project. The Planning & Zoning Commission denied the request after a thorough review of the facts and a full hearing. The Commission is a body Council appoints and they should listen to those members. The property located at the corner of Chunns Cove Road and Old Chunns Cove Road is a steep site rising 10 feet above Chunns Cove Road at the entrance to the Chunns Cove community. The property is currently zoned RM-6, Residential Multi-Family Low Density District. He read the description of RM-6 from the UDO. RM-6 is what the people of Chunns Cove counted on at the entrance to their community – a zoning district that would limit the size and density of multi-family development. The RM-6 district allows the developer to build 20 units and the PUD Overlay with its density bonus provisions would permit the developers to put more than twice that many units. He said their plan, which they contend is partially through the process, shows 35 units plus an office. But there is nothing that says if Council passes this PUD Overlay that they can't come back with a plan for 44 units. This is a 3.38 acre site, but really the construction of the project will be on 1.77 acres – less than one-half of that site. That calculates to be 18 units per acre. Very few, if any, of MHO existing projects have this level of density per acre. Furthermore, they disagree with some of the numbers given on the multi-family developments in Chunns Cove. Buck Cove is 20 units on 2.41 aces (8 units per acre) and Pinecliff Condos and Stone Ridge Condos are not in the Chunns Cove area. The Chunns Cove neighborhood strongly supports affordable housing and they support many of the efforts of MHO. This neighborhood, however, opposes the density and scale of this project. It simply does not fit into the character of their neighborhood. They think, in addition to the project being incompatible with the character of the neighborhood, this oversized project will exacerbate existing sanitary sewer, stormwater and traffic problems that already exist in the Cove. He has a police report that lists 23 accidents last year at different spots on Chunns Cove Road. These issues have not been properly addressed by needed traffic, infrastructure or environmental studies. Setback and buffering requirements have been waived and there are none on one side of the project at all. There are serious concerns about fire safety and concerns about the site. Mr. Baechtold's letter that Ms. Brison submitted into the record was dated May of 2001 and was based on a plan that is no longer in existence. That was the original plan that had two access points and had a different configuration of buildings. We contend that the new plan only has one access point and the Fire Department has never seen the revised plan. He didn't think the Tree Commission has seen the revised plan either. After looking at the plat of ownership for this project and it looks like their property line does not come over to Old Chunns Cove Road where this access road exists. So, they're not sure if they actually own the property that their one access road goes on. He felt the PUD Overlay process is unfair – not just to Chunns Cove, but to anyone. The PUD Overlay with its density bonus provisions have never been used by the City to date. It was also his understanding that there have been some issues about this process and there may well be some forthcoming modifications or deletions recommended to City Council. Chunns Cove was the only neighborhood who was forced to suffer through the "rock pile" fiasco when I-240 was built. They request City Council not vote to make it the only neighborhood to suffer through the unfair provisions of the PUD Overlay District. People in a neighborhood have the right to know, with some certainty, what can be constructed in that neighborhood. That's why there is zoning. The residential PUD Overlay process, however, does nothing but bring about uncertainty and destroys the trust which should exist between the City and its neighborhoods. He felt that every neighborhood in Asheville should be concerned about this. If we are going to have areas where we want affordable housing, let's zone it that way so that people know what's there and what's going to be there. We content that the people who live in the proposed development will be jammed into a crowded environment that is not going to be adequate for what is trying to be done. They would like to see a smaller project with 20 units with more amenities and a safer and comfortable residency for those people who will be living in the development. He realized that cost considerations have no bearing on Council's decision but the people in Chunns Cove are taxpayers and they are disturbed by the magnitude of the monies used to purchase this site. The site was purchased in late 1996 by a local attorney for $59,000. It's valued on the tax books of Buncombe County for $40,000. According to the tax stamps, the developers paid last week $282,000. He can't believe that other sites are not available. On behalf of the citizens of Chunns Cove, he promised that if the developer will reduce the density of this project to the allowed 20 units, the people of Chunns Cove will welcome these new residents into the Cove as friends and neighbors. He said that Mr. Dedman visited the neighborhood about two weeks ago and one of the things he said was that if they don't get this density bonus, they will build 20 units and they will put more mentally disadvantaged people in those 20. He said that the Chunns Cove residents don't care. He said since Mr. Dedman will not voluntarily consider a reduction in density, they respectfully request City Council deny their appeal and require them to comply with the existing RM-6 density requirements. This will be a win-win-win for the City, the Chunns Cove neighborhood and also for affordable housing.

The following residents support affordable housing, however, they urged City Council to deny the PUD Overlay District request for various reasons, some being, but are not limited to, the height elevation of the buildings, once constructed, will be overwhelming since the first building will already start off at 20 feet higher than Chunns Cove Road and then the 38 foot building would be built on top of that; development is out of proportion for the area; the development would denominate the entrance to Chunns Cove and the surrounding neighborhood; the project is not compatible to the neighborhood; density of the project is too high; project doesn't fit into the character of the neighborhood; already existing sanitary sewer, stormwater and traffic problems on Chunns Cove Road; fire safety; buffers and setbacks are insufficient; revised plan was not approved by the Fire Department as reported at the Planning and Zoning Commission meeting; fire safety concerns; turn area in the drive is inadequate in that it a 30-foot fire truck (medium size) has to use both lanes of the road to complete the turn; not a well-designed project; only one close by fire hydrant; speeding on Chunns Cove Road; Chunns Cove Road is dangerous with a blind hill; there have been many traffic accidents on Chunns Cove Road; Chunns Cove Road and Old Chunns Cove Road is a dangerous intersection; existing sewer line is inadequate; existing seepage, overflow and spilling sewage problems; developer knew what the zoning was when they purchased the property; there will be clear-cutting of large trees; there will be bull-dozing of historical artifacts; City to be looking to attract businesses with good paying jobs and then people could affordable homes; other sites are available that would support the density, in particular the 30 acres behind Memorial Stadium; Chunns Cove neighborhood just wants the residents of this development to have a little space and not be overcrowded in the development; property values will be harmed; if the PUD Overlay is granted, other area properties will petition to rezoned to a higher density; since the PUD Overlay process is going to be reviewed, why rush to approve it and then it will be the only one standing that already is greatly at variance with traditional UDO policies and would then be grandfathered in at a later time; several old oak trees need to be protected so they can live through the grading and construction of the site; important historic reminders of Asheville and southern history should stay in their original places and be preserved for future generations; proposed site is too hilly; Chunns Cove Road has no sidewalks; entire development will be on the front half of the lot; there is not enough parking, buffer zones, outdoor recreation space or setbacks provided for the residents of the development; inadequate water flow; with only one access, if an emergency occurs people will be trying to drive out and the emergency vehicles cannot get into the development; the 3-story buildings will block the views;

there are no other 3-story buildings in Chunns Cove; keep the zoning only RM-6; the extra 15 units (if a PUD Overlay is granted) will not solve Asheville's affordable housing needs; 20 units will be welcomed into the Chunns Cove neighborhood; City and County should work together to solve affordable housing problems; and more higher paid jobs than $7.00 need to be created:

Mr. Jeff Burleson, adjoining property owner and resident in the City's extraterritorial jurisdiction
Mr. Thomas Custer, resident of Chunns Cove
Mr. James Judd, 26 Rollingwood Road (entered into record four letters)
Mr. Gerald Wagstaff, resident on Honey Drive
Ms. Rhonda Byrd, 156 Chunns Cove Road
Ms. Patty Robertson, 35 Covewood Road in Chunns Cove
Ms. Jean Wall Penland, resident on Rollingwood Road
Mr. Nlan Avery, 46 Chunns Cove Road
Ms. Jean Baker, resident of Chunns Cove
Ms. Linda Price, property owner in Chunns Cove
Ms. Beth Pilz, resident on Covewood Road
Ms. Carol Collins, Co-Chair of Highland Gate Neighborhood Association
Ms. Nancy Orbin, resident on Rollingwood Road in Chunns Cove
Ms. Patricia Teague, resident of East Asheville
Mr. Kermit Brown, 398 Chunns Cove Road
Ms. T. Finch, 655 Chunns Cove Road
Mr. Ed Teague, Asheville resident
Ms. Beth Chestnut, resident on Rollingwood Road
Ms. Judy Marshall, 1 Honey Drive
Mr. Wayne Marshall, 1 Honey Drive
Mr. Dick Washam, resident on Honey Drive
Ms. Susan Counsel, 37 Rollingwood Road
Ms. Helen Coman
Mr. Don Sly, Asheville resident
Ms. Madge Murray, 19 Old Chunns Cove Road
Mr. David Herbert, Kenilworth resident
Ms. Carolyn Turminy, 658 Chunns Cove Road
Ms. Karen Hunnicutt, resident in Chunns Cove
Ms. Linda Baker, 33 Rollingwood Road
Ms. Denise Garrison, 5 Rollingwood Road
Mr. Joe Wald, property owner in Chunns Cove
Ms. Barber Melton, President of the Coalition of Asheville Neighborhoods and Haw Creek resident
Mr. Walter Plaue, Carolina Real Estate Investors Association

The following residents urged City Council to approve the PUD Overlay District to allow a 35 unit development for MHO for various reasons, some being, but are not limited to, the project is actually less that the allowed 44-units; the PUD is a new concept that forward thinking cities have used; the PUD gives the City an additional tool to accept higher density if other conditions are met; affordable housing is desperately needed in Asheville; good design of the project; people shouldn't have to fight to live in a section of town; people need a place to live; neighborhoods should be enriched with diversity; this project is an opportunity to advance the cause for affordable housing; affordable housing is important to the City's economic development; MHO has complied with all the City's regulations and should be allowed to build these needed affordable housing units; working people can't afford a decent place to live; Chunns Cove Road neighborhood is changing just by the fact that people move to Asheville; affordable housing will increase the affordability of nearby houses; MHO has had meetings with the neighborhoods and have reduced the number of units as a result of those meetings; some Chunns Cove residents say they support affordable housing, but not in their neighborhood or less of it or they want houses and not apartments; there is not much more land available for multi-family development; zoning should have nothing to do with the wealth of a resident or ownership status of resident; this development is over a one million dollar private investment in affordable housing; the more units that can be built, the less rent they have to charge; to allow this development is pro business and pro economic development; if MHO doesn't get funded for Ross Creek, there will be no new affordable housing units built in Asheville next year; for the City's investment of $1 Million the City can receive approximately $3 Million in return; and development will not overtax water, sewer or roadways:

Mr. Robert Todd, Asheville resident
Ms. Willie Vincent, Asheville resident
The Rev. Jim Abbott, Pastor of St. Matthias Episcopal Church and East End/Valley Street resident
Mr. Mathew Ashworth
Ms. Suzanne Walker Wilson, Asheville resident
Ms. Veronika Gunter, Asheville resident (entered into record letter with 11 signatures)
Mr. Barry Summers, Asheville resident
Mr. Alan Ditmore, County resident
Ms. Ann Bamburger, East Asheville resident
Mr. Richard Genz, 355 Sunset Drive
Ms. Pauline Counsel, 415 Chunns Cove Road and Asheville resident
Mr. Tony Sayer, resident on Florida Avenue
Mr. Douglass Keen, 105 Sunny Ridge Drive in Town of Woodfin
Mr. Al Mojonnier, Buncombe County resident
Mr. Bud Walker, 315 Chunns Cove Road
Mr. Brownie Newman, Asheville resident
Ms. Beth Maczka, Asheville resident
Ms. Amanda Ross, Asheville resident
Ms. Robin Merrill, housing attorney for Pisgah Legal Services
Mr. Jim Barrett, Asheville resident
Mr. Greg Walker Wilson, North Asheville resident
Mr. Rich Olejniczak, Asheville resident (entered into record NCHFA Multi-Family Rental Development 2002 Preliminary Application Report)
Ms. Karen Keenan, Executive Director of the Affordable Housing Coalition
Ms. Melendez, Asheville resident
An unidentified lady
Ms. Beth Duttera, Asheville resident
Mr. Howard Shepherd, West Asheville resident
Ms. Noel Nickle, Asheville resident
Ms. Selina Sullivan, Asheville resident
Mr. Bob Smith, Montford resident

Ms. Rebecca Campbell felt both sides of the issue need to sit down and find a way to work together.

Mayor Worley said that Mr. Tom Hartye, General Manager of the Metropolitan Sewerage District, called him earlier that day and said that they have plans to line this section within the next four months and that lining that section will stop the current infiltration. He said that the date of completion of this lining is June and the line is scheduled for a major upgrade in approximately two years.

Mr. David Matney, attorney representing WNC Housing Inc. and Buncombe County resident, said that they do have a legal right-of-way to the roadway. Zoning has the provision for change to allow for changing circumstances and the PUD Overlay is to promote innovative design by providing flexibility. The flexibility and site design is intended to accomplish, among others, to facilitate more affordable housing through clustering of dwellings through increased density. The issue here is whether City Council will assist affordable housing at this site by increasing the density. City Council should follow the philosophy set forth in the UDO and support the PUD Overlay for this property.

Mr. Steve Barden, attorney representing MHO and City resident, said that MHO undertook an exhaustive search for suitable property for affordable housing and this tract was one of the few suitable places in the City. MHO submitted a first-class application and made many concessions to please the Chunns Cove Road homeowners. The City's TRC approved this and the Planning & Development staff recommended approval. They say that it meets the City's smart growth policies, preserves a significant amount of open space and it helps the City meet it's affordable housing goals. He stressed this is an ideal site for a PUD Overlay and it meets all of the UDO's criteria. One of the rights of all of us as property owners is to use our property as we see fit as long as that use complies with laws and land use regulations. The applicant/property owner in this case has complied to the letter of the law. Mr. Bissette stated that none of the other MHO projects had the same density, but that is not true. With regard to the traffic impact, the City's Traffic Engineer determined that it's below the threshold to require a traffic study. The City has certified there are no water, sewer or fire problems. The price of the site has absolutely nothing to do with this issue, but the fact of the matter is that the contract price in this acquisition was completely supported by an appraisal by a qualified professional appraiser in Asheville. Mr. Bissette referred to Mr. Baechtold's letter being outdated. The plan changed but the changes did not reflect the substance of the letter. When the plans were revised the revised plans did not have to go back to the TRC because it involved an actual reduction in the density. In a letter dated today to City Attorney Oast from Mr. Bissette, it reads in part "We are very concerned that the City Council's prior action in approving the $100,000.00 in CDBG funds for this project will make it very difficult for the Council to make an impartial decision on this Appeal. It is our understanding that $100,000.00 in City of Asheville CDBG funds was approved by the Asheville City Council last year for this project and those funds have already been disbursed to the Developers for acquisition of the property." Mr. Barden was confident that City Council will be fair and impartial. He cited a case in that the City of Raleigh Court of Appeals held that there is nothing improper about a council voting on a project it previously participated in planning on. There were comments about the project being higher than the rock pile, but is it not. There was a comment about the sewer line capability, but pointed out that a 80 unit condo complex was approved and that runs into the same main sewer line but only two residents of Chunns Cove residents were present at that hearing. There was a question about fire hydrant pressure, but it's indicated that there is no problem with fire hydrant pressure. There has been no good reason raised why this application should not be approved. He stressed that they have complied with all the requirements and are entitled to a PUD Overlay.

Mr. Dedman admitted to stating that if they did not get approval for 35 units and were only able to build 20 units that there might in fact be more mental health units. The reason is that a tax credit development is very complex and when you get to a certain size of units its not feasible. A 20 unit development is very difficult for a tax credit development. If eight of those 20 are mental health, it's that much worse as far as the flexibility of the funding. With regard to not being flexible about the plan and the number of units, that is not true. He has offered Mr. Bissette and Mr. Washam several times to sit down. They took the position that 20 units is it and anything above 20 units would not be acceptable.

Mr. Bissette cleared up a statement in that he meant to say that if they want to put this number of affordable housing apartments in an area, do it in an area that is zoned for that number. This seems to be framed as a referendum on affordable housing. It's not. Chunns Cove residents say they want, will take and will be great neighbors to 20 affordable housing units because they believe that is what is compatible to their neighborhood. Chunns Cove is not against affordable housing. There are affordable units going up in other areas of the City and these 15 units are not going to bring us from last place to first place. This development is clearly not going to be compatible with this neighborhood. There are safety problems, road problems, sewer problems and water problems in this area. The area residents want these problems cleared up before something of this size is allowed in this area. Pinecliff Condos and the Stone Ridge development sewer does not go into Chunns Cove but into the Haw Creek sewer. The TRC did not approve the revised plans and they are not something with one change on them – they go from two access to one and that's a big change. He said that if City Council denies the PUD Overlay, there will still be 20 units of affordable housing. He entered into the record a petition containing 275 names. Said petition read "Petition against proposed 40-unit, 3-story Mountain Housing Opportunities/Blue Ridge Mental Health Joint P.U.D. project/development to be known as 'Ross Creek Commons.' Proposed project to be located at the corner of Chunns Cove Road and Old Chunns Cove Road. Said project is to begin 2002. Please sign your name, address and are you a voter (Y/N)?"

Mr. Dick Washam reiterated that the issue with the Chunns Cove community is not affordable housing – it's the density overlay position of the UDO. He felt the property should be built to the existing zoning and they would support 20 units. The cost of the property has a significant impact on the ability to have affordable housing and that is driving the number of units they would like to have there in order for it to be affordable housing. Either too much was paid for the property or the property is an inappropriate choice for affordable housing. If that is the case, then that is a poor business judgment and why ask the community to stand behind a poor business judgment by a developer.

Mayor Worley closed the public hearing at 11:50 p.m.

City Attorney Oast reiterated that there are certain things that are not relevant to City Council's consideration on the rezoning issue: nature or degree of ability or disability of the potential tenants of the project; as with any rezoning, MHO may not always be the owner or operator of the project and so their policies, practices and track record is not relevant to Council's consideration; the PUD Overlay is in the UDO and the applicant has applied to the law and that is what Council needs to apply; and whether it is a good or bad financial decision, or the price paid for the property is irrelevant to Council's consideration.

Upon inquiry of Councilman Mumpower, City Attorney Oast said that a PUD may contain any type of residential use except manufactured homes. He said there is nothing in the Code that restricts the application of PUDs to mixed use developments.

Mayor Worley clarified that City Council has used the PUD Overlay District before, but just not with density bonuses.

Upon inquiry of Councilman Peterson, Mr. Shuford said that by the time the site is prepared and ready for occupancy that would put a demand on the sewer system, the sewer line improvements will be in place. MSD has issued a sewage allocation letter for the project saying there is sufficient sewage capacity in the treatment facility and the lines leading to that treatment facility to accommodate this use.

Councilwoman Jones questioned the process for review with regard to fire safety. Mr. Shuford explained that this project went to the TRC in May of 2001. Since that time the developer did reduce the density and change some of the site configurations. They did go from a loop access road to a single access road. To do that requires a fire truck turn-around which he believed has been approved. There are also some additional minor adjustments for the Fire Department that the plan will require in order to get the lane configuration. In addition, when the plans come in for a permit there would be an additional review by all of the different departments that are involved. That gives the City an opportunity to catch any changes, mistakes or omissions.

Councilman Dunn felt like Council needs to look at the spirit of the law and then the letter of the law. He felt that if you have a certain density, that density should apply to the entire property, however, he does understand the upper part is too steep on this site. Even though City staff feels that the extra acreage is a buffer, the truth is that it's too steep to build on. He felt we should be looking at putting apartments in a project that may be spread out a little more. When you have a density of 6 per acre, that means six units per acre -- not just crammed into a little area that calculates to 18 units per acre. That fulfills the letter of the law, but doesn't think it is the spirit of the law. He felt if Council votes to approve this and allows a developer to arbitrarily put buildings where they want to when it's zoned to be put on the entire property, that would be starting a dangerous precedent.

Mr. Shuford explained that they encourage developers to do just that - whether or not we had the density bonus provision that encourages clustering. If the units were spread out into the steeper area, they would be just as difficult to serve as Buck Cove Townhomes which is in a very steep environment. Those Townhomes would run into very serious permitting issues today due to the steepness of the road and the design of the facility. In addition, we want to encourage the preservation of open space and in this particular case, roughly 1/3 of the site would be retained for open space. It's good planning to concentrate the units on the flatter part and try to preserve the steeper part and the wildlife habitat up towards the top of the mountain.

Councilman Mumpower confirmed that City Council recently passed the Stone Ridge Condominium development which built their units on the flatter property and left the higher elevations open. When he asked why there is no elevation drawing for this project, Mr. Shuford said that the developers actually have a model that would show how the elevation pieces work but that information has to be presented when Council talks about the actual site design.

Councilman Peterson said that some concern is about a very large building right-up-against Chunns Cove Road. Because of the N. C. Dept. of Transportation right-o-way, he questioned if there will be some setback requirements and if staff took those into consideration with regard to buffering on the property. Mr. Shuford said that at the request of the neighborhood, MHO did try to make some adjustments to the building in front and saved a fairly good stand of taller trees. But that gets into the site design issue. However, the buildings meet the height limit and anything that is built on that site could probably meet that setback and have that height whether it be a single family home, a duplex, or some other form of multi-family.

Upon inquiry of Councilman Dunn about how the height of the buildings are measured, Mr Shuford said the building height is measured from the ground up. He explained that the first building will be approximately 10-15 feet above the road because of how the land lays. It would require extensive grading to reduce that back to the road level.

Councilman Dunn said he didn't think a decision tonight will kill affordable housing in this community. The Housing & Community Development Committee have just recommended spending $500,000 on affordable housing projects and the City just started, last year, designating $400,000 to the Housing Trust Fund. He didn't feel that 15 units is going to destroy economic development.

Councilwoman Jones asked if some common ground might be achieved by cutting off a few units from the three story buildings. Mr. Dedman said that if they remove the third story units on the front building and make it a two story, that would be a reduction of four units for a total of 31 units. Even though he believed there are tax credit developments that have been successful with 30 units, the developments MHO has done have been 38, 40 and 48 units and those have been successful tax credit developments.

Councilman Dunn pointed out that not only is height a concern of his, but also the density.

Mr. Dedman said that there are a lot of regulations when you start building on steep land. Some of the older developments, e.g., Buck Cove Townhomes and Pinecliff Condos, could not be built today because of those regulations. He, frankly,, would like to move a little further up the hill with some of the buildings, but didn't know if regulations would allow him to do that. As to other accommodations of the site plan, there wasn't a lot of room for that in the process because the neighbors chose the position of only 20 units. If Council approves the PUD Overlay, he would commit to coming back and sitting with the neighbors and discussing the density on the site plan. Even though this PUD Overlay public hearing is not supposed to be about how many units are on that site, they had to submit a site plan saying how many units were on the site. They couldn't submit the application without it. He did reiterate that if Council wants to discuss 30 or 31 units, he would be willing to discuss that in the next public hearing and would accommodate Council's wishes as to the site plan.

Upon inquiry of Mayor Worley, City Attorney Oast explained Council's ability to change the site plan is limited to a large extent by what the applicant brings to Council. If the applicant brings a site plan that meets the qualifications of the ordinance, Council doesn't have a lot of room to amend it, from a legal standpoint. They can't require adjustments to the site plan, but can strongly encourage them. Again, if the applicant can demonstrate that they have met the requirements, Council may not have a choice but to approve the site plan. He did note that the site plan can change, but it would have to be approved by the Planning & Zoning Commission or by the City Council, if appealed.

Councilman Mumpower said it was Council's job to implement the ordinances in a fair and consistent manner, therefore, he moved to adopt the PUD Overlay District designation for Ross Creek Commons, located at Chunns Cove Road and Old Chunns Cove Road. This motion was seconded by Councilwoman Jones.

Councilman Peterson pointed out how this is a discretionary call for City Council with regard to whether the project is compatible with the surrounding area. Looking at what is immediately around the property, with no development on two sides, apartments and multi-family mostly on the other side and then other multi-family further down the road, his judgment is that it is a close call, but feels it is compatible.

Councilwoman Jones said that during the campaign process a lot of the comments were that City Council was not predictable and were inconsistent. The City does have mechanisms in place to give Council information and she has to rely on staff's expertise. She felt MHO has followed the rules. She felt it's a scary precedent in the other direction for the business and development community if Council sends mixed messages.

Councilman Dunn reiterated his comments with regard to density and how it should be spread over the entire property and not just in one small area. Again, the City has an Housing Trust Fund and the Housing & Community Development Committee will recommend $500,000 in affordable housing projects. He said this Council is committed to affordable housing, so, he didn't think, this vote won't kill affordable housing or economic development.

Councilman Ellis pointed out some of the similarities of the Stone Ridge Condominium Project City Council recently approved, noting that Councilman Dunn was absent from that meeting. He did have several site specific questions, but would wait until the appropriate time to ask those questions.

Councilman Worley explained why the PUD Overlay district with the density bonus was adopted in 1997 as part of the UDO, noting that the UDO was just a recompilation of the existing zoning ordinances. There was a serious concern about recognizing the lack of affordable housing in 1997. He sees this project as a comprehensive plan for the development of this site that utilizes the density bonus. This density is no different than in any of our other zoning districts, in that whether you have a density bonus or not, the density allowed is done that way. You frequently see a concentration on one portion of the lot, where another portion may not be buildable or you want to preserve open space. Again, the application of the density bonus is no different than that theory when you apply just regular zoning density to it. He did have some concerns about the site plan, especially with regard to fire safety and he will discuss those at the appropriate time. He, too, was a little concerned about the height of the building at the front and hoped MHO will come back with a lower building and slightly fewer units on that front building. However, at this stage, he is prepared to vote for application of the PUD.

Upon inquiry of Councilman Dunn, Mayor Worley said that Council may have some influence, but not total control, of the number of units that can be placed on that site.

When Mayor Worley called for a vote on the motion to approve of the PUD Overlay District, said motion failed on a 5-1 vote, with Councilman Dunn voting "no."

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of February 1-7, 2002: Claire Payne (Water), Rose Gwaltney (Water), Dave Ariola (Streets), Marilyn Pagett (Water), Koriander (Streets), Rita Lunsford (Water), Glenda Whitten (Streets), Hazel Guthrie (Water) and Stanley Woodruff (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

B. LAWSUITS

The City was served with the following Complaint on January 31, 2002: Kenny McDaniels v. City of Asheville. The nature of the complaint is EEOC charge of racial discrimination.

The City was also served on January 28, 2002, with the following Complaint: Charles D. Williams v. City of Asheville. The nature of the complaint is EEOC charge of racial discrimination.

Both lawsuits will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

A. COMMENTS BY KEVIN NUTTELL

Mr. Kevin Nuttell, representing NC AIDS Policy Center, stressed the need for education for HIV and AIDS.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 12:56 a.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – February 19, 2002 - 3:00 p.m.

Worksession

Present:	Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson
Absent:	None

CONSENT:

Donation from Asheville Professional Firefighters Association

Summary: The consideration of a budget amendment to accept a donation of $17,100 from the Asheville Professional Firefighters Association.

The Asheville Professional Firefighters Association has raised money through fundraising efforts. The Association desires to donate money to the City to purchase a thermal imaging camera for use in the Fire and Rescue Division. The camera will allow firefighters to see in smoke and dark conditions. Use of the camera improves firefighter effectiveness and safety. The cameras also allow firefighters to locate and rescue fire victims quickly and to search for fire hidden in walls and building voids.

The Asheville Firefighter's Association, IAFF Local 865, recently received the "North Carolina Professional Firefighters and Paramedics of North Carolina Local of the Year" award for the State of North Carolina. This is a prestigious honor for the Association. The Association is comprised of approximately 85% of the Asheville firefighters.

City staff recommends City Council adopt a budget amendment accepting the donation.

Urban Trail ADA and Sidewalk Improvements Contract

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Precision Contracting Co. Inc. to construct ADA and sidewalk amenities located along the Urban Trail in downtown Asheville.

The City is in need of a contractor to perform ADA and sidewalk construction services along the Urban Trail. In accordance with N.C. Gen. Stat. sec. 143-129, formal bids for ADA and sidewalk construction services were solicited and four responses were received. The bidders are listed below:

Company	MB Part	Drug Free	Bond	Bid
Carolina Specialties Construction Inc.	Non-Compliance	Yes	Yes	$111,827.00
Precision Contracting Inc.	100%	Yes	Yes	$133,410.00
Candler Concrete Works Inc.	0%	Yes	Yes	$137,328.54
Jerry Payne Const. Co. Inc.	0%	Yes	Yes	$191,300.00

These amenities will include: The installation of seven additional handicap accessible ADA ramps. Sidewalk replacement on Haywood Street adjacent to the downtown library, which will include new handicap accessible parking spaces to accommodate side-unloading vehicles, tree grates, and streetscape amenities such as benches and trash cans. The installation of thematic, directional markers will assist downtown visitors in finding their way along the Urban Trail.

As part of a TEA 21 Grant, 80% of the project funding is reimbursable from the N. C. Dept. of Transportation. The City's 20% match has already been allocated in the Public Works Department's Capital Improvement Project budget. Under the provisions of a TEA 21 Transportation Improvement Project (project number E-4138), completion of this contract would qualify the City of Asheville for a reimbursement of $106,728.00.

The Public Works Department staff recommends City Council adopt the resolution to construct ADA and sidewalk amenities along the Urban Trail.

Preventive Maintenance Contract for Traffic Signals

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Green Light Electric, Inc., for preventative maintenance of traffic control devices in the amount of $79,775.

In April 2001, the Public Works and Engineering staff undertook the project of reengineering the Division of Traffic Operations, given the fact that two signals technicians resigned and the impending retirement of the traffic signal supervisor. Staff goals were to evaluate the existing level of service and determine if reengineering options were available, with the possibility of contracting out some of the existing services. Other goals were to improve overall signal services, assure system reliability, and maintain direct accountability for fundamental system functions.

City staff has determined that preventative maintenance activities could, and should be, contracted to the private sector.

It was further determined that a minimum staff level of two signal technicians, whose pay scale and classification would more closely emulate the N. C. Dept. of Transportation technicians with similar responsibilities, would be maintained to insure emergency response and guarantee that timely repairs were enacted. Their primary responsibility, beyond emergency response, is to maintain and update signal system data and functions of coordination and timing.

Bids were solicited to determine actual costs for a comprehensive preventative signal maintenance program by the private sector. The City received three bids for the work. Bids were received from the following vendors:

Green Light Electric	$119,800
ALS of North Carolina	$199,800
MB Haynes Electric	$249,945

City staff negotiated with the successful bidder to further reduce the contract amount for the required work to $79,775 per year for the next 5 years, with annual options for renewal, calculating a 3% increase per year.

The overall cost savings from the reengineering idea, along with the improved services mentioned above, is approximately $40,000 per year.

Staff requests that City Council approve a resolution authorizing the City Manager to enter into an agreement with Green Light Electric, Inc. for preventative maintenance of traffic control devices.

Approval of 2002 Co-Sponsored Events

Summary: The consideration of a motion approving the 2002 festival and special events scheduled co-sponsorship by the City of Asheville.

In March of 1995, the Asheville City Council adopted a festival policy. A segment of that policy requires that City Council approve the list of festivals requesting co-sponsorship with Asheville Parks & Recreation on an annual basis. In 2001, the City co-sponsored 37 events produced by 25 organizers. For 2002, the request is for 65 events produced by 35 organizers.

The criteria for inclusion as a co-sponsored event are laid out in the Outdoor Special Event Guide which are:

1. The requesting applicant must represent a non-profit organization as defined by state or federal tax law.
2. The requesting applicant/organization does not discriminate on the basis of race, color, creed, sex, sexual orientation, age, political or religious affiliation, ethnicity, national origin or economic standing.
3. The proposed event is community focused and recreational in nature.
4. The proposed event is open to the general public.
5. The proposed event has been planned to facilitate a positive impact to the community.
6. Eligibility for co-sponsorship status is based on successful completion and submittal of application, agreements, letters of petition and/or contracts within the specified period of time.

The Parks and Recreation Department recommends accepting the list of events as the only events eligible for co-sponsorship for 2002. All further requests for 2002 will be denied, and organizers will be encouraged to apply for 2003.

When Councilman Mumpower expressed concerned about the City co-sponsoring 65 events with regard to the budget situation, Parks & Recreation Director Irby Brinson explained that it would be a total of approximately $95,000, two-thirds being non-direct costs. He explained that other third of that total is for overtime costs for Park Maintenance, Asheville Police Department, and some Public Works services.

Mr. Brinson explained that the policy was adopted in 1995 and it would be difficult to decide who and who not to co-sponsor, especially when the meet the criteria established in the policy. He said staff will do their best to limit co-sponsorship, however, they would need direction from City Council. A possible way to limit co-sponsorship would be to not allow any new festival or possibly look at a lottery system and draw from a hat.

Councilman Ellis felt that festivals are a great way to bring in some tax base to our City and create some jobs. The economic development factor also needs to be considered as hotels, restaurants, etc. benefit as well.

Councilman Dunn felt that the festivals that help people out are the important festivals, and given our budget constraints, the City needs to look for ways to save money.

Councilman Mumpower realized the millions of dollars of secondary impact from the festivals last year, but still expressed concern over the City's tight budget. He suggested maybe half co-sponsorship or to totally postpone co-sponsorship until our budget is on firm ground.

Vice-Mayor Bellamy pointed out that there are some non-profit organizations that supplement their budget based on "walks" or "runs". The County has reduced their funding to non-profits and the City is looking at that as well. She stressed how the non-profits depend on the community and the City to help them raise money. She felt that by not co-sponsoring, especially non-profits, the City will do more harm than good. In addition, there are business entities that clearly benefit from co-sponsorship too. She supported co-sponsorship of each one of the festivals. She also noted that each of the festival organizers paid a $25 application fee, and Council doesn't realize that the festivals pay for a lot of the associated costs, e.g., electricity, etc.

At the suggestion of Councilwoman Jones, it was the consensus of City Council to have staff review the policy adopted back in 1995 and bring it back in early fall for Council review. This way people will be on notice ahead of time that the policy, and possibly the criteria, might change.

Fire Station 8 Renovations

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Glazer Architecture, P.A., in the amount of $33,000, for renovations and additions at Fire Station #8 located at 902 Tunnel Road.

Fire Station #8 was constructed in 1966 and no major building renovations have been undertaken during the life of the building. The additional growth of east Asheville required the building to house a pumping fire engine and ladder truck today. However the building was only designed for one fire company. The renovations include women's locker area, storage area, enlarged dayroom and kitchen. A new public entry, bay for a quick response vehicle, and officer office are in the scope of work. Site work to improve the traffic flow is included in the contract. The contract is an AIA Document with modifications for the City of Asheville.

The funds for this project were appropriated in previous fiscal years and no funds would be used from Fiscal Year 2001-02 appropriations.

The Fire Chief recommends City Council authorize the City Manager to sign the contract with Glazer Architecture, P.A. for renovations and additions to Fire Station #8.

Fire Station 3 Renovations

Summary: The consideration of a resolution authorizing the City Manager to sign the contract with Glazer Architecture, P.A., in the amount of $18,600, for basic renovations and minor additions at Fire Station #3 located at 50 Oregon Avenue.

Fire Station 3 was constructed in 1976 and no major building renovations have been undertaken during the life of the building. Presently, a pumping fire engine and a ladder truck are housed within the station. The renovations include re-roofing the building, renovating the kitchen, new finishes in the dayroom, kitchen, and dorms, new HVAC for all areas except the apparatus bays, electrical and plumbing renovations as required by Code. The contract is an AIA Document with modifications for the City of Asheville.

The funds for this project were appropriated in previous fiscal years and no funds would be used from Fiscal Year 2001-02 appropriations.

The Fire Chief recommends City Council authorize the City Manager to sign the contract with Glazer Architecture, P.A. for renovations and additions to Fire Station #3.

Clerk to Advertise Offer to Purchase Disposal Parcel 146 on Lincoln Street

Summary: The consideration of a resolution establishing minimum price and authorizing the City Clerk to advertise an offer to purchase Disposal Parcel 146 in the East End/Valley Street Community for the amount of $3,200.

Disposal Parcel 146 is a substandard lot located on the north side of Lincoln Street comprising 3,659± square feet. The lot is irregular in shape and mostly flat about street level then sloping up sharply to the rear. The bid in the amount of $3,200 from Damon Rouse includes the proposal to combine the property with adjoining property currently owned by Mr. Rouse on Jordan Street.

Although the new tax appraisal is $5,600, this property was available for several years at the previous tax value of $2,000 and then at $4,900 with no offers having been received. A letter of opinion from Ben Mansell CRS, GRI with RE/MAX Advantage Realty, indicates that due to the limited utility of the property to any buyer except an adjoining owner, the market value of the property would be approximately $3,000.

Approval of the resolution will establish the minimum price in the amount of $3,200 and initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Community Development staff recommends adoption of the resolution.

Sale of Property at 9-13 Biltmore Avenue

Summary: The consideration of a resolution setting a public hearing and directing the City Clerk to publish a notice regarding proposed sale of real property at 9 -13 Biltmore Avenue, Asheville, N.C.

The property at 9 -13 Biltmore Avenue is located about 125 feet south of Pack Square. It is improved with a store front building with three bays dating from the 1920s. The land area comprises 14,469 square feet and the total combined building area is approximately 6,529 square feet. The lot extends to the east side of South Lexington Avenue, about 125 feet south of the intersection with Patton Avenue, and is improved with marked parking spaces on an asphalt surface. The lot is rectangular in shape and sloped to street level access. The appraised value of the property is $530,000.

Asheville Area Arts Council has submitted a proposal to purchase the property minus the air rights over the rear parking lot in the amount of $462,500. The bid from the Arts Council includes the proposal to cooperate with the eventual purchaser of the air rights over the parking lot to allow construction a new building containing parking, office, retail and/or residential units on South Lexington Avenue. The new building would be constructed above the first level by the purchaser of the air rights. The calculated value of the air rights retained by the City to be sold separately is $67,500. The bid from the Arts Council reflects the appraised value minus the air rights. The City has a bid in hand from a redeveloper for the air rights. The bid from the Arts Council includes an offer of $339,000 cash and a request that the City finance $123,500 of the purchase price.

If the bid of the Arts Council is accepted, Community Development staff recommends evidence of funding or financing be required within 60 days of acceptance.

Approval of the resolution will schedule a public hearing on March 12, 2002, and initiate the sale of the property through a private sale as provided in N. C. Gen. Stat. sec. 160A-457(4).

Community Development staff recommends adoption of the resolution.

Contract Approval Authority

Summary: The current contract approval authority for the City Manager is relatively low compared to formal bid limits set in the North Carolina General Statutes and normal practices across the state, thus requiring many routine, budgeted, contracts to require approval of Council. This change, if approved, would increase the City Manager's authority consistent with state law and general practices across North Carolina.

Currently the City Manager is authorized to sign contracts up to $30,000.00. All contracts for construction and services above $30,000.00 require approval of City Council. In many cases contracts are approved by Council on the consent agenda and, therefore, require several additional weeks before the awarding of the contract can be accomplished. This slows down the process and, in several recent cases, you have noticed where staff has asked you to take special action at worksessions in order to be able to move projects forward at a more rapid pace.

Just recently the General Assembly amended General Statute §143-129 regarding the procedures for letting of public contracts. The General Assembly increased the amount of the contract needed to trigger the formal bidding requirements as outlined in the statute. The recent changes require that cities receive formal bids on construction or repair contracts that could amount to more than $100,000.00. In addition, the formal bid requirement for purchases of apparatuses, supplies, material or equipment has been raised from $30,000.00 to $50,000.00. (Note: Informal bids are still required for purchases from $5,000.00 to $49,999.99.)

In order to align local responsibilities with newly changed state law, it is recommended that the City Manager be given authority to approve contracts in the following manner:

A. Construction or repair contracts up to $100,000.00 could be approved and signed by the City Manager without City Council approval while construction contracts over $100,000.00 must be approved by City Council before the City Manager is authorized to sign the contract.

B. Purchase contracts for apparatuses, supplies, materials or equipment below $50,000.00 could be approved and signed by the City Manager without Council approval.

C. Service contracts up to $50,000.00 can be approved and signed by the City Manager without Council approval while service contracts $50,000.00 and over need City Council approval before the City Manager can sign the contract. Currently, the City Manager can sign a service contract under $30,000.00 without City Council approval. (NOTE: THERE IS NO REQUIREMENT TO BID A SERVICE CONTRACT AND THERE ARE NO MONETARY THRESHOLDS.)

All of the above recommendations are made with the understanding that there must be sufficient funding in the budget and that all contracts will be approved in accordance with federal, state and local laws. In addition, the Manager will continue to report to City Council on a quarterly basis in writing regarding the contracts of the City.

The above changes would take some of the items off the Council's agenda which sometimes tend to lengthen it with routine matters. In addition, it would follow the tradition of allowing Council approval of formally bid construction projects and large service contracts, while allowing the City Manager to execute the remaining contracts.

The City Manager requests that Council adopt the ordinance granting authority to approve, award and execute construction contracts, purchase contracts and service contracts as outlined.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

2002 TAX REVALUATION

Buncombe County Tax Collector Jerome Jones explained the 2002 Buncombe County revaluation. He explained how the City's tax base has grown. He pointed out that revaluation has three key points: (1) values are determined by market forces; (2) computer assisted mass appraisal: possible errors occur in some appraisals); and (3) every taxpayer has the right to appeal. Revaluation is (1) every four years; (2) 1998 last revaluation; (3) 2002 next revaluation; and (4) it's continuous. Revaluation is a process that determines fair market value and analyzes local real estate sale, cost and market trends. Thee approaches used to value include: (1) cost; (2) sales comparison/market; and (3) income. The following are reasons why we have revaluations: (1) North Carolina General Statutes; (2) insure fairness, equity and uniformity; (3) property values change at different rates; (4) sales/assessment ratio; and (5) public service companies. Revaluations are conducted by (1) the county assessor; (2) in-house personnel; and (3) local appraisers who are state certified. Mr. Jones then explained the Elderly/Disabled Exclusion Program. This program excludes the larger of $20,000 or 50% of residence value. Some facts of the program include (1) you must be 65 years of age or older; (2) totally and permanently disabled; (3) gross income of $18,000 or less (spouse); (4) must be a North Carolina resident; and (5) once you enroll, you don't have to enroll again. He said that there are approximately 3,400 people enrolled. Mr. Jones then explained that the value, not the taxes, can be appealed and reviewed the process starting out with the informal appeal, working it's way up to the NC Supreme Court. He did note that virtually all appeals are settled locally.

Mr. Jones then answered and responded to various questions from Council, some being, but are not limited to, historic designations, has there been any property depreciation, does the revaluation have any effect on the tax collection rates, flyer sent out has valuable information in it, many homes are becoming not affordable after revaluations; and how do our property tax rates stack up with the rest of the state.

Upon inquiry of Councilwoman Jones, Mr. Jones said that he would provide the Council with information on how many of the 3,400 people enrolled in the Elderly/Disabled Exclusion Program are City residents.

At the suggestion of Councilman Mumpower, City Manager Westbrook said that the City might be able to put something on it's governmental channel about the County's Elderly/Disabled Exclusion Program.

City Manager Westbrook said that he is working with Mr. Jones regarding the building being designated historical but then luxury apartments being built inside that building – all being taxed at 50% under the historic landmark designation.

City Manager Westbrook said that this is a good example of the cooperation between the City and the County working together.

UDO AMENDMENT REVIEW

City Attorney Oast said that this Unified Development Ordinance amendment is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearing, which is scheduled for Tuesday, March 12, 2002. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Identifying Artist's Studios & Workshops as Home Occupations in Residential Districts

Chief Planner Gerald Green said that this is the consideration of an ordinance amending the Unified Development Ordinance to identify artist's studios and workshops as home occupations in residential districts and to establish standards for these uses.

The Planning and Zoning Commission is recommending adoption of an amendment to the City's zoning standards to identify artist's studios and workshops as home occupations and to establish standards for these uses. Home occupations are currently permitted in all residential districts and although many artists have studios or workshops in their homes, these uses are not specifically identified in the City's zoning code. As a result of the City of Asheville's popularity as an arts center, the number of artist's studios and workshops located in residential areas will continue to increase. Artist's studios and workshops often require more space than traditional home occupations due to the need to store materials and for larger work areas. The proposed amendment addresses this need by allowing artist's studios and workshops to be larger than other home occupations. In order to protect adjacent residential uses from potential adverse impacts of artist's studios and workshops, a larger lot size is required for larger studios and workshops. Larger studios and workshops, when constructed as a separate building, must be setback a greater distance from the property lines. The studios and workshops must also adhere to the other standards for home occupations set forth in the City's zoning ordinance. These standards address:

- The display of goods and products as well as other advertising;
- Prohibition on retail sales from the home;
- Restriction on uses that create odor, noise, glare, etc.; and
- Standards for signs and parking.

Staff worked with a group of artists and craftspeople in developing the standards set forth in the draft ordinance amendment. No comments in opposition to the proposed revisions have been received.

The Planning and Zoning Commission voted 7 to 0 to recommend approval of the proposed ordinance amendment. The Planning and Development staff also recommends approval of the amendment.

Mr. Green responded to Councilman Peterson's questions about the definition of a workshop and also displaying of goods on the premises.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to proceed with the appropriate public hearing on March 12, 2002.

HOUSING TRUST FUND LOAN RECOMMENDATIONS

Councilman Dunn moved to excuse Vice-Mayor Bellamy from participating in this discussion due to a conflict of interest. This motion was seconded by Councilman Mumpower and carried unanimously.

Community Development Director Charlotte Caplan said that this is the consideration of a resolution to award five loans from the City's Housing Trust Fund.

Available funds in the City Housing Trust fund stand at $512,000. This comprises $400,000 in new Fiscal Year 2002 funds and approximately $112,000 in loan repayments. Applications for these funds were invited by letter and advertisement on December 7, 2001.

Eight applications were received by the January 18 deadline, requesting loans totaling $840,000. They were reviewed by a five-person committee of City staff and outside experts, using criteria developed by a broad-based focus group last fall. The review committee reported to the Housing and Community Development Committee, which has recommended the five highest ranked applications for a total of $520,000 in loans, producing 26 affordable housing units. They are:

1. WNC Housing, Inc. – $100,000 for "Independence Cottages", five 1-bedroom houses for rent to very low income individuals with severe and persistent mental illness; on Clemmons Street and Spinet Street.
2. Mountain Housing Opportunities – $80,000 for construction of a 4-bedroom house for sale and rehabilitation of two dilapidated houses, one for sale and one as a rental duplex; on Jefferson Street, Clingman Avenue, and Rector Street.
3. Tim & Wendy Vorst – $40,000 for a duplex with a 1-bedroom and a 3-bedroom apartment to rent on Brookshire Street.
4. Tim & Wendy Vorst – $120,000 for a 6-plex of 1-bedroom apartments to rent on Hendersonville Road.
5. Carolina Custom Exteriors – $180,000 for a 3-bedroom house for sale, and two duplexes and a 4-plex to rent on Galax St. The proposal includes an offer to buy the City-owned site on Galax.

Proposed loan terms are as follows:

WNC Housing:	2% interest payable annually; first year's interest and all principal repayment deferred for 30 years.
Mountain Housing:	Rental duplex: 2% interest with all payments deferred for 20 years; S/F homes: x% interest with all payments deferred for 30 years, where x = the rate of appreciation of the properties.
Tim & Wendy Vorst:	2% for 30 years, amortizing, on both projects.
CC Exteriors:	2% construction loan only on the S/F house; 2% for 15 years amortizing on the rental units.

The Housing & Community Development Committee and City staff recommends approval of the five loans from the City's Housing Trust Fund.

Mayor Worley questioned the deferrals and his theory of the Housing Trust Fund was that the Fund would continue and evolve and help more people than having a good portion of our assets tired up for a number of years with the deferrals. Ms. Caplan explained that this issue did come up last year and was sent to a focus group. It was their consensus that only a limited amount would be deferred, stressing that the deferral is necessary for the low and very low income projects. She stressed that financing affects affordability.

Councilman Dunn, member of the Housing & Community Development Committee, did note that WNC Housing requested no interest, however, they did agree to a 2% interest payable annually. He said that the Committee is aware of the deferral issue and also wants to see money being put back into the Fund.

Councilwoman Jones, member of the Housing & Community Development Committee, said that the Housing Trust Fund is only one answer to affordable housing, as is Community Development Block Grant funds. She said the Fund is a great tool and the Committee members are thinking of ways to improve the system.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

TROLLEY FRANCHISE

Transit Services Director Bruce Black said that this is the consideration of a franchise ordinance for the operation by Trolley Leasing, LLC, of a narrated historic tour trolley on the streets of the City of Asheville.

Trolley Leasing, LLC, is a Florida Limited Liability Corporation. They propose to do business in Asheville as Asheville Historic Trolley Tours, with two trolleys. The services to be offered will include narrated historic tours of the downtown and nearby historic areas. They intend to stop at a number of local hotels. The tickets will be sold at various locations including hotels and the Asheville Visitors Center.

The tour will follow an established route and could occur up to four times per day. The business plan does not contemplate point-to-point transportation of people on a scheduled basis for a fee, but does include the possibility of charter business.

At the request of City staff, the operator has met twice with the City Traffic Engineer and he has signed off on the proposed route as not unduly interfering with the normal flow of traffic.

The vehicle is a 30-foot rubber-tired trolley with open sides where the windows would normally be. This area can be closed off with clear plastic roll down curtains in inclement weather. The operator has assured the staff that the narration from within the trolley is not audible outside the vehicle.

The vehicle is driven and the tour narrated by one person, but could also include a second person if appropriate.

It is recommended that the Council franchise the historical tour aspect of this business. A tour trolley usually runs somewhat slower than prevailing traffic and occasionally stops to embark or discharge passengers from a public street. This creates the possibility of interfering with the flow of traffic on public streets by creating unsafe situations or by blocking a lane of traffic. The franchise, as drafted, would simply require that the City's Traffic Engineer sign off on the proposed routes and be advised of any changes subject to his approval. At this time, the Traffic Engineer has reviewed and approved the routes, but the operator is conferring with the Traffic Engineer on some proposed changes.

The franchise ordinance also limits operation of the narrated tour from 7:00 a.m. to 8:00 p.m., Sunday through Thursday, and between 7:00 a.m. and 12:00 Midnight Friday and Saturday. For City-recognized holidays and days on which City-approved festivals occur in the Central Business District, the operating hours may be extended to 12:00 Midnight, regardless of the day

274

of the week. For charter operations, the hours of operation are not limited to the above, providing that Trolley Leasing meets all local, state and federal laws regarding the operation of a chartered vehicle.

The ordinance is drawn to be as narrow as possible. It does not attempt to franchise any other part of the business operation except that part which will regularly and routinely utilize local public rights-of-way with the potential of repeated constraints to the flow of traffic.

City staff recommends City Council adopt the franchise ordinance.

Mr. Rich Mills, owner of Trolley Leasing LLC, said that they are currently operating in Everglade City, Florida, and also Madison, Georgia.

Upon inquiry of Councilwoman Field, Mr. Mills said that his trolleys have the state of the art small diesel engine. He did state, however, that they are willing, as this progresses, to look at ways to address the issue of air quality.

Vice-Mayor Bellamy felt that the $1 day franchise fee was too low. Mr. Black responded that this is a one year agreement and that fee will be revised when, and if, the franchise renewal is requested. Mr. Mills said that he would also be willing to discuss the franchise fee at the end of the year. He also noted that in the cities he is currently operating in, they had no franchise fee in that they feel the trolley is a moving billboard advertising the City. He felt that the cities get a lot of intangible benefits from his business.

Upon inquiry of Councilwoman Jones, Mr. Black said that this trolley would also help with the problems of parking in downtown.

City Attorney Oast noted that the franchise, by law, has to be adopted by two votes, which need to happen at two different meetings. He suggested City Council vote on the franchise at the February 26, 2002, formal meeting and then at the March 5, 2002, worksession.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

UPDATE ON RESTRUCTURING AND INCREASING PENALTIES FOR ANIMAL CONTROL VIOLATIONS

Police Chief Will Annarino said that this is the consideration of an ordinance to restructure and increase penalties for animal control violations.

The current penalty for animal control violations is $10.00 for the first offense; $20.00 for the second offense within 12 months of the first; and succeeding offenses within 12 months of a prior offense result in increased penalties in $10.00 increments per offense. Penalties of these amounts have proven ineffective in promoting voluntary compliance with animal control regulations. In addition, collection of penalties is a problem because of the costs of collecting delinquent penalties exceeds the value of the revenue.

It is proposed that the penalties be increased as follows:

- First offense --$50.00
- Second offense within 12 months ----------------$100.00
- Third offense within 12 months--------------------$150.00

- Succeeding offenses within 12 months result in increased penalties in $50.00 increments per offense. (For example the fourth offense within 12 months would carry a $200.00 penalty; the fifth would carry a $250.00 penalty, and so on.) The maximum penalty is set at $500.00.
- Unpaid penalties would be declared delinquent after the 30th day from the issuance of the citation and thereafter for each additional 30-day period of delinquency.
- Delinquency fee------$50.00. (This is similar to the parking penalty delinquency schedule which provides for a $25 fee for each 30 day delinquency period.)

The following is a survey of seven cities' and counties' which have animal control penalties (none provide for a delinquency fee for non-payment):

- Chapel Hill: $50 per offense; if payment is not received a criminal summons is issued, to $500.
- Buncombe County: Each offense not to exceed $500 at the discretion of the Animal Control Officer.
- Lee County: 1st offense $25; 2nd $50; 3rd $250 and/or confiscation of animal.
- High Point: $50 per offense.
- Salisbury: 1st offense $25; 2nd $50; 3rd $75; 4th $250. Loose dog is $50.
- Sanford: 1st offense $50; 2nd $100; 3rd $250 and/or confiscation of animal.
- Cary: 1st offense $20; 2nd $50; 3rd $75; 4th $100; 5th $250 and confiscation of animal.

Public education of the penalty structure is an important component of the implementation plan. Asheville's Government Access Channel, the "City Works" section of the Asheville Citizen-Times, internet postings and other methods will be used to inform the public. The effective date of the ordinance will allow a 60-day window of opportunity for staff to carry out public education activities.

Spay and neuter alternatives to penalties will be considered on a case-by-case basis.

The contract for animal control services the City has with the Asheville Humane Society specifies that all civil penalties and license fees collected will be retained by the Humane Society to off-set expenses associated with enforcing the annual license fee, sterilization of animals adopted from the shelter, and public education. For 2001, approximately $1,700 in penalties and $10,000 in license fees were collected.

City staff recommends Council adopt the ordinance.

There was a lot of discussion with regard to how the spay and neutering alternatives would occur, how the penalties would escalate, the need for dogs to be licensed and benefits associated with that licensing, the cost for a license, how the public (especially renters who do not receive water bills with the licensing insert) is not aware that dogs need to be licensed, penalties are too high, maximum cap should be $500 per offense,

Police Chief Will Annarino stressed that the City wants to violators to pay for this program, not the general taxpayers.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

MISCELLANEOUS MATTERS

276

Worksessions Items

Upon inquiry of Councilman Peterson, Mayor Worley said that the proper procedure for a Council member to have an issue placed on a worksession agenda is to let him know at least one week in advance of the worksession and he would advise the City Clerk to place it on the agenda.

U.S. Citizenship on Boards and Commissions

It was the consensus of Council to remove the U.S. citizenship on boards and commissions from City Council's consideration on February 26, 2002, and remand the issue back to the City's Boards and Commissions Committee.

Current Operations at the Civic Center Worksession Item

Upon inquiry of Councilman Mumpower, City Manager Westbrook said that it was his understanding that City staff was to provide City Council with a staff representation with regard to the current operations at the Civic Center – what is and is not working – at the March 5, 2002, worksession. He did not think that City Council wanted him to invite the tenants, but to hear the staff presentation and then if Council wanted different information, then the tenants could be brought in.

Councilman Mumpower felt strongly that the Civic Center Commission members should be invited to the worksession to hear the report, or possibly even share the report with them prior to City Council. City Manager Westbrook said that he would be happy to invite the Commission members, however, the City doesn't normally release information to others before City Council. In addition, due to time restraints, he didn't think that the staff's presentation could be ready any sooner than the Friday before the Tuesday worksession, if then.

Mayor Worley agreed that the Commission members should be present to hear the report in that Council may wish to defer the report to them or to ask them questions.

Public Hearing Procedures

Councilwoman Jones felt City Council should look at its deliberation process. She felt it was important that Council balance open government while not short-changing City Council discussion.

Mayor Worley said that he had once suggested that if a meeting reaches a certain hour (11:00 p.m. or Midnight) that a good breaking point be found and the meeting be recessed until the next day or next couple of days.

Vice-Mayor Bellamy agreed in at if the public knows ahead of time that the meeting will not last past Midnight, they could be better prepared.

Councilman Peterson agreed in that the Mayor can announce at 10:00 p.m. a short break at which time people can sign-in to speak if the meeting is recessed to another day. That way only those who attended the beginning of the meeting would be allowed to speak at the end of the meeting on a different day.

It was the consensus of Council to have Mayor Worley, Vice-Mayor Bellamy and Councilman Peterson work on a proposed policy regarding the length of the meetings.

Asheville Smoke

Discussion occurred with regard to a letter City Council members received from the Asheville Smoke asking for two things, both of which mean providing funding which would require a City Council appropriation. City Manager Westbrook said that based on the information from the State with regard to the budget, a reduction in City services, and infrastructure needs in the City, he did not recommend making an appropriation to those requests.

When Councilman Mumpower suggested the City write off the facility fee for the remainder of their season, City Manager Westbrook said that City Council would have to pass a resolution and then there could be a problem with the basketball team and other vendors who use the facility.

City Manager Westbrook stated that City Council has worked with the Asheville Smoke in the past by taking over some responsibilities. He stressed that we do value the Smoke.

All of Council stressed that the City of Asheville recognizes the importance of hockey, but given the City's financial situation is unable to help them financially. Therefore, it was the consensus of Council to ask staff to look for some non-financial support for the Smoke.

State Budget Cuts

Mayor Worley updated City Council on a meeting he had recently with the Metropolitan Coalition and Governor Easley regarding the State budget. In summary, Governor Easley agreed to work with the Coalition and try to determine if there are other areas of the State budget that can be cut to alleviate pain to cities and towns, and to also look at ways to make our revenues more secure. It will be difficult to get any of our reimbursements back this fiscal year and the State is anticipating a similar problem next year. He did state that our local delegation was sympathetic and very much willing to help to make Asheville's revenues more secure in years to come.

City Manager Westbrook said that the Governor has appointed a Revenue Commission whose charge will be to review the revenue laws passed in the 1930's.

Councilwoman Jones spoke of the need for leadership and mutual support in how we approach this problem on a local level.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 6:02 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – February 26, 2002 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Councilwoman Jones gave the invocation.

I. PROCLAMATIONS:

A. MAYOR WORLEY RECOGNIZED BOY SCOUT TROOP 77

B. ORDINANCE NO. 2897 - ORDINANCE ACCEPTING DONATION FROM THE ASHEVILLE PROFESSIONAL FIREFIGHTERS ASSOCIATION

Mayor Worley recognized Fire Chief Greg Grayson who in turn recognized Asheville Professional Firefighters Association Mike Marshall and thanked the Asheville Professional Firefighters Association for the $17,100 donation to the City to purchase a thermal imaging camera for use in the Fire and Rescue Division. The camera will allow firefighters to see in smoke and dark conditions. Use of the camera improves firefighter effectiveness and safety. The cameras also allow firefighters to locate and rescue fire victims quickly and to search for fire hidden in walls and building voids.

The Asheville Firefighter's Association, IAFF Local 865, recently received the "North Carolina Professional Firefighters and Paramedics of North Carolina Local of the Year" award for the State of North Carolina. This is a prestigious honor for the Association. The Association is comprised of approximately 85% of the Asheville firefighters.

Fire Chief Grayson was also pleased to announce that the Asheville Chapter of Professional Firefighters and Paramedics of North Carolina received the Local of the Year Award for the Year 2001.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Vice-Mayor Bellamy moved for the adoption of Ordinance No. 2897. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 414

C. PROCLAMATION PROCLAIMING MARCH 10-16, 2002, AS "GIRL SCOUT WEEK"

Mayor Worley read the proclamation proclaiming March 10-16, 2002, as "Girl Scout Week" and recognizing March 12, 2002, as the 90th Anniversary of Girl Scouts of the USA and recognizing 2002 as the 50th Anniversary of Girl Scouts of Western North Carolina Pisgah Council. He presented the proclamation to Ms. Jennifer Hallmark, Director of Communication/ Marketing for the Girl Scouts of Western North Carolina Pisgah Council.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE RETREAT HELD ON FEBRUARY 8, 2002; THE REGULAR MEETING HELD ON FEBRUARY 12, 2002, AND THE WORKSESSION HELD ON FEBRUARY 19, 2002

B. ORDINANCE NO. 2898 – FIRST READING OF ORDINANCE GRANTING A FRANCHISE TO TROLLEY LEASING, LLC, TO OPERATE A NARRATED HISTORIC TOUR TROLLEY ON THE STREETS OF THE CITY OF ASHEVILLE

Summary: This is the consideration of the first reading of a franchise ordinance for the operation by Trolley Leasing, LLC, of a narrated historic tour trolley on the streets of the City of Asheville.

Trolley Leasing, LLC, is a Florida Limited Liability Corporation. They propose to do business in Asheville as Asheville Historic Trolley Tours. The services to be offered will include narrated historic tours of the downtown and nearby historic areas. They intend to stop at a number of local hotels. The tickets will be sold at various locations including hotels and the Asheville Visitors Center.

The tour will follow an established route and could occur up to four times per day. The business plan does not contemplate point-to-point transportation of people on a scheduled basis for a fee, but does include the possibility of charter business.

At the request of City staff, the operator has met twice with the City Traffic Engineer and he has signed off on the proposed route as not unduly interfering with the normal flow of traffic.

The vehicle is a 30-foot rubber-tired trolley with open sides where the windows would normally be. This area can be closed off with clear plastic roll down curtains in inclement weather. The operator has assured the staff that the narration from within the trolley is not audible outside the vehicle.

The vehicle is driven and the tour narrated by one person, but could also include a second person if appropriate.

It is recommended that the Council franchise the historical tour aspect of this business. A tour trolley usually runs somewhat slower than prevailing traffic and occasionally stops to embark or discharge passengers from a public street. This creates the possibility of interfering with the flow of traffic on public streets by creating unsafe situations or by blocking a lane of traffic. The franchise, as drafted, would simply require that the City's Traffic Engineer sign off on the proposed routes and be advised of any changes subject to his approval. At this time, the Traffic Engineer has reviewed and approved the routes, but the operator is conferring with the Traffic Engineer on some proposed changes.

The franchise ordinance also limits operation of the narrated tour from 7:00 a.m. to 8:00 p.m., Sunday through Thursday, and between 7:00 a.m. and 12:00 Midnight Friday and Saturday. For City-recognized holidays and days on which City-approved festivals occur in the Central Business District, the operating hours may be extended to 12:00 Midnight, regardless of the day of the week. For charter operations, the hours of operation are not limited to the above, providing that Trolley Leasing meets all local, state and federal laws regarding the operation of a chartered vehicle.

The ordinance is drawn to be as narrow as possible. It does not attempt to franchise any other part of the business operation except that part which will regularly and routinely utilize local public rights-of-way with the potential of repeated constraints to the flow of traffic.

City staff recommends City Council adopt the franchise ordinance.

The required second reading of this ordinance will occur on March 5, 2002.

ORDINANCE BOOK NO. 19 – PAGE [redacted] 416

C. RESOLUTION NO. 02-27 - RESOLUTION ESTABLISHING A NEW POLICY AUTHORIZING THE CITY MANAGER TO EXECUTE CONTRACTS AND AWARD BIDS

Summary: The current contract approval authority for the City Manager is relatively low compared to formal bid limits set in the North Carolina General Statutes and normal practices across the state, thus requiring many routine, budgeted, contracts to require approval of Council. This change, if approved, would increase the City Manager's authority consistent with state law and general practices across North Carolina.

Currently the City Manager is authorized to sign contracts up to $30,000.00. All contracts for construction and services above $30,000.00 require approval of City Council. In many cases contracts are approved by Council on the consent agenda and, therefore, require several additional weeks before the awarding of the contract can be accomplished. This slows down the process and, in several recent cases, you have noticed where staff has asked you to take special action at worksessions in order to be able to move projects forward at a more rapid pace.

Just recently the General Assembly amended General Statute §143-129 regarding the procedures for letting of public contracts. The General Assembly increased the amount of the contract needed to trigger the formal bidding requirements as outlined in the statute. The recent changes require that cities receive formal bids on construction or repair contracts that could amount to more than $100,000.00. In addition, the formal bid requirement for purchases of apparatuses, supplies, material or equipment has been raised from $30,000.00 to $50,000.00. (Note: Informal bids are still required for purchases from $5,000.00 to $49,999.99.)

In order to align local responsibilities with newly changed state law, it is recommended that the City Manager be given authority to approve contracts in the following manner:

A. Construction or repair contracts up to $100,000.00 could be approved and signed by the City Manager without City Council approval while construction contracts over $100,000.00 must be approved by City Council before the City Manager is authorized to sign the contract.

B. Purchase contracts for apparatuses, supplies, materials or equipment below $50,000.00 could be approved and signed by the City Manager without Council approval.

C. Service contracts up to $50,000.00 can be approved and signed by the City Manager without Council approval while service contracts $50,000.00 and over need City Council approval before the City Manager can sign the contract. Currently, the City Manager can sign a service contract under $30,000.00 without City Council approval. (NOTE: THERE IS NO REQUIREMENT TO BID A SERVICE CONTRACT AND THERE ARE NO MONETARY THRESHOLDS.)

All of the above recommendations are made with the understanding that there must be sufficient funding in the budget and that all contracts will be approved in accordance with federal, state and local laws. In addition, the Manager will continue to report to City Council on a quarterly basis in writing regarding the contracts of the City.

The above changes would take some of the items off the Council's agenda, which sometimes tend to lengthen it with routine matters. In addition, it would follow the tradition of allowing Council approval of formally bid construction projects and large service contracts, while allowing the City Manager to execute the remaining contracts.

The City Manager requests that Council adopt the ordinance granting authority to approve, award and execute construction contracts, purchase contracts and service contracts as outlined.

RESOLUTION BOOK NO. 27 – PAGE 69

D. RESOLUTION NO. 02-28 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH PRECISION CONTRACTING CO. TO CONSTRUCT ADA AND SIDEWALK AMENITIES ALONG THE URBAN TRAIL

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Precision Contracting Co. Inc. to construct ADA and sidewalk amenities located along the Urban Trail in downtown Asheville.

The City is in need of a contractor to perform ADA and sidewalk construction services along the Urban Trail. In accordance with N.C. Gen. Stat. sec. 143-129, formal bids for ADA and sidewalk construction services were solicited and four responses were received. The bidders are listed below:

Company	MB Part	Drug Free	Bond	Bid
Carolina Specialties Construction Inc.	Non-Compliance	Yes	Yes	$111,827.00
Precision Contracting Inc.	100%	Yes	Yes	$133,410.00
Candler Concrete Works Inc.	0%	Yes	Yes	$137,328.54
Jerry Payne Const. Co. Inc.	0%	Yes	Yes	$191,300.00

These amenities will include: The installation of seven additional handicap accessible ADA ramps. Sidewalk replacement on Haywood Street adjacent to the downtown library, which will include new handicap accessible parking spaces to accommodate side-unloading vehicles, tree grates, and streetscape amenities such as benches and trash cans. The installation of thematic, directional markers will assist downtown visitors in finding their way along the Urban Trail.

As part of a TEA 21 Grant, 80% of the project funding is reimbursable from the N. C. Dept. of Transportation. The City's 20% match has already been allocated in the Public Works Department's Capital Improvement Project budget. Under the provisions of a TEA 21 Transportation Improvement Project (project number E-4138), completion of this contract would qualify the City of Asheville for a reimbursement of $106,728.00.

The Public Works Department staff recommends City Council adopt the resolution to construct ADA and sidewalk amenities along the Urban Trail.

RESOLUTION BOOK NO. 27 – PAGE 71

E. RESOLUTION NO. 02-29 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH GREEN LIGHT ELECTRIC INC. FOR PREVENTIVE MAINTENANCE OF TRAFFIC CONTROL SIGNALS

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Green Light Electric, Inc., for preventative maintenance of traffic control devices in the amount of $79,775.

In April 2001, the Public Works and Engineering staff undertook the project of reengineering the Division of Traffic Operations, given the fact that two signals technicians resigned and the impending retirement of the traffic signal supervisor. Staff goals were to evaluate the existing level of service and determine if reengineering options were available, with the possibility of contracting out some of the existing services. Other goals were to improve overall signal services, assure system reliability, and maintain direct accountability for fundamental system functions.

City staff has determined that preventative maintenance activities could, and should be, contracted to the private sector.

It was further determined that a minimum staff level of two signal technicians, whose pay scale and classification would more closely emulate the N. C. Dept. of Transportation technicians with similar responsibilities, would be maintained to insure emergency response and guarantee that timely repairs were enacted. Their primary responsibility, beyond emergency response, is to maintain and update signal system data and functions of coordination and timing.

Bids were solicited to determine actual costs for a comprehensive preventative signal maintenance program by the private sector. The City received three bids for the work. Bids were received from the following vendors:

Green Light Electric	$119,800
ALS of North Carolina	$199,800
MB Haynes Electric	$249,945

City staff negotiated with the successful bidder to further reduce the contract amount for the required work to $79,775 per year for the next 5 years, with annual options for renewal, calculating a 3% increase per year.

The overall cost savings from the reengineering idea, along with the improved services mentioned above, is approximately $40,000 per year.

Staff requests that City Council approve a resolution authorizing the City Manager to enter into an agreement with Green Light Electric, Inc. for preventative maintenance of traffic control devices.

RESOLUTION BOOK NO. 27 – PAGE 72

F. MOTION APPROVING THE 2002 FESTIVAL AND SPECIAL EVENTS CO-SPONSORED BY THE CITY OF ASHEVILLE

Summary: The consideration of a motion approving the 2002 festival and special events scheduled co-sponsorship by the City of Asheville.

In March of 1995, the Asheville City Council adopted a festival policy. A segment of that policy requires that City Council approve the list of festivals requesting co-sponsorship with Asheville Parks & Recreation on an annual basis. In 2001, the City co-sponsored 37 events produced by 25 organizers. For 2002, the request is for 65 events produced by 35 organizers.

The criteria for inclusion as a co-sponsored event are laid out in the Outdoor Special Event Guide which are:

1. The requesting applicant must represent a non-profit organization as defined by state or federal tax law.
2. The requesting applicant/organization does not discriminate on the basis of race, color, creed, sex, sexual orientation, age, political or religious affiliation, ethnicity, national origin or economic standing.
3. The proposed event is community focused and recreational in nature.
4. The proposed event is open to the general public.
5. The proposed event has been planned to facilitate a positive impact to the community.
6. Eligibility for co-sponsorship status is based on successful completion and submittal of application, agreements, letters of petition and/or contracts within the specified period of time.

The Parks and Recreation Department recommends accepting the list of events as the only events eligible for co-sponsorship for 2002. All further requests for 2002 will be denied, and organizers will be encouraged to apply for 2003.

Councilman Mumpower pointed out the fact that the numbers have increased dramatically and City staff has been instructed to review the policy on the criteria for co-sponsorship.

G. RESOLUTION NO. 02-30 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH GLAZER ARCHITECTURE P.A. FOR RENOVATIONS AND ADDITIONS TO FIRE STATION 8 LOCATED AT 902 TUNNEL ROAD

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Glazer Architecture, P.A., in the amount of $33,000, for renovations and additions at Fire Station #8 located at 902 Tunnel Road.

Fire Station #8 was constructed in 1966 and no major building renovations have been undertaken during the life of the building. The additional growth of east Asheville required the building to house a pumping fire engine and ladder truck today. However the building was only designed for one fire company. The renovations include women's locker area, storage area, enlarged dayroom and kitchen. A new public entry, bay for a quick response vehicle, and officer office are in the scope of work. Site work to improve the traffic flow is included in the contract. The contract is an AIA Document with modifications for the City of Asheville.

The funds for this project were appropriated in previous fiscal years and no funds would be used from Fiscal Year 2001-02 appropriations.

The Fire Chief recommends City Council authorize the City Manager to sign the contract with Glazer Architecture, P.A. for renovations and additions to Fire Station #8.

RESOLUTION BOOK NO. 27 – PAGE 73

H. RESOLUTION NO. 02-31 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH GLAZER ARCHITECTURE P.A. FOR RENOVATIONS AND ADDITIONS TO FIRE STATION 3 LOCATED AT 50 OREGON AVENUE

Summary: The consideration of a resolution authorizing the City Manager to sign the contract with Glazer Architecture, P.A., in the amount of $18,600, for basic renovations and minor additions at Fire Station #3 located at 50 Oregon Avenue.

Fire Station 3 was constructed in 1976 and no major building renovations have been undertaken during the life of the building. Presently, a pumping fire engine and a ladder truck are housed within the station. The renovations include re-roofing the building, renovating the kitchen, new finishes in the dayroom, kitchen, and dorms, new HVAC for all areas except the apparatus bays, electrical and plumbing renovations as required by Code. The contract is an AIA Document with modifications for the City of Asheville.

The funds for this project were appropriated in previous fiscal years and no funds would be used from Fiscal Year 2001-02 appropriations.

The Fire Chief recommends City Council authorize the City Manager to sign the contract with Glazer Architecture, P.A. for renovations and additions to Fire Station #3.

RESOLUTION BOOK NO. 27 – PAGE 74

I. RESOLUTION NO. 02-32 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE DISPOSAL PARCEL 146 ON LINCOLN STREET IN THE EAST END/VALLEY STREET COMMUNITY

Summary: The consideration of a resolution establishing minimum price and authorizing the City Clerk to advertise an offer to purchase Disposal Parcel 146 in the East End/Valley Street Community for the amount of $3,200.

Disposal Parcel 146 is a substandard lot located on the north side of Lincoln Street comprising 3,659± square feet. The lot is irregular in shape and mostly flat about street level then sloping up sharply to the rear. The bid in the amount of $3,200 from Damon Rouse includes the proposal to combine the property with adjoining property currently owned by Mr. Rouse on Jordan Street.

Although the new tax appraisal is $5,600, this property was available for several years at the previous tax value of $2,000 and then at $4,900 with no offers having been received. A letter of opinion from Ben Mansell CRS, GRI with RE/MAX Advantage Realty, indicates that due to the limited utility of the property to any buyer except an adjoining owner, the market value of the property would be approximately $3,000.

Approval of the resolution will establish the minimum price in the amount of $3,200 and initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Community Development staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE 75

K. RESOLUTION NO. 02-33 - RESOLUTION DIRECTING THE CITY CLERK TO PUBLISH A NOTICE REGARDING THE PROPOSED SALE OF REAL PROPERTY AT 9-13 BILTMORE AVENUE, ASHEVILLE, N.C., AND SETTING A PUBLIC HEARING ON MARCH 12, 2002

Summary: The consideration of a resolution setting a public hearing and directing the City Clerk to publish a notice regarding proposed sale of real property at 9 -13 Biltmore Avenue, Asheville, N.C.

The property at 9 -13 Biltmore Avenue is located about 125 feet south of Pack Square. It is improved with a store front building with three bays dating from the 1920s. The land area comprises 14,469 square feet and the total combined building area is approximately 6,529 square feet. The lot extends to the east side of South Lexington Avenue, about 125 feet south of the intersection with Patton Avenue, and is improved with marked parking spaces on an asphalt surface. The lot is rectangular in shape and sloped to street level access. The appraised value of the property is $530,000.

Asheville Area Arts Council has submitted a proposal to purchase the property minus the air rights over the rear parking lot in the amount of $462,500. The bid from the Arts Council includes the proposal to cooperate with the eventual purchaser of the air rights over the parking lot to allow construction a new building containing parking, office, retail and/or residential units on South Lexington Avenue. The new building would be constructed above the first level by the purchaser of the air rights. The calculated value of the air rights retained by the City to be sold separately is $67,500. The bid from the Arts Council reflects the appraised value minus the air rights. The City has a bid in hand from a redeveloper for the air rights. The bid from the Arts Council includes an offer of $339,000 cash and a request that the City finance $123,500 of the purchase price. If the bid of the Arts Council is accepted, Community Development staff recommends evidence of funding or financing be required within 60 days of acceptance.

Approval of the resolution will schedule a public hearing on March 12, 2002, and initiate the sale of the property through a private sale as provided in N. C. Gen. Stat. sec. 160A-457(4).

Community Development staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE 76

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilwoman Jones moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Ellis and carried unanimously.

III. PUBLIC HEARINGS:

A. CONTINUATION OF PUBLIC HEARING TO REZONE A PORTION OF PROPERTY LOCATED AT 1153 SWEETEN CREEK ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT

Mayor Worley said that this public hearing was opened on October 23, 2001, and continued several times.

On February 19, 2002, a letter was received from Ms. Diane Smoak, representing the petitioner, as follows: "We are requesting that our rezoning hearing for 1153 Sweeten Creek Road be rescheduled for the May meeting. We have been trying to work with the citizens of the Shiloh community to rezone this property and apologize for the inconvenience to the council but feel a mutually agreeable plan for the property would be good for the community as well as the owner of the property. Thank you in advance for working with us."

Councilman Ellis moved to continue the public hearing to May 28, 2002. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

B. PUBLIC HEARING TO CONSIDER THE VOLUNTARY ANNEXATION OF 2270 HENDERSONVILLE ROAD KNOWN AS ARDEN SQUARE SHOPPING CENTER

ORDINANCE NO. 2899 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE 2270 HENDERSONVILLE ROAD KNOWN AS ARDEN SQUARE SHOPPING CENTER.

Mayor Worley opened the public hearing at 5:17 p.m.

Urban Planner Paul Benson said that this is the consideration of an ordinance to consider the voluntary annexation for property located at 2270 Hendersonville Road, site of the Arden Square Shopping Center. This public hearing was advertised on February 15, 2002.

Mr. Winston W. Pulliam, sole owner of Arden Square LLC, has submitted an annexation petition for property located at 2270 Hendersonville Road.

This property is not contiguous to the City, but is located within the Arden annexation area, for which the annexation ordinance has been adopted with an effective date of June 30, 2002. The location of the property is further described as being on the east side of Hendersonville Road, south of Royal Pines Drive. The annexation area includes one lot, PIN No. 9654-09-15-9196, and consists of 2.2 acres.

City staff recommends City Council adopt the ordinance annexing 2270 Hendersonville Road.

Mayor Worley closed the public hearing at 5:22 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Ellis moved for the adoption of Ordinance No. 2899. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 421

C. PUBLIC HEARING TO CONSIDER THE REZONING OF TWO LOTS LOCATED AT THE CORNER OF HENDERSONVILLE ROAD AND MILLS GAP ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT TO HIGHWAY BUSINESS DISTRICT

ORDINANCE NO. 2900 - ORDINANCE TO REZONE TWO LOTS LOCATED AT THE CORNER OF HENDERSONVILLE ROAD AND MILLS GAP ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT TO HIGHWAY BUSINESS DISTRICT

Mayor Worley opened the public hearing at 5:23 p.m.

Urban Planner Jeff Tacy said that this is consideration of an ordinance to rezone two lots located at the corner of Hendersonville Road and Mills Gap Road from Commercial Industrial District to Highway Business District. This public hearing was advertised on February 15 and 22, 2002.

The Planning and Development Department has initiated this rezoning request (.88 acre) (PIN Nos. 9655.09-25-0433 and 1468) in an effort maintain the commercial character of the Hendersonville Road corridor. The Highway Business District is established to address the needs of commercial development along major thoroughfares. The district permits a wide range of residential, recreational, institutional, public/semi-public, office/business and other land uses. The majority of the properties in the vicinity that front on Hendersonville Road are zoned Highway Business. There are no industrial uses fronting on Hendersonville Road in the immediate area. Based on the purpose of the HB District and the development patterns along Hendersonville Road, HB zoning would be more appropriate than Commercial Industrial. HB zoning would prevent the location of incompatible uses in the area and promote the location of uses similar to those in existence. Next month, the Planning and Development Department will request the same rezoning for the property on the southeast corner of Hendersonville Road and Mills Gap Road. This will eliminate nearly all of the Commercial Industrial zoning fronting on Hendersonville Road at the Mills Gap Road intersection.

It should be noted that the current owner of the subject property has submitted a letter of agreement for the rezoning request.

The Planning and Zoning Commission voted unanimously to recommend approval of the rezoning of the property located at the northeast corner of Hendersonville Road and Mills Gap Road from Commercial Industrial to Highway Business. The Planning and Development staff recommends approval of the requested rezoning.

Councilman Peterson said that at their recent retreat City staff advised Council that the City needs to preserve property that is zoned industrial to encourage more industrial development in the City. This rezoning request is doing just the opposite. He wondered if by changing the zoning on this property, are we making it easier for the properties behind it to be more justified in changing to a more commercial use vs. a more industrial use. He admitted that it's easy for the City to say they need to preserve the industrial zones, but hard to enforce if property owners can get better use out of their property if zoned commercial.

Mr. Tacy said that these properties are not good from a planning or land use type perspective to be preserved as industrial. He pointed out that there are a lot of uses permitted in the industrial district that would not fit into the long-range plan for the Hendersonville Road corridor.

Planning & Development Director Scott Shuford said that at this particular location it is very unlikely that the property would be developed for anything industrial. In fact, with very rare exceptions, when property is placed in commercial industrial zoning classifications, the end result is that the commercial aspect usually gets developed. He advised Council that in the near future Planning staff will be bringing forward to Council an amendment that will allow more industrial development to occur in our commercial zoning classifications.

Mayor Worley closed the public hearing at 5:33 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 2900. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE [redacted] 423

IV. UNFINISHED BUSINESS:

A. AMENDMENT TO CITY COUNCIL POLICY ON RULES FOR BOARDS AND COMMISSIONS REGARDING U.S. CITIZENSHIP AS A QUALIFICATION FOR APPOINTMENT

Mayor Worley said that this issue has been referred to the City's Board and Commission Committee and will not be discussed at this meeting.

V. NEW BUSINESS:

A. RESOLUTION NO. 02-34 - RESOLUTION APPROVING FIVE LOANS FROM THE CITY'S HOUSING TRUST FUND

Councilman Peterson moved to excuse Vice-Mayor Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilwoman Jones and carried unanimously.

Community Development Director Charlotte Caplan said that this is the consideration of a resolution to award five loans from the City's Housing Trust Fund.

Ms. Caplan explained the 2nd Year Housing Trust Fund Program. She pointed out the concerns of Year 1 and explained the focus group, which was formed to address those concerns. She explained why repayments should be deferred: (1) funding structure depends on target income group; (2) making housing affordable at 80% median income requires incentives; and (3) making housing affordable at less than 50% median income requires subsidy. She explained the growth of the Fund through repayments vs. level of subsidy and then gave examples of finding the right loan structure.

Ms. Caplan said that available funds in the City Housing Trust fund stand at $512,000. This comprises $400,000 in new Fiscal Year 2002 funds and approximately $112,000 in loan repayments. Applications for these funds were invited by letter and advertisement on December 7, 2001.

Eight applications were received by the January 18 deadline, requesting loans totaling $840,000. They were reviewed by a five-person committee of City staff and outside experts, using criteria developed by a broad-based focus group last fall. The review committee reported to the Housing and Community Development Committee, which has recommended the five highest ranked applications for a total of $520,000 in loans, producing 26 affordable housing units. They are:

1. WNC Housing, Inc. – $100,000 for "Independence Cottages", five 1-bedroom houses for rent to very low income individuals with severe and persistent mental illness; on Clemmons Street and Spinet Street.

2. Mountain Housing Opportunities – $80,000 for construction of a 4-bedroom house for sale and rehabilitation of two dilapidated houses, one for sale and one as a rental duplex; on Jefferson Street, Clingman Avenue, and Rector Street.
3. Tim & Wendy Vorst – $40,000 for a duplex with a 1-bedroom and a 3-bedroom apartment to rent on Brookshire Street.
4. Tim & Wendy Vorst – $120,000 for a 6-plex of 1-bedroom apartments to rent on Hendersonville Road.
5. Carolina Custom Exteriors – $180,000 for a 3-bedroom house for sale, and two duplexes and a 4-plex to rent on Galax Street. The proposal includes an offer to buy the City-owned site on Galax Street.

Proposed loan terms are as follows:

WNC Housing:	2% interest payable annually; first year's interest and all principal repayment deferred for 30 years.
Mountain Housing:	Rental duplex: 2% interest with all payments deferred for 20 years; Single-family homes: x% interest with all payments deferred for 30 years, where x = the rate of appreciation of the properties.
Tim & Wendy Vorst:	2% for 30 years, amortizing, on both projects.
CC Exteriors:	2% construction loan only on the single-family house; 2% for 15 years amortizing on the rental units.

City staff recommends approval of the five loans from the City's Housing Trust Fund.

Councilman Dunn felt that the Housing & Community Development Committee (of which he is a member) should carefully review using the Housing Trust Fund monies to restore historic sites. He asked that if a focus group is again formed, he felt it should be more balanced by having an equal number of developers, non-profits and for-profits.

Upon inquiry of Councilman Dunn, Ms. Caplan said that since property in the extraterritorial jurisdiction does not provide tax revenue, City Council did not wish Housing Trust Fund monies to be expended outside the City limits.

Councilwoman Jones, member of the Housing & Community Development Committee, felt this would be a good time to ask the County to be a part of the Housing Trust Fund. She felt these five recommendations represent a balance of rehab and new construction; rental and sale; different types of dwellings as far as duplexes and single-family homes; is a mixture of private and non-profit; and are different parts of the City. She stressed that part of what we must do as policy and decision makers is be good stewards of hard earned tax money. However, the "bang-for-the-buck" is only one criterion in the bottom line and will not always be for the best decisions. When we talk about balance, we need to bring in other criteria as well.

Councilman Mumpower felt that accountability is a good criterion, but also defends getting the most benefit out of the monies that we have to spend.

Upon inquiry of Councilman Ellis, Ms. Caplan said that the City would gain 26 affordable housing units from the combined $520,000 loans this year.

Mayor Worley gave a brief history of the Housing Trust Fund and said that City Council has never adopted policies to apply to this Fund. He suggested the Housing & Community Development Committee look at adopting some policies on how the Trust Fund is administered in the future. His concern has to do with the no payment loans where the loans are for 20 or 30 years and there is no principle being returned and no opportunity to revolve that money over and over again within the community. He does understand how incentives and subsidies are needed. Perhaps Community Development Block Grant (CDBG) funds could be used more effectively as a subsidy. He also suggested we look at our total funds available for affordable housing and see which fund sources are best for which aspects of affordable housing.

Councilwoman Jones said that CDBG funds and the Housing Trust fund are not enough to fix affordable housing problems in Asheville. We need to find more creative solutions and be open to land use planning if we are going to make a difference in affordable housing. Council needs to remember that while we are growing this Fund and using it wisely, let's not forget we are putting people in homes.

Councilman Dunn said that the Housing & Community Development Committee is already talking about some of the issues mentioned at this meeting.

Councilman Ellis asked if all of the new units pay property taxes. Ms. Caplan responded that the units owned and maintained by WNC Housing for special needs people will not be on the tax rolls – all the other units will be.

Mr. Walter Plaue, City resident, said that he was a member of the focus group that addressed the first year concerns. They agreed that (1) no more than 30% of the loan funds in any year should be deferred; (2) no more than 30% of the loan funds in any year should be at 0% interest; and (3) there should be a creation of a balanced citizens advisory committee for the 2002-03 year to be appointed by the City Council by the Spring of 2002. He agreed that this is not simply the matter of the best dollar, but that there needs to be a consideration of the human element. He personally felt that the City should look to expand the Fund into the ETJ areas. Granted those properties may not pay City taxes, but already one of the recommendations today is for a project that is not going to pay City taxes. By going into the ETJ we can find land that is less expensive and that is a key element in giving the people better units to live in.

Mr. Fred English, City resident, felt that the City should not be putting any of the Trust Fund into historic properties.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Peterson moved for the adoption of Resolution No. 02-34. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 77

Vice-Mayor Bellamy said that there are other ways to address the issues of affordable housing and some is looking at our policies and how we interpret those policies. We need to think about what people want in their existing neighborhoods -- something that blends in with the character of the neighborhood. We need to look at more collaboration with non-profits and for-profits and look at how we can work together. She supported inclusionary housing, which the City needs legislative authority.

B. ORDINANCE NO. 2901 - ORDINANCE RESTRUCTURING AND INCREASING PENALTIES FOR ANIMAL CONTROL VIOLATIONS

Police Chief Will Annarino said that this is the consideration of an ordinance to restructure and increase penalties for animal control violations.

The current penalty for animal control violations is $10.00 for the first offense; $20.00 for the second offense within 12 months of the first; and succeeding offenses within 12 months of a prior offense result in increased penalties in $10.00 increments per offense. Penalties of these amounts have proven ineffective in promoting voluntary compliance with animal control regulations. In addition, collection of penalties is a problem because of the costs of collecting delinquent penalties exceeds the value of the revenue.

It is proposed that the penalties be increased as follows:

- First offense --$50.00
- Second offense within 12 months ----------------$100.00
- Third offense within 12 months--------------------$150.00
- Succeeding offenses within 12 months result in increased penalties in $50.00 increments per offense. (For example the fourth offense within 12 months would carry a $200.00 penalty; the fifth would carry a $250.00 penalty, and so on.) The maximum penalty is set at $500.00.
- Unpaid penalties would be declared delinquent after the 30th day from the issuance of the citation and thereafter for each additional 30-day period of delinquency.
- Delinquency fee-------$50.00. (This is similar to the parking penalty delinquency schedule which provides for a $25 fee for each 30 day delinquency period.)

The following is a survey of seven cities' and counties' which have animal control penalties (none provide for a delinquency fee for non-payment):

- Chapel Hill: $50 per offense; if payment is not received a criminal summons is issued, to $500.
- Buncombe County: Each offense not to exceed $500 at the discretion of the Animal Control Officer.
- Lee County: 1st offense $25; 2nd $50; 3rd $250 and/or confiscation of animal.
- High Point: $50 per offense.
- Salisbury: 1st offense $25; 2nd $50; 3rd $75; 4th $250. Loose dog is $50.
- Sanford: 1st offense $50; 2nd $100; 3rd $250 and/or confiscation of animal.
- Cary: 1st offense $20; 2nd $50; 3rd $75; 4th $100; 5th $250 and confiscation of animal.

Public education of the penalty structure is an important component of the implementation plan. Asheville's Government Access Channel, the "City Works" section of the Asheville Citizen-Times, internet postings and other methods will be used to inform the public. The effective date of the ordinance will allow a 60-day window of opportunity for staff to carry out public education activities.

Spay and neuter alternatives to penalties will be considered on a case-by-case basis.

The contract for animal control services the City has with the Asheville Humane Society specifies that all civil penalties and license fees collected will be retained by the Humane Society to off-set expenses associated with enforcing the annual license fee, sterilization of animals adopted from the shelter, and public education. For 2001, approximately $1,700 in penalties and $10,000 in license fees were collected.

City staff recommends Council adopt the ordinance.

Councilman Peterson asked if the City considered confiscation of animal as the last resort as some cities and counties do. Police Chief Annarino said that administratively and realistically they don't get to that point. Confiscation of animals generally means a violation of some type of criminal offense.

Vice-Mayor Bellamy said that she people have brought to her attention problems with the Humane Society not enforcing the ordinance and their inability of responding in a timely manner. Police Chief Annarino said that the City's contract with the Humane Society is in the amount of $170,000 and expires on July 1 of this year. He noted that both parties are currently evaluating the contract. They do have a new director who is working on those issues. She has instituted training and certification for her officers, is working to enforce compliance and has supported the increasing of fees. This will help them bring in revenue to help offset some of their costs.

The following residents spoke in support of increasing the penalties for animal control violations:

Mr. Bob Brummond, Haw Creek resident
Mr. Walter Plaue, City resident
Mr. Robert Maddox, City resident
Mr. Fred English, Haw Creek resident
Mr. Lynwood Crump, Shiloh resident
Mr. Bernard Lancaster, Haw Creek resident
Mr. Thomas Penland, Haw Creek resident
Mr. Chris Pelly, President of the Community Association of Haw Creek

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Dunn moved for the adoption of Ordinance No. 2901. This motion was seconded by Vice-Mayor Bellamy.

Councilman Mumpower understands that there is a clear need for this increase of fees, however, felt that this is an extreme percentage of increase. He would prefer to support of a sequential increase in fees. He felt that our fees are higher than the healthier models in the survey, specifically speaking to Lee County, Salisbury and Cary. He was also concerned that we are changing the fees before we clarify our ordinance. He felt the enforcement part is as least as important as the fees, if not more. He felt this should be a more reasonable fee structure, for example $50 first offense and $25 increments from there on.

The motion made by Councilman Dunn and seconded by Vice-Mayor Bellamy and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 19 - PAGE [illegible] 425

At 6:55 p.m., Mayor Worley announced a short break.

B. RESOLUTION NO. 02-35 - RESOLUTION APPOINTING MEMBERS TO THE BOARD OF ADJUSTMENT

Vice-Mayor Bellamy said that this is the consideration of appointing members to the Board of Adjustment.

The terms of Lauren Malinoff (Regular), Dennis Hodgson (Regular) and Joseph Brady (Alternate) on the Board of Adjustment expired on January 21, 2001.

On February 5, 2002, City Council interviewed Chris Goodwin, Lauren Malinoff, Dee Knight, Richard Fort, Robert Smith, Ned Guttman and Steven Sizemore. On February 12, 2002, City Council interviewed Beverly Robinson, Tom Muncy and James Mills.

Chris Goodwin received 0 votes; Lauren Malinoff received 3 votes; Dee Knight received 0 votes; Richard Fort received 3 votes; Robert Smith received 0 votes, Ned Guttman received 1 vote, Steven Sizemore received 4 votes; Beverly Robinson received 4 votes; Tom Muncy received 6 votes; and James Mills received 0 votes. Because of a tie between Beverly Robinson and Steven Sizemore, another vote was taken: Beverly Robinson received 5 votes and Steven Sizemore received 2 votes.

Vice-Mayor Bellamy moved to appoint Tom Muncy and Beverly Robinson, as Regular members, to each serve a three year term respectively, terms to begin immediately and expire on January 21, 2005; and to appoint Steven Sizemore, as an Alternate member, to serve a three year term, term to begin immediately and expire January 21, 2005. This motion was seconded by Councilman Mumpower and carried on a 6-1 vote with Councilman Peterson voting "no".

RESOLUTION BOOK NO. 27 – PAGE 78

C. RESOLUTION NO. 02-36 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE-BUNCOMBE COMMUNITY RELATIONS COUNCIL

Vice-Mayor Bellamy said that this is the consideration of appointing members to the A-B Community Relations Council.

The terms of Bernadette Thompson and Cassandra Ingram, as members on the Asheville-Buncombe Community Relations Council, expired on December 31, 2001.

On January 22, 2002, City Council interviewed Rod Whiteside, Shirley Dillingham and Leslie Hennessee. On February 5, 2002, City Council interviewed Dan Comer.

Mayor Worley noted that he had received an e-mail from Rod Whiteside which stated he did not wish to be considered for the A-B Community Relations Council appointment.

Shirley Dillingham received 2 votes; Leslie Hennessee received 6 votes and Dan Comer received 6 votes.

Vice-Mayor Bellamy moved to appoint Leslie Hennessee and Dan Comer to each serve a three year term respectively, terms to begin immediately and expire on December 31, 2004, or until their successor have been appointed. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 79

D. RESOLUTION NO. 02-37 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE-BUNCOMBE FAIR HOUSING COMMISSION

Vice-Mayor Bellamy said that this is the consideration of appointing members to the Asheville-Buncombe Fair Housing Commission.

The terms of Christiana Tugman, Kim Moore and Jim McCulley, as members on the Asheville-Buncombe Fair Housing Commission, expired on December 31, 2001.

On February 12, 2002, City Council interviewed David Clegg.

City Council noted how impressed they were with Mr. Clegg.

294

Vice-Mayor Bellamy moved to reappoint Jim McCulley, Kim Moore and Christiana Tugman to each serve a three year term respectively, terms to expire December 31, 2004, or until their successors have been appointed. This motion was seconded by Councilman Mumpower and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 80

E. RESOLUTION NO. 02-38 - RESOLUTION APPOINTING MEMBERS TO THE TRANSIT COMMISSION

Vice-Mayor Bellamy said that this is the consideration of appointing members to the Asheville Transit Commission.

The term of Claudia Nix, Ron Lambe, Althea Goode and Willie McDaniel, as members on the Asheville Transit Commission, expired on December 31, 2001.

On January 22, 2002, City Council interviewed Mickey Mahaffee and on February 12, 2002, City Council interviewed Richard Fosmoen.

Mickey Mahaffey received 5 votes and Richard Fosmoen received 2 votes.

Vice-Mayor Bellamy moved to reappoint Claudia Nix, Ron Lambe and Althea Goode to each serve an additional two year term, terms to expire December 31, 2003, or until their successor have been appointed; and to appoint Mickey Mahaffey to serve a two year term, term to begin immediately and expire December 31, 2003, or until his successor has been appointed. This motion was seconded by Councilman Mumpower and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 81

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of February 8-21, 2002: Perry Christopher (Parks & Recreation), Asheville Smoke (Civic Center), Jean Arrington (Water), Kent Cook (Streets) and Scott Bralley (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

A. COMMENTS BY FRED ENGLISH

Mr. Fred English, City resident, spoke about several matters concerning the Asheville Smoke, the Asheville Altitude, affordable housing, 2002 revaluation, and the City's budget as a result of the State's budget cuts.

B. COMMENTS BY KEVIN NUTTELL

Mr. Kevin Nuttell, representing the N.C. AIDS Policy Center, spoke about his dissatisfaction about the services provided by local AIDS service organizations.

Mayor Worley stated that the comments Mr. Nuttell makes before Council are not relevant to the tasks of City Council. He suggested Mr. Nuttell to only bring matters to Council's attention which are in their preview.

C. COMMENTS BY NELDA HOLDER

Ms. Nelda Holder, City resident and President of the League of Women Voters of Asheville and Buncombe County, presented City Council with a petition containing 45 signatures which reads "WHEREAS, the cost of running for and winning elective office has been escalating throughout the nation; and WHEREAS, this escalation has reached to municipal election level; and WHEREAS, this escalation results in a de facto Wealth Primary, limiting access to public office to those with wealth or access to the wealth of others; and WHEREAS, this Wealth Primary seriously erodes the principle of one person, one vote. We citizens of Asheville, North Carolina, do hereby resolve to petition the City Council to appoint a Citizens Committee to study alternative methods of municipal campaign finance reform and to recommend adoption of a specific ordinance for comprehensive campaign finance reform to the City Council by July, 2002." She said that the League of Women Voters will volunteer in any way they can to help.

D. COMMENTS BY SHARON MARTIN

Ms. Sharon Martin, City resident, spoke to Council about their board and commission appointment process and also about campaign finance reform.

E. COMMENTS BY BEN DARUDY

Mr. Ben Darudy, City resident, spoke about how the unusual people are the heart of downtown Asheville and the need for affordable housing.

F. COMMENTS BY REBECCA CAMPBELL

Ms. Rebecca Campbell, City resident, spoke about the need for campaign finance reform.

G. COMMENTS BY JOHN YARNALL

Mr. John Yarnall, City resident, spoke about the need for campaign finance reform and the need for the changes to be make before the next election.

H. COMMENTS BY DENNIS JUSTICE

Mr. Dennis Justice, Fletcher resident, spoke to Council about the lack of practice time on the ice for the Asheville Smoke. He felt the City needs to create a sports authority for the Asheville area.

I. COMMENTS BY LYNWOOD CRUMP

Mr. Lynwood Crump spoke about the need for additional police.

J. CLOSESD SESSION

At 8:08 p.m., Councilwoman Jones moved to go into closed session to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including proceedings involving the policy pay grievance decision by the Civil Service Board – G.S. 143-318.11 (a) (3). This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

At 9:37 p.m., Vice-Mayor Bellamy moved to come out of closed session. This motion was seconded by Councilwoman Jones and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:37 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – March 5, 2002 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

Agreement with NC DOT for Black Mountain Bus Route

Summary: The consideration of a resolution authorizing the Mayor to enter into an agreement with the N. C. Dept. of Transportation (NC DOT) for the reimbursement of funds to be expended for service to Black Mountain.

The NC DOT has tendered a contract to the Asheville Transit System (City of Asheville) in which the NC DOT will contribute funds for bus service to Black Mountain. The Asheville Transit System will operate said service.

In no event will the City of Asheville be required to contribute financially to this route. All financing will be provided by the State (maximum of $92, 708), the Town of Black Mountain ($13,360), Mountain Mobility ($5,000), and Fare Box Revenue ($3,882). The total budgeted cost is $114,950. The City`of Asheville is specifically exempted from any liability towards operating costs. If funds budgeted are not sufficient, the operation will either be additionally funded by some combination of the above, or it will be terminated. The City of Asheville will not be liable for any additional cost of operation under this contract.

The contract has a period of performance of 14 months - from March 1, 2002, through May 1, 2003. During that time, the Asheville Transit System must provide 12 consecutive months of service, within the above financial constraints.

The NC DOT requires the Mayor to sign the contract for this service, and will then return a copy signed by the state Secretary of Transportation. Commencement of service is contingent upon receiving this signed contract from the NC DOT. Service will start as soon as possible after receipt of the fully executed contract.

Black Mountain will be served four times a day, six days a week, except for holidays during which the transit system does not operate. Thus, Black Mountain will be served 306 days during the twelve-month period.

City staff recommends adoption of the resolution.

Clerk to advertise offer to purchase property on Galax Avenue

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer to purchase property on Galax Avenue in the West Asheville community.

Michael A. Pressley submitted a bid in the amount of $25,800 for the purchase of land on Galax Avenue in the West Asheville Community. Said bid is not less than the tax appraisal of $25,800.

The land on Galax Avenue is a residential zoned lot beyond the end of the street improvements of Galax Avenue. Said lot is 0.94 acre. The bid from Michael A. Pressley includes the proposal to combine the property with adjacent property he owns and construct nine units of affordable housing on the property. Mr. Pressley's project has been recommended for a Housing Trust Fund Loan and is consistent with the policy of encouraging infill development.

The property was designated as surplus property in 1997 and has been available for sale since that time.

Approval of the resolution will initiate the sale of the property through the upset bid process as provided in N. C. G. S. 160A-269.

Community Development staff recommends adoption of the resolution.

Application to Land, Water & Conservation Fund for Grant for Azalea Road Park

Summary: The consideration of a resolution to apply for and enter into an agreement with the North Carolina Department of Environment and Natural Resources, Division of Parks and Recreation for funds through the Land, Water and Conservation Fund to assist with the development of outdoor recreation facilities.

Azalea Road Park represents the City of Asheville's first phase of a major greenway and park system being developed along the Swannanoa River on Azalea Road in east Asheville. If this grant is received, the funds will be used to assist with the construction of the first phase of the Park. This first phase will include the development of two fields of the four field soccer complex, restrooms, concession, kayak launch, two picnic shelters, a large playground, disc golf, fitness and greenway trails, river observation decks, restoration of the Thomas Wolfe cabin, and parking areas.

The Parks and Recreation Department, Western North Carolina Soccer Foundation and RiverLink are in partnership to implement an ambitious fundraising plan to raise $3 million to build the first phase of the Park.

The Parks and Recreation Department is requesting $500,000 in grant funds from the Land, Water and Conservation Fund, which requires a 50% cash or in-kind match. The cash match is available through the Western North Carolina Soccer Foundation via the John B. Lewis Family Foundation, and the in-kind match (approximately 25%) is available in labor, equipment, and project management in the Parks and Recreation Department.

The Parks and Recreation Department recommends the City of Asheville to apply for and enter into an agreement for grant funds to assist with the construction of Azalea Road Park Phase I.

New Street Name of Myra Place off East Starnes Cove Road

Summary: The consideration of a resolution accepting the new proposed street name "Myra Place."

Dave Ball, owner of lots in Maple Grove Subdivision, has petitioned the City of Asheville to accept the street name " Myra Place." The new street will begin at East Starnes Cove Road and end at cul-de-sac on Myra Place.

City staff recommends adoption of the resolution.

Clerk to Publish Notice of Intent to Lease Space at 45 Wall Street

Summary: The consideration of a resolution directing the City Clerk to publish a Notice of Intent regarding a proposed lease with the Asheville Performing Arts Alliance for space at 45 Wall Street.

The property at 45 Wall Street is located in the Wall Street Parking Garage owned by the City of Asheville. The City has previously leased the space, but currently the space is vacant.

The Asheville Performing Arts Alliance (APAA) has offered to enter into a lease for the space. The proposed lease will enable APAA to operate offices and a small performing theater at the site. There is a provision which allows either the Lessor or the Lessee to terminate the agreement upon 180 days notice. The term of the License Agreement will be 9 years and 11 months. APAA will pay rent in the amount of $1,050 for the first six years the rent will increase annually thereafter based on the Consumer Price Index compared to the date the lease originated. In addition to the rent, APAA will up-fit the space at its own expense.

Approval of the resolution will authorize the City Clerk to publish a Notice of Intent to enter into the Lease.

Finance Department and Planning Department staffs recommend adoption of the resolution.

City staff answered various questions from Councilman Dunn with regard to this lease.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

UDO AMENDMENT REVIEW

City Attorney Oast said that these Unified Development Ordinance amendments are being brought before City Council in order that staff may respond to questions Council may have prior to the public hearings, which are scheduled for March 12, 2002. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Revisions to the Sidewalk Regulations

City Engineer Cathy Ball said that this is the consideration of an ordinance amending the Unified Development Ordinance (UDO) related sidewalk regulations.

In May of 1997, sidewalks requirements were adopted as part of the final adoption of the UDO. In March of 2000, the sidewalk requirements were revised to include the provisions for allowing a "fee in lieu of" constructing sidewalks under certain conditions.

In 2000, staff began working with the development community to review the conditions for allowing a fee in lieu of constructing sidewalks. This group consisted of developers, affordable housing advocates and staff. The group agreed that some additional changes needed to be made in the sidewalk requirements (Section 7-11-17) for the following reasons:

- The group had concerns regarding the fact that the ordinance did not have an exemption for properties that had low pedestrian impact and were on relatively low vehicular volume streets.
- The development community, while not happy to pay additional costs of sidewalks, supported paying the fee in lieu of constructing the sidewalk so long as the money was used to install sidewalks in places where it was needed. Developers requested more flexibility in being able to pay the fee in lieu of constructing the sidewalk.
- Staff was concerned about maintenance issues that would arise from having sidewalks installed piecemeal. This means that the sidewalks would age at varying degrees and need to be replaced at different times, thus increasing the maintenance and replacement costs.
- The development community requested that a more expedient appeal process be developed. Currently they are required to go to City Council for a waiver to the sidewalk requirements.
- The group requested that clarification be made as it relates to sidewalk requirements on private and public streets.

As a result of these concerns, staff began exploring ways of improving the sidewalk requirements. The revisions that you are being asked to approve include most of the concerns of the task force.

The revisions include the following changes:

- Establishing a threshold for requiring sidewalks or a fee in lieu of constructing sidewalks. We recommend that this threshold be 300 Average Daily Traffic (ADT) volume currently or projected for the next 5 years. (Provided the street is not listed on the Pedestrian Thoroughfare Plan.)
- Requiring sidewalks to be constructed on all new and improved streets. A large cost of the sidewalk includes mobilization and grading. When a street is being constructed or reconstructed, the mobilization and grading for the sidewalk can occur in conjunction with the roadway.
- Allowing developers to pay the fee in lieu of constructing the sidewalk unless the sidewalk is on the Pedestrian Thoroughfare Plan.
- Providing for an appeal process that allows the develop to appeal to a committee consisting of the City Manager, or his designee, and two other Department Directors, excluding the City Engineer.
- Clarifying that public and private streets have the same requirements with regard to sidewalks.

In addition, an amendment to the Fees and Charges Manual is requested. She said the amendment would be to add the following sentence: "In the event that a fee is allowed for an economic development project, the developer will be allowed to pay 50% of the fee, provided that the project is eligible for the City of Asheville Economic Development Incentive Grant as defined by the City of Asheville Economic Development Incentive Policy and administered by the Economic Development Director."

Nothing in the revised ordinance would prohibit a developer from installing sidewalk as opposed to paying the fee in lieu of constructing the sidewalk. The developer always has the option of installing the sidewalk adjacent to their project.

The Planning and Zoning Commission approved the revisions to the sidewalk regulations on February 6, 2002. The approval vote was unanimous with the following two suggested changes:

(1) Allow the developer to pay the fee in lieu of constructing sidewalk if the sidewalk is listed on the Pedestrian Thoroughfare Plan so long as the project is on a N. C. Dept. of Transportation or City of Asheville funded project.

(2) Request an easement from the developer for future sidewalk installation even if they are exempt from installing the sidewalk or paying the fee in lieu of constructing the sidewalk.

Staff presented the concept of this proposal at the Development Issues Forum in September 2001 and at the February meeting of the Council of Independent Business Owners. Both groups had a favorable response to the revisions.

Staff requests that City Council adopt the revisions to Section 7-11-7 of the Unified Development Ordinance related to sidewalk regulations and the amendment to the Fees & Charges Manual.

Ms. Ball answered various questions from City Council, some being, but are not limited to: who set the current fees; how were those fees determined; instead of allowing a developer to pay a fee in lieu of or build sidewalks on his project, can the developer construct the same length elsewhere in the City; and can the developer build nature trails instead of sidewalks.

Revisions to the Floodplain Regulations

Ms. Natalie Berry, Stormwater/Erosion Control Coordinator said that this is the consideration of an ordinance amending the Unified Development Ordinance (UDO) regarding floodplain regulations.

Below are the recommended amendments to the City's flood control standards. All of the revisions are housekeeping in nature.

- Revising the ordinance to give the City Engineer authority to enforce this section of the UDO in place of the Planning and Development Director, adding a few definitions, amending a few definitions and changing the name of the Erosion Control Review Committee to Specifications Review Committee.
- Expanding the duties of the Specifications Review Committee to be able to interpret and make recommendations on variances to the flood ordinance to the Board of Adjustment, leaving final authority vested in the Board of Adjustment.
- Delete the paragraph entitled "exemptions" out of the flood ordinance. The National Flood Insurance Program Western Coordinator recommends the deletion due to non-compliance with Federal Emergency Management Agency (FEMA) regulations.
- Adding an option under the unnumbered "A" zone section. When the base flood elevation (BFE) is not known this is known as an unnumbered "A" zone. A structure may be constructed if the lowest finished floor is built at least three (3) feet above the highest adjacent grade. This option will help the property owner(s) who could not afford to hire a professional engineer to do a flood study to determine the base flood elevation (BFE).
- Remove wet flood proofing option "c" under the flood proofing heading in Section 7-12-1(i)(2). The National Flood Insurance Program Western Coordinator recommends the removal of this option for the City of Asheville's UDO. The NFIP does not allow wet flood proofing in lieu of meeting the lowest floor elevation requirements. The City's ordinance currently is out of compliance with the NFIP regulations by allowing this option and we could be at risk of losing the program. This is not an option under FEMA model ordinance.
- Include the flood ordinance under the enforcement and penalties for civil penalties when violations occur.

The Planning and Zoning Commission voted 6 to 1 to recommend approval of the proposed ordinance amendment. The opposing vote was due to the changes in no longer allowing wet flood proofing on structures in the floodway.

Staff recommends that City Council adopt the proposed amendments to the Floodplain Regulations of the Unified Development Ordinance.

When Councilman Mumpower expressed his concern over the $100 per day violation, City Attorney Oast explained that that figure is standard in North Carolina and not extreme at all.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to proceed with the appropriate public hearings on March 12, 2002.

SECOND READING OF ORDINANCE NO. 2898 - ORDINANCE GRANTING A FRANCHISE TO TROLLEY LEASING LLC TO OPERATE A NARRATED HISTORIC TOUR TROLLEY ON THE STREETS OF THE CITY OF ASHEVILLE

City Attorney Oast explained that this ordinance was adopted on its first reading on February 26, 2002.

Councilman Ellis moved to waive the rules and proceed with formal action at this meeting. This motion was seconded by Councilwoman Jones and carried unanimously.

Councilwoman Jones moved to adopt Ordinance No. 2898 on its second and final reading. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 506

PROHIBITING PERSONS FROM SOLICITING FROM THE STREET OR MEDIAN WITHIN CITY LIMITS

Police Chief Will Annarino said that this is the consideration of an ordinance prohibiting pedestrians to stand on any city street or median and solicit money, employment, business or a ride from passing or stopped motorists within the City limits.

The Asheville Police Department has determined that there is a potential danger allowing persons to solicit money, employment, rides or business from the streets and mediations within the City. Currently, there any many busy intersections where persons regularly use to beg for money, rides or employment. It is the Asheville Police Department's (APD) contention that this type of behavior near a busy intersection creates a dangerous situation for the pedestrian and the motorists.

This ordinance will make it a class 3 misdemeanor and a fine no more that $500.00 for a pedestrian to stand on any city street or median and solicit money, employment, business or a ride from passing or stopped motorists within the City limits.

In addition, APD has determined that at certain intersections, homeless persons have formed "gangs" to enforce the exclusive right to beg at certain intersections and will resort to violence if another group or person tries to beg at said intersection.

The APD has checked with the N. C. Dept. of Transportation and they fully support this ordinance.

Currently, the cities of Charlotte, Gastonia, Wilmington, Greenville and Garner have some form of a street solicitation prohibition. Durham is currently in the process of adopting such an ordinance.

City staff recommends approval of the ordinance.

Sergeant Haun and Officer Bowman both related incidents to City Council in which this ordinance is necessary to address safety.

Councilman Dunn passed out pictures of syringes, broken bottles, drug paraphernalia, etc. located behind businesses on Tunnel Road. He felt this ordinance was not only necessary for the safety of motorists and pedestrians, but also for the safety of residents.

Upon inquiry of Councilman Mumpower, Police Chief Annarino said that this is not a tool to regulate transients that pass through our community, but a public safety tool to make our major intersections and thoroughfares safe.

Councilwoman Jones hoped that there is a plan to advise individuals and organizations before citing them for violations.

Vice-Mayor Bellamy stressed the need to work with organizations and to develop a comprehensive plan on how to address the issues regarding the homeless because harassment and arrest is not the solution. Police Chief Annarino said that when camps are identified, they identify the property owners and work with them to get the camp removed. Because this is a broader social issue, they are working with shelters on how to address these concerns.

Councilman Dunn felt that City Council should review their budget and find monies to help Hospitality House keep their doors open longer.

Councilman Peterson asked if some regulations could be put in place to allow good charitable organizations to continue this type of soliciting. Perhaps they could be required to be a non-profit organization, wear orange vests and have the Traffic Engineer develop some requirements. Assistant City Attorney Curt Euler stressed that this is a safety issue, not an issue of who should and shouldn't solicit. Police Chief Annarino also said that people could still solicit on private property.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

9-13 BILTMORE AVENUE

This matter was removed from the agenda for City Council consideration.

CAMPAIGN FINANCE REFORM

Councilman Peterson suggested a citizen study committee be formed. Two issues that need to be addressed are (1) campaign finance reform; and (2) election process changes. He felt that perhaps one group could address both of those issues and report on them separately, however, it might be better to separate the issues. He suggested each Council member submit two names of people to form the committee (and representation from some civic groups), give them a timeline and ask them to report back in 90 days with not necessarily one plan, but some options and different approaches City Council can consider. He suggested City Attorney Oast be the staff person on that committee. He suggested some ideas might be to expand access to communication tools; some voluntary limits on campaign spending; inducements to voluntary limits; and if public funding is used, who should get it and what are the thresholds. He suggested City Council discuss the parameters of the committee and at the next worksession, Council be prepared to appoint the committee.

Council discussed their reasoning for two separate groups vs. one group to deal with both items.

Councilman Ellis felt that the election process should be changed to allow City Council members appoint the Mayor every two years, as was done several years ago.

Councilman Dunn questioned if district elections would cut down on campaign expenses. He also felt City Council should look at term limits.

Councilman Mumpower felt a Council sub-committee might be in order to explore this issue further before appointing a citizen study committee. That Council committee could report back to Council in 2-4 weeks.

Mayor Worley felt that a Council sub-committee could develop some parameters for the committee.

It was the consensus of Council that Mayor Worley appoint a 3-member Council sub-committee as quickly as possible in order to have a report from the citizen study committee this fall.

CIVIC CENTER UPDATE

Finance Director Bill Schaefer used the charts to describe the Civic Center's Fiscal Years 1979-2001 revenues, losses before transfer of monies from the General Fund, losses before transfer of monies from the General Fund in 2001 dollars, losses as percentage of revenue, transfer as percentage of General Fund revenue, revenues as percent of year to date budget, and expenditures as percent of year to date budget. He then used charts to describe the profit and loss by venue and the profit and loss by event type for July 2001 through January 31, 2002.

At 5:20 p.m., Mayor Worley announced a short break.

Civic Center Director David Pisha said that his report would cover Fiscal Years 1997-2001.

With regard to the Arena, there are two important phases in the history of the Civic Center (1) 1997-1998 before the Bi-Lo Center opened (attendance averaged 288,600 patrons per year); and (2) 1999-2001 after the Bi-Lo Center opened (attendance averaged 342,500 patrons per year). Using a chart, he showed the contribution of various major event types on annual Arena attendance. Family shows migrated to the Bi-Lo Center when it opened in 1999, however, that attendance loss was made up by ice-related events. It is important to note that attendance does not directly translate into profitable financial performance. Family shows saw attendance plunge from high of 68,800 in 1997 to low of 4,400 in 2001. Consumer/Trade shows followed the downward trend. Hockey, concerts, and public skating made up the difference in attendance and helped hold the overall patron at historic levels. While overall attendance held up, the events in the Arena were very different in the post Bi-Lo era as compared to the pre Bi-Lo period. The Arena is now primarily used for sporting events, public skating and consumer trade shows. The Arena is also seeing a return of rock concerts (1) this year all three concerts held in the Arena were sell-outs; and (2) we have a fourth concert scheduled which we expect to sell out. The Warren Haynes Concert: (1) sold tickets in 26 states and the District of Columbia; (2) Good Morning America called for information on the show; and (3) overall the concert produced gross revenues of nearly $75,000 for the Civic Center. It is important to remember that entertainment events will continue as long as the public supports them. Good financial performance is dependent on the number and type of events held at the facility.

With regard to the Thomas Wolfe Auditorium, it has not felt the impact of the Bi-Lo Center. These events are more localized in nature. The concerts are an eclectic mix with a ready market in Asheville in that (1) their success may not transfer as easily to another venue; and (2) the Auditorium is the perfect size. Using a chart, Mr. Pisha showed the concert activity is booming at the Civic Center, especially in the Auditorium. The total number of concerts in the Auditorium could reach 20 by the end of Fiscal Year 2002. Attendance at the Symphony and Bravo has remained flat over time and major growth is not expected. Attendance at special events and touring productions have declined, in that staging accommodations have long proven inadequate for Broadway productions and national touring productions could cease to be an event category. Concerts along with local events have been providing the attendance growth for the Auditorium. Their increases have allowed the overall patron numbers to remain flat rather than decline.

Regarding the overall Civic Center usage, the mix of events has changed over the years; however, attendance has remained about 300,000 attendees per year. Regarding the monthly attendance for Fiscal Year 2001, (1) there's a strong seasonal bias in the current space utilization as is indicated by the graph; (2) this bias is not expected to change in any significant way in the future; (3) non-use days are primarily concentrated in the summer months; and (4) most arenas experience this same seasonal bias.

The Center's current available space is being successfully utilized in that since November 2001 there have been only four non-use days at the Civic Center (Thanksgiving, Christmas Eve, Christmas Day and New Year's Day). The Arena, Auditorium and Exhibit Hall are primarily designed to hold events that occur in fall, winter and spring: (1) Basketball and hockey are fall, winter and spring events; (2) the Home and Boat Show are winter activities; (3) Symphony and Bravo are fall, winter and spring events; (4) most concerts are held indoors in the fall, winter and spring; and (5) in the summer most concerts play in outdoor amphitheatres.

He then explained the usage by venue. A functional Banquet Hall has the most potential for growth with the resulting reduction in non-use days. The current Banquet Hall is under utilized. An expanded, fully functional ballroom would have a seasonal bias different than the rest of the facility (1) it would primarily operate spring, summer and fall; (2) we would be able to shrink non-use day losses; (3) event load would smooth out for a more efficient operation; (4) local usage could rise substantially with wedding receptions, proms, banquets and other social activities; and (5) meetings and regional conventions could also use this space.

He reviewed the major current users. Potential future users include all the citizens, groups, institutions and companies of Western North Carolina for receptions, banquets, proms, meetings, regional conventions and many other activities requiring affordably priced professional, centrally located ballroom/meeting space.

In conclusion, Mr. Pisha said that the type of events using the Civic Center has changed drastically over time (1) the Bi-Lo Center has affected Arena usage; (2) public tastes have changed regarding entertainment; and (3) while the Center has tried to accommodate these changes, improvements are necessary to shrink non-use days and improve efficiency. It is important to remember that the number and type of events are both critical to the Center's financial outcome.

Mr. Schaefer and Mr. Pisha responded to several questions and comments from Council, some being, but are not limited to: what are expenses on non-use days; is there a lot of interaction between the Civic Center Director and the Civic Center Commission; if hockey or basketball left, what would be the overall effect on the Civic Center; have comparisons been performed to see what other Civic Center losses have been; does the Civic Center promote events; and what was the Bi-Lo contribution to the Bi-Lo Center.

Mr. Richard Bowman, Chairman of the Civic Center Commission, said that the Commission feels they can do something about the non-use days at the Civic Center. The Commission wishes to work closer with the Chamber of Commerce and the Chamber should actively participate in the Commission meetings. With improved communication, the Commission's requests and needs should be given a higher priority as we work to develop and make recommendations to the Civic Center Director, the City Manager and City Council regarding long-range plans for the Civic Center. There should be a contingency plan if hockey or basketball leave the Civic Center. There needs to be improved public relations by better informing the public of the Center's benefits to them as citizens.

Councilman Mumpower questioned if City Council has been asking the Commission for guidance or advise. Mr. Bowman responded yes. Councilman Mumpower disagreed in that he felt the Commission is severely underutilized. He felt the Commission should be included and asked to offer their opinion in any primary decisions affecting the Civic Center.

Ms. Laverne Laney and Mr. Paul Hornyak, Civic Center Commission members, asked City Council to devote a person solely to the Civic Center to solicit events.

Mr. Dan Wilhelm, representing the Asheville Smoke, said they were in a good position to finish the season and they wanted hockey to remain in Asheville for years to come.

UPDATE ON INFORMATION TECHNOLOGY

Information Services Director Larry Bopp and members of his staff updated City Council on five new applications that will serve residents: (1) Search City Council minutes; (2) utility billing Internet service; (3) Parks and Recreation on-line registration; (4) building permits on-line; and (5) community reporting. Future initiatives (which will require funding) include (1) determine flood zone conditions for properties; (2) apply for and pay for business licenses; (3) pay parking tickets; (4) access housing inspection reports; (5) access traffic accident reports; and (6) access map data sources (for architects, engineers, surveyors and government agencies.

BOARD AND COMMISSION REPORT

Vice-Mayor Bellamy, Chair of the Boards & Commissions Committee, gave a brief report on the School Board vacancy process. She presented City Council with an aggressive schedule to appoint a member to the School Board to fill Mark Gordon's unexpired term. After discussion, it was the consensus of Council to proceed with the schedule presented by Vice-Mayor Bellamy, and to not make it mandatory that School Board applicants must live in the Asheville School District.

At the request of Vice-Mayor Bellamy, it was the consensus of City Council to change the Film Commission membership from 15 to 13 members and instruct the City Attorney to prepare the proper ordinance amendment.

Vice-Mayor Bellamy said that with regard to the U.S. Citizenship issue, based on the information given to City Council from the City Attorney, they could not legally make any changes to the list, except to exclude the Asheville-Buncombe Community Relations Council and the Minority Business Commission.

Upon inquiry of Councilman Dunn, Mayor Worley said that this item will be scheduled for an upcoming agenda.

CLOSED SESSION

At 7:25 p.m., Councilman Mumpower moved to go into closed session to establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease - G.S. 143-318.11(a)(5). This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

At 8:10 p.m., Councilman Ellis moved to come out of closed session. This motion was seconded by Councilman Mumpower and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:10 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – March 12, 2002 - 5:00 p.m.

Regular Meeting

Present:	Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson
Absent:	None

INVOCATION

Councilman Mumpower gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING THE MONTH OF MARCH 2002 AS "PROFESSIONAL SOCIAL WORK MONTH"

Mayor Worley read the proclamation proclaiming the month of March, 2002, as "Professional Social Work Month" in the City of Asheville. He presented the proclamation to Ms. Dotty Saxon and Ms. Tracy Carrington who briefed the Council on some activities that will take place during the month.

B. PRESENTATION OF USS ASHEVILLE MEMORABILIA

Mr. Ken Vasilik, Chairman of the Asheville USS Asheville Committee, gave a brief background of the PG-21. He said that a video of the memorial ceremony conducted by the SSN-758 has been given to the City. He concluded his presentation with reading the certificate from the SSN-758 commemorating the event, presenting it together with the duplicate wreath and photo plaque of the wreath in the water at the site superimposed with an image of the PG-21.

On behalf of City Council, Mayor Worley thanked Mr. Vasilik, Mr. Walter Ashe, LCDR Scott Maple of the USN Reserve Center, and the entire USS ASHEVILLE Committee for this memorabilia.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON FEBRUARY 26, 2002, AND THE WORKSESSION HELD ON MARCH 5, 2002

A. RESOLUTION NO. 02-39 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT THE BID FROM DAMON ROUSE TO PURCHASE DISPOSAL PARCEL 146 ON LINCOLN STREET IN THE EAST END/VALLEY STREET COMMUNITY

Summary: The consideration of a resolution authorizing the Mayor to convey Disposal Parcel 146 in the East End/Valley Street Community to Damon Rouse in the amount of $3,200.

Disposal Parcel 146 is a substandard lot located on the north side of Lincoln Street comprising 3,659± square feet. The lot is irregular in shape and mostly flat about street level then sloping up sharply to the rear. The bid in the amount of $3,200 from Damon Rouse includes the proposal to combine the property with adjoining property currently owned by Mr. Rouse on Jordan Street.

On February 26, 2002, the City Council directed the City Clerk to advertise for upset bids on Disposal Parcel 146. The advertisement ran in the Asheville Citizen-Times on March 1, 2002, as provided in N. C. Gen. Stat. sec. 160A-269. No response was received. Therefore, the offer to purchase from Damon Rouse in the amount of $3,200 was not upset and the sale to Damon Rouse should be approved.

Community Development staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE 82

C. RESOLUTION NO. 02-40 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR REIMBURSEMENT OF FUNDS TO BE EXPENDED FOR TRANSIT SERVICE TO BLACK MOUNTAIN

Summary: The consideration of a resolution authorizing the Mayor to enter into an agreement with the N. C. Dept. of Transportation (NC DOT) for the reimbursement of funds to be expended for service to Black Mountain.

The NC DOT has tendered a contract to the Asheville Transit System (City of Asheville) in which the NC DOT will contribute funds for bus service to Black Mountain. The Asheville Transit System will operate said service.

In no event will the City of Asheville be required to contribute financially to this route. All financing will be provided by the State (maximum of $92, 708), the Town of Black Mountain ($13,360), Mountain Mobility ($5,000), and Fare Box Revenue ($3,882). The total budgeted cost is $114,950. The City of Asheville is specifically exempted from any liability towards operating costs. If funds budgeted are not sufficient, the operation will either be additionally funded by some combination of the above, or it will be terminated. The City of Asheville will not be liable for any additional cost of operation under this contract.

The contract has a period of performance of 14 months - from March 1, 2002, through May 1, 2003. During that time, the Asheville Transit System must provide 12 consecutive months of service, within the above financial constraints.

The NC DOT requires the Mayor to sign the contract for this service, and will then return a copy signed by the state Secretary of Transportation. Commencement of service is contingent upon receiving this signed contract from the NC DOT. Service will start as soon as possible after receipt of the fully executed contract.

Black Mountain will be served four times a day, six days a week, except for holidays during which the transit system does not operate. Thus, Black Mountain will be served 306 days during the twelve-month period.

City staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 - PAGE 83

310

D. **RESOLUTION NO. 02-41 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE PROPERTY ON GALAX AVENUE**

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer to purchase property on Galax Avenue in the West Asheville community.

Michael A. Pressley submitted a bid in the amount of $25,800 for the purchase of land on Galax Avenue in the West Asheville Community. Said bid is not less than the tax appraisal of $25,800.

The land on Galax Avenue is a residential zoned lot beyond the end of the street improvements of Galax Avenue. Said lot is 0.94 acre. The bid from Michael A. Pressley includes the proposal to combine the property with adjacent property he owns and construct nine units of affordable housing on the property. Mr. Pressley's project has been recommended for a Housing Trust Fund Loan and is consistent with the policy of encouraging infill development.

The property was designated as surplus property in 1997 and has been available for sale since that time.

Approval of the resolution will initiate the sale of the property through the upset bid process as provided in N. C. G. S. 160A-269.

Community Development staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE 84

E. **RESOLUTION NO. 02-42 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR AND ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES FOR A GRANT TO ASSIST WITH THE DEVELOPMENT OF AZALEA ROAD PARK PHASE I**

Summary: The consideration of a resolution to apply for and enter into an agreement with the North Carolina Department of Environment and Natural Resources, Division of Parks and Recreation for funds through the Land, Water and Conservation Fund to assist with the development of outdoor recreation facilities.

Azalea Road Park represents the City of Asheville's first phase of a major greenway and park system being developed along the Swannanoa River on Azalea Road in east Asheville. If this grant is received, the funds will be used to assist with the construction of the first phase of the Park. This first phase will include the development of two fields of the four field soccer complex, restrooms, concession, kayak launch, two picnic shelters, a large playground, disc golf, fitness and greenway trails, river observation decks, restoration of the Thomas Wolfe cabin, and parking areas.

The Parks and Recreation Department, Western North Carolina Soccer Foundation and RiverLink are in partnership to implement an ambitious fundraising plan to raise $3 million to build the first phase of the Park.

The Parks and Recreation Department is requesting $500,000 in grant funds from the Land, Water and Conservation Fund, which requires a 50% cash or in-kind match. The cash match is available through the Western North Carolina Soccer Foundation via the John B. Lewis Family Foundation, and the in-kind match is available in labor, equipment, and project management in the Parks and Recreation Department.

The Parks and Recreation Department recommends the City of Asheville to apply for and enter into an agreement for grant funds to assist with the construction of Azalea Road Park Phase I.

RESOLUTION BOOK NO. 27 – PAGE 85

F. RESOLUTION NO. 02-43 - RESOLUTION ACCEPTING THE NEW STREET NAME OF "MYRA PLACE" OFF EAST STARNES COVE ROAD

Summary: The consideration of a resolution accepting the new proposed street name "Myra Place."

Dave Ball, owner of lots in Maple Grove Subdivision, has petitioned the City of Asheville to accept the street name " Myra Place." The new street will begin at East Starnes Cove Road and end at cul-de-sac on Myra Place.

City staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE 86

G. RESOLUTION NO. 02-44 - RESOLUTION AUTHORIZING THE CITY CLERK TO PUBLISH A NOTICE OF INTENT TO LEASE SPACE AT 45 WALL STREET TO THE ASHEVILLE PERFORMING ARTS ALLIANCE

Summary: The consideration of a resolution directing the City Clerk to publish a Notice of Intent regarding a proposed lease with the Asheville Performing Arts Alliance for space at 45 Wall Street.

The property at 45 Wall Street is located in the Wall Street Parking Garage owned by the City of Asheville. The City has previously leased the space, but currently the space is vacant.

The Asheville Performing Arts Alliance (APAA) has offered to enter into a lease for the space. The proposed lease will enable APAA to operate offices and a small performing theater at the site. There is a provision which allows either the Lessor or the Lessee to terminate the agreement upon 180 days notice. The term of the License Agreement will be 9 years and 11 months. APAA will pay rent in the amount of $1,050 for the first six years the rent will increase annually thereafter based on the Consumer Price Index compared to the date the lease originated. In addition to the rent, APAA will up-fit the space at its own expense.

Approval of the resolution will authorize the City Clerk to publish a Notice of Intent to enter into the Lease.

Finance Department and Planning Department staffs recommend adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE 87

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilman Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

312

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING REVISIONS TO THE FLOODPLAIN REGULATIONS

ORDINANCE NO. 2902 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDIANNCE REGARDING REVISIONS TO THE FLOODPLAIN REGULATIONS

Mayor Worley opened the public hearing at 5:21 p.m.

Ms. Natalie Berry, Stormwater/Erosion Control Coordinator said that this is the consideration of an ordinance amending the Unified Development Ordinance (UDO) regarding floodplain regulations. This public hearing was advertised on March 1 and 8, 2002.

Below are the recommended amendments to the City's flood control standards. All of the revisions are housekeeping in nature.

- Revising the ordinance to give the City Engineer authority to enforce this section of the UDO in place of the Planning and Development Director, adding a few definitions, amending a few definitions and changing the name of the Erosion Control Review Committee to Specifications Review Committee.
- Expanding the duties of the Specifications Review Committee to be able to interpret and make recommendations on variances to the flood ordinance to the Board of Adjustment, leaving final authority vested in the Board of Adjustment.
- Delete the paragraph entitled "exemptions" out of the flood ordinance. The National Flood Insurance Program Western Coordinator recommends the deletion due to non-compliance with Federal Emergency Management Agency (FEMA) regulations.
- Adding an option under the unnumbered "A" zone section. When the base flood elevation (BFE) is not known this is known as an unnumbered "A" zone. A structure may be constructed if the lowest finished floor is built at least three (3) feet above the highest adjacent grade. This option will help the property owner(s) who could not afford to hire a professional engineer to do a flood study to determine the base flood elevation (BFE).
- Remove wet flood proofing option "c" under the flood proofing heading in Section 7-12-1(i)(2). The National Flood Insurance Program Western Coordinator recommends the removal of this option for the City of Asheville's UDO. This is not an option under FEMA model ordinance. A property owner can still use this option if they apply for a variance with the Board of Adjustment and follow strict guidelines.
- Include the flood ordinance under the enforcement and penalties for civil penalties when violations occur - $100.00 per day for each day the violation continues.

The Planning and Zoning Commission voted 6 to 1 to recommend approval of the proposed ordinance amendment. The opposing vote was due to the changes in no longer allowing wet flood proofing on structures in the floodway.

Staff recommends that City Council adopt the proposed amendments to the Floodplain Regulations of the Unified Development Ordinance.

Dr. Ned Guttman, representing Coalition of Asheville Neighborhoods, commented on the major issues regarding floodplain management that this ordinance does not address. He felt the Task Force was created to modify the ordinance so that adequate flood protection could be afforded to the community, but this ordinance does not address that. He briefed Council on the several suggestions he made as a member of the Task Force, but staff ignored. He said that City staff does not have the specialized training to approach these issues. He stressed that City Council is responsible for floodplain management in Asheville.

When Mayor Worley asked Dr. Guttman if he agreed with the ordinance with regard to housekeeping issues. Dr. Guttman replied he did, however, he stressed that in the definition section for historic structures, the ordinance only refers to national and state listings - nothing about local historic sites or sites under formal study. That should be included in the proposed ordinance.

Ms. Berry said that she did take into consideration all comments from the Task Force. With regard to the definition for historic structures that Dr. Guttman noted, she said that she intended to include that in the ordinance and it was her omission. She agreed that should be added as well.

City Engineer Cathy Ball responded to the comments from Dr. Guttman. She stressed that staff considered all comments from the Task Force, appreciated their feedback and respected their opinions. However, there is a balance between trying to keep the community safe and being able to have property that can be developed. We do have an ordinance that does meet federal requirements and when we look at stricter regulations, our property becomes unable to be developed, especially on the riverfront. Again, they did have to balance the ability to develop in the area vs. stricter compliance.

Ms. Ball responded to several questions Vice-Mayor Bellamy raised. She explained that the role of the committee was to review the ordinance and make recommendations.

Mr. Guttman said that what he is proposing would not restrict development. Basically, what he asked for was to provide information to the community to be able to judge whether or not there is a flood hazard.

Mr. Marvin Slosman, member of the Task Force, supported the ordinance in that this is an example where the program is in compliance and it works for the community and developers. The ordinance is not so burdensome that it doesn't allow progress.

Ms. Margaret Shook, Crowfields resident, said that each year there are new developments and the increased resulting Stormwater velocity are causing three creeks, Pebble Creek, Dingle Creek and Turtle Creek, to jeopardize personal safety, create road hazards, plus greater and greater damage to properties contiguous to these creek's entire waterways. In every area of Asheville there will continue to be a growing problem of flash flooding of streets, properties and inadequate floodplain areas – all going hand-in-hand with rapid development construction without an impact study to the downstream areas. Please consider including the amendment for new development construction to provide a stormwater impact study before "City approval" to build within all Asheville watersheds impacted with rapid development including the extremely fragile Busbee Mountain Watershed.

Mr. Don Yelton, property owner, said that vacant property, undeveloped, serves as a way to soak up water and has value to the taxpayer. He encouraged Council to consider looking at stormwater and run-off together.

Mayor Worley closed the public hearing at 6:04 p.m.

Councilman Peterson felt the City does need to look at going beyond the minimum requirements and encouraged the City Engineer to seriously look at that issue. He hoped that staff would look at some of the ideas Dr. Guttman suggested with stricter standards.

Vice-Mayor Bellamy suggested the Task Force continue to meet to address some of the specific concerns brought up today and report back to Council in about six months.

Councilman Mumpower felt that if the City was going to use the services of a Task Force, they should take their recommendations seriously. He suggested that in the future there be a larger presence of Task Force members so City Council can get their opinions.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 2902, with the addition of adding a subsection to the definition of historic structure to include locally designated historic structures. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE [redacted] 426

B. PUBLIC HEARING TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO IDENTIFY ARTIST'S STUDIOS AND WORKSHOPS AS HOME OCCUPATIONS IN RESIDENTIAL DISTRICTS AND TO ESTABLISH STANDARDS FOR THESE USES

ORDINANCE NO. 2903 - ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO IDENTIFY ARTIST'S STUDIOS AND WORKSHOPS AS HOME OCCUPATIONS IN RESIDENTIAL DISTRICTS AND TO ESTABLISH STANDARDS FOR THESE USES

Mayor Worley opened the public hearing at 6:08 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance amending the Unified Development Ordinance to identify artist's studios and workshops as home occupations in residential districts and to establish standards for these uses. This public hearing was advertised on March 1 and 8, 2002.

The Planning and Zoning Commission is recommending adoption of an amendment to the City's zoning standards to identify artist's studios and workshops as home occupations and to establish standards for these uses. Home occupations are currently permitted in all residential districts and although many artists have studios or workshops in their homes, these uses are not specifically identified in the City's zoning code. As a result of the City of Asheville's popularity as an arts center, the number of artist's studios and workshops located in residential areas will continue to increase. Artist's studios and workshops often require more space than traditional home occupations due to the need to store materials and for larger work areas. The proposed amendment addresses this need by allowing artist's studios and workshops to be larger than other home occupations. In order to protect adjacent residential uses from potential adverse impacts of artist's studios and workshops, a larger lot size is required for larger studios and workshops. Larger studios and workshops, when constructed as a separate building, must be setback a greater distance from the property lines. The studios and workshops must also adhere to the other standards for home occupations set forth in the City's zoning ordinance. These standards address:

- The display of goods and products as well as other advertising;
- Prohibition on retail sales from the home;
- Restriction on uses that create odor, noise, glare, etc.; and
- Standards for signs and parking.

Staff worked with a group of artists and craftspeople in developing the standards set forth in the draft ordinance amendment. No comments in opposition to the proposed revisions have been received.

The Planning and Zoning Commission voted 7 to 0 to recommend approval of the proposed ordinance amendment. The Planning and Development staff also recommends approval of the amendment.

Mayor Worley closed the public hearing at 6:10 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Ellis moved for the adoption of Ordinance No. 2903. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE [redacted] 435

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING REVISIONS TO THE SIDEWALK REGULATIONS

ORDINANCE NO. 2904 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDIANNCE REGARDING REVISIONS TO THE SIDEWALK REGULATIONS

RESOLUTION NO. 02-45- RESOLUTION AMENDING THE FEES AND CHARGES MANUAL

Mayor Worley opened the public hearing at 6:11 p.m.

City Engineer Cathy Ball said that this is the consideration of an ordinance amending the Unified Development Ordinance (UDO) related sidewalk regulations. This public hearing was advertised on March 1 and 8, 2002.

In May of 1997, sidewalks requirements were adopted as part of the final adoption of the UDO. In March of 2000, the sidewalk requirements were revised to include the provisions for allowing a "fee in lieu of" constructing sidewalks under certain conditions.

In 2000, staff began working with the development community to review the conditions for allowing a fee in lieu of constructing sidewalks. This group consisted of developers, affordable housing advocates and staff. The group agreed that some additional changes needed to be made in the sidewalk requirements (Section 7-11-17) for the following reasons:

- The group had concerns regarding the fact that the ordinance did not have an exemption for properties that had low pedestrian impact and were on relatively low vehicular volume streets.
- The development community, while not happy to pay additional costs of sidewalks, supported paying the fee in lieu of constructing the sidewalk so long as the money was used to install sidewalks in places where it was needed. Developers requested more flexibility in being able to pay the fee in lieu of constructing the sidewalk.
- Staff was concerned about maintenance issues that would arise from having sidewalks installed piecemeal. This means that the sidewalks would age at varying degrees and

need to be replaced at different times, thus increasing the maintenance and replacement costs.

- The development community requested that a more expedient appeal process be developed. Currently they are required to go to City Council for a waiver to the sidewalk requirements.
- The group requested that clarification be made as it relates to sidewalk requirements on private and public streets.

As a result of these concerns, staff began exploring ways of improving the sidewalk requirements. The revisions that you are being asked to approve include most of the concerns of the task force.

The revisions include the following changes:

- Establishing a threshold for requiring sidewalks or a fee in lieu of constructing sidewalks. We recommend that this threshold be 300 Average Daily Traffic (ADT) volume currently or projected for the next 5 years. (Provided the street is not listed on the Pedestrian Thoroughfare Plan.)
- Requiring sidewalks to be constructed on all new and improved streets. A large cost of the sidewalk includes mobilization and grading. When a street is being constructed or reconstructed, the mobilization and grading for the sidewalk can occur in conjunction with the roadway.
- Allowing developers to pay the fee in lieu of constructing the sidewalk unless the sidewalk is on the Pedestrian Thoroughfare Plan.
- Providing for an appeal process that allows the develop to appeal to a committee consisting of the City Manager, or his designee, and two other Department Directors, excluding the City Engineer.
- Clarifying that public and private streets have the same requirements with regard to sidewalks.

In addition, an amendment to the Fees and Charges Manual is requested. She said the amendment would be to add the following sentence: "In the event that a fee is allowed for an economic development project, the developer will be allowed to pay 50% of the fee, provided that the project is eligible for the City of Asheville Economic Development Incentive Grant as defined by the City of Asheville Economic Development Incentive Policy and administered by the Economic Development Director."

Nothing in the revised ordinance would prohibit a developer from installing sidewalk as opposed to paying the fee in lieu of constructing the sidewalk. The developer always has the option of installing the sidewalk adjacent to their project.

The Planning and Zoning Commission approved the revisions to the sidewalk regulations on February 6, 2002. The approval vote was unanimous with the following two suggested changes:

(1) Allow the developer to pay the fee in lieu of constructing sidewalk if the sidewalk is listed on the Pedestrian Thoroughfare Plan so long as the project is on a N. C. Dept. of Transportation or City of Asheville funded project.
(2) Request an easement from the developer for future sidewalk installation even if they are exempt from installing the sidewalk or paying the fee in lieu of constructing the sidewalk.

Staff presented the concept of this proposal at the Development Issues Forum in September 2001 and at the February meeting of the Council of Independent Business Owners. Both groups had a favorable response to the revisions.

Staff requests that City Council adopt the revisions to Section 7-11-7 of the Unified Development Ordinance related to sidewalk regulations and adoption of the amendment to the Fees and Charges Manual.

Upon inquiry of Councilman Dunn, Ms. Ball explained how the $20 per linear feet was derived, noting that the City feels that amount is very fair.

After responding to several questions from Councilman Peterson, Ms. Ball said that the City is in the process of updating the Pedestrian Thoroughfare Plan and it should be brought before Council in approximately six months.

Mayor Worley noted that one of the uses in the fee in lieu of provisions is to allow us to construct sidewalks in other areas where they are identified.

Upon inquiry of Councilman Mumpower, Ms. Ball said that this ordinance will allow more flexibility in working with developers and it also provides the necessary linkages that we need in the City.

Mayor Worley closed the public hearing at 6:28 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and resolution and they would not be read.

Councilman Dunn moved for the adoption of Ordinance No. 2904. This motion was seconded by Councilwoman Jones and carried unanimously.

Councilman Peterson stressed that we need to require sidewalks and hoped that City staff will exercise proper discretion where sidewalks should be installed. Even though it looks like we are requiring "sidewalks to nowhere," those need to be built now so development in the future doesn't balk at installing their portion of the sidewalk.

ORDINANCE BOOK NO. 19 – PAGE 438

Councilman Mumpower moved for the adoption of Resolution No. 02-45. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 88

B. PUBLIC HEARING TO CONSIDER THE SALE OF 9-13 BILTMORE AVENUE

RESOLUTION NO. 02-46 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT THE BID FROM THE ASHEVILLE AREA ARTS COUNCIL TO PURCHASE 9-13 BILTMORE AVENUE (MINUS THE AIR RIGHTS OVER THE REAR PARKING LOT)

Mayor Worley opened the public hearing at 6:30 p.m.

Field Services Coordinator Ed Vess said that this is the consideration of a resolution authorizing the Mayor to convey 9-13 Biltmore Avenue (minus the air rights over the rear parking lot) to the Asheville Area Arts Council in the amount of $462,500.

On February 26, 2002, City Council scheduled a public hearing for March 12, 2002, and directed the City Clerk to publish a notice of said public hearing in connection with a proposal from the Asheville Area Arts Council to purchase 9-13 Biltmore Avenue (PIN No. 9649.18-40-1091), minus the air rights over the parking lot on South Lexington Avenue, for the sum of $462,500. The notice ran in the Asheville Citizen-Times on March 1 and 8, 2002, as provided in N. C. Gen. Stat. sec. 160A-475 (4).

Mr. Vess said this property is located 125 south of Pack Square. The property was acquired in 1985 as part of the Pack Square Redevelopment Project. It was leased to the Arts Council in 1987 and they invested about $100,000 in the property in return for reduced rent. He said that the City does have a bid in hand for the air rights, which will be coming before Council in their next worksession. The Arts Council has proposed to purchase the property using a cash payment of $399,000 and financing from the City in the amount of $123,500. The Arts Council proposal equals the appraised value for the property (minus the air rights). Their investment in, and presence on, Biltmore Avenue has contributed to the redevelopment of the area. Their presence on Biltmore Avenue is consistent with, and complimentary to, the present development in that area and will continue to be an asset for that area in the foreseeable future.

Staff recommends acceptance of the Art Council's bid and that evidence of financing be required within 60 days of the acceptance.

Upon inquiry of Mr. Walter Plaue, Mr. Vess said that the Arts Council will be using a portion of the property to generate income and they will be required to pay taxes on it.

Mr. George Saenger, Chairman of the Arts Council, said that this would allow them to expand their arts and education program in addition to providing a headquarters for the Urban Trail.

Mayor Worley closed the public hearing at 6:38 p.m.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 02-46. This motion was seconded by Councilman Peterson and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 90

At 6:40 p.m., Mayor Worley announced a short break.

IV. UNFINISHED BUSINESS:

A. DISCUSSION OF AMENDMENT TO CITY COUNCIL POLICY ON RULES FOR BOARDS AND COMMISSIONS REGARDING U.S. CITIZENSHIP AS A QUALIFICATION FOR APPOINTMENT

Vice-Mayor Bellamy, Chair of the Council Boards & Commissions Committee, said that the issue regarding U.S. Citizenship as a qualification for appointment to a board or commission was remanded to this Committee. Their charge was to tweak the list received from the City Attorney of boards and commissions having some degree of independence or autonomy. Those boards include the Airport Authority, the ABC Board, the Board of Adjustment, the Civil Service Board, the Historic Resources Commission (HRC), the Metropolitan Sewerage District, the Planning & Zoning Commission, the Regional Water Authority, the School Board, the Tourism Development Authority (TDA) and the WNC Air Quality Board. This list represents 11 out of the 35 boards the City makes appointments to.

Councilman Mumpower, member of the Committee, also stated that there was an original unanimous vote in favor of requiring citizenship for boards and commission that make decisions for citizens. He said the Committee did not vote in favor of requiring citizenship of advisory boards.

Vice-Mayor Bellamy confirmed Councilman Mumpower's statement that the Committee originally made the recommendation that governing and policy-making boards were the ones they recommended U.S. Citizenship.

Upon inquiry of Councilman Peterson, City Attorney Oast said that the 11 boards perform a governmental function; the chief criterion used to identify those boards was whether they had the power to consider and determine the rights of others in a way that could be final, without recourse to the City Council or some other City board. In his follow-up memorandum to Council dated February 19, 2002, he recommended the HRC be removed from consideration for application of the citizenship requirement because its decisions are appealable to the Board of Adjustment. That recommendation stands to be consistent with the other boards. Also in his memorandum, he recommended the TDA be removed because its function is only marginally political in the sense that it is important for purposes of the law, and because legal aliens play an important role in the local tourism industry. With regard to the TDA, he would leave that up to Council's discretion to keep it on the list or remove it.

When Councilman Peterson asked why the Planning & Zoning Commission was included on his list, City Attorney Oast said that they have final approval authority with respect to some subdivisions and under statute they can perform some of the functions of the Board of Adjustment, if Council assigns those functions to them.

When Councilman Peterson asked if wording on the proposed amendment had been drafted, Vice-Mayor Bellamy said that City Attorney Oast would draft that amendment based on Council's direction tonight.

Upon inquiry of Councilwoman Jones, City Attorney Oast said that some of the 11 boards Vice-Mayor Bellamy named have other bodies making appointments to those same boards and they are free to establish their own qualifications for appointment.

Councilman Mumpower said that since the February 19, 2002, privileged and confidential memorandum from City Attorney Oast to City Council is the only written material before Council for discussion and is therefore their working document, Mayor Worley asked for a motion that authorized the release of this privileged memorandum. This motion was seconded by Councilman Mumpower and carried unanimously.

The following individuals spoke in favor of amending the City Council policy on Rules for Boards and Commission to require U.S. Citizenship as a qualification for appointment to boards and commissions:

Ms. Helen Morrison, City resident
Mr. Walter Plaue, Buncombe County resident
Mr. Zed Mackey, City of Asheville property owner
Mr. Terry Elniff, City resident
Mr. Robert Grant, Veteran
Mr. Danny Roberts, City resident
Mr. Don Yelton, City taxpayer
Mr. Chad Nesbitt
Mr. Cecil Beumer, City resident
Mr. Bill Stamey, City resident
Mr. Tom Glanville, City resident
Ms. Mary Glanville, City resident

The following individuals spoke in opposition of amending the City Council policy on Rules for Boards and Commission to require U.S. Citizenship as a qualification for appointment to boards and commissions:

Mr. Bud Howell, City resident
Ms. Pauline Kaltsunis, member on the Greenway Commission
Ms. Hazel Fobes, City resident
Ms. Sharon Martin, City resident
Ms. Rebecca Campbell, City resident
Mr. Robert Fitch, City resident
Mr. Peter Salvucci
Mr. John Gaynor, City resident
Mr. Willie Rosencrans, City resident
Ms. Allie Morris, City resident

Councilman Dunn said that he raised this issue and it had nothing to do with fear or the terrorist attack on September 11, 2001. He felt that "our founding fathers would be happy to see everyone in this room upset and wanting to take care of minorities. In 1776 a lot of people decided they were tired of being told what to do by someone across the ocean. It's called self-determination. That is what the revolutionary war was all about – self-determination. This is not an issue – it's a principle. This country has gotten to the point where it wants to be fuzzy and feel-good and it's forgotten some of the principles on which it was founded. Self-determination was one of them. The newspapers, the Asheville Citizen-Times and the Mountain Xpress love to express their attitudes. This time I think they are wrong. Their own polls showed over 400 people wanted to see this change. Only 20 said they didn't want to. I heard the comment about a lot of hurt people in this City. I think you will hurt an awful lot of people if you don't vote for this. I have been sitting here listing to the press and have been reading the Letters to the Editors for about two months. People ask me why I brought this up. I did not bring this up to attack a member who was on the Board of Adjustment. I never really attacked him personally. I attacked the principle. Why did I bring it up? I felt the people in Asheville needed to know about it. A lot of them did not know that this is a policy that we have been doing for a long time. We have a politically correct country now and sooner or later we are going to have to start thinking about the basics on what this country was founded on. This policy discriminates. There are people on this Council and others who do not like discrimination and I don't either. This policy, if we don't pass it, discriminates on people who are U.S. citizens. They have lived here, worked here and pay their taxes and they can't be on a board. This is discrimination when we are allowing and worrying about a handful of people who can become a citizen and be working on everything we hold dear. Then what is the problem? We are taking about a few years to become a citizen. Is that asking too much? We all stood up and said the Pledge of Allegiance to the flag. We put our hands across our hearts and said "I pledge allegiance to the flag of the United States of America." We weren't talking about the 'United Nations.' We were talking about the 'United States of

America.' 'One nation under God.' It's not talking about a bunch of nations – it's talking about "one nation", our nation. There are hundreds of thousands of American people who have given their lives to keep this country the way it is. We are taking God out of it too. 'One nation under God.' God sure doesn't seem to have much of a place anymore in this country and we seem to be too worried about a lot of other things. Talk is cheap. Go over to Normandy, France, and you look at those dead Americans that came across on the Normandy invasion. I'd like you to ask them what they thought about this. They would tell you they didn't storm ashore to get their heads shot off for someone who doesn't belong to this country and is going to make decisions for them. The soldiers that defended this country from 1776 to Afghanistan do know what is involved here. Go ask them. You have heard some things about we want the best folks in Asheville to be on our boards. I do too. I want Asheville to be the best it can be. But this is an elitist idea because of the fact that we put Asheville's needs way above what that flag stands for – citizenship. Where do we get off on thinking Asheville is more important than what this country was founded on. You will also hear that this is not a big deal, not a big issue – that Council can change it anytime they want to. And that's true. It can be changed. But, it's a principle. When are we going to start taking a stand on things and how much more are we going to give away in this nation that we haven't already given away. Before you know it, there's not going to be anything left to give away. Property rights, family issues, family values – they don't seem to have as much of an issue now as it used to be. I've heard that a lot of people are going to be hurt. I think if this isn't passed, there are going to be a lot of citizens in Asheville very upset. It's not like we're banning people from these boards. We have 38 of them in the City and we're only talking about 11. We're not trying to keep people from having a say-so. They can walk up here and stand at the podium and say anything they want to say. They can go to church. They are protected under our Constitution for everything so why are we so worried about this one little issue. You're right. We have other things in the City more important. I am proud of the people that came up here. These veterans. Those folks in the USS Asheville who we just heard about that died in World War II. Let's think about what they did, what their sacrifices have been. One man made a comment about what is so significant about a piece of paper. I'll tell you - it's called citizenship and you go ask our veterans what they paid the price for. They may give you a different answer than what significance really is. Significance is that they gave their lives to defend this country and that's darn significant. I've heard we are not really serving the needs of the residents of Asheville. Where is Asheville? It's in the United States of America. I don't think this is divisive. I think if we don't vote for this, it's going to divide the City a little more. Again, what is so difficult about being a citizen? What is so bad about this? What is so wrong for someone to just simply raise their right hand, learn what the Constitution is and join the rest of us – all of us in this room. We welcome them, but let's draw the line in the sand somewhere. If we don't draw the line in the sand somewhere, we're not going to have anything left. I was asked to apologize to this Council and to this City for my issues. I'll never apologize to anyone for what I've said. And I will say one more thing 'God Bless America.'"

Councilman Mumpower felt that all things should be discussed. He said we have worked out a compromise. "When thing first landed on the table, it was no non-citizens on any boards or commissions. We narrowed that down by 1/3 to what to some of us is the core of the issue. Roughly 20 of our boards are advisory boards and a non-citizen can serve on those. My personal belief is that those who have governmental authority over citizens should in fact be citizens. I have trouble looking beyond that. Somewhere between disenfranchising minorities and disenfranchising majorities is a middle ground. We are not going to support minority issues by disenfranchising our majority. We have to work together. I think this is an imperfect effort to move in that direction. We are a community of standards that has worked well for the most part. Some of us are interested in validating and improving that community and hesitant to support the drift toward, what we view, is a less constructive course. I think we didn't spend a lot of time on this and I'm sorry it's become divisive but I've been proud of this Council's effort to try to find a reasonable, practicable place to land on. I frankly, do not think that this will contribute to the devicenes in the community. Whether we wished it would have come up this way or not, it has, and I've enjoyed the opportunity to work with these folks and find a good place to land."

Councilman Peterson felt this issue "has gotten sidetracked by a lot of symbolic and divisive issues. I think we've got 500 to 1,000 people on boards and commissions and we've had probably one non-citizen. We probably may not have another one apply for another 10 years, but it's a very symbolic issue and a hot button issue. I know folks feel very strongly about it. I hoped this Council would focus on more practical matters we face and significant problems, but symbolic issues are hard to get away with once they've been opened up. There was a lot of criticism that the prior Council spent too much time on issues that weren't affecting folks on a daily basis. I also think that if this is adopted, we're going to have lawsuits and we've going to waste a lot of money. Our attorney has informed us that these kinds of issues frequently attract costly lawsuits. So, the issue is, if we adopt this policy, are we going to lay off a fireman or layoff a policeman to defend against it. Because, we all know, Asheville is the kind of City that attracts an awful lot of lawsuits. I just wish we could focus on more practical issues and we could actually solve some of the City's problems that we actually deal with on a regular everyday basis. I also think it sends a message. Some of the comments are about we don't like aliens making decisions for us. In Sunday's paper I saw where French company was looking to bring several hundred jobs here. Volvo, Square D - I think we are potentially sending those folks a message saying we don't want your jobs here because we don't like people in foreign countries or even foreigners living here telling us what to do. I think that if we're going to adopt a policy, I don't see the distinction between some of the boards. They are all very important boards and commissions."

Councilwoman Jones said she "was grateful for the subcommittee's work on moving towards a compromise. I think when I first heard this discussion I thought the compromise would be a much more limited body. From some people's perspective, 1/3 is a small number. In my perspective, it's a large number. I think I do want us to continue to have that type of dialogue and try to come together. I do believe that how we go outside these doors, whatever happens on either side – I think it's our choice how much we separate from each other. It's our choice how hurt we are. And that's going to be a choice I personally make, one way or the other." She said in Councilman Mumpower's prayer, it was a call to see the best in others. "I think that I believe that everybody on this table is struggling through that. It's unfortunate that we are not going to have the same vote, but it is belief that's where we are all coming from – to see the best in others. The thing that made me so sad after September 11, regardless of how you felt about the comments that were made, was that all around the country communities were coming together. They were embracing each other and holding each other's hands and crying on each other's shoulders. We somehow managed to make each other made. At that moment, we should have been united nationally. So it's our choice whether we hear this one way or the other. I do hope we can go forward like that. I do think this opens us up for legal issues and anybody that was on the campaign trail knows that I really hate litigation and any way that we can cut it off at the pass, we have a good stewardship to the City to try to do that. That's my personal belief and part of the frustration that I express. I really want to understand legal matters to protect the City's resources down the line. That's a huge concern for me - the legality of it. In terms of the founding fathers and founding mothers, I think self-determination is a big part. And I think part of what we need to do is to be able to vote our conscious. If you vote your conscious, you might get voted out of office. That's okay. That's about being a public official with integrity, with conscious. I think on either side of the fence is that what you probably want at the end of the day. You want somebody with a conscious that is working from a place of integrity. I hope everybody can be open to all seven of us in that regard. I'm not saying you have to vote for all of us, but understand where we are coming from."

Vice-Mayor Bellamy said as Chair of the Boards and Commissions Committee we were presented with an awesome task of deciding on what boards and what commissions we could possibly comply with the request regarding U.S. citizenship. "There are 35 boards that the City actually appoints to. Of those 36 boards, 206 people are appointed by the City of Asheville. That is not counting the ones who are appointed by other entities – just the ones that solely are appointed by this City Council. The seven of us being up here represent 69,739 citizens and in that process we don't always go with everyone's views. Because there are close to 70,000 people in our City, we are asked to make decisions on behalf of them every other Tuesday, and sometimes every Tuesday. In the process of decision-making, some decisions that we make, everyone doesn't agree with and some decisions we make, some people do agree with. Someone told City Council 'it's your job to counsel the people.' Then tonight someone came in and said we're serving all the residents of the City of Asheville. That means that some of the citizens who we serve may be in the minority and some may be in the majority in decision-making processes. It's important tonight that as we cast our vote that everyone understands there are some people in our community who believe in whatever way that we choose to vote tonight, that there are people who believe in either non-citizens, or all citizens. So it's important that as we have this awesome task to make these decisions, that we do represent all citizens and all citizens don't agree with some of the people who come before you and stand. We get e-mails, faxes, phone calls, and we go out and talk to people – we just don't stay in the ivory tower. We believe in grassroots efforts and in talking and communicating. Carl will even invite you for breakfast – he even pays for it. What I'm trying to say is we reach out and so it's imperative that you hear where we're coming from and hear the hearts of this Council that we are here to serve you. And that the decision that we make is not based on people who come just before us today or just before us in the moment. It's about decision-makings and hearing people at all times – in the grocery stores, in the car wash, the cleaners, the day-cares, it doesn't matter. We're here for you. So as we make our decisions tonight, please keep that in mind."

Councilman Ellis said that he is a veteran, having served four years during the Korean War and so he does come from that perspective. "Asheville is facing many serious challenges tonight and to spend time debating whether a taxpaying resident of Asheville or Buncombe County must be a citizen to voluntarily contribute their time, talents and efforts to improve our lives is at best questionable. Earlier this year, Council authorized adding a question about citizenship to every application for any board or commission. On an individual basis, along with all other qualifications, I feel the applicant's citizenship can be considered. I have serious reservations about approving a policy that prohibits qualified city and county residents from serving based solely on that one qualification. I have a few examples to share. We are blessed to have the world headquarters for Volvo International in Asheville. Volvo is a Swedish company and if the president of Volvo is willing to serve on our Economic Development Board and try to encourage additional European companies to locate here, that individual has my vote to serve. Some in this room may remember when American Enka employed over 5,000 area residents. Enka was owned and built by a company from the Netherlands. We welcomed their investment in our community. Similarly, Akzona, the corporate giant that built their world headquarters in downtown Asheville was owned by a Danish company. Would we exclude an official from that company from serving on one of our boards or commissions? We want and need jobs in Asheville. If we approve this policy, what message are we sending to companies like BMW, Michelin and hundreds of others regarding locating their companies in Asheville. I have heard it said that anyone not supporting the citizenship requirement is not patriotic and un-American. I feel differently. To tell the world we will not welcome foreign companies and jobs to Asheville along with the participation of their company officials is shortsighted. Americans pride ourselves on being inclusive not exclusive. Let me repeat, I feel by adding the citizenship question to the application form, this Council has already taken all the action necessary and I cannot support the proposal that citizenship is mandatory. In addition, it has brought up that we truly have a potential legal problem and I'm simply not willing to vote for something that will put the citizens of this City at risk for money that is just totally being wasted."

Upon inquiry of Councilman Dunn, City Attorney Oast said his reading of the cases that he has looked at suggest that there is a political function exception to the strict scrutiny test that may apply in situations involving appointments to boards and commissions that exercise some degree of authority and final, in the sense of administrative finality, over folks who are citizens. That really does draw from the recognized principles of self-determination. What he provided Council with is a list of boards and commissions with respect to which he felt the policy would be legally defensible. He couldn't guarantee that the City would win if we were sued and he couldn't guarantee that the City wouldn't get sued. The best he could do is to put the City in a position of legal defensibility.

City Attorney Oast concurred with Councilman Peterson's statement that other cities have been sued over issues similar to this and potentially have gone to not just Superior Court, but courts of appeals and supreme courts. However, he said he didn't think this issue has been addressed by appellate court in North Carolina.

When Councilman Mumpower asked if there have been successful suits filed against policy changes similar to this, City Attorney Oast said there have been cases that have recognized that legal aliens have certain rights of citizenship, even though they are not citizens. Where a governing body has taken some action to limit those rights, such as by service like this, there have been, in some cases, successful lawsuits. He didn't remember a case exactly on point with what City Council is proposing now.

Vice-Mayor Bellamy asked if the question on our application form of whether you are a U.S. Citizen or not is discrimination. She doesn't want the City to be in a position of having something on the application form and then still exclude people based on what is on the form. She would prefer the question not be on the form. She wanted it to be clear to people when they apply for a board. City Attorney Oast said that the key thing he would caution Council about is adopting a policy that is a blanket exclusion of non-citizens from all boards. He felt the citizenship question is an appropriate question to ask.

Councilman Dunn agreed with Vice-Mayor Bellamy in that we will discriminate against a lot of people who are citizens of this country. He was more worried about what they think than even our good friends who come over and bring business. These people came to this country to bring business to the City because they know this is the fairest and greatest, most economically healthy nation in the world. That's why they came. He doesn't think we will scare anybody off by changing this policy. When they come, they realize there are a few rules we have to follow. He didn't think that's sending a bad message.

Mayor Worley said that "based on the way this Council and past Councils have done business, this issue has no significance. Let me explain what I mean. First of all, it has significance. It has significance to each one of you who have come and spoken for or against the issue. But what is that significance based on? It's based on a feeling. It's based, perhaps for many of you, on the waive of patriotism that is sweeping our nation – and we should be patriotic. We have every reason in the world to be patriotic. For some of you the significance is based on the fear of discrimination. Discrimination against a class of people who are amongst us and who contribute to us in many, many ways. So yes, it has significance, but in the context of the way this Council and the past Councils have done business, it has no significance, because it is a policy decision. It is a policy that no matter what we do in terms of that policy, we can do something different immediately thereafter. We can adopt this policy tonight and tomorrow we can appoint a non-citizen to a board. We cannot adopt this policy tonight and tomorrow we can refuse to appoint a non-citizen to a board. So, in that context, it has no significance. I have really struggled in my own mind over what position I would take with respect to this issue. As soon as the issue came up I realized it had no significance in terms of the City Council's actions. I've also recognized that the question or the issue of citizenship is a very popular one to discuss. It's easy to lose site of the context of the issue and jump on the patriotic bandwagon and wave the flag and say 'we don't want any non-citizens participating on our boards and commissions.' It's real easy to do that in particularly in light of September 11, it's even easier. Is citizenship a consideration, and a serious consideration? I believe it is. Is it something we should put into our policy? I don't think so because of what I said a moment ago where I said it has no significance. I don't think so because we're not doing it across the board. I don't think we ought to separate out our various boards and commissions. I know there are legal reasons to do so. If we're going to adopt the policy like that, we ought to adopt it with respect to every board or commission, or we ought to adopt it to none of them. I think it's a little sweeping and over-broad to adopt it to all of our boards and commissions, so I don't necessarily support going that way. We have wasted a lot of time. We are closing in on the two hour range tonight, about an hour and forty minutes by my calculation. We have a lot of very important issues that do have significance to this Council and to this community. I think we ought to be addressing those issues. We've got serious budget problems. We've got other things on the horizon that we have needs for. We don't need to spend a lot of time. Okay, it's easy to say we've spent the time, let's pass this thing and get on with it. But I don't think the time stops there. I think even though I am very satisfied with our attorney's research and opinion that we would win a lawsuit, I think there is a risk that we would suffer a lawsuit. That's more time and more money and more attention directed away from the important things that are facing us. So those are the reasons that I will not support a change in the policy. Does that mean that I want to go out and appoint a non-citizen to our boards and commissions? No, it means that I will continue to take, as I have, citizenship as a serious issue and one of the criteria upon which I base the qualifications that I will select someone to a board or commission. I think each one of us on Council has the right and the duty and the obligation to develop our own set of criteria and qualifications. And citizenship will be certainly one of my criteria. I don't think any member of this Council who either votes in favor of changing the policy, or who votes against a change in the policy should be either held up or ridiculed. These are matters that are important to you, in terms of your perception. It's important to the Council in terms of how we do business. I think we need to get on with the business of taking care of our City. I've given you my criteria. I am concerned about citizenship – don't misunderstand me. I am concerned about citizenship and I am as patriotic as anybody in this room. I just don't believe it's in the best interest of the City of Asheville to adopt the change in the policy."

Councilman Mumpower moved to approve a policy change that makes U.S. citizenship a requirement for participation on the following decision-making boards, authorities and commission: Airport Authority, the ABC Board, the Board of Adjustment, the Civil Service Board, the Historic Resources Commission (HRC), the Metropolitan Sewerage District, the Planning & Zoning Commission, the Regional Water Authority, the School Board, the Tourism Development Authority (TDA) and the WNC Air Quality Board. This motion was seconded by Councilman Dunn. Said motion failed on a 3-4 vote with Vice-Mayor Bellamy, Councilman Dunn and Councilman Mumpower voting "yes" and Mayor Worley, Councilwoman Jones, Councilman Ellis and Councilman Peterson voting "no."

Vice-Mayor Bellamy moved to remove from the boards and commissions application the questions of "Are you a U.S. Citizen?" This motion was seconded by Councilman Mumpower.

Councilman Brian felt that question should remain on the application because it is a factor we should consider. He personally couldn't imagine appointing a non-citizen to an important regulatory board and I would like to know that. That will be only one of many factors in his decision.

Councilman Mumpower felt it should be up-front or not at all. He made a promise to any non-citizen who wants to be appointed to one of our boards, he won't pay any attention to that question. He said they are welcome based on the earlier vote.

Vice-Mayor Bellamy agreed with Councilman Mumpower. On the application we currently ask race, sex, address and if you are a City or County resident. We do take that

326

criterion into consideration when we deliberate on appointments. It's clear and it's important. If we ask if they are a U.S. citizen and we say we are not going to appoint them, I think that's discrimination. If we keep the question on there, we should consider them just like any other applicant. If it's not an issue enough to change the policy, it shouldn't be on the application.

Councilwoman Jones interprets this differently than Vice-Mayor Bellamy. She feels the U.S. citizenship question is an important factor. In terms of the regulatory boards, she felt there is a higher bar in terms of some of the requirements, so she would ask harder questions.

Mayor Worley felt the question should remain on the application because it is one of the criteria we look at and he doesn't want to make decisions in the absence of knowledge of some qualifications.

The motion made by Vice-Mayor Bellamy and seconded by Councilman Mumpower failed on a 2-5 vote, with Vice-Mayor Bellamy and Councilman Mumpower voting "yes" and Mayor Worley, Councilman Dunn, Councilwoman Jones, Councilman Ellis and Councilman Peterson voting "no."

At 8:40 p.m., Mayor Worley announced a brief recess.

V. NEW BUSINESS:

A. ORDINANCE NO. 2905 - ORDINANCE PROHIBITING PEDESTRIANS TO STAND ON ANY CITY STREET OR MEDIAN AND SOLICIT MONEY, EMPLOYMENT, BUSINESS OR A RIDE FROM PASSING OR STOPPED MOTORISTS WITHIN THE CITY LIMITS

Deputy Police Chief Ross Robinson said that this is the consideration of an ordinance prohibiting pedestrians to stand on any city street or median and solicit money, employment, business or a ride from passing or stopped motorists within the City limits.

The Asheville Police Department has determined that there is a potential danger allowing persons to solicit money, employment, rides or business from the streets and mediations within the City. Currently, there any many busy intersections where persons regularly use to beg for money, rides or employment. It is the Asheville Police Department's (APD) contention that this type of behavior near a busy intersection creates a dangerous situation for the pedestrian and the motorists.

This ordinance will make it a class 3 misdemeanor and a fine no more that $500.00 for a pedestrian to stand on any city street or median and solicit money, employment, business or a ride from passing or stopped motorists within the City limits.

In addition, APD has determined that at certain intersections, homeless persons have formed "gangs" to enforce the exclusive right to beg at certain intersections and will resort to violence if another group or person tries to beg at said intersection.

The APD has checked with the N. C. Dept. of Transportation and they fully support this ordinance.

Currently, the cities of Charlotte, Gastonia, Wilmington, Greenville and Garner have some form of a street solicitation prohibition. Durham is currently in the process of adopting such an ordinance.

City staff recommends approval of the ordinance.

Councilman Peterson asked exactly where is the dividing line of what is getting in the street and what is off the street. Deputy Chief Robinson said they try to apply a commonsense approach to that question. They are frequently governed by what the right-of-way is of the highway and we generally know the road features of how many feet that is, but we realize private property owners can grant someone permission to be on their property. There is a certain amount of judgment involved and a certain amount of right-of-way expectation. They are trying to determine that everyone is safe and not in harms way. They realize there are a lot of well-intentioned people and organizations collect money, but we feel they can find a safer location by moving onto private property, with the permission of the property owner.

Deputy Chief Robinson agreed with Councilman Peterson in that there is nothing to prevent people from advertising on private property.

Mayor Worley asked if, for example, school groups on sidewalks notifying people of a car wash would be prohibited. Deputy Chief Robinson said that would not be prohibited because it makes specific allowance for use of a sidewalk.

The following individuals spoke in favor of the ordinance and made various comments, some being, but are not limited to: requesting Police restraint when issuing citations or arrests, give pedestrians a two week warning period, need money to take care of the indigent, and this ordinance is being proactive before someone is injured:

Mr. Fred English, City resident
Mr. Danny Roberts
Mr. Mickey Mahaffey, City resident and representing Peacemakers
Ms. Hazel Fobes, City resident
Mr. Walter Plaue
Mr. Cecil Beumer, City resident

Mr. Robert Grant and Mr. Salvucci spoke in opposition of the ordinance for various reasons, some being, but are not limited to, lay-offs and plant closing in Western North Carolina will drive homelessness up, churches can't help everybody, jails are already over-crowded, and wait until the economy picks up and then pass the ordinance.

Mr. Karl Rogozenski, District Director of the Muscular Dystrophy Association, understands the need for an ordinance of this nature, but since 1954 firefighters have collected funds for Jerry's Kids on the street. Asheville firefighters are strong good-will ambassadors for the City of Asheville. The organization does not put their staff members, volunteers, patients or their families on the street. We use safety professionals. We also have extensive training and conferences where we meet and emphasize safety. We will not compromise the safety of these professionals. Firefighters do not stop traffic – red lights do. And once they are stopped, then they solicit. We have helped craft ordinances where there are exceptions. He would be disappointed in seeing a blanket ordinance adopted that will eliminate firefighters from soliciting for his organization. He suggested City Council table this issue. He offered his organization's resources to help Council craft an ordinance to fit it to the needs of the firefighters of Asheville. They provided $13,327 last year and they are a source of pride for the City of Asheville.

City Attorney Oast gave Council a letter from Mr. Gene Hampton, who had to leave the meeting. Said letter hoped "this Council will act with both courage and compassion and restore some 'faith' in our government."

Councilwoman Jones, member on the Housing & Community Development Committee, said that they have proposed to not only fully fund the Hospitality House, but funding them at a higher level recognizing the extent of the problem. She knows this is a small step, but it may help.

Upon inquiry of Councilman Peterson, Assistant City Attorney Curt Euler said that he did review the ordinances in Raleigh, Charlotte, Gastonia, and other North Carolina cities and saw no exceptions for charities. City Attorney Oast also noted that he felt there might be some legal difficulties in discriminating between charities and other types of organizations.

Councilman Peterson did wish we could provide something for the firefighters and other non-profit groups, but understood.

When Councilman Mumpower asked that the procedure would be for non-profits to ask for an amendment to the ordinance for exceptions, City Attorney Oast said they could contact the City Attorney's Office, the Police Department or an individual Council member.

Vice-Mayor Bellamy recently attended a conference with the Secretary of Housing & Urban Development and he said that HUD is working on homelessness. Our citizens need to write Secretary Martinez to get more money for our community. In President Bush's proposed budget for 2003, there is $1.13 Billion set aside for homeless assistance grants. We need to get our share. Also there is no money allotted for drug elimination grants. We need those grants because it helps the police officers and Housing Authority deal with drug elimination to provide programs and alternatives to homelessness. She encouraged people to write to Secretary Mel Martinez, 451 7th Street SW, Washington, DC, 20410 - Phone 202-708-0417.

Councilman Mumpower said that one unfortunate consequence of this ordinance is that it does penalize groups that depend on this kind of activity. He encouraged Mr. Rogozenski to meet with staff and present them with some legitimate exceptions.

Councilwoman Jones said the public safety and the training is a really strong case and if there is a way to present that to staff, she would be open to hearing an amendment.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Ellis moved for the adoption of Ordinance No. 2905. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE [redacted] 444

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of February 22-28, 2002: George Benning (Water), Viola Thompson (Inspections) and Josef Zaengerle (Water).

The following claims were received by the City during the period of March 1-7, 2002: Charles Norman (Water), William Yelton (Civic Center) and Ernest Conner (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Campaign Finance Reform

Upon inquiry of Councilman Peterson of the status of the 3 member Council subcommittee, Mayor Worley said that he has one more member to ask if they would serve.

Campaign Finance Reform

Mr. Lewis Langford, representing Citizens for Campaign Finance Reform, presented City Council with a petition containing 194 signatures. Said petition read "Whereas, the cost of running for and winning elective office has been escalating throughout our nation, and Whereas, this escalation has reached to municipal election level, and Whereas, this escalation essentially limits access to public office to those with wealth or access to the wealth of others, and Whereas, this escalation seriously erodes the principle of one person, one vote. We citizens of Asheville, North Carolina, do hereby resolve to petition the City Council to appoint a Citizens Committee to study alternative methods of municipal campaign finance, and to recommend adoption of a specific ordinance for comprehensive campaign finance reform to the City Council by July, 2002." He felt the 3 member Council subcommittee being established to determine the parameters of study is a mistake. He felt the citizen study committee should be appointed as soon as possible, with no limits.

Comments from Mr. Fred English

Mr. Fred English, Haw Creek resident, was disappointed that City Council did not vote in favor of requiring U.S. citizenship on boards and commissions.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:48 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – March 19, 2002 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

REPORT FROM THE FUTURE OF THE CIVIC CENTER TASK FORCE

Mr. Edward Hay, Chair of the Future of the Civic Center Task Force, briefly explained why the Task Force recommends City Council, at the appropriate time, adopt the Heery International Report as the strategic plan for the Civic Center. He explained that it was the Task Force's intent to submit a full report to Council at this meeting, however, City Engineer Cathy Ball, lead staff person with the Task Force, had to leave unexpectedly due to a family emergency and the report was not quite in final form. He hoped to have that final report to Council shortly.

Mr. Ian Vingoe, Project Director for Heery International, explained to Council their team's qualifications, this mission and their process, which was very inclusive. He stressed that the Arena is structurally solid and the building is of sufficient volume. He then talked about the market overview, physical plan, costs and funding options. He responded to the several frequently asked questions, e.g., why renovate the arena, why not renovate the Thomas Wolfe Auditorium, why expand, why not build a new arena, why not convert the arena to a performing arts facility, why not separate facilities, why not 10,000 seats and why not build at another site.

Mr. Joe Baker, Project Manager, pointed out the Civic Center's functional disabilities: substandard ice floor, inadequate sightings, poor circulation, woefully inadequate backstage for auditorium, temporary ice and outdated audio and rigging. Physical disabilities include: roof in very poor condition, 1930's electrical system in auditorium, cooling tower at end of useful life, inoperable smoke vents, poor and noisy lighting, worn seating, improperly functioning mechanical systems and severe water damage in auditorium. The cost to repair and maintain the Civic Center is $10 million and the result would still be a 1975 arena, an auditorium with no acoustics and no backstages and exhibit hall in basement of building.

Mr. Jerry McClendon, Strategic Advisory Group, showed Council a market overview of the arena trends. He explained how our arena was impacted by the Bi-Lo arena in that it is a newer, larger arena in a bigger market (5 times bigger). Our family shows were hardest hit and it will require significant improvements to win shows back. He then showed a trend line of family show attendance. He explained how building a new, larger arena will not compete with the Bi-Lo Center and that overall, our arena has held up well in the face of new competition. He then showed a trend line of total attendance in the arena.

Mr. McClendon explained that the theatre is doing very well: all event types are exhibiting strong performance - the Symphony, Bravo, concerts, touring and local performing arts, special events and graduations, etc.; and promoters like the 2,400 seating size. However, the Thomas Wolfe Auditorium cannot achieve it's potential with its physical shortcomings. A new theatre can expect better results. Many view a new theatre as a key to Asheville's vibrancy as a community.

He said the primary driver is consumer shows, both in the Exhibit Hall and the full building. It will provide pedestrian activity and economic impact in downtown, which was important to the Task Force and other community leaders. Convention and trade show activity is moderate in that Asheville has a lack of air access, small hotel supply and a small market limits large conventions. Many meeting planners are turned off by the existing Civic Center, but would consider Asheville. We need a mix of exhibit, ballroom and meeting rooms. A ballroom would be for special events, banquets and civic events.

Their recommendation would be (1) to renovate the arena to include a full size built-in ice floor; 5-6,000 seats, with good sight-lines; adequate support spaces; improved circulation; and new service dock (addition); (2) to build a new performance arts center; 2,400 seat auditorium; multi-use community performance space; and symphony rehearsal spaces; (3) renovate the Exhibit Hall to include 40,000 square feet of leasable floor area; pre-function space (addition); and adequate truck dock (addition); and (4) convert the Thomas Wolfe Auditorium to include a ballroom with pre-function to seat 900 for banquets; full kitchen and adequate support space; and six break-out meeting rooms (addition).

Mr. McClendon then gave Council the following menu of potential funding options: naming rights, suite sales, lease of ground floor retail, CP&L (to relocate power station), community fund-raising campaign, other private equity and debt; and spin-off development. Public sector options include: project cost afforded by bonding revenue steam; countywide sales tax, citywide sales tax; countywide prepared food and beverage tax; countywide hotel tax; and product development fund.

Mr. Vingoe then showed Council a vehicular travel analysis, pedestrian travel analysis and then a view analysis.

Mr. Baker then explained to Council the different completed project cost options. He said the level of completion can be determined by the community. He showed illustrations of the levels and explained the different Completed Project (CP) levels and what those levels would contain.

CP-1 – site improvements, including utilities, grading and roadwork; Lexington Street motor court; performance center auditorium; lower bowl seating and lower concourse in arena; rotunda; service plaza for arena. Total cost of $72.8 million (includes construction cost of $54.8 million).

CP-2 – conversion of Thomas Wolfe Auditorium to Great Hall ballroom, including kitchen support; expand and improve of arena support and operations space. Total cost $13.1 million.

CP-3 - new construction-operation and service addition; construction of meeting rooms; renovation and expansion of exhibit hall. Total cost of $13.7 million (includes construction cost of $11.4 million).

CP-4 - new construction – performance center addition, including community multi-use performance space and Symphony support spaces; modification and reinforcement of the arena catwalk and roof structure. Total cost of $8.3 million (includes construction cost of $6.9 million).

CP-5 - renovation of the arena upper concourse and balcony seating area; modification and reinforcement of the arena catwalk and structure room. Total cost of $7.2 million (includes construction cost of $6.0 million).

Mr. Baker explained that every CP is a complete project.

Project costs include: arena renovation - $24 million; theatre - $35 million; exhibit/meeting function - $16.7 million; rotunda - $5.8 million; general site work - $8.6 million, power station relocation - $5 million; land acquisition - $2 million, fees, fixtures and equipment - $9 million; and fees -- 9,000. Grand total is $115.1 million.

Mr. Hay explained that with regard to private funding, they have spent a good part of the fall meeting with people and feels confident that $20 million in private fund-raising is a minimum number. However, they need a plan first and this plan represents the most affordable way to meet the needs of our City. Again, he said the Task Force recommends this report be adopted as the strategic plan for the Civic Center. He hoped the City would commit to proceed with CP-1 as it meets the basic needs of the community. Also, CP-2 brings in the extra convention facilities in a big way. As funding becomes available, he urged City Council to proceed with CP-2.

Heery team members responded to various questions/comments from Council, some being, but are not limited to: how were the fees determined; is there a contingency built into the construction costs and designs; what does state-of-the-art mean and why is it necessary to have a state-of-the-art building; is private funding a reality; why are all three elements important; was the flat land by the river an option for building a new arena; using the existing Civic Center land, is there anything underground that we need to be concerned about; is there adequate parking around the Civic Center; what are some of the other economic benefit spin-offs; what will the seating be in the arena, the performing arts center and the banquet hall; what is the level of commitment for suite boxes; and what does other private equity mean.

Mayor Worley said that if Council adopts this report, we are at least a year away from developing sources of funding, given the State budget crisis. We cannot expect to approach the legislature and ask for any funding sources this year. During that time, we will have time to digest the information, to gage the community support, and to begin the process of the fund-raising efforts. So, when we do go to the legislature a year from now, we will have all the pieces together with a plan in place.

Upon inquiry of Councilman Mumpower, Mayor Worley said that after Council has an opportunity to review this report thoroughly, we can place it on an agenda in approximately two months.

Mayor Worley thanked Mr. Hay and the Task Force members, along with the Heery team for their hard work with regard to this project.

At 5:30 p.m., Mayor Worley announced a short break.

CLERK TO ADVERTISE OFFER TO PURCHASE AIR RIGHTS OVER REAR PARKING LOT AT 9-13 BILTMORE AVENUE

Field Services Coordinator Ed Vess said that this is the consideration of a resolution establishing minimum price and authorizing the City Clerk to advertise an offer to purchase the air rights to the parking lot on South Lexington Avenue at the rear of 9 -13 Biltmore Avenue.

The land area comprises 7,940 square feet located on the east side of South Lexington Avenue, about 150 feet south of the intersection with Patton Avenue. It is at the rear of 9 - 13 Biltmore Avenue and is improved with marked parking spaces on an asphalt surface. The lot is rectangular in shape and slopes up from street level access. It is part of a proposed sale to the Asheville Area Arts Council, which includes the building at 9 - 13 Biltmore Avenue but minus the air rights over the rear parking lot. The appraisal of the property reflects a land value for the parking lot of $135,000. The value of the air rights over the property is calculated at 50% of the land value or $67,500.

Robert Camille, Jr., Peter Y. Alberice and Robert M. Todd have submitted a proposal to purchase the air rights in the amount of $67,500. The bid from Camille, Alberice and Todd includes the proposal to construct a new mixed use building containing parking, retail, offices and residential units which would connect to the building proposed to be constructed on the adjoining lot to the north. The new building would contain approximately 8 stories and the estimated cost of the proposed improvement is about $2.4 million.

Approval of the resolution will establish the air rights value and initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Community Development staff recommends adoption of the resolution.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

UDO AMENDMENT REVIEWS

City Attorney Oast said that these Unified Development Ordinance amendments are being brought before City Council in order that staff may respond to questions Council may have prior to the public hearings, which are scheduled for April 9, 2002. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Amendment to the Residential Level I Thresholds

Urban Planner Carter Pettibone said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) to increase the threshold for Level I administrative review of residential projects from 7 units to 50 units.

Currently, by-right residential development projects containing 8 to 50 units are required to be reviewed by the Technical Review Committee (TRC), while residential developments containing three to seven units are reviewed administratively as Level I projects. This amendment would increase the Level I threshold to include these projects containing up to 50 units

This ordinance amendment will help streamline the review process for smaller residential developments by removing the requirement for these projects to go before the TRC. These projects would still be reviewed by all applicable city departments but only administratively. Applicants would also not have to wait until the submission deadline since Level I projects may be submitted anytime.

The ordinance amendment would also provide for a more equitable treatment of smaller residential projects as compared to commercial, office, or institutional uses at the current threshold levels for Level II review in terms of traffic impact. The current residential minimum of 8 units for Level II review generates about 53 trips per day while the minimum levels of commercial, office, and institutional generate 385 to 3,903 trips per day.

Staff believes this ordinance amendment provides a more streamlined and equitable alternative for review of smaller residential projects.

At their March 6, 2002, meeting, the Planning and Zoning Commission voted unanimously to recommend approval of the proposed ordinance amendment. The Planning and Development staff also recommends approval of the amendment.

Councilman Peterson was concerned that this would eliminate an avenue for public comment at the TRC meeting. Chief Planner Gerald Green responded that the City reviews only approximately 4-5 projects a year that this would fall into and over half of those are subdivisions and they go to TRC and the Planning & Zoning Commission.

Amendment to the Flexible Development Standards

Chief Planner Gerald Green said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) to identify lot size, lot width, off-street parking, and landscaping as categories for modification by design review boards using flexible development standards and to identify alternative landscape compliance as a flexible development standard.

Flexible development standards allow minor modifications to be approved administratively or as part of the standard review process rather than requiring a separate hearing by the Board of Adjustment to grant a variance. This procedure streamlines and simplifies the review process for all involved. Currently, design review boards are authorized to modify structure floor area and height and setbacks when structures or lots subject to design review are found to comply with the applicable design guidelines. The proposed ordinance amendment identifies two new dimensional categories, lot area and lot width, as well as off-street parking and landscaping, for the application of flexible development standards. In addition, the proposed amendment identifies alternative landscape compliance as a flexible development standard. Alternative landscape compliance is a tool that has been in place for almost 5 years. This change will not result in any change in the tool; it will only bring it under the umbrella of flexible development standards, possibly resulting in increased use of the tool.

This ordinance amendment encourages infill development that follows historic development patterns within the design review areas of Montford, Biltmore Village, Albemarle Park, Downtown Asheville, and the River District. This flexibility will allow development on lots that do not conform to the UDO standards, helping to implement the City's smart growth policies. The revision should also result in increased use of the alternative landscape compliance tool.

Staff believes that this ordinance provides needed flexibility to evaluate and approve reasonable adjustments to lot dimensions, off-street parking and landscape requirements.

Councilman Dunn hoped that staff and developers will work together regarding alternative landscaping compliance.

At their March 6, 2002, meeting, the Planning and Zoning Commission voted 7 to 0 to recommend approval of the proposed ordinance amendment. The Planning and Development staff also recommends approval of the amendment.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to proceed with the appropriate public hearings on April 9, 2002.

BOARDS/COMMISSIONS

City Council instructed the City Clerk to arrange for interviews for vacancies on the following boards: Board of Electrical Examiners, Civic Center Commission, Educational Access Channel Commission, Film Commission, and the Historic Resources Commission.

City Council instructed the City Clerk to re-advertise the vacancy on the Citizens-Police Advisory Committee. That appointment must be a Central resident and no applications were received from that area.

After discussion, it was the consensus of City Council to reappoint Andrew Reed and Marianna Bailey to the Public Access Channel Commission and that the two remaining vacancies be brought back before City Council in approximately three months. Prior to that time the Commission can update City Council on their incorporation to a non-profit organization.

City Council narrowed the questions to be sent to School Board candidates.

MISCELLANEOUS

Campaign Finance Reform

Mayor Worley announced that the Council subcommittee to look at a citizen study committee for campaign finance reform will consist of Vice-Mayor Bellamy, Councilman Mumpower and Councilman Peterson.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:30 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – March 26, 2002 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Councilman Peterson gave the invocation.

I. PROCLAMATIONS:

II. CONSENT:

A. **APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 13, 2002, AND THE WORKSESSION HELD ON MARCH 19, 2002**

B. **RESOLUTION NO. 02-47 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT THE BID FROM MICHAEL A. PRESSLEY TO PURCHASE PROPERTY ON GALAX AVENUE**

Summary: The consideration of a resolution authorizing a lease of space at 45 Wall Street to the Asheville Performing Arts Alliance.

City Council authorized publication of a notice of intent to lease the space at 45 Wall Street to the Asheville Performing Arts Alliance on March 12, 2002. A notice of intent was duly published in the Asheville Citizen-Times on March 15 and 22, 2002. The term of the lease will be for nine years and 11 months.

The leased premise comprises of approximately 2,520 square feet. The rent reflects an annual rent of $5.00 per square foot. The rental amount is believed to be appropriate considering the location, condition of the space and the lease terms.

The Lessee is responsible for renovating the space. The Lessee is also responsible for paying utilities and maintenance of the interior of the premises including cleaning, glass breakage, electrical, heating, plumbing and air conditioning equipment. The Lessor is responsible for maintenance of the exterior.

Approval of the resolution will authorize the Mayor to execute the lease with the Asheville Performing Arts Alliance for the space at 45 Wall Street.

Community Development staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE 91

C. **RESOLUTION NO. 02-48 - RESOLUTION AUTHORIZING THE CITY TO LEASE SPACE AT 45 WALL STREET TO THE ASHEVILLE PERFORMING ARTS ALLIANCE**

Summary: The consideration of a resolution authorizing a lease of space at 45 Wall Street to the Asheville Performing Arts Alliance.

City Council authorized publication of a notice of intent to lease the space at 45 Wall Street to the Asheville Performing Arts Alliance on March 12, 2002. A notice of intent was duly published in the Asheville Citizen-Times on March 15 and 22, 2002. The term of the lease will be for nine years and 11 months.

The leased premise comprises of approximately 2,520 square feet. The rent reflects an annual rent of $5.00 per square foot. The rental amount is believed to be appropriate considering the location, condition of the space and the lease terms.

The Lessee is responsible for renovating the space. The Lessee is also responsible for paying utilities and maintenance of the interior of the premises including cleaning, glass breakage, electrical, heating, plumbing and air conditioning equipment. The Lessor is responsible for maintenance of the exterior.

Approval of the resolution will authorize the Mayor to execute the lease with the Asheville Performing Arts Alliance for the space at 45 Wall Street.

Community Development staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE 92

D. RESOLUTION NO. 02-49 - RESOLUTION AUTHORIZING THE CITY TO LEASE THE ROCK HOUSE AT 324 CHARLOTTE STREET TO THE PRESERVATION SOCIETY OF ASHEVILLE AND BUNCOMBE COUNTY

Summary: The consideration of a resolution authorizing a lease of the "Rock House" at 324 Charlotte Street to the Preservation Society of Asheville and Buncombe County.

City Council previously approved leasing the subject property. A notice of intent was duly published in the Asheville Citizen-Times on March 15 and 22, 2002.

The leased premises comprise of a 1,158 square foot rock building known as the Rock House along with the yard around the building. The rent reflects an annual rent of $5.70 per square foot. The rental amount is believed to be appropriate considering the location, condition of the space and the lease terms. This lease would be for nine years and eleven months.

The Lessee is responsible for renovating the space. A rent credit will be given for renovations costs. The Lessee is also responsible for paying utilities and all maintenance of the premises including cleaning, glass breakage, electrical, heating, plumbing and air conditioning equipment, interior and exterior repairs. The Lessor is not responsible for any maintenance.

Approval of the resolution will authorize the Mayor to execute the lease with the Preservation Society of Asheville and Buncombe County for the house at 324 Charlotte Street.

Community Development staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE 93

E. RESOLUTION NO. 02-50 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE THE AIR RIGHTS TO THE PARKING LOT ON SOUTH LEXINGTON AVENUE AT THE REAR OF 9-13 BILTMORE AVENUE

Summary: The consideration of a resolution establishing minimum price and authorizing the City Clerk to advertise an offer to purchase the air rights to the parking lot on South Lexington Avenue at the rear of 9 -13 Biltmore Avenue.

The land area comprises 7,940 square feet located on the east side of South Lexington Avenue, about 150 feet south of the intersection with Patton Avenue. It is at the rear of 9 - 13 Biltmore Avenue and is improved with marked parking spaces on an asphalt surface. The lot is rectangular in shape and slopes up from street level access. It is part of a proposed sale to the Asheville Area Arts Council, which includes the building at 9 - 13 Biltmore Avenue but minus the air rights over the rear parking lot. The appraisal of the property reflects a land value for the parking lot of $135,000. The value of the air rights over the property is calculated at 50% of the land value or $67,500.

Robert Camille, Jr., Peter Y. Alberice and Robert M. Todd have submitted a proposal to purchase the air rights in the amount of $67,500. The bid from Camille, Alberice and Todd includes the proposal to construct a new mixed use building containing parking, retail, offices and residential units which would connect to the building proposed to be constructed on the adjoining lot to the north. The new building would contain approximately 8 stories and the estimated cost of the proposed improvement is about $2.4 million.

Approval of the resolution will establish the air rights value and initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Community Development staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 - PAGE 94

F. ORDINANCE NO. 2906 - ORDINANCE REDUCING THE FILM COMMISSION MEMBERSHIP FROM 15 TO 13 MEMBERS

Summary: The consideration of an ordinance reducing total membership of Asheville Film Commission from 15 to 13.

This amendment, which is self-explanatory, has been suggested by staff and the Film Commission members as a way to help ensure regular attendance and quorums at meetings.

City staff recommends City Council adopt the ordinance reducing the membership of the Film Commission.

ORDINANCE BOOK NO. 19 – PAGE 446

G. MOTION SETTING A PUBLIC HEARING ON APRIL 9, 2002, TO CONSIDER THE CONSOLIDATE COMMUNITY DEVELOPMENT BLOCK GRANT/HOME ACTION PLAN

H. RESOLUTION NO. 02-51 - RESOLUTION REAPPOINTING MEMBERS TO THE PUBLIC ACCESS CHANNEL COMMISSION

Summary: The consideration of appointing members to the Public Access Channel Commission.

Mark Rosenstein and Raphael Peter have resigned from the Public Access Channel Commission. The terms of Andrew Reed and Marianna Bailey expired on March 1, 2002.

On March 19, 2002, City Council instructed the City Clerk to bring back the two resignation vacancies in three months.

Also, on March 19, 2002, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Andrew Reed and Marianna Bailey to each serve an additional three year term respectively, terms to expire March 1, 2005, or until their successors have been appointed.

Staff recommends City Council reappoint Andrew Reed and Marianna Bailey to the Public Access Channel Commission.

RESOLUTION BOOK NO. 27 – PAGE 95

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Vice-Mayor Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Peterson and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR WESTMONT COMMONS (FORMERLY KNOWN AS WESTRIDGE COMMONS) LOCATED ON LEICESTER HIGHWAY AND ELIADA HOME ROAD

ORDINANCE NO. 2907 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR WESTRIDGE COMMONS LOCATED ON LEICESTER HIGHWAY AND ELIADA HOME ROAD

City Attorney Oast reviewed with Council the conditional use permit process by stating that City Council will first hear from staff that will describe the proposal and provide some background information. Then the applicant may make a presentation and then comments from the public will be taken. He said that there would be an opportunity for questions and rebuttal comments, as necessary. Following the hearing, Council will then debate the proposal and will take action on the request.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:05 p.m.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Mr. Jeff Tacy, Urban Planner, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Tacy said that this is the consideration of a conditional use permit for a proposed 180-unit apartment development known as Westmont Commons (formerly known as Westridge Commons) located on Leicester Highway, just north of Eliada Home Road.

The project applicant is Bostic Brothers Development with Timmons Consulting Engineers acting as the agent. The project site is located within the corporate city limits on the northeastern side of Leicester Highway approximately 530 feet north of its intersection with Eliada Home Road (Location Map – Attached to City Exhibit 3). The project site is located in an area of mixed commercial, single-family detached, manufactured housing, multi-family residential, and institutional type land uses. There are six different zoning districts found in the immediate area, including: Institutional, Highway Business, Commercial Business II, RM-6 (Residential Multi-family), RM-16 (Residential Multi-family), and RS-8 (Residential Single-family).

The project site contains 17.5 acres (portion of PIN No. 9629.14-43-2879) and is currently zoned HB (Highway Business) and Institutional. The HB district allows for multi-family developments with a maximum density of 32 units per acre and the Institutional district allows for a maximum density of 16 units per acre. The project proposes a total of 180 units for a density of 10.3 units per acre. Based on the plans submitted, the project will contain seven (7) three-story apartment buildings consisting of a total of 72 one-bedroom units, 90 two-bedroom units, and 18 three-bedroom units. The plan also depicts a 2,700 square foot club house/office building, outdoor pool, playground area, and communal dumpster. The project is required to provide a minimum of 202 parking spaces and a maximum of 389 spaces. The plan depicts a total of 293 spaces including 11 handicap spaces. A private driveway extending from a cul-de-sac entrance road will access the development.

The project site has some existing vegetation including mature trees, shrubs, and wild growth. The landscape plan depicts type A & B buffers surrounding the property, street trees along the access road and parking lot landscaping throughout the parking areas. The plan also depicts sidewalks throughout the project site and along the access road.

This project was reviewed at the February 18 Technical Review Committee (TRC) meeting and was recommended for approval at that time. There were some technical issues identified at the meeting and the applicant has agreed to work with the necessary authorities to meet the various requirements. The project was also reviewed at the March 6 Planning & Zoning Commission public hearing and was recommended for approval.

City Council must take formal action as set forth in section 7-5-5 (e) of the Unified Development Ordinance (UDO), and must make the following findings based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case [UDO 7-16-2 (c)]:

1) That the proposed use or development of the land will not materially endanger the public health or safety.

   The project will meet all of the code requirements and incorporate any necessary measures to ensure the protection of public health, safety and welfare.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site;

The project will provide reasonably priced housing in a rapidly developing area of the City where there is a great need.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

It is recommended that the proposed development be designed and constructed with materials that will be long lasting and in a manner that will contribute to and enhance the surrounding community. If developed in this manner, it is not anticipated that the development would injure the value of adjoining property. Due to the intensity of the uses in the immediate area, the proposed development will be compatible.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

There are a variety of commercial, institutional and multi-family residential developments in the area that would be consistent with the scale, bulk, coverage, density, and character of the proposed development.

5) That the proposed use or development of the land will generally conform to the Comprehensive Plan and other official plans adopted by the City.

It appears that the Asheville City 2010 Plan indicates multi-family residential use for this area.

6) That the proposed use or development of the land will generally conform with the comprehensive plan, smart growth policies, sustainable economic development strategic plan, and other official plans adopted by the city.

The proposed development is located in a developing area. The project received conditional approval from City's Technical Review Committee, including the Water Resources Department, the Fire Department, Metropolitan Sewerage District, Engineering Department and Public Works Department. The TRC recommended certain conditions, which have been met.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The project applicant has been working with the City Engineering staff to devise a plan that will adequately address any traffic impact issues resulting from the project site.

The Planning & Development Department has reviewed the proposed development and is satisfied, with the understanding that the project must meet the conditions set forth at the TRC meeting. Based on information available to the Planning & Development Department in advance of the public hearing, staff recommends approval of the conditional use rezoning.

Upon inquiry of Councilman Peterson, Mr. Tacy said that in Phase II they might address a second access off of Eliada Home Road for traffic distributions and safety issues.

Mr. Mike Hartnett, representing Bostic Brothers Development, asked Council to support this request in that it is a good working plan.

Upon inquiry of Vice-Mayor Bellamy, Mr. Hartnett said that the price range of the apartments would be approximately $50 below market rents. He felt they would be moderately priced to fit the market.

When Councilman Mumpower asked about a Phase II, Mr. Hartnett said that he contemplates Phase II being 60-70 units at a later date.

Mr. Doug Annonsen, resident at 61 Webb Cove Road, said that as a North Carolina licensed building contractor, he is in favor of this development.

Vice-Mayor Bellamy said that this is a good example where 10% of the project could have been set aside for affordable housing. We need the support of our legislature to have that provision enacted. Planning & Development Director Scott Shuford responded that the incentive that we currently have is not sufficient to draw market interest and Planning staff is looking at other ways to address this issue.

Vice-Mayor Bellamy said that this project is a good example of smart growth development and will bring needed economic development to our community.

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 5:22 p.m.

Vice-Mayor Bellamy moved to grant a conditional use permit to construct a 180-unit apartment development known as Westmont Commons (formerly known as Westridge Commons) located on Leicester Highway, just north of Ellada Home Road subject to the conditions set forth at the TRC meeting. This motion was seconded by Councilman Peterson and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 447

B. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE ZONING OF FIVE LOTS LOCATED ON CARROLL AVENUE (TRIED STONE MISSIONARY BAPTIST CHURCH) FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO INSTITUTIONAL/CONDITIONAL USE AND ISSUANCE OF A CONDITIONAL USE PERMIT

ORDINANCE NO. 2908 – ORDINANCE TO REZONE FIVE LOTS LOCATED ON CARROLL AVENUE (TRIED STONE MISSIONARY BAPTIST CHURCH) FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO INSTITUTIONAL/CONDITIONAL USE

ORDINANCE NO. 2909 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR FIVE LOTS LOCATED ON CARROLL AVENUE (TRIED STONE MISSIONARY BAPTIST CHURCH)

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:26 p.m.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Mr. Jeff Tacy, Urban Planner, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Tacy said that this is the consideration of a request to rezone property located on the north and south sides of Carroll Avenue from RM-8 Residential Multi-Family Medium Density District and RS-8 Residential Single-Family High Density District to Institutional and of a motion to issue a Conditional Use Permit for the proposed use of a place of worship with accessory parking and a six-unit multi-family development.

The project site is located in a predominantly residential area including single-family and multi-family residential developments (Location Map – Attached to City Exhibit 3). The portion of the project site located on the northern side of Carroll Avenue is approximately 2.11 acres and the portion on the southern side is .76 acres (PIN Nos. 9648.07-58-4342, 6372, 4195, 5192, & 6190). Based on the site plan and information submitted by the applicant, the applicant is proposing a two phase project with Phase I to reconstruct a place of worship with approximately 350 seats and parking lots containing a total of 100 spaces and Phase II a six unit multi-family residential development. The RM-8 and RS-8 districts allow churches as a use by right, subject to special requirements. When applied, the special requirements create a hardship and eliminate the possibility of reconstructing a church comparable to the one that previously existed on the site. In an effort to reconstruct a church facility that meets the needs of the church, it was determined that Institutional zoning would be most appropriate. In addition, the Planning and Development Director has determined that Phase I of the project qualifies for a vested rights provision. Due to this determination, the applicants have been given building permits to begin construction on the project. However, in order to bring the project site into compliance with the Unified Development Ordinance (UDO) requirements, it is still necessary that the project be rezoned to the Institutional district. The conditional use process will provide city authorities with a mechanism to ensure compliance with the UDO and compatibility with adjacent and surrounding properties. In addition, the conditional use permit will prevent to the possibility of incompatible developments in the future.

Per the Planning and Development Department's request, Phase II of the project includes a six (6) unit multi-family development located on .76 acres on the south side of Carroll Avenue. Phase II will also include thirteen (13) off-street parking spaces and an interior network of sidewalks. All buffer yards and landscaping incorporated into Phase I will remain throughout Phase II.

City Council must take formal action as set forth in section 7-5-5(e) of the Unified Development Ordinance, and must find that all seven standards for approval for conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case [UDO 7-16-2 (c)]. Staff's preliminary opinion, absent the benefit of public input, is that all seven standards appear to be met.

1. That the proposed use or development of the land will not materially endanger the public health or safety.

All public health and safety concerns have been addressed through the site plan development process and it appears that the proposed use and development will not materially endanger the public health or safety.

2. That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and in the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   The project site has been designed with every consideration for the natural and topographic features on the site and in the immediate vicinity. The development was designed to provide for the minimum changes and alterations to the existing conditions on the site.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

   Places of worship are considered low impact uses as well as residential type uses in the area. City authorities will ensure the use of compatible building materials, buffering, and landscaping.

4. That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

   There are a variety of building types and developments in the area, most of which appear to be comparable in scale, bulk, coverage, density, and character.

5. That the proposed use or development of the land will generally conform with the comprehensive plan, smart growth policies, sustainable economic development strategic plan, and other official plans adopted by the City.

   The 2010 plan appears to designate this area for low to medium density type developments.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

   The proposed development is located in a developing area. The project received conditional approval from City's Technical Review Committee, including the Water Resources Department, the Fire Department, Metropolitan Sewerage District, Engineering Department and Public Works Department. The Technical Review Committee recommended certain conditions, which have been met.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

   The project applicant has been working with the city engineering staff to devise a plan that will adequately address any traffic impact issues resulting from the project site.

The Technical Review Committee reviewed the proposed project at their February 18, 2002, public meeting and recommended approval. A Transportation Impact Analysis was not required for this project.

The Planning and Zoning Commission reviewed the requested conditional use rezoning and the site plan for the proposed use at their March 6, 2002, public hearing and recommended approval subject to the conditions recommended by staff.

Based on the information submitted by the applicant, the proposed project does meet all of the UDO standards required for approval. Based on a field investigation of the project site, the proposed project will function appropriately with the natural characteristics and topography. Based on a field investigation of the surrounding area, the proposed project is consistent with other developments in the area.

Based on information available to the Planning and Development Department in advance of this public hearing, staff recommends that the City Council approve the requested conditional use rezoning and issue the Conditional Use Permit with the following conditions:

1. Allow Phase II development at a maximum density of 12-units instead of the proposed 6-unit density.
2. The project applicant shall coordinate with the City to design a drainage plan for the property located on the south side of Carroll Avenue.
3. The project applicant shall work with the Planning and Development Department to determine the best placement of buffering and landscaping materials throughout the development process.
4. The project applicant shall meet all other requirements as deemed necessary by local officials and authorities throughout the development of the project.
5. The applicant shall comply with all applicable codes, ordinances, and filing procedures that are in place at the time of Phase II development.

Mr. Tacy noted that during the Planning & Zoning Commission meeting there was some discussion about the security and lighting at the site. The applicants have been asked to work with the Planning and Police Departments to design security for a safe site where lighting will not be intrusive on adjoining properties.

Pastor Alfred Blount, Tried Stone Missionary Baptist Church, said that in 1994 their church was destroyed due to a fire and since that time they have been working diligently to raise money to not only restore their worship facility but to also develop a place that would be a greater asset to the East End community. They would like to continue their legacy through the rebuilding of their church, as well as providing an attractive and safe affordable housing to residents.

Mr. Cornell Proctor, Chairman of the Building Committee, also spoke in support of this project.

Mr. Jerry Young, Project Coordinator, spoke in support of the project and presented City Council with a site plan (Applicant Exhibit 1).

There was some discussion about the adequacy of parking.

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 5:46 p.m.

Councilman Mumpower moved to adopt Ordinance No. 2908 to rezone property located on the north and south sides of Carroll Avenue from RM-8 Residential Multi-Family Medium Density District and RS-8 Residential Single-Family High Density District to Institutional/Conditional Use. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 451

Vice-Mayor Bellamy moved to adopt Ordinance No. 2909 to issue the conditional use permit for the proposed use of a place of worship with accessory parking and a six-unit multi-family development, subject to the following conditions: (1) Allow Phase II development at a maximum density of 12-units instead of the proposed 6-unit density; (2) The project applicant shall coordinate with the City to design a drainage plan for the property located on the south side of Carroll Avenue; (3) The project applicant shall work with the Planning and Development Department to determine the best placement of buffering and landscaping materials throughout the development process; (4) The project applicant shall meet all other requirements as deemed necessary by local officials and authorities throughout the development of the project; and (5) The applicant shall comply with all applicable codes, ordinances, and filing procedures that are in place at the time of Phase II development. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 19 - PAGE 453

C. PUBLIC HEARING RELATIVE TO REZONING TWO LOTS LOCATED AT THE INTERSECTION OF MILLS GAP ROAD AND HENDERSONVILLE ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT TO HIGHWAY BUSINESS DISTRICT

ORDINANCE NO. 2910 - ORDINANCE TO REZONE TWO LOTS LOCATED AT THE INTERSECTION OF MILLS GAP ROAD AND HENDERSONVILLE ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT TO HIGHWAY BUSINESS DISTRICT

Mayor Worley opened the public hearing at 5:52 p.m.

Urban Planner Jeff Tacy said that this is an ordinance to consider the rezoning of property located at southeast corner of Hendersonville Road and Mills Gap Road from Commercial Industrial District to Highway Business District. This public hearing was advertised on March 15 and 22, 2002.

The Planning and Development Department has initiated this rezoning request (PIN Nos. 9655.09-25-1134 and 2170) in an effort to maintain the commercial character of the Hendersonville Road corridor. The Highway Business District is established to address the needs of commercial development along major thoroughfares. The district permits a wide range of residential, recreational, institutional, public/semi-public, office/business and other land uses. The majority of the properties in the vicinity that front on Hendersonville Road are zoned Highway Business. There are no industrial uses fronting on Hendersonville Road in the immediate area. Based on the purpose of the Highway Business District and the development patterns along Hendersonville Road, Highway Business zoning would be more appropriate than the current Commercial Industrial. Highway Business zoning would prevent the location of incompatible uses in the area and promote the location of uses similar to those in existence.

It should be noted that the property owner has submitted a letter of consent and desire for the rezoning request.

The Planning and Zoning Commission voted unanimously to recommend approval of the rezoning of the property located at the southeast corner of Hendersonville Road and Mills Gap Road from Commercial Industrial District to Highway Business District. The Planning and Development staff recommends approval of the requested rezoning.

Mayor Worley closed the public hearing at 5:57 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 2910. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 19 - PAGE 458

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

VI. OTHER BUSINESS:

Council Miscellaneous Items

Councilman Dunn and Councilman Mumpower asked about the status of the extraterritorial jurisdiction issue. Their interest is in seeing some movement, with the intent that we work with the County on a positive basis and within our limits of liability. City Manager Westbrook responded that a report will be given City Council in approximately two weeks.

Upon inquiry of Councilwoman Jones, Councilman Peterson said that the Council subcommittee on campaign finance reform will hopefully be meeting before the next worksession and they will report back to Council as soon as possible.

Councilman Dunn and Councilman Mumpower each suggested a closed session regarding the lawsuit with the police officers.

Councilman Peterson asked the City Manager to provide city Council with information on the financial aspects of annexation so that members of Council can be better informed about all aspects of annexation.

Councilman Peterson suggested that perhaps at a worksession every other month Council members can bring up items they would like to see reviewed or if there is an issue they would like to discuss.

Claims

The following claims were received by the City of Asheville during the period of March 8-21, 2002: John Smith (Water), Gretchen Clasby (Civic Center), Teresa Johnson (Sanitation), BellSouth (Water), BellSouth (Water), and Stephen Aldrich (Civic Center).

These claims have been referred to Asheville Claims Corporation for investigation.

Lawsuits

The City filed the following Complaint on March 13, 2002: City of Asheville vs. Kenneth Bowman, et al. This is a complaint to vacate for lack of subject matter jurisdiction or to remand this matter involving a pay increase back to the Civil Service Board for a fair hearing before an impartial board. This matter will be handled in-house.

The City filed the following Petition on March 13, 2002: City vs. Civil Service Board. This is a petition to rescind the Board's March 3, 2002, order and to remand the matter back before the Board for a new hearing due to a conflict of interest. This matter will be handled in-house.

348

The City was served with the following Petition on March 18, 2002: Noccalula M. Moon v. City. This is a petition for an order setting aside the adoption of Ordinance No. 2894 – Ordinance granting conditional use permit (Long Street recycling center and farmers market). This matter will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Comments by Fred English

Mr. Fred English, Haw Creek resident, hoped City Council does not put any more money into the aging Civic Center.

Comments by Andy Reed

Mr. Andy Reed, City resident, representing Citizens for Campaign Finance Reform, said that this organization now includes the Asheville-Buncombe County League of Women Voters, Common Cause 11th District, Taxpayers for Accountable Government, Coalition of Asheville Neighborhoods, Council of Independent Peacemakers and the West Asheville Business Association. Their vision is that if the citizens study committee is appointed that they will study the issue of campaign finance and make recommendations to Council for an ordinance that will reduce the cost of campaigning. They hoped the committee would investigate a full range of possible changes, up to and including, public financing of local campaigns and maybe even free public access channel television appearances. They understand the Council subcommittee is to set parameters for such a citizens study committee. They urged Council not to set restrictions on a public citizens committee that would tie a committee's hands, but you set parameters that (1) ensure that a broad cross-section of the public is appointed to serve on the committee; (2) charge the committee to investigate all possible improvements in ways we finance campaigns for local office; and (3) set a target date for the committee to make a report back to City Council with its recommendations. He presented City Council with a petition containing 58 names, asking Council "to appoint a Citizens Committee to study alternate methods of municipal campaign finance, and to recommend adoption of a specific ordinance for comprehensive campaign finance reform to the City Council by July, 2002." He urged Council to proceed without delay.

Comments by Peter Dawes

Mr. Peter Dawes urged City Council to move quickly on getting the public access channel up and running.

Comments by Walter Plaue

Mr. Walter Plaue, Buncombe County resident, requested City Council include in their staff reports regarding land, that two items be addressed: (1) the implications for City property tax (whether it will be added or deleted from the tax rolls); and (2) that whenever land is set aside for another project, that we look at the implications of whether or not we are taking land that may be used for affordable housing away from that market.

Mr. Plaue also suggested that City Council hold a public Memorial Day ceremony on the City-County Plaza. He felt sure that a lot of veterans groups would like to participate in that event.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 6:19 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – April 2, 2002 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

Next Community Meeting on April 30, 2002, at the North Asheville Community Center beginning at 7:00 p.m.

A short discussion took place regarding the process of community meetings.

Parking Study Update

Summary: The consideration of an up-to-date Status Report Spreadsheet that is used to track the progress of the Parking Study Implementation.

The City's Comprehensive Parking Study was adopted by the City Council in December 1998. The Parking Study Implementation Team was formed and the LX Team Charter was signed in June 1999. The study made about 60 recommendations for potential changes that would improve parking issues within the City. In addition, a few other recommendations have been made by other groups including the Asheville Downtown Association and the Implementation Team itself. A total of 68 recommendations have been incorporated into a single Status Report Spreadsheet. This spreadsheet is used to track the progress on evaluating and implementing the recommendations. Beginning in July 1999, updates have been provided to the City Council twice each year. The most recent report to City Council was on August 21, 2001.

Many of the items on the list are now completed resulting in less overall action each month. At this time, the team has agreed that meetings will be held quarterly rather than monthly, because there is often little progress to discuss on a monthly basis. Likewise, the team would like to report to City Council once per year instead of twice per year, unless Council has objections.

A few issues have been completed in the past 8 months and some are nearing completion. Item B4 in the status report spreadsheet identifies a need to look for opportunities to add additional on-street parking in various areas of downtown. The redesign of streets and sidewalks around the Grove Arcade includes a reconfiguration of the parking resulting in increased on-street parking availability. The final result of this improvement should be visible in the next several months. Items C1 and D1 indicate a need to encourage bicycling and walking in downtown and Biltmore Village. Many bike racks have recently been installed in downtown and more are on their way. All of the planned bike racks have been installed in Biltmore Village. Item D4 addresses the optimization of the timing of the downtown traffic signals. The signal timing throughout downtown has been updated and the final report has been received from the Consultant. Item H2 indicates a need to make crosswalk improvements at the intersection of Lodge Street, All Souls Crescent and the McDowell Street Viaduct. In late 2001, the N. C. Dept. of Transportation installed pedestrian signals and pedestrian pushbuttons at this intersection.

The spreadsheet outlines the continuing work being done by employees from several departments to implement many of the remaining recommendations.

Staff recommends that Council review the Status Report Spreadsheet and direct staff to continue implementing the Parking Study.

Traffic Engineer Michael Moule responded to various questions/comments from Council, some being, but are not limited to: what are the City's parking plans for around the City-County Plaza; has the City looked at raising the rates at some of the parking decks and parking meters; why are there no parking meters in Biltmore; some parking meters need to have placards that say parking is enforced on Saturdays; need for a pedestrian button at the intersection of Montford Avenue and Cherry Street.

Clerk to Advertise an Offer for Upset Bids on 17 Kendall Street

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer to purchase property at 17 Kendall Street in the West Asheville community.

A bid has been received from Neighborhood Housing Services of Asheville in the amount of $10,000 for the purchase of land at 17 Kendall Street in the West Asheville Community.

The land at 17 Kendall Street is a rectangular shaped residential zoned lot comprising 0.11 acre±. It is level at street grade and slopes down from front to rear. The property was acquired at a tax foreclosure sale in 2000 to recover on a demolition lien and has been available for sale since that time. The property was acquired at the tax foreclosure sale for the amount of $3,700.00. Of that amount $634.13 was remitted back to the City for the City's share of delinquent taxes. The amount of the demolition lien which included asbestos removal and removal of abandoned furniture was $7,842.44 bringing the City's total cost related to the property to $10,908.31. The previous tax value was $4,700. The bid from Neighborhood Housing Services in the amount of $10,000 includes a request for short term financing of $9,500 of the purchase price and the proposal to construct an affordable house on the property for sale. The purchase money loan would be due on sale of the completed structure. Staff recommends that if the bid is accepted the following terms be added: (1) the loan be due on sale or within 24 months of closing whichever comes first, (2) the loan bear interest at the rate of 2% per annum. The proposed construction is consistent with the policy of encouraging infill development.

The current tax appraisal on the subject parcel is $14,300 ($2.98 per square foot). That amount is almost triple the previous tax appraisal and more than double the per square foot price of recent appraisals of comparable parcels on Choctaw Street (0.22 ac. each @ $11,800 or $1.23 per square foot) which were twice as large, but clearly more buildable. The upset bid process will provide the opportunity for the market to produce the true value of the property.

Planning & Development staff recommends adoption of the resolution which will initiate the sale of the property through the upset bid process.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

DRAFT CONSOLIDATED COMMUNITY DEVELOPMENT BLOCK GRANT/HOME ACTION PLAN

Community Development Director Charlotte Caplan said that this is the consideration of a resolution authorizing submission of the City's Consolidated Action Plan for 2002/03, allocating federal Community Development Block Grant (CDBG) and HOME funds.

The City expects to have available $1,902,224 in CDBG funds and $1,506,326 in HOME funds to allocate for housing and community development activities in the fiscal year beginning

July 1, 2002. The City's Housing and Community Development Committee and the Asheville Regional Housing Consortium have made recommendations for allocating these funds to 21 CDBG-assisted and 13-HOME assisted projects.

If approved, the funding will assist in adding or preserving 92 affordable housing units in the City and 109 units in the rest of the Consortium area. CDBG funds will also help provide 150 Asheville residents with employment or business training and over 3,000 residents with other needed services. CDBG will also continue to support revitalization of the WECAN and South Pack Square neighborhoods.

Notice of the public hearing and a summary of the draft plan were published on March 22. A 30-day public comment period is required by federal regulations. The final plan must be submitted to HUD by May 15, 2002.

City staff recommends City Council hold a public hearing on April 9, 2002, to consider the Consolidated Action Plan for 2002-03. No action is needed at the public hearing. Approval of the draft Action Plan is recommended at the April 23, 2002, Council meeting.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

Ms. Caplan responded to several questions/comments from Council, some being, but are not limited to: what projects are funded from the sale of properties on Biltmore Avenue; what type of renovations are taking place in the Eagle/Market Street area and do they have a Master Plan; and what is the makeup of the Asheville Regional Housing Consortium.

Councilman Mumpower, member of the Housing & Community Development Committee, felt the Committee made a good effort to not waste the monies allocated to the City of Asheville. He was impressed with what most people are trying to do with the money.

Councilwoman Jones, Chair of the Housing & Community Development Committee, agreed with Councilman Mumpower in that the City is being a good steward with the taxpayers money. She explained why she personally felt that the City should look at a future work plan of additional staff in the Community Development Division.

Councilman Dunn, member of the Housing & Community Development Committee, stated that this year more money was allocated to address the homeless problem in Asheville.

ANNEXATIONS

Resolutions of Intent to Annex

Urban Planner Paul Benson said that this is the consideration of adopting resolutions stating the intent of the City to annex seven areas.

Mr. Benson said that the State of North Carolina enables cities to grow by annexation, and provides incentives in the form of various shared revenues tied to population and street mileage.

This state legislation is based on the proposition that strong cities are the basis of a strong state economy and essential to the continued economic development of the state, and that cities are the best units of government to meet the needs of urban areas. The state's intent is often summed up as "what is urban should be municipal."

In a growing urban area, annexation becomes an equity issue. This stems from the fact that the true "City of Asheville" (like most cities) is always growing and at any given time is larger than the area in the current city limits. North Carolina state law recognizes that the cities need to expand their boundaries to include this growth so that we don't end up in a situation where an increasingly relatively smaller number of citizens are financing the urban infrastructure used by a much larger population. The fact is that people living in close proximity to cities benefit from the cities, and state annexation law is designed to include these people in the costs and benefits of governing and servicing the City.

The City of Asheville has initiated annexations for the past two years – five areas in 2001 and five areas in 2002. These recent annexations, like the ones being presented are designed to include: areas that are clearly urban, areas surrounded by the City but not within the City of Asheville and can only be accessed through the City; areas that will create a more logical City boundary; and areas with at least some existing water and sewer service.

Mr. Benson then showed Council a chart for the past two year annexations which showed annual revenue, annual expenditures and capital costs for each of the areas. In the past two years, ten areas have been annexed (two are pending court decisions). In total, the estimated annual revenue from these areas is $2,199,869, with estimated annual costs of $281,987.

The following steps and dates meet the process required by State law:

Adoption of Resolutions of Intent	April 9, 2002
Adoption of Plans of Services	April 23, 2002
Public Informational Meeting	June 3, 2002
Public Hearings	June 11, 2002
Adoption of Annexation Ordinances	June 25, 2002
Effective Date of Annexations	June 30, 2003

Mr. Benson under State law the City must follow a specific process for annexation that begins with the adoption of resolutions that describe the boundaries of the areas under consideration, and fix dates for a public informational meeting and a public hearing on the question of annexation. State law does allow simultaneous annexation of multiple non-adjacent areas.

City staff has identified the following seven areas with the potential for being annexed:

Leicester Highway – This is a one mile corridor along Leicester Highway. This has 68 lots, is 64 acres, and has an estimated population of 113. It has a mixture of commercial and residential development and provides a more rational City boundary. Current boundary excludes a pocket on east side of the highway. There is a one-time capital cost of $160,000 for improvements in fire protection water service.

Sherwood Heights – This is a subdivision in North Asheville. This is the only pocket of development out of the City in this area and their only access is through the City of Asheville. This has 50 lots, is 97 acres and a population of 73.

Huntington Chase – This is a new subdivision in Haw Creek and forms isolated pocket out of the City. Their only access is through the City of Asheville. This has 41 lots, is 63 acres and a population of 68. There is a one-time capital cost of $105,000 for some sewer and fire protection water service improvements which are planned.

Bell Road – This is a section of Bell Road between two existing sections of the City in Haw Creek. There is currently a service delivery problem. This has 14 lots, 22 acres and a population of 32. There is a one-time capital cost of $116,000 for fire protection water service improvements which are planned.

Forest Lake – This is a large subdivision in South Asheville off of Sweeten Creek Road. Its access is only through the City. This has 128 lots, is 53 acres and a population of 250.

Mill Stone – This is a subdivision off Round Top Road and is in a corner formed by the City limits. This has a population of 51. There is a one-time capital cost of $30,000 for some sewer improvements which are planned.

Kensington-Windsor – This is a large residential area off Sweeten Creek Road and Mills Gap Road. It includes two apartment complexes (Kensington Place and Pine Ridge Apartments) and the Windsor Park Subdivision. This has 30 lots, is 67 acres and has a population of 500.

Under State law the City must follow a specific process for annexation that begins with the adoption of resolutions that describe the boundaries of the areas under consideration, and fix dates for a public informational meeting and a public hearing on the question of annexation. State law does allow simultaneous annexation of multiple non-adjacent areas.

City staff recommends that the seven Resolutions of Intent be adopted. They have been working on these areas since last fall and City staff feels they can handle these annexations with existing staff and equipment.

Councilman Dunn stressed that there should be financial benefits to the community when annexation occurs, just not to City government. Mr. Benson explained some benefits to property owners include reduction of fire insurance ratings, bigger water lines to support fire hydrants, solid waste collection, improved level of police protection, and increased code enforcement protection for property owners.

City Manager Westbrook pointed out that there is a book entitled "Cities without Suburbs" that contains definitive work on why annexation of an urban area is the way to spread the cost to provide urban services to people who live in an urban environment. The book points out all kinds of factors, noting that they all can't be measured in dollars and cents.

Upon inquiry of Councilman Peterson, City Manager Westbrook said that in addition to property taxes, the City receives additional Powell Bill funds, State intangible taxes, inventory taxes, sales tax, and utility franchise taxes.

Councilman Mumpower asked for a summation of figures on how much it cost the City to provide actually provide services to the 2001 annexations. Planning & Development Director Scott Shuford responded in that he would provide Councilman Mumpower with the Annexation Plan for Services for 2001.

Councilman Dunn was upset that the Metropolitan Sewerage District does not extend sewer lines and that the burden is placed upon the City of Asheville.

Upon inquiry of Councilman Dunn, Mr. Benson said that all of seven areas are in the City's extraterritorial jurisdiction, except for Kensington-Windsor which is in the Limestone Township.

Discussion surrounded the City's not providing trash collection service to multi-family apartments and some condominiums.

Upon inquiry of Vice-Mayor Bellamy, City Manager Westbrook said that staff is working on the issue of recycling at apartments.

Councilwoman Jones thanked staff for this informative presentation on annexation and hoped the City and news media would try to educate the public about annexation to dispel some myths.

When Councilman Dunn expressed concern that property owners taxes will almost double when they are annexed, Councilman Peterson stressed they are saving money in other ways.

Councilman Mumpower felt the City needed to be direct with the citizens in that taxes will go up, but there are compensations.

Resolution of Consideration for Potential Future Annexation Areas

Urban Planner Paul Benson said that this is the consideration of a Resolution of Consideration identifying areas with potential for future annexation.

State law provides that a Resolution of Consideration may be adopted by cities as a preliminary step in the annexation process. While not required, the Resolution of Consideration serves the purpose of providing citizens with advance notice that certain areas in proximity to the city may, within the reasonably near future, be subject to annexation. After being in effect for a least one year, the Resolution of Consideration also has the benefit of reducing the time period required between adoption of the annexation ordinance and the effective date of that ordinance from a minimum of 1 year to a minimum of 40 days. The Resolution of Consideration is effective for 2 years.

The map staff has prepared in connection with the Resolution of Consideration basically includes areas with the potential for urbanization, such as the areas along major thoroughfares, areas within the City's existing extraterritorial jurisdiction, areas with existing infrastructure or areas where utility extensions are feasible, such as areas that are within drainage basins with existing sewer service, and other areas with potential for urban development. The map includes many areas that may not experience urban development in the near future, because the boundaries are drawn to be expansive enough so that any possible near term (1-5 years), annexation areas will be within the boundaries.

City staff recommends that the Resolution of Consideration be adopted.

City Attorney Oast stated that just because you may have property in the area, the property still must quality under the statutes for annexation.

Councilman Dunn felt that the City should be sensitive to industry when thinking about annexation.

Upon inquiry of Councilman Peterson, Mr. Benson said that even with this resolution of consideration, the City still could give property owners from 40 days to 400 days within which to make the effective date of the annexation. However, Mr. Benson felt that June 30 should be the date for effective annexations for tax billing purposes.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

At 5:40 p.m., Mayor Worley announced a short break.

ASHEVILLE SCHOOL BOARD

It was the consensus of City Council to only consider applicants who submitted written responses to Council's questions and that only City residents who live in the Asheville School District be considered.

City Council instructed the City Clerk to arrange interviews for the following individuals for the vacancy on the Asheville School Board: Allison Jordan, Keith Thomson, Marsha Bate, Pegi O'Hagan and Roxie Wynn.

MISCELLANEOUS ITEMS

Board Appointments

It was the consensus of the City Council to go to a monthly appointment process until the end of December, 2002. At that time the Boards and Commissions Committee will review the monthly vs. quarterly process. It was also the consensus of City Council to only keep board and commission applications for one year instead of two years.

Council Subcommittee on Campaign Finance Changes

Councilman Peterson, Chair of the Council Subcommittee on Campaign Finance Changes ("Subcommittee"), said that he, Vice-Mayor Bellamy and Councilman Mumpower met on April 1, 2002. He summarized the following report: The Subcommittee recommends that City Council explore options to improve campaigns for Council and Mayor by appointing a Citizens Study Committee for Campaign Finance Reform. The Subcommittee members believe that recommendations to improve local campaigns should come from Asheville citizens and not from individual members of Council or from City staff. The Subcommittee further recommends that consideration of changes in the process for conducting City elections be postponed until a later time.

Make-Up of the Citizens Study Committee – To begin the process, the Subcommittee recommends that Council appoint a Citizen Study Committee ("Committee") composed of seven voting members and a few additional ex-officio members to represent interested civic organizations. For the voting members of the Committee, each member of Council and the Mayor shall nominate one individual to serve on the Committee. The Subcommittee believes that there are several local civic organizations that have a special involvement in local government and would be able to provide valuable information to the Committee. Therefore, the Subcommittee recommends that the Committee include several ex-officio members that are appointed by these civic organizations. City Council can decide which civic groups will be allowed to nominate ex-officio representatives to the Committee. The Subcommittee discussed including groups such as the League of Women Voters, Common Cause, and the NAACP.

Operations of the Citizens Study Committee – The Subcommittee recommends that the operations of the Committee be left to the members of the Committee. The Committee members should elect a Chair, Secretary, and other positions (i.e. facilitator, parliamentarian) as they see necessary. The Subcommittee recommends that the City Attorney's office provide any staffing and administrative support that the Committee may require. As this is an official City Committee, it will be subject to the Open Meetings Law. The Subcommittee recognizes that City staff may need to provide some limited clerical assistance such as mailing notices and copying material. The Subcommittee also recommends that the City provide adequate meeting space for the Committee to conduct their meetings. The meeting space should be at a location that is accessible to the public. The Subcommittee encourages the Committee to establish, if possible, a regularly scheduled meeting time and place. The Subcommittee recommends that the

Committee allow reasonable public comment at each of their meetings. The Subcommittee will be available to the Committee should they need any additional guidance or assistance with process or administrative issues.

Goals for the Citizens Study Committee – The Subcommittee recommends that we ask the Committee to provide Council with a written Final Report within 120 days of their appointment. This time-line may be extended by the Subcommittee upon request of the Committee. Following the submission of their written report, the Committee should make a presentation to City Council of their recommendations. The Subcommittee recommends that the Final Report include (1) possible options to improve the financing of city elections; (2) the Committee's recommendations and rationale as to the best option or options; (3) steps to implement their recommendations; and (4) relevant research material they gathered. The Subcommittee recommends that the Committee research the following specific issues: (1) What ordinance or campaign limits would be permitted under current North Carolina law; (2) What have other cities (in North Carolina and in other states) done to address the problems of campaign finance reform; (3) What Constitutional limits would the City face; and (4) What federal regulations would the City face. The Subcommittee recommends that the Committee consider the following possible campaign finance changes: (1) public funding for local campaigns (A) what threshold should there be to quality for public funding (i) funding candidates in the primary; (ii) funding only candidates in the general; (B) how much to fund candidate; (C) how much could it cost; and (D) how could it be funded; (2) voluntary spending limits (A) what should the limits be; and (B) how to enforce the limits; (3) voluntary limits on contributions (A) what should the limits be; and (B) how to enforce the limits; (4) ways to reduce campaign spending and improve voter education (A) better coverage by media outlets; (B) free coverage by media outlets; (C) coverage by the Government Channel; and (D) other means to reduce campaign costs; (5) increased reporting requirement of contributions; (6) non-public funding options; (7) the role of the political action committees (PACs); and (8) any additional options.

After discussion, it was the consensus of Council that (1) clerical assistance from City staff means providing paper, copying and mailing; (2) the City-provided meeting space might be Stephens-Lee Community Center; (3) there be no ex-officio members; (4) if one person from the Committee drops out, the Council member who nominated that person will be allowed to nominate another one; and (4) add the issue of the amount of filing fees to the Committee's charge.

It was the consensus of Council for each Council member to give their suggested name to City Clerk Burleson and that this report and the seven Committee members will be reviewed and appointed at the next formal meeting.

Memorial Day Observance

After a brief discussion, it was the consensus of City Council to hold a Memorial Day event at City-County Plaza. Mayor Worley appointed Councilman Mumpower as Chair and Councilmen Dunn and Ellis to begin the process. This event is to move forward with the understanding that Buncombe County has agreed to be the City's co-sponsor, no City funds will be used, and that the event be coordinated with other groups that have events, such as the VA Hospital and Cemetery.

Closed Session

At 7:00 p.m., Councilman Mumpower moved to go into closed session to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including proceedings involving the following parties: Buncombe County; Henderson County; Regional Water Authority of Asheville,

358

Buncombe and Henderson; and the City of Asheville – G.S. 143-31-8.11 (a) (3). This motion was seconded by Councilwoman Jones and carried unanimously.

At 8:00 p.m., Councilman Mumpower moved to come out of closed session. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:00 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – April 9, 2002 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Mayor Worley gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING THE MONTH OF APRIL, 2002, AS "CHILD ABUSE PREVENTION MONTH"

Vice-Mayor Bellamy read the proclamation proclaiming April, 2002, as "Child Abuse Prevention Month" in the City of Asheville. She presented the proclamation to Bill McGuire, director of the WNC Child Advocacy Center, who briefed City Council on some activities taking place during the month.

B. PROCLAMATION PROCLAIMING THE MONTH OF APRIL, 2002, AS "PARKINSON'S DISEASE AWARENESS MONTH"

Mayor Worley read the proclamation proclaiming April, 2002, as "Parkinson's Disease Awareness Month" in the City of Asheville. He presented the proclamation to Mr. Tom Fitzpatrick, President of the Parkinson Support Group of Asheville, who briefed City Council on some activities taking place during the month.

C. RESOLUTION NO. 02-52 – RESOLUTION OF CONCERN REGARDING STATE BUDGET

Councilman Mumpower read the following resolution: "The City of Asheville relies heavily on annual state reimbursements to fund critical services for our citizens. The Governor of the State of North Carolina has withheld local reimbursements for inventory and intangibles taxes, homestead exemptions, and utility franchise taxes as a means to balancing the state budget. This action was initiated without warning or proper sensitivity to the budgetary impact on the City of Asheville. The withheld amount of $2.7 million is locally generated revenue that is being utilized to address a revenue shortfall in the state budget. This action has served to further erode the trust between the citizens of Asheville and the leadership of the State of North Carolina. The leadership of the State of North Carolina holds a trusted position intended to serve as a model of good stewardship, responsible and predictable action, and accountability. These actions are shifting a burden to our City that may result in reductions of service, and the imposition of additional tax burdens that are ultimately servicing the budget of the State of North Carolina, the effect of which is to require local governments to impose taxes to solve the State's budget crisis. This is the third time in 10 years that reimbursements have been withheld from Asheville and other cities and counties in North Carolina, all leading to inability of local governments to reliably budget. Now, therefore, be it resolved by the City Council of the City of Asheville that we express strong concern to the Governor of the State of North Carolina regarding these actions. We hereby request release of funds withheld for fiscal 2001-2002 and further seek legislative action

360

to assure that the reimbursement revenues or replacement revenues will be reliably available to local governments in the 2002 - 2003 fiscal year."

All Council members spoke in support of the resolution and thanked Councilman Mumpower and Councilwoman Jones for taking the initiative to draft the resolution.

Upon inquiry of Councilman Mumpower, Mayor Worley said that the resolution would be distributed as widely as possible, but in particular to the Metro Coalition, our local delegation in Raleigh, the North Carolina City and County Managers Association, and the N. C. League of Municipalities.

Councilman Mumpower moved for the adoption of Resolution No. 02-52. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 96

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 26, 2002, AND THE WORKSESSION HELD ON APRIL 2, 2002

B. RESOLUTION NO. 02-53 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT THE BID FROM ROBERT CAMILLE JR., PETER ALBERICE AND ROBERT TODD TO PURCHASE THE AIR RIGHTS TO THE PARKING LOT ON SOUTH LEXINGTON AVENUE AT THE REAR OF 9-13 BILTMORE AVENUE

Summary: The consideration of authorizing the Mayor to convey air rights to parking lot on South Lexington Avenue at rear of 9 - 13 Biltmore Avenue to Centrino, LLC.

On March 26, 2002, the City Council of the City of Asheville directed the City Clerk to advertise for upset bids regarding an offer to purchase the air rights to the parking lot on South Lexington at the rear of 9 - 13 Biltmore Avenue (PIN No. 9649.18-40-1091) for the sum of $67,500. The notice ran in the Asheville Citizen-Times on March 29, 2002, as provided in N. C. Gen. Stat. sec. 160A-269. No upset bids were received in response to said advertisement.

Planning Department staff recommends adoption of the resolution to authorize the sale of the property to Centrino, LLC, for the amount of $67,500.

RESOLUTION BOOK NO. 27 – PAGE 97

C. RESOLUTION NO. 02-54 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE PROPERTY AT 17 KENDALL STREET

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer to purchase property at 17 Kendall Street in the West Asheville community.

A bid has been received from Neighborhood Housing Services of Asheville in the amount of $10,000 for the purchase of land at 17 Kendall Street in the West Asheville Community.

The land at 17 Kendall Street is a rectangular shaped residential zoned lot comprising 0.11 acre±. It is level at street grade and slopes down from front to rear. The property was acquired at a tax foreclosure sale in 2000 to recover on a demolition lien and has been available for sale since that time. The property was acquired at the tax foreclosure sale for the amount of $3,700.00. Of that amount $634.13 was remitted back to the City for the City's share of delinquent taxes. The amount of the demolition lien which included asbestos removal and removal of abandoned furniture was $7,842.44 bringing the City's total cost related to the property to $10,908.31. The previous tax value was $4,700. The bid from Neighborhood Housing Services in the amount of $10,000 includes a request for short term financing of $9,500 of the purchase price and the proposal to construct an affordable house on the property for sale. The purchase money loan would be due on sale of the completed structure. Staff recommends that if the bid is accepted the following terms be added: (1) the loan be due on sale or within 24 months of closing whichever comes first, (2) the loan bear interest at the rate of 2% per annum. The proposed construction is consistent with the policy of encouraging infill development.

The current tax appraisal on the subject parcel is $14,300 ($2.98 per square foot). That amount is almost triple the previous tax appraisal and more than double the per square foot price of recent appraisals of comparable parcels on Choctaw Street (0.22 ac. each @ $11,800 or $1.23 per square foot) which were twice as large, but clearly more buildable. The upset bid process will provide the opportunity for the market to produce the true value of the property.

Planning & Development staff recommends adoption of the resolution, which will initiate the sale of the property through the upset bid process.

RESOLUTION BOOK NO. 27 – PAGE 98

D. RESOLUTION NO. 02-55 - RESOLUTION SCHEDULING A CITY COUNCIL COMMUNITY MEETNG ON TUESDAY, APRIL 30, 2002, AT 7:00 P.M. IN THE NORTH ASHEVILLE COMMUNITY CENTER, 37 E. LARCHMONT ROAD, ASHEVILLE, N.C.

RESOLUTION BOOK NO. 27 – PAGE 99

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Vice-Mayor Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING ON THE CONSOLIDATED COMMUNITY DEVELOPMENT BLOCK GRANT/HOME ACTION PLAN

Councilman Peterson moved to excuse Vice-Mayor Bellamy from participating in this issue due to a conflict of interest. This motion was seconded by Councilwoman Jones and carried unanimously.

Mayor Worley opened the public hearing at 5:21 p.m.

Community Development Director Charlotte Caplan said that this is the consideration of a resolution authorizing submission of the City's Consolidated Action Plan for 2002/03, allocating federal Community Development Block Grant (CDBG) and HOME funds. This public hearing was advertised on March 29, 2002.

362

The City expects to have available $1,902,224 in CDBG funds and $1,506,326 in HOME funds to allocate for housing and community development activities in the fiscal year beginning July 1, 2002. The City's Housing and Community Development Committee and the Asheville Regional Housing Consortium have made recommendations for allocating these funds to 21 CDBG-assisted and 13-HOME assisted projects.

If approved, the funding will assist in adding or preserving 92 affordable housing units in the City and 109 units in the rest of the Consortium area. CDBG funds will also help provide 150 Asheville residents with employment or business training and over 3,000 residents with other needed services. CDBG will also continue to support revitalization of the WECAN and South Pack Square neighborhoods.

Notice of the public hearing and a summary of the draft plan were published on March 22. A 30-day public comment period is required by federal regulations. The final plan must be submitted to HUD by May 15, 2001.

Mr. James Judd, City resident, hoped that the HOME funds to Mountain Housing Opportunities would help meet some of the community goals with Ross Creek Commons.

Mayor Worley closed the public hearing at 5:37 p.m.

Mayor Worley said that the resolution to adopt the Consolidated Action Plan will be considered at Council's April 23, 2002, meeting.

B. PUBLIC HEARING TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO INCREASE THE THRESHOLD FOR LEVEL I ADMINISTRATIVE REVIEW OF RESIDENTIAL PROJECTS FROM 7 TO 50 UNITS

ORDINANCE NO. 2911 - ORDINANCE AMENDING CHAPTER 7 OF THE CODE OF ORDINANCES TO INCREASE THE THRESHOLD FOR LEVEL I ADMINISTRATIVE REVIEW OF RESIDENTIAL PROJECTS FROM 7 TO 50 UNITS

Mayor Worley opened the public hearing at 5:38 p.m.

Urban Planner Carter Pettibone said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) to increase the threshold for Level I administrative review of residential projects from 7 units to 50 units. This public hearing was advertised on March 29 and April 5, 2002.

Currently, by-right residential development projects containing 8 to 50 units are required to be reviewed by the Technical Review Committee (TRC), while residential developments containing three to seven units are reviewed administratively as Level I projects. This amendment would increase the Level I threshold to include these projects containing up to 50 units.

This ordinance amendment will help streamline the review process for smaller residential developments by removing the requirement for these projects to go before the TRC. These projects would still be reviewed by all applicable city departments but only administratively. Applicants would also not have to wait until the submission deadline since Level I projects may be submitted anytime.

The ordinance amendment would also provide for a more equitable treatment of smaller residential projects as compared to commercial, office, or institutional uses at the current threshold levels for Level II review in terms of traffic impact. The current residential minimum of 8 units for Level II review generates about 53 trips per day while the minimum levels of commercial, office, and institutional generate 385 to 3,903 trips per day.

Staff believes this ordinance amendment provides a more streamlined and equitable alternative for review of smaller residential projects. There is an estimated timesaving for a developer of 2-5 weeks. This will only apply to by-right residential development projects that have appropriate zoning in place and subdivision will still go to the TRC.

At their March 6, 2002, meeting, the Planning and Zoning Commission voted unanimously to recommend approval of the proposed ordinance amendment. The Planning and Development staff also recommends approval of the amendment.

Councilman Peterson said that presently when a project from between 8-50 units is being considered, the developer has to go through the TRC with a notice being sent out to adjoining property owners within 400 feet of the property and also a sign posted on the property. With this proposed amendment, he was concerned that adjoining property owners will not know when a project of 8-50 units is being proposed near their property because no notices are sent out to advise people of the TRC meeting. If these projects are going to be handled administrative, there is no opportunity for public comment or questions.

Upon inquiry of Vice-Mayor Bellamy, Mr. Pettibone said that Planning staff is looking at enlarging the signs posted on the property. He also noted that the public still has an opportunity to bring up concerns after they see the signage posted on the property.

Planning & Development Director Scott Shuford stressed that these projects will still be reviewed by all the applicable departments and still have to meet all standards.

The following individuals spoke against the proposed amendment for several reasons, some being, but are not limited to: the neighboring properties should be notified because only people in the neighborhood can provide valuable information regarding infrastructure, etc.; no notification will further distance the community from having input on what is happening in their neighborhoods; this amendment will cause more contention between developers and neighborhoods; a 50 unit development would have an impact on neighboring properties and they should be notified; neighborhoods have a lot of knowledge and not notifying them of a meeting eliminates their ability to voice their concerns; this amendment is an attempt by City officials to silence neighbors and keep them in the dark; if the project is good the development will go through so don't cut the citizens out of the process; surrounding neighbors should be involved as decisions are being made by developers for projects; residents need to have oversight on these projects; citizens want to have input into politics; neighborhoods need to be involved at the early stages; and staff shouldn't look at public comment as bothersome:

Ms. Barber Melton, Haw Creek resident and President of the Coalition of Asheville
  Neighborhoods
Ms. Jean Penland, City resident
Mr. Andrew Brown, City resident
Mr. James Judd, City resident
Ms. Patty Robertson
Ms. Terri Finch, Chunns Cove resident
Ms. Carol Collins, City resident
Mr. Jeff Burleson, property owner in Chunns Cove
Mr. Carl Nyberg, Kenilworth resident
Mr. Dick Washam, Chunns Cove resident
Ms. Rebecca Campbell, West Asheville resident
Mr. Mark Legard, City resident

Mayor Worley closed the public hearing at 6:20 p.m.

Mr. Shuford stressed that Planning staff does value public input. However, public input at the TRC meeting is often frustrating in that if the project meets all the technical review standards, the TRC should approve the project whether the neighborhood thinks it's a good project or not. At the TRC meeting, residents talk about a variety of things that are not technical issues. Planning staff will work on the signage that will provide notification of these type projects and as a part of the review process, residents can either call or visit the Planning Office to give input.

Councilman Peterson was opposed to the ordinance amendment and suggested a compromise to raise the threshold from 7 units to 12 or 15 units because 50 units are too many to not let people know what is going to be developed in their neighborhood. He felt that by having somewhat of a public process, the City would get a better development. He felt that people who live in the area have knowledge about issues that City staff might not be aware of.

Upon inquiry of Councilwoman Jones, Mr. Shuford said that his Chief Planner noted that he didn't recall a single case where there has been a change to the TRC's decision with regard to what the public brought up at the TRC meeting and it applying to the technical standards.

There was discussion with regard to public input from citizens at the TRC level and the most effective and efficient way to notify them when projects are being considered.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Ellis moved for the adoption of Ordinance No. 2911. This motion was seconded by Councilman Dunn and carried on a 6-1 vote with Councilman Peterson voting "no".

ORDINANCE BOOK NO. 19 – PAGE 460

At 6:55 p.m., Mayor Worley announced a short break.

C. PUBLIC HEARING TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO IDENTIFY LOT SIZE, LOT WIDTH, OFF-STREET PARKING, AND LANDSCAPING AS CATEGORIES FOR MODIFICATION BY DEISGN REVIEW BOARDS USING FLEXIBLE DEVELOPMENT STANDARDS AND TO IDENTIFY ALTERNATIVE LANDSCAPE COMPLIANCE AS A FLEXIBLE DEVELOPMENT STANDARD

ORDINANCE NO. 2912 - ORDINANCE AMENDING CHAPTER 7 OF THE CODE OF ORDINANCES TO IDENTIFY LOT SIZE, LOT WIDTH, OFF-STREET PARKING, AND LANDSCAPING AS CATEGORIES FOR MODIFICATION BY DEISGN REVIEW BOARDS USING FLEXIBLE DEVELOPMENT STANDARDS AND TO IDENTIFY ALTERNATIVE LANDSCAPE COMPLIANCE AS A FLEXIBLE DEVELOPMENT STANDARD

Mayor Worley opened the public hearing at 7:12 p.m.

Chief Planner Gerald Green said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) to identify lot size, lot width, off-street parking, and landscaping as categories for modification by design review boards using flexible development standards and to identify alternative landscape compliance as a flexible development standard. This public hearing was advertised on March 29 and April 5, 2002.

Flexible development standards allow minor modifications to be approved administratively or as part of the standard review process rather than requiring a separate hearing by the Board of Adjustment to grant a variance. This procedure streamlines and simplifies the review process for all involved. Currently, design review boards are authorized to modify structure floor area and height and setbacks when structures or lots subject to design review are found to comply with the applicable design guidelines. The proposed ordinance amendment identifies two new dimensional categories, lot area and lot width, as well as off-street parking and landscaping, for the application of flexible development standards. In addition, the proposed amendment identifies alternative landscape compliance as a flexible development standard. Alternative landscape compliance is a tool that has been in place for almost 5 years. This change will not result in any change in the tool; it will only bring it under the umbrella of flexible development standards, possibly resulting in increased use of the tool.

This ordinance amendment encourages infill development that follows historic development patterns within the design review areas of Montford, Biltmore Village, Albemarle Park, Downtown Asheville, and the River District. This flexibility will allow development on lots that do not conform to the UDO standards, helping to implement the City's smart growth policies. The revision should also result in increased use of the alternative landscape compliance tool.

Staff believes that this ordinance provides needed flexibility to evaluate and approve reasonable adjustments to lot dimensions, off-street parking and landscape requirements.

At their March 6, 2002, meeting, the Planning and Zoning Commission voted 7 to 0 to recommend approval of the proposed ordinance amendment. The Planning and Development staff also recommends approval of the amendment.

Upon inquiry of Ms. Hazel Fobes, Mr. Green explained the makeup of the River District Design Review Committee, the Downtown Commission and the Asheville-Buncombe Historic Resources Commission.

Mr. James Judd, resident on Rollingwood, voiced his concerns on alternative landscape compliance. He also felt there was an oversight in the ordinance because it states that only the developer can appeal.

Mr. Green responded to Mr. Judd's concerns and said that he will review the ordinance to see if there is an error with regard to only the developer having the right to appeal, and will correct it accordingly.

Councilman Dunn hoped that the City and private landscape architects would work out a compromise if disagreements occur.

Mayor Worley closed the public hearing at 7:30 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Dunn moved for the adoption of Ordinance No. 2912. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 463

IV. UNFINISHED BUSINESS:

A. RESOLUTION NO. 02-56 – RESOLUTION RECEIVING REPORT ON SUBCOMMITTEE ON CAMPAIGN FINANCE CHANGES

Councilman Peterson thanked Vice-Mayor Bellamy and Councilman Mumpower for working with him on the Council Subcommittee on Campaign Finance Changes. He said that he has amended the following report to be consistent with Council discussion on April 2, 2002: The Subcommittee recommends that City Council explore options to improve campaigns for Council and Mayor by appointing a Citizen Study Committee for Campaign Finance Reform. The Subcommittee members believe that recommendations to improve local campaigns should come from Asheville citizens and not from individual members of Council or from City staff. The Subcommittee further recommends that consideration of changes in the process for conducting City elections be postponed until a later time.

Make-Up of the Citizens Study Committee – To begin the process, the Subcommittee recommends that Council appoint a Citizen Study Committee ("Committee") composed of seven voting members. Each member of Council and the Mayor shall nominate one individual to serve on the Committee.

Operations of the Citizens Study Committee – The operations of the Committee shall be left to the members of the Committee. The Committee members should elect a Chair, Secretary, and other positions (i.e. facilitator, parliamentarian) as they see necessary. The City shall provide limited clerical assistance such as mailing notices and copying material that the Committee may require. The City Attorney's office shall provide legal or other administrative support. As this is an official City Committee, it will be subject to the Open Meetings Law. The City shall provide adequate meeting space for the Committee to conduct their meetings. The meeting space should be at a location that is accessible to the public. The Subcommittee encourages the Committee to establish, if possible, a regularly scheduled meeting time and place. The Subcommittee recommends that the Committee allow reasonable public comment at each of their meetings. The Subcommittee will be available to the Committee should they need any additional guidance or assistance with process or administrative issues.

Goals for the Citizens Study Committee – The Subcommittee recommends that we ask the Committee to provide Council with a written Final Report within 120 days of their appointment. This time-line may be extended by the Subcommittee upon request of the Committee. Following the submission of their written report, the Committee should make a presentation to City Council of their recommendations. The Subcommittee recommends that the Final Report include (1) possible options to improve the financing of city elections; (2) the Committee's recommendations and rationale as to the best option or options; (3) steps to implement their recommendations; and (4) relevant research material they gathered. The Subcommittee recommends that the Committee research the following specific issues: (1) What ordinance or campaign limits would be permitted under current North Carolina law; (2) What have other cities (in North Carolina and in other states) done to address the problems of campaign finance reform; (3) What Constitutional limits would the City face; and (4) What federal regulations would the City face. The Subcommittee recommends that the Committee consider the following possible campaign finance changes: (1) public funding for local campaigns (A) what threshold should there be to quality for public funding (i) funding candidates in the primary; (ii) funding only candidates in the general; (B) how much to fund candidate; (C) how much could it cost; and (D) how could it be funded; (2) voluntary spending limits (A) what should the limits be; and (B) how to enforce the limits; (3) voluntary limits on contributions (A) what should the limits be; and (B) how to enforce the limits; (4) ways to reduce campaign spending and improve voter education (A) better coverage by media outlets; (B) free coverage by media outlets; (C) coverage by the Government Channel; and (D) other means to reduce campaign costs; (5) increased reporting requirement of contributions; (6) non-public funding options; (7) the role of the political action committees (PACs); (8) filing fee costs; and (9) any additional options.

Councilman Peterson moved to adopt Resolution No. 02-56 receiving the report of the Council Subcommittee on Campaign Finance Changes. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

For the Citizen Study Committee, Councilman Peterson nominated Wanda Adams; Councilman Mumpower nominated Kent Wolff; Vice-Mayor Bellamy nominated Rod Whiteside; Councilwoman Jones nominated Marie Colton; Councilman Dunn nominated Christina McCormick; Councilman Ellis nominated Max Haner and Mayor Worley nominated Lou Bissette.

RESOLUTION BOOK NO. 27 – PAGE 100

V. NEW BUSINESS:

A. RESOLUTIONS OF INTENT TO ANNEX THE LEICESTER HIGHWAY AREA, SHERWOOD HEIGHTS AREA, HUNTINGTON CHASE AREA, BELL ROAD AREA, FOREST LAKE AREA, MILL STONE AREA AND KENSINGTON-WINDSOR AREA AND SETTING A PUBLIC INFORMATION MEETING ON JUNE 3, 2002, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING CITY COUNCIL PUBLIC HEARINGS ON JUNE 11, 2002, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Mr. Paul Benson, Urban Planner, said that the State of North Carolina enables cities to grow by annexation, and provides incentives in the form of various shared revenues tied to population and street mileage.

This state legislation is based on the proposition that strong cities are the basis of a strong state economy and essential to the continued economic development of the state, and that cities are the best units of government to meet the needs of urban areas. The state's intent is often summed up as "what is urban should be municipal."

In a growing urban area, annexation becomes an equity issue. This stems from the fact that the true "City of Asheville" (like most cities) is always growing and at any given time is larger than the area in the current city limits. North Carolina state law recognizes that the cities need to expand their boundaries to include this growth so that we don't end up in a situation where an increasingly relatively smaller number of citizens are financing the urban infrastructure used by a much larger population. The fact is that people living in close proximity to cities benefit from the cities, and state annexation law is designed to include these people in the costs and benefits of governing and servicing the City.

The City of Asheville has initiated annexations for the past two years – six areas in 2001 and five areas in 2002. These recent annexations, like the ones being presented are designed to include: areas that are clearly urban, areas surrounded by the City but not within the City of Asheville and can only be accessed through the City; areas that will create a more logical City boundary; and areas with at least some existing water and sewer service.

Mr. Benson reviewed with Council the past two year annexations which showed annual revenue, annual expenditures and capital costs for each of the areas. In the past two years, ten areas have been annexed (two are pending court decisions). In total, the estimated annual revenue from these areas is $2,199,869, with estimated annual costs of $281,987.

The following steps and dates meet the process required by State law:

Adoption of Resolutions of Intent	April 9, 2002
Adoption of Plans of Services	April 23, 2002
Public Informational Meeting	June 3, 2002
Public Hearings	June 11, 2002
Adoption of Annexation Ordinances	June 25, 2002
Effective Date of Annexations	June 30, 2003

Mr. Benson under State law the City must follow a specific process for annexation that begins with the adoption of resolutions that describe the boundaries of the areas under consideration, and fix dates for a public informational meeting and a public hearing on the question of annexation. State law does allow simultaneous annexation of multiple non-adjacent areas. He passed out a chart of "Growth of Largest (at 2000 Census) Municipalities from April 1990 to April 2000."

Mr. Benson stated that the resolutions of intent state that (1) it is the intent of the City Council of the City of Asheville to consider annexation of the territory described in the resolution pursuant to Part 3 of Article 4A of Chapter 160A of the North Carolina General Statutes; (2) a public informational meeting on the question of annexing the above-described territory will be held in the Public Works Building located at 161 S. Charlotte Street, Asheville, N.C., at 5:30 p.m. on the 3rd day of June , 2002, at which time a representative of the City of Asheville shall make an explanation of plans for extending services to said territory and all residents and property owners in said territory and all residents of the City of Asheville will be given the opportunity to ask questions and receive answers regarding the proposed annexation; (3) a public hearing on the question of annexing the above-described territory will be held in the Council Chamber located on the 2nd Floor of the City Hall Building, 70 Court Plaza, Asheville, N.C., at 5:00 p.m. on the 11th day of June, 2002, at which time a representative of the City of Asheville will make an explanation of plans for extending Services to said territory and all residents and property owners in said territory and all residents of the City of Asheville will be given an opportunity to be heard; (4) a report of plans for extending services to the above-described territory shall be made available for public inspection at the office of the City Clerk at least thirty (30) days prior to the date of the public informational meeting; (5) the statement of financial impact contained in the report shall be delivered to the Buncombe County Board of Commissioners at least thirty (30) days prior to the date of the public informational meeting; (6) a legible map of the area to be annexed and a list of identified persons holding freehold interests in property in the area to be annexed shall be posted in the office of the City Clerk, Asheville City Building, 70 Court Plaza, Asheville, North Carolina, at least thirty (30) days prior to the date of the public informational meeting; (7) the effective date of annexation shall be at least one year, but no more than 400 days, from the date of passage of the annexation ordinance; and (8) notice of the public informational meeting and public hearing shall be given as required by law.

City staff has identified the following seven areas with the potential for being annexed:

Leicester Highway – This is a one-mile corridor along Leicester Highway. This has 68 lots, is 64 acres, and has an estimated population of 113. It has a mixture of commercial and residential development and provides a more rational City boundary. Current boundary excludes a pocket on east side of the highway. There is a one-time capital cost of $160,000 for improvements in fire protection water service.

Sherwood Heights – This is a subdivision in North Asheville. This is the only pocket of development out of the City in this area and their only access is through the City of Asheville. This has 50 lots, is 97 acres and a population of 73.

Huntington Chase – This is a new subdivision in Haw Creek and forms isolated pocket out of the City. Their only access is through the City of Asheville. This has 41 lots, is 63 acres and a population of 68. There is a one-time capital cost of $105,000 for some sewer and fire protection water service improvements, which are planned.

Bell Road – This is a section of Bell Road between two existing sections of the City in Haw Creek. There is currently a service delivery problem. This has 14 lots, 22 acres and a population of 32. There is a one-time capital cost of $116,000 for fire protection water service improvements, which are planned.

Forest Lake – This is a large subdivision in South Asheville off of Sweeten Creek Road. Its access is only through the City. This has 128 lots, is 53 acres and a population of 250.

Mill Stone – This is a subdivision off Round Top Road and is in a corner formed by the City limits. This has a population of 51. There is a one-time capital cost of $30,000 for some sewer improvements, which are planned.

Kensington-Windsor – This is a large residential area off Sweeten Creek Road and Mills Gap Road. It includes two apartment complexes (Kensington Place and Pine Ridge Apartments) and the Windsor Park Subdivision. This has 30 lots, is 67 acres and has a population of 500.

Under State law the City must follow a specific process for annexation that begins with the adoption of resolutions that describe the boundaries of the areas under consideration, and fix dates for a public informational meeting and a public hearing on the question of annexation. State law does allow simultaneous annexation of multiple non-adjacent areas.

City staff recommends that the seven Resolutions of Intent be adopted. They have been working on these areas since last fall and City staff feels they can handle these annexations with existing staff and equipment.

Upon inquiry of Councilman Mumpower, Mr. Benson said that as to the level of service, state law requires the City provide the same level of service that we provide to people living within in the existing City limits. He felt that there are no areas bordering the City of Asheville that have the same level of service, but recognized there are areas that probably have all the services that people there require.

Upon inquiry of Councilman Dunn, Mayor Worley stressed that City Council will make the determination on whether to annex all or some of these areas on June 25, 2002. Adoption of the resolutions of intent will direct City staff to start gathering specific information and start the process to involve the public.

The following individuals spoke against annexation for several reasons, some being, but are not limited to: the City needs to maintain what they already have; the City shouldn't annex if neighborhoods currently have all their needs met; has the City ever not annexed even if the area met the technical requirements; the City has nothing to offer Forest Lake Subdivision residents; don't annex because the City needs more money; affordable housing is needed; annexation will place a severe burden on residents when people are struggling to make ends meet; there should be better ways for the City to make money than to annex especially when areas are not getting any services; and now is not the City for the City to consider annexing, especially after the County has just completed their re-evaluation of property and we are still in a serious economic downturn:

Mr. Fred English, City resident
Ms. Nancy Williams
Mr. Dennis Seeney, Forest Lake resident

RESOLUTION BOOK NO. 27 – PAGE 113

RESOLUTION NO. 02-60 - RESOLUTION OF INTENT TO ANNEX THE BELL ROAD AREA, SETTING A PUBLIC INFORMATION MEETING ON JUNE 3, 2002, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON JUNE 11, 2002, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Vice-Mayor Bellamy moved for the adoption of Resolution No. 02-60. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 117

RESOLUTION NO. 02-61 - RESOLUTION OF INTENT TO ANNEX THE FOREST LAKE AREA, SETTING A PUBLIC INFORMATION MEETING ON JUNE 3, 2002, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON JUNE 11, 2002, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Councilman Ellis moved for the adoption of Resolution No. 02-61. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 121

RESOLUTION NO. 02-62 - RESOLUTION OF INTENT TO ANNEX THE MILL STONE AREA, SETTING A PUBLIC INFORMATION MEETING ON JUNE 3, 2002, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON JUNE 11, 2002, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Councilman Peterson moved for the adoption of Resolution No. 02-62. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 125

RESOLUTION NO. 02-63 - RESOLUTION OF INTENT TO ANNEX THE KENSINGTON-WINDSOR AREA, SETTING A PUBLIC INFORMATION MEETING ON JUNE 3, 2002, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON JUNE 11, 2002, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Councilman Ellis moved for the adoption of Resolution No. 02-63. This motion was seconded by Councilman Peterson and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 129

B. RESOLUTION NO. 02-64 - RESOLUTION IDENTIFYING THE AREA DESCRIBED HEREIN AS BEING UNDER CONSIDERATION FOR ANNEXATION

Mr. Barry Siegle, Manager of KP Investments which is the owner of Kensington Place Apartments

Mr. Mark Rusko, President of the Huntington-Chase Homeowners Association

Councilman Peterson spoke in support of annexation noting that the effective date will not take effect until June 30 of next year and taxes won't be due until the end of that year. He noted that County residents do enjoy City amenities. He did say that he would visit all the areas proposed for annexation to see if they meet the qualification of an urbanized area.

Councilman Mumpower didn't like the concept of annexation and felt it was forced participation. However, he perceived annexation as a necessary evil. He felt that if the City is not growing, it's dying. He felt the City is annexing mostly pockets around the City and they are being very selective and strategic about their choices. He doesn't favor annexation, however he has come to understand the factors and the scale tips more toward annexation than against it.

Councilman Dunn felt that he would be in a better position regarding his stance on annexation after the budget process is over.

Mayor Worley said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

RESOLUTION NO. 02-57 - RESOLUTION OF INTENT TO ANNEX THE LEICESTER HIGHWAY AREA, SETTING A PUBLIC INFORMATION MEETING ON JUNE 3, 2002, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON JUNE 11, 2002, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Councilman Mumpower moved for the adoption of Resolution No. 02-57. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

RESOLUTION NO. 02-58 - RESOLUTION OF INTENT TO ANNEX THE SHERWOOD HEIGHTS AREA, SETTING A PUBLIC INFORMATION MEETING ON JUNE 3, 2002, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON JUNE 11, 2002, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Councilman Peterson moved for the adoption of Resolution No. 02-58. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 109

RESOLUTION NO. 02-59 - RESOLUTION OF INTENT TO ANNEX THE HUNTINGTON CHASE AREA, SETTING A PUBLIC INFORMATION MEETING ON JUNE 3, 2002, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON JUNE 11, 2002, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Councilwoman Jones moved for the adoption of Resolution No. 02-59. This motion was seconded by Councilman Ellis and carried unanimously.

372

Urban Planner Paul Benson said that this is the consideration of a Resolution of Consideration identifying areas with potential for future annexation.

State law provides that a Resolution of Consideration may be adopted by cities as a preliminary step in the annexation process. While not required, the Resolution of Consideration serves the purpose of providing citizens with advance notice that certain areas in proximity to the city may, within the reasonably near future, be subject to annexation. After being in effect for a least 1 year, the Resolution of Consideration also has the benefit of reducing the time period required between adoption of the annexation ordinance and the effective date of that ordinance from a minimum of 1 year to a minimum of 40 days. The Resolution of Consideration is effective for 2 years.

The map staff has prepared in connection with the Resolution of Consideration basically includes areas with the potential for urbanization, such as the areas along major thoroughfares, areas within the City's existing extraterritorial jurisdiction, areas with existing infrastructure or areas where utility extensions are feasible, such as areas that are within drainage basins with existing sewer service, and other areas with potential for urban development. The map includes many areas that may not experience urban development in the near future, because the boundaries are drawn to be expansive enough so that any possible near term (1-5 years), annexation areas will be within the boundaries.

City staff recommends that the Resolution of Consideration be adopted.

Councilman Mumpower supported the concept of giving people advance notice. However, he felt that even though with the Resolution of Consideration on file and Council could make the annexation effective within the window of 70-400 days after adoption of the annexation ordinance, there should be at least a one year effective date after the annexation ordinance is adopted.

Councilman Peterson felt perhaps the ordinance should take effect after six months especially since making the effective date at the beginning of a new fiscal year makes budgeting more predictable.

Councilman Dunn asked what kinds of options were available to major employers if the City annexes them and that step forces them to go out of business. Mr. Benson said that the only thing he was aware of was that the City has some economic development incentives that may be used to mitigate the tax burden for a period of time. However, if that is a major concern, then City Council always have the discretion to exclude that industry, provided the City still meet the other standards.

Upon inquiry of Mr. Doug Birch, Mr. Benson said that if the City successfully annexes the entire boundary of this Resolution of Consideration it would be adding approximately 60 square miles to the current City, which is presently 40 square miles now.

Mayor Worley called for a short recess.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved to adopt the Resolution of Consideration with the addition that in the name of consistency we do not make the annexation ordinances effective until at least one year after adoption of the ordinance.

City Attorney Oast said that he didn't think that addition was appropriate for inclusion in the Resolution of Consideration. He felt Council's views have been made very clear and when the time comes when Council is considering annexation of other areas, then if Council then wants to implement that additional delay, that would be the appropriate time to include that language.

Councilman Mumpower didn't feel comfortable in moving for adoption of the Resolution of Consideration without the delayed effective date language and therefore withdrew his motion.

Planning & Development Director Shuford explained how every annexation is different and perhaps separate guidelines could be drawn up to follow the longer schedule. He hoped City Council would not tie their hands because some exceptional event may occur in the future to where the Council might want to make the effective date sooner than one year.

Councilman Ellis moved to adopt Resolution No. 02-64. This motion was seconded by Vice-Mayor Bellamy and carried on a 6-1 vote, with Councilman Mumpower voting "no".

It was the consensus of Council to instruct the City Attorney to work with the Planning Department to develop some guidelines that would allow the effective date of annexation ordinances be delayed.

RESOLUTION BOOK NO. 27 – PAGE 133

C. RESOLUTION NO. 02-65 - RESOLUTION APPOINTING A MEMBER TO THE BOARD OF ELECTRICAL EXAMINERS

Vice-Mayor Bellamy said that this is the consideration of appointing a member to the Board of Electrical Examiners.

There currently exists a vacancy for an electrical contractor on the Board of Electrical Examiners until July 1, 2003.

On March 26, 2002, City Council interviewed Tommy Wilson.

Councilman Mumpower moved to appoint Tommy Wilson to the Board of Electrical Examiners to fill the position for an electrical contractor. Said term will expire on July 1, 2003, or until his successor has been appointed. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 135

D. RESOLUTION NO. 02-66 - RESOLUTION APPOINTING MEMBERS TO THE CIVIC CENTER COMMISSION

Vice-Mayor Bellamy said that this is the consideration of appointing three members to the Civic Center Commission.

Mr. Dan Breneman and Dr. Carl Mumpower have resigned their positions on the Civic Center Commission thus leaving two expired terms until June 30, 2004. In addition, Robert Dungan has resigned, thus leaving an unexpired term until June 30, 2003.

On March 26, 2002, City Council interviewed Kathryn Nash and James Grant. On April 2, 2002, City Council interviewed John Hutchby. On April 9, 2002, City Council interviewed Dan Breneman and Jerri Goldberg.

Kathryn Nash received 0 votes, James Grant received 7 votes, John Hutchby received 7 votes, Dan Breneman received 0 votes and Jerri Goldberg received 7 votes. Therefore, James Grant and John Hutchby were each appointed to serve unexpired terms until June 30, 2004, respectively, or until their successors have been appointed. In addition, Jerri Goldberg was appointed to fill the unexpired term of Mr. Dungan, term to expire June 30, 2003, or until her successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 136

E. RESOLUTION NO. 02-67 - RESOLUTION APPOINTING A MEMBER TO THE EDUCATIONAL ACCESS CHANNEL COMMISSION

Vice-Mayor Bellamy said that this is the consideration of appointing a member to the Educational Access Channel Commission.

Adam Baylus has resigned from the Educational Access Channel Commission, thus leaving an unexpired term until June 1, 2003.

On April 2, 2002, City Council interviewed Frank Dastoli and Nat Myers.

Frank Dastoli received 1 vote and Nat Myers received 6 votes. Therefore, Nat Myers was appointed to serve the unexpired term of Mr. Baylus, term to expire June 1, 2003, or until his successor is appointed.

RESOLUTION BOOK NO. 27 – PAGE 137

F. RESOLUTION NO. 02-68 - RESOLUTION APPOINTING MEMBERS TO THE FILM COMMISSION

Vice-Mayor Bellamy said that this is the consideration of appointing members to the Film Commission.

Sarah Blankenship, David Quinn, Diana Bilbrey and Jerry Birdwell have expired from the Film Commission, thus leaving four unexpired terms. Two unexpired terms are until November 1, 2003, and two unexpired terms are until November 1, 2004.

On March 5, 2002, the Asheville Film Commission requested City Council reduce the membership of the Film Commission from 15 to 13 members. City Council agreed with that recommendation and the ordinance was amended on March 26, 2002.

In addition, on March 5, 2002, the Film Commission recommended City Council appoint Leni Sitnick and Kathi Petersen to serve the two of the unexpired terms – one until November 1, 2003; and one until November 1, 2004.

On April 2, 2002, City Council interviewed Marcianna Miller, Terry Adams and Kathi Petersen. Leni Sitnick is also a candidate, however, she was not brought in for an interview.

Marcianna Miller received 0 votes, Terry Adams received 1 vote, Kathi Petersen received 6 votes and Leni Sitnick received 6 votes. Therefore, Kathi Petersen was appointed to serve an unexpired term until November 1, 2003,or until her successor has been appointed. In addition, Leni Sitnick was appointed to serve an unexpired term until November 1, 2004, or until her successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 138

G. RESOLUTION NO. 02-69 - RESOLUTION APPOINTING A MEMBER TO THE ASHEVILLE-BUNCOMBE HISTORIC RESOURCES COMMISSION

Vice-Mayor Bellamy said that this is the consideration of appointing a member to the Asheville-Buncombe Historic Resources Commission.

Annamarie Rickman has resigned from the Historic Resources Commission, thus leaving an unexpired term until July 1, 2004.

On March 26, 2002, City Council interviewed Marsha Shortell and Laurie Rotundo. On April 2, 2002, City Council interviewed Stephen Olin. On April 9, 2002, City Council interviewed Alice Keller.

Marsha Shortell received 2 votes, Laurie Rotundo received 4 votes, Stephen Olin received 0 votes, and Alice Keller received 1 vote. Therefore, Laurie Rotundo was appointed to fill the unexpired term of Ms. Rickman, term to expire July 2, 2004, or until their successor is appointed.

RESOLUTION BOOK NO. 27 – PAGE 139

VI. OTHER BUSINESS:

Memorial Day Task Force

Councilman Mumpower reported that Mayor Worley appointed him, Councilman Dunn and Councilman Ellis to serve as the Council Memorial Day Committee ("Committee"). The Committee met on April 5, 2002, and with their mission in mind to develop a Memorial Day Task Force that will focus on coordinating a Memorial Day event at the City-County Plaza in cooperation with Buncombe County, the Committee made the following recommendations: (1) that each member of Council and County Commissioners be permitted to select one person for the Memorial Day Task Force; (2) that Mr. Walter Plaue be appointed to the Task Force in view of his commendable efforts to bring this issue up for consideration; (3) that, with the approval of the County Commissioners, Jerome Jones be appointed as the Chair of the Task Force; and (4) that the respective recreation directors of Buncombe County and the City of Asheville be asked to serve as ex-officio consultants to the Task Force. The Committee's recommendation to the Task Force includes (1) that care should be taken to not overlap with other pre-planned Memorial Day events (VA Hospital, Veterans Cemetery, etc); (2) that an effort should be made to incorporate police, fire and emergency care personnel into the event; and (3) that this event be conducted with a minimum of City and County monies due to the current budgetary crisis – donations, support from Veteran organizations, and business investment should be encouraged as much as possible.

Councilwoman Jones moved to accept the recommendations of Council Memorial Day Committee with the exception that the Committee be empowered to make the appointments to the Task Force and oversee the process. This motion was seconded by Councilman Ellis and carried unanimously.

Budget Worksession Rescheduled

At the request of City Manager Westbrook, Councilman Mumpower moved to reschedule the budget worksession from May 16, 2002, until May 13, 2002, beginning at 1:00 p.m. in the First Floor North Conference Room. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

Claims

The following claims were received by the City of Asheville during the period of March 22-April 4, 2002: Brooks Howell Home (Water), WCQS (Streets), Annelore McMahan (Streets), Blue Ridge B&J (Inspections), Holly Elledge (Water), Marlin Harbin (Water), Thomas Tuten (Water), Jeffrey D. Shepherd (Police), Chester Davis (Parks & Recreation) and Maggie Guyton (Streets).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English felt that the City of Asheville should not annex people who do not wish to become City residents.

Ms. Rebecca Campbell was disappointed with Council's decisions at the meeting regarding less public comment on projects being built in neighborhoods and also an accelerated involuntary annexation process.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:33 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – April 16, 2002 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

Renewal of License Agreements with Morris Communications Inc.

Summary: The consideration of a resolution directing the City Clerk to publish notices of intent regarding renewal of License Agreements with Morris Communications, Inc. for antennas at 36 Reservoir Road and Peach Knob Reservoir.

The properties at 36 Reservoir Road (White Fawn) and Peach Knob Reservoir are the sites of telecommunication towers owned by the City of Asheville. The City leases antenna space on the towers and ground space for related equipment.

Morris Communications, Inc., has operated an antenna and related equipment at each of the sites since December, 1996. There are three towers at 36 Reservoir Road and the Morris antenna is located on the tower known as the "U. S. Cellular Tower" which is immediately east of the proposed Sister Cities Park. The proposed License Agreements will enable Morris to continue operating antennas at each site; however, there is a provision which allows either the Licensor or the Licensee to terminate the agreement upon 180 days notice. The term of the License Agreements will be 3 years with 2 renewal periods of 3 years. Morris will pay a License Fee of $6,300 for the White Fawn site and $5,100 for the Peach Knob site, the first term with a 10.5% increase at each renewal thereafter. In addition to the License Fee, Morris will pay a Utility Fee of $150.00 per annum at each site.

Approval of the resolution will authorize the City Clerk to publish notices of intent to renew the License Agreements.

Planning Department staff recommends adoption of the resolution authorizing the City Clerk to publish notices of intent to renew license agreements with Morris Communications Inc.

FAA Grant Agreement

Summary: The consideration of a resolution approving a grant from the Federal Aviation Administration in an amount not to exceed $366,676.

The Federal Aviation Administration (FAA) has offered a grant agreement to the Asheville Regional Airport. This grant, in an amount not to exceed $366,676, is for reimbursement of security operational costs as provided under Public Law 107-117.

378

Staff recommends adoption of the resolution authorizing the Mayor to execute the grant agreement for Project No. 3-37-0005-26.

Amendment to the Municipal Records Retention & Disposition Schedule

Summary: The consideration of a resolution authorizing the Mayor to sign an amendment to the 1997 Municipal Records Retention & Disposition Schedule.

On September 23, 1997, by Resolution No. 97-158, the City approved the Municipal Records Retention and Disposition Schedule issued August 15, 1997, by the N. C. Department of Cultural Resources, Division of Archives and History.

The N. C. Department of Cultural Resources has now amended said Schedule. The first amendment to Standard 3 (Budget and Fiscal Records) adds Powell Bill records to the schedule and amends Payroll and Payroll Deduction records. The second amendment to Standard 13 replaces the entire Personnel Records schedule.

It is in the best interest of the City of Asheville to promote municipal records management as provided by the N. C. Department of Cultural Resources, Division of Archives and History by adopting these amendments.

Staff recommends City Council authorize the Mayor to execute an amendment dated February 25, 2002, to the Municipal Records Retention and Disposition Schedule.

Mowing Contract

Summary: The consideration of a resolution authorizing the City Manager to enter into a grass mowing contract for the East and West mowing districts.

In an effort to provide mowing services for grass areas throughout the City of Asheville, City staff divided the grass areas into five separate mowing districts and solicited sealed bids from ten Commercial Lawn Mowing Contractors, four of which were minority contractors, to provide mowing services for each and/or all of the five mowing districts. City staff reviewed the bids and concluded that Donna Spratt, d/b/a Donnie Appleseed's Landscaping, was the responsive low bidder for the East and West mowing districts at $68,000, combined for both districts and recommends acceptance of the bid.

Approved funding is available in the Park and Recreation operating fund account to pay for these mowing services.

The Parks and Recreation Department requests City Council authorize the City Manager to enter into a contract for $68,000 with Donna Spratt, d/b/a Donnie Appleseed's Landscaping.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

UPDATE FROM THE HAW CREEK PEDESTRIAN TASK FORCE

Mr. Chris Pelly, President of the Haw Creek Community Association, briefed Council on the years the Association has been working with the City on pedestrian issues in Haw Creek. He stressed there is only 1/3 of a mile of sidewalks serving the entire Haw Creek valley and the lack of sidewalks is the number one road concern for the residents.

Mr. Calvin Underwood, Co-Chair of the Haw Creek Pedestrian Task Force, said that in April of 2001, City Council adopted a resolution establishing the Haw Creek Pedestrian Task Force. The criteria in the Pedestrian Thoroughfare Plan for sidewalks include: ½ mile of school, ½ mile of community center, ½ mile of church, commercial or business center, along major corridor, and high use area/pedestrian generator.

Mr. Underwood described the work of the Task Force: (1) met monthly since June 2001; (2) developed short term goal which is to install sidewalk between the library, Park and school; and (3) developed long term goals which are (a) install greenway connections in the valley; (b) develop an educational/awareness program; and (c) sidewalks the length of the valley.

He showed a slide of where there are existing sidewalks in Haw Creek, where there are no sidewalks and proposed sidewalk areas in Haw Creek.

He explained the Avon Road project as follows: (1) design is complete for approximately 1,100 linear feet of sidewalk by City staff; (2) exploring options for funding; (3) preparing easements for sidewalk; (4) contracting for easement acquisition; and (5) estimated cost of $220,000 which is unfunded.

He explained the Trinity Chapel Road project as follows: (1) design complete for approximately 1,800 linear feet of sidewalk by City staff; (2) exploring options for funding; (3) preparing easements for sidewalk; (4) contracting for easement acquisition; and (5) estimated cost is $280,000 which is unfunded.

He then explained New Haw Creek Road project from Beverly Road to Arco Road: (1) design complete for approximately 1,700 linear feet of sidewalk by City staff; (2) exploring options for funding; (3) preparing easements for sidewalk; (4) contracting for easement acquisition; (5) State road – qualifies for NC DOT Small Urban Funds – proposed for approval on NC DOT May Board agenda; and (6) estimated cost of $300,000 – with potential for $150,000.

Mr. Underwood explained the New Haw Creek Road project from Arco Road to Tunnel Road: (1) design in progress for approximately $1,200 linear feet of sidewalk by City staff; (2) exploring options for funding; (3) preparing easements for sidewalk; (4) contracting for easement acquisition; (5) State road – qualifies for NC DOT Small Urban Funds – requested in Fiscal Year 2002-03 budget; and (6) estimated cost of $400,000 – with potential for $150,000.

He explained the Task Force's goals: (1) in Fiscal Year 2002-03, the New Haw Creek from Beverly Road to Arco Road Sidewalk Project and the Avon Road Sidewalk Project be completed by any combination of the following: money, labor from Public Works crews to complete the projects, or dedication of "fee in lieu of" construction money for this area; and (2) City support for a TEA 21 grant application to complete sections of the sidewalk due June 28, 2002.

Mr. Underwood explained some new developments in the Haw Creek Valley, which consist of The Village at Haw Creek in December of 2002, and a new 15-lot subdivision on Bell Road – both of which will contribute additional vehicular and pedestrian traffic.

Mr. Underwood requested City Council set aside the $40,000 in the City's funds from "fee in lieu of" payments be set aside for these two projects in Haw Creek.

Upon inquiry of Councilman Mumpower, Mr. Pelly said that because the State has assured them of a grant in the amount of $150,000 from the Small Urban Fund for the New Haw Creek Road Project from Beverly Road to Arco Road, he felt if they had to choose between projects, this would be the one they would chose to complete first.

380

City Engineer Cathy Ball said that the $150,000 from the Small Urban Fund is limited only to curb and gutters.

In response to Councilman Mumpower, Mr. Pelly said that the only existing sidewalk in Haw Creek was installed in 1990.

When Councilman Peterson asked about easements, Mr. Pelly said that a majority of owners along Avon Road are willing to give easements to the City for these sidewalks, but want some type of a commitment from the City first.

City Manager Westbrook said that since City Council has adopted a priority needs list for sidewalks, City Council may want to revisit the whole list because neighborhoods near the top of the list expect their sidewalks to be built. Ms. Ball noted that Hendersonville Road sidewalks are number one on that list and the Haw Creek area is number two.

Councilwoman Jones said that during this budget crisis, it's more imperative to leverage the City's money with other funds. The Haw Creek community is an active partner and they have done their part in working with property owners to obtain easements and other community solutions.

It was the consensus of City Council to ask the City Manager to come back with recommendations on how the City can help fund a sidewalk project in Haw Creek.

ORDINANCE NO. 2913 – BUDGET AMENDMENT REGARDING THE ASHEVILLE YOUTH SPORTS PROGRAM

Vice-Mayor Bellamy presented City Council with a letter dated April 11, 2002, from Lamont Bellamy, Commissioner 2002, which read "On Thursday, November 22, 2001, while most of us were enjoying Thanksgiving with our family and friends, Asheville Youth Sports Program suffered a significant loss to our athletic program. The storage facility that housed our organization's sports equipment, which is used by over 160 little league football players and cheerleaders, went up in flames at McCormick Stadium. Asheville Youth Sports Program is known for being a training organization for football players who have played and are playing at Asheville High School, TC Roberson High School, AC Reynolds High School, Erwin High School as well as for the National Football League. Our league has helped to train – Leonard Little, John Avery, Ray Roberts and many others. We were able to provide them with a safe and fun experience, while participating in organized sports. Today we endeavor to continue this practice with all the children who come through our program. Each year, over 160 young boys and girls come to participate in our sports program, many of them have never played or cheered in an organized sport prior to coming to the Asheville Youth Sports Program. While under our supervision, we work on their football and cheering talents; as well as their attitudes. We understand that being a good athletic is only possible if a child has good support from coaches, parents and the community. We need your help in order to continue to provide a safe and fun experience for the youth who desire to participate in our program. We are asking you to act today by making a contribution of $25,000 to help us replace over $30,000 worth of equipment we lost. You can send your contribution to: Asheville Youth Sports Program Fire Fund, Asheville Savings Bank, Post Office Box 652, Asheville, NC, 28802. Thank you in advance for your support."

Vice-Mayor Bellamy urged City Council to support this request. She said that most children come from low-income families and they children have held many fund-raisers. She said the fire that destroyed their equipment was an electrical fire. The insurance covered the building, but not the contents of the building and they had no renter's insurance. She said the Program is asking for a one-time appropriation of $25,000 to be combined with their $6,232 contributions to date. A total amount of $33,795 is needed to replace the items lost in the fire.

381

Upon inquiry of Councilman Dunn about the most important items needed, Mr. Bellamy said that uniforms are the most important.

When Mayor Worley asked if any equipment has been donated, Mr. Bellamy replied that approximately 45 should pads have been donated, but they need to be refurbished at a cost of $20-25 each.

Upon inquiry of Councilman Mumpower, Mr. Bellamy said there is an additional $15,000 pledge that is outstanding but they have not heard from that person since approximately three months ago. Mr. Bellamy said that time is important because uniforms need to be ordered and there is a deposit required.

At the request of Councilwoman Jones, Mr. Bellamy explained how the Program works in cooperation with education through the youth and parents.

Councilman Dunn suggested sharing some of the equipment, however, Mr. Bellamy said that games are played right behind each other and because of the weight difference and quick dress change, there is little potential for sharing.

City Manager Westbrook said that if Council wishes to appropriate funds for this purpose, the funds would have to come from contingency.

When Councilman Dunn felt this might create a precedent for other teams to request money from the City, Vice-Mayor Bellamy said that in 1999-00, there was an appropriation to the North Asheville Youth League. City Manager Westbrook responded that the 1999-00 appropriation was for the North Asheville Park.

Mr. Jim Drummond, former Commissioner of the North Asheville Sports Program, urged City Council to support this request.

When Councilman Dunn asked if the City could make an interest-free loan to the Program, City Manager Westbrook felt the City of Asheville could not make that type of an investment by law.

All of Council was sympathetic and discussion surrounded the type of support the City could offer, e.g. amount of support, matching support, contingent support, donations, etc.

Councilman Mumpower suggested a $12,000 match.

Vice-Mayor Bellamy supported a $15,000 appropriation.

Mayor Worley suggested City staff work with the Program representatives to see what the absolute minimum needs are because we are in a very tight budget year. He felt that the City is being asked to be the insurer of this loss since the Program did not have insurance for their equipment. He felt there is a real need out there and would support of $12,000 with no match required.

Councilman Peterson supported a $15,000 appropriation and felt that other City departments might be able to donate their popcorn machine, coffee maker, etc.

Councilman Ellis at first suggested the City postpone action on this to see if the community and foundations will step up to help pay for their loss. Vice-Mayor Bellamy then said that there already has been publicity out there and they only have raised $6,232. Councilman Ellis then felt that he could support the $15,000 allocation.

Vice-Mayor Bellamy moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilman Peterson and carried unanimously.

Councilwoman Jones moved to appropriate a one-time $15,000 allocation to the Asheville Youth Sports Program. This motion was seconded by Vice-Mayor Bellamy and carried on a 4-3 vote, with Vice-Mayor Bellamy, Councilman Ellis, Councilwoman Jones and Councilman Peterson voting "yes" and Mayor Worley, Councilman Dunn and Councilman Mumpower voting "no."

City Manager Westbrook said that an agreement would be drawn up between the City and the Asheville Youth Sports Program.

ORDINANCE BOOK NO. 19 – PAGE 465

Vice-Mayor Bellamy said that it is important that if a Council member wants to have an issue placed on the agenda, it should be listed on the agenda.

REGIONAL WATER AUTHORITY

City Manager Westbrook announced that today Mayor Worley was appointed as Vice-Chair to the Regional Water Authority of Asheville, Buncombe and Henderson.

At 4:30 p.m., Mayor Worley moved to recess the meeting until 5:00 p.m., in the Council Chamber of the City Hall Building for School Board interviews.

SCHOOL BOARD INTERVIEWS

At 5:00 p.m., City Council began interviewing Allison Jordan, Marsha Bate, Roxie Wynn, Pegi O'Hagan and Keith Thompson for a vacancy on the Asheville School Board.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:30 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – April 23, 2002 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Vice-Mayor Bellamy gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING MAY, 2002, AS "MOTORCYCLE AWARENESS MONTH"

Mayor Worley read the proclamation proclaiming May, 2002, as "Motorcycle Awareness Month " in the City of Asheville. He presented the proclamation to Mr. Eldon Moore, who briefed City Council on some activities taking place during the month.

II. CONSENT:

Mayor Worley announced that Consent Agenda Item C has been removed from the Agenda due to an upset bid being received.

Vice-Mayor Bellamy asked that Consent Agenda Item B be removed from the Consent Agenda due to her conflict of interest.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON APRIL 9, 2002, AND THE WORKSESSION HELD ON APRIL 16, 2002

B. RESOLUTION APPROVING THE CONSOLIDATED COMMUNITY DEVELOPMENT BLOCK GRANT/HOME ACTION PLAN

Vice-Mayor Bellamy removed this item from the Consent Agenda due to a conflict of interest.

C. RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT THE BID FROM NEIGHBORHOOD HOUSING SERVICES TO PURCHASE 17 KENDALL STREET

This item was removed from the Consent Agenda due to an upset bid being received.

D. RESOLUTION NO. 02-70 - RESOLUTION DIRECTING THE CITY CLERK TO PUBLISH A NOTICE OF INTENT REGARDING RENEWAL OF LICENSE AGREEMENTS WITH MORRIS COMMUNICATIONS INC. FOR ANTENNAS AT 36 RESERVOIR ROAD AND PEACH KNOB RESERVOIR

Summary: The consideration of a resolution directing the City Clerk to publish notices of intent regarding renewal of License Agreements with Morris

Communications, Inc. for antennas at 36 Reservoir Road and Peach Knob Reservoir.

The properties at 36 Reservoir Road (White Fawn) and Peach Knob Reservoir are the sites of telecommunication towers owned by the City of Asheville. The City leases antenna space on the towers and ground space for related equipment.

Morris Communications, Inc., has operated an antenna and related equipment at each of the sites since December, 1996. There are three towers at 36 Reservoir Road and the Morris antenna is located on the tower known as the "U. S. Cellular Tower" which is immediately east of the proposed Sister Cities Park. The proposed License Agreements will enable Morris to continue operating antennas at each site; however, there is a provision, which allows either the Licensor or the Licensee to terminate the agreement upon 180 days notice. The term of the License Agreements will be 3 years with 2 renewal periods of 3 years. Morris will pay a License Fee of $6,300 for the White Fawn site and $5,100 for the Peach Knob site, the first term with a 10.5% increase at each renewal thereafter. In addition to the License Fee, Morris will pay a Utility Fee of $150.00 per annum at each site.

Approval of the resolution will authorize the City Clerk to publish notices of intent to renew the License Agreements.

Planning Department staff recommends adoption of the resolution authorizing the City Clerk to publish notices of intent to renew license agreements with Morris Communications Inc.

RESOLUTION BOOK NO. 27 – PAGE 140

E. RESOLUTION NO. 02-71 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A GRANT AGREEMENT WITH THE FEDERAL AVIATION ADMINISTRATION

Summary: The consideration of a resolution approving a grant from the Federal Aviation Administration in an amount not to exceed $366,676.

The Federal Aviation Administration (FAA) has offered a grant agreement to the Asheville Regional Airport. This grant, in an amount not to exceed $366,676, is for reimbursement of security operational costs as provided under Public Law 107-117.

Staff recommends adoption of the resolution authorizing the Mayor to execute the grant agreement for Project No. 3-37-0005-26.

RESOLUTION BOOK NO. 27 – PAGE 141

F. RESOLUTION NO. 02-72 - RESOLUTION AUTHORIZING THE MAYOR TO SIGN AMENDMENTS TO THE 1997 MUNICIPAL RECORDS RETENTION AND DISPOSITION SCHEDULE

Summary: The consideration of a resolution authorizing the Mayor to sign an amendment to the 1997 Municipal Records Retention & Disposition Schedule.

On September 23, 1997, by Resolution No. 97-158, the City approved the Municipal Records Retention and Disposition Schedule issued August 15, 1997, by the N. C. Department of Cultural Resources, Division of Archives and History.

The N. C. Department of Cultural Resources has now amended said Schedule. The first amendment to Standard 3 (Budget and Fiscal Records) adds Powell Bill records to the schedule and amends Payroll and Payroll Deduction records. The second amendment to Standard 13 replaces the entire Personnel Records schedule.

It is in the best interest of the City of Asheville to promote municipal records management as provided by the N. C. Department of Cultural Resources, Division of Archives and History by adopting these amendments.

Staff recommends City Council authorize the Mayor to execute an amendment dated February 25, 2002, to the Municipal Records Retention and Disposition Schedule.

RESOLUTION BOOK NO. 27 – PAGE 142

G. RESOLUTION NO. 02-73 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH DONNA SPRATT, d/b/a DONNIE APPLESEED LANDSCAPING, FOR MOWING THE EAST ASHEVILLE AND WEST ASHEVILLE DISTRICTS

Summary: The consideration of a resolution authorizing the City Manager to enter into a grass mowing contract for the East and West mowing districts.

In an effort to provide mowing services for grass areas throughout the City of Asheville, City staff divided the grass areas into five separate mowing districts and solicited sealed bids from ten Commercial Lawn Mowing Contractors, four of which were minority contractors, to provide mowing services for each and/or all of the five mowing districts. City staff reviewed the bids and concluded that Donna Spratt, d/b/a Donnie Appleseed's Landscaping, was the responsive low bidder for the East and West mowing districts at $68,000, combined for both districts and recommends acceptance of the bid.

Approved funding is available in the Park and Recreation operating fund account to pay for these mowing services.

The Parks and Recreation Department requests City Council authorize the City Manager to enter into a contract for $68,000 with Donna Spratt, d/b/a Donnie Appleseed's Landscaping.

RESOLUTION BOOK NO. 27 – PAGE 143

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilman Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ITEM REMOVED FROM THE CONSENT AGENDA

RESOLUTION NO. 02-74 - RESOLUTION APPROVING THE CONSOLIDATED COMMUNITY DEVELOPMENT BLOCK GRANT/HOME ACTION PLAN

Councilman Mumpower moved to excuse Vice-Mayor Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Peterson and carried unanimously.

Summary: This is the consideration of a resolution authorizing submission of the City's Consolidated Action Plan for 2002/03, allocating federal Community Development Block Grant (CDBG) and HOME funds.

The City expects to have available $1,902,224 in CDBG funds and $1,506,326 in HOME funds to allocate for housing and community development activities in the fiscal year beginning July 1, 2002. The City's Housing and Community Development Committee and the Asheville Regional Housing Consortium have made recommendations for allocating these funds to 21 CDBG-assisted and 13-HOME assisted projects.

If approved, the funding will assist in adding or preserving 92 affordable housing units in the City and 109 units in the rest of the Consortium area. CDBG funds will also help provide 150 Asheville residents with employment or business training and over 3,000 residents with other needed services. CDBG will also continue to support revitalization of the WECAN and South Pack Square neighborhoods.

Notice of the public hearing and a summary of the draft plan were published on March 22. A 30-day public comment period is required by federal regulations. The final plan must be submitted to HUD by May 15, 2001. City Council held their public hearing on April 9, 2002.

Councilman Peterson moved for the adoption of Resolution No. 02-74. This motion was seconded by Councilman Mumpower and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 144

III. PUBLIC HEARINGS:

A. PUBLIC HEARING RELATIVE TO REZONING 26 WEDGEFIELD DRIVE FROM COMMUNITY BUSINESS I DISTRICT TO REGIONAL BUSINESS DISTRICT

ORDINANCE NO. 2914 - ORDINANCE TO REZONE 26 WEDGEFIELD DRIVE FROM COMMUNITY BUSINESS I DISTRICT TO REGIONAL BUSINESS DISTRICT

Mayor Worley opened the public hearing at 5:15 p.m.

Urban Planner Jeff Tacy said that this is the consideration of an ordinance to rezone 26 Wedgefield Drive from Community Business I District to Regional Business District. This public hearing was advertised on April 12 and 19, 2002.

The project applicant, Spake Real Estate, has requested a rezoning from Community Business I to Regional Business to allow for an expansion of an existing business. The purpose of the CB-I District is to provide areas for medium-density business and service uses to several residential neighborhoods with a maximum building size of 12,000 square feet. The purpose of the Regional Business District is to provide areas for large-scale commercial operations without any limitations on structure size.

The subject property contains .96 acres. It is located within the City's extraterritorial jurisdiction, in an area dominated by regional business land uses. The area surrounding the project site has mixed zoning including Regional Business, CB-I, RM-8 (Residential Multi-Family), and RS-4 (Residential Single-Family). The existing land uses in the area include offices, auto body shop, hotels, retail stores, the Biltmore Mall, single-family residences, manufactured housing, and a variety of others. The project site has frontage along Wedgefield Drive, however, the parcel will be combined with a development fronting on Brevard Road and will be oriented facing Brevard Road. Brevard Road is major thoroughfare with sufficient capacity to handle uses allowed in the Regional Business District. In addition, the project site is located in close proximity to the I-26 interchange.

In consideration of other land uses in the area and the project sites proximity to major thoroughfares and interstates, the proposed zoning change appears to be consistent with the intent and purpose of the Unified Development Ordinance.

It is the recommendation of the Planning and Development Department to approve the request to rezone 26 Wedgefield Drive from Community Business I District to Regional Business District. The Planning & Zoning Commission held a public hearing on April 3, 2002, and unanimously voted to recommend the rezoning request be approved.

Upon inquiry of Councilman Peterson, Mr. Tacy said that the existing property is approximately 25-30 feet below the elevation of the road and that there will be consider buffering giving to the residential neighborhood.

Mr. Charles Murdock, speaking on behalf of Spake Development, felt that this particular parcel fits into the expansion, update and renovation of the supermarket and rezoning the property represents the highest and best use of that property. He felt that expanding the store to an upgraded and renovated store benefits the City residents in that area. He felt they were confident that they could buffer that property after construction is complete. He asked for Council support of the rezoning.

Mayor Worley closed the public hearing at 5:28 p.m.

City Attorney Oast reminded City Council that if the property is rezoned, that any use in the Regional Business District can be made of that property.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 2914. This motion was seconded by Councilman Peterson and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 467

B. PUBLIC HEARING RELATIVE TO CONSIDER A REQUEST TO APPROVE A MODIFICATION FROM THE SUBDIVISION STANDARDS TO ALLOW THE LENGTH OF THE FLAGPOLE PORTION OF A FLAG LOT TO EXCEED THE MAXIMUM PERMITTED LENGTH OF 250 FEET AND TO ALLOW A SINGLE-FAMILLY HOME TO BE CONSTRUCTRED FURTHER THAN 500 FEET FROM A FIRE HYDRANT FOR PROPERTY ON BALLANTREE DRIVE

Mayor Worley opened the public hearing at 5:29 p.m.

Urban Planner Carter Pettibone said that this is the consideration of a request to approve a modification from the subdivision standards to allow the length of the flagpole portion of a flag lot to exceed the maximum permitted length of 250 feet and to allow a single-family home to be constructed further than 500 feet from a fire hydrant for property on Ballantree Drive. This public hearing was advertised on April 12 and 19, 2002.

The City has received a request to subdivide a 5.74-acre parcel into two lots. The parcel is a flag lot type of property, with narrow frontage on Ballantree Drive that continues behind smaller properties along Ballantree and opens up to the bulk of the lot approximately 300 feet from Ballantree. The subdivision regulations of the Unified Development Ordinance require all residential lots to have at least 25 feet of frontage and flag lots to have a minimum width of 25 feet for the flagpole portion of the lot. The maximum length for the flagpole portion is 250 feet. A flag lot may only serve one single-family dwelling and the dwelling is required to be within 500 feet of a fire hydrant where public water is available.

The petitioners wish to create two flag lots out of the parent parcel in order to build homes on both lots. Each resulting lot would have the required street frontage and flagpole width, but due to the dimensions of the parcel, the maximum flagpole length and permitted distance from a fire hydrant cannot be observed.

An old logging road currently provides access to the undeveloped lot and it would be upgraded to a driveway to serve one of the resulting lots and another driveway would branch off from the upgraded driveway to access the other lot.

Staff received comments at both the Technical Review Committee (TRC) meeting and the Planning and Zoning Commission meeting from surrounding neighbors. Their concerns were primarily based on potential stormwater and erosion issues as well as possible strain on the existing water system resulting from development of the property. The TRC, in its decision, attached conditions to ensure that the applicants work with the Engineering Department to ensure compliance with the City's erosion control and stormwater ordinances. The applicant has had a preliminary meeting with a representative of the City's Engineering Department to discuss stormwater and erosion control requirements and measures that would be used for compliance with them. Another condition was that the Water Resources Department evaluates the water system to make sure adequate water and water pressure is available for the existing homes in the area as well as the potential new homes on the property.

At the TRC's meeting on March 18, 2002, they recommended approval with conditions. At their April 3, 2002, meeting, the Planning and Zoning Commission voted unanimously to recommend approval. The Planning and Development staff also recommends approval of the subdivision modification.

Councilman Dunn, who lives in the Ballantree neighborhood, stated that they do not want to block the applicant from building on their property, but they are concerned about stormwater runoff problems to the homes at the bottom.

When Vice-Mayor Bellamy asked if the Fire Department truck would be able to drive up the steep driveway, Mr. Pettibone said that at the TRC meeting, the Fire Department did review and approve the modification request.

Councilman Dunn said that the developer has agreed to install two silt fences to prevent erosion from running down the hill onto adjoining property.

There was a brief discussion about the hillside ordinance and stormwater control ordinance and whether the ordinances are strict enough. City Manager Westbrook said that they would be glad to review those ordinances at some point in time, but to his knowledge, he felt our ordinances are in line with other municipalities of our size in the state.

Councilman Ellis pointed out that there is a parking lot at the medical complex on Sweeten Creek Road that is entirely pervious. Progress is being made in this area and we need to try to encourage developers to proceed with that type of construction.

Councilman Peterson pointed out that this is an example of the need for the City to expand its extraterritorial jurisdiction (ETJ) because when the Pinnacles were developed, it was in the County and they didn't have to meet City standards. Part of the rationale for expanding the ETJ is that development just outside the City does have an impact within the City.

Mr. John Grear, 15 Elmwood Lane, presented City Council with an engineering report dated March 28, 2002, regarding his property and the proposed development located at the rear of his residence. It was the engineer's opinion that "the development will have adverse effects" to his property and the adjoining property owners. Mr. Grear was concerned that his house (and adjoining houses) will be the collection point of all the water runoff from this project. If Council approves this, he asked that a condition be placed that the construction must meet or exceed all the City's rules and regulations.

Mr. George Ribaud, 7 Elmwood Lane, voiced concern over water runoff and the danger of a fire occurring in the woods where the proposed house will be built.

Mr. Roy Birchfield, President of the Ballantree Homeowners Association, said that a concern they had when they first heard about this project was would the construction be single- or multi-family. They have now been assured that any more development would have to come back through the same process. He urged City Council to make sure that the developer follows these plans.

Mr. Leo Wentzel, property owner, explained that he has met with the City Engineer and he understands the erosion control problem in the area. He said that he intends to do everything he can to prevent erosion from running off his property and will cooperate with the City Engineer.

Mayor Worley closed the public hearing at 6:02 p.m.

When Councilman Mumpower asked about if the Planning staff has reviewed the engineering report Mr. Grear presented, Planning & Development Director Scott Shuford responded that the letter is evident of the possibility of some civil action that could be pursued outside the standards that the City imposes. If the construction is not installed correctly, not only would the property owner be liable to face the enforcement of our ordinances, but also they might suffer civil damages of the neighboring property owners.

Councilman Mumpower moved to approve the modification from the subdivision standards to allow the length of the flagpole portion of a flag lot to exceed the maximum permitted length of 250 feet and to allow a single-family home to be constructed further than 500 feet from a fire hydrant for property on Ballantree Drive with the condition that the developer work with the Engineering Department to ensure compliance with the City's erosion control and stormwater ordinances. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE FOLLOWING SEVEN AREAS PROPOSED FOR ANNEXATION WHICH ARE GENERALLY KNOWN AS (1) LEICESTER HIGHWAY AREA; (2) SHERWOOD HEIGHTS AREA; (3) HUNTINGTON-CHASE AREA; (4) PORTION OF BELL ROAD; (5) FOREST LAKE AREA; (6) MILL STONE AREA; AND (7) KENSINGTON-WINDSOR AREA

Urban Planner Paul Benson said that the Annexation Services Plan is being submitted for Council's approval for the following areas: Leicester Highway area, Sherwood Heights area, Huntington-Chase area; portion of Bell Road, Forest Lake area, Mill Stone area and Kensington-Windsor area.

City Council approval of this document is the second step in the annexation process that began on April 9, 2002, when Council adopted the resolutions of intent to annex these seven areas.

Upon review and approval by City Council, the Plan will be made available for public review. The follow steps will complete the annexation process.

Approval of Annexation Services Plan	April 23, 2002
Public information meeting	June 3, 2002
Public hearings	June 11, 2002
Adoption of annexation ordinances	June 25, 2002
Effective date of annexations	June 30, 2003

The N.C. General Statutes require that municipalities exercising annexation authority make plans for the extension of services to the area proposed to be annexed and shall, prior to the public hearing and public information meeting, prepare a report setting forth such plans.

The Statutes require that the reports include:

1) Maps showing: (a) The present and proposed boundaries of the municipality; (b) The present major water and sewer lines, and any proposed extensions; and (c) The general land use pattern in the area to be annexed.

2) A statement that the area to be annexed meets the standards of N. C. Gen. Stat. sec. 160A-48 (basically contiguity and urbanization).

3) A statement setting forth the plans of the municipality for extending to the annexation area each major municipal service performed within the municipality. Specifically, (a) police protection, fire protection, solid waste collection and street maintenance on the date of annexation; and (b) extension of major trunk water mains and sewer outfall lines so that property owners in the area will be able to secure public water and sewer service according to the municipal policies in effect for extending such service to individuals lots or subdivisions.

4) The method under which the municipality plans to finance extension of services into the area to be annexed.

5) A statement of the impact of the annexation on any rural fire department providing service in the area to be annexed and a statement of the impact of the annexation on fire protection and fire insurance rates in the area to be annexed.

6) A statement showing how the proposed annexation will affect the City's finances and services, including City revenue change estimates.

He then reviewed with Council the specifics of how each area qualifies for annexation:

Leicester Highway – Contains 64 acres, northwest. The area is contiguous and urbanized. It meets all three tests – population density test, the population density and subdivision test, and the subdivision test.

Sherwood Heights – Contains 61 acres, north – The area is contiguous and urbanized. It meets two tests – population density and subdivision test, and subdivision test.

Huntington Chase – Contains 63 acres, east - The area is continuous and urbanized. It meets two tests – population density and subdivision test, and subdivision test. This area also contains two non-urbanized areas.

Bell Road – Contains 21 acres, east – The area is contiguous and is urbanized. It meets the subdivision test.

Forest Lake – Contains 53 acres, south – The area is contiguous and meets all three tests – population density test, the population density and subdivision test, and the subdivision test.

Mill Stone – Contains 7 acres, south – The area is contiguous and meets all three tests – population density test, the population density and subdivision test, and the subdivision test.

Kensington-Windsor – Contains 67 acres, south – The area is contiguous and meets the population density test.

Mr. Benson then explained the Plan for extension of services, including police protection, fire protection, solid waste collection, street maintenance, water distribution and sewer collection.

Police protection: The additional land area, street mileage, dwelling units, businesses and improvements will not require expansion of the Police Department. He explained how each area would be served by an expansion of a particular district. At the current population, the number of sworn positions reflects a police/citizen ratio of one officer per 410 residents. A ratio of one officer per 300-400 residents is typical for North Carolina cities and towns. The police/citizen ratio following annexation is estimated at one officer to 417 residents. Because of the relatively small size of the annexation areas and close proximity to the existing municipal boundaries, no additional capital or operating expenses is anticipated in adding these areas to the existing patrol districts.

Fire protection: The additional land area, street mileage, dwelling units, businesses and improvements will not require immediate expansion of the Fire and Rescue Department. The N.C. Gen. Statutes require the City to compensate rural fire departments for lost revenue by either contracting with the rural fire departments for fire protection, (usually the case). City services supplement the rural fire departments under contract to bring fire protection to City standards. The Fire and Rescue Department participates with surrounding fire departments in accordance with mutual aid agreements. The City currently has an insurance rating of 3, on a scale of 1-10, with 1 being the highest level.

Solid waste collection: The additional land area, street mileage, dwelling units, businesses and improvements will not require immediate expansion of Public Works Department, Sanitation Division. New customers would receive the automated collection service. Compensation would be offered to private solid waste hauler to offset economic loss as required by the statutes. Therefore, there will be costs to the City associated with the purchase of new rollout containers and potential "economic loss" payments to affected contractors.

Street maintenance services: The additional land area, street mileage, dwelling units, businesses and improvements will not require immediate expansion of Public Works Department, Street Maintenance Division. Existing personnel and equipment are planned to serve the proposed additions to the City maintenance system; therefore, no specific personnel and equipment additions will be made. Streets are resurfaced on a scheduled rotation established by classification, construction type, use, condition and inspections. The following are private and state maintained streets planned for inclusion on the scheduled rotation: Leicester Highway: Eliada Home Road and Old County Home Road; Sherwood Heights: Robinhood Road, Brookwood Road, and Brookwood Court; Huntington Chase: Huntington Chase Drive; Bell Road: Bell Road; Forest Lake: Forest Lake Drive, Sawmill Road, Meadow Lake Road, Simpson Hollow Road, Kingbird Lane, Glen Woods Court, and Goldfinch Lane; Mill Stone: Mill Stone Drive; and Kensington-Windsor: Windsor Drive, New Castle Court and Saint Charles Court. In order for privately owned streets to be considered by maintenance by the City, there is certain criterion that must be met. Some immediate maintenance issues include trimming of overgrown vegetation adjacent to streets in Sherwood Heights area; and need for some patching in the Forest Lake area.

Water distribution: On the effective date of annexation, all residents, businesses and property owners within the proposed seven annexation areas that are adjacent to existing water facilities will receive service on a basis substantially equal to all current portions of the City. The following four areas require no water line improvements: Sherwood Heights area, Forest Lake area, Mill Stone area and Kensington-Windsor area. The following three areas have water line improvements which are planned for completion by June 30, 2005: Leicester Highway: There is a need to upgrade the existing 2-inch water line to bring fire protection coverage to the same level as other parts of the City. The City will install approximately 2,600 linear feet of new 6-inch water line, fire hydrants and related appurtenances. Huntington Chase: There is a need to upgrade the existing 2-inch water line to bring fire protection coverage to the same level as other parts of the City. The City will install approximately 560 linear feet of new 6-inch water line, fire hydrants and related appurtenances. Bell Road: There is a need to upgrade the existing 2-inch water line to bring fire protection coverage to the same level as other parts of the City. The City will install approximately 1,300 linear feet of new 6-inch water line, fire hydrants and related appurtenances.

Sewer collection: The following five areas require no sanitary sewer system improvements: Leicester Highway area, Sherwood Heights area, Bell Road area, Forest Lake area and Kensington-Windsor area. The following two areas have sanitary sewer system improvements which are planned for completion by June 30, 2005: Huntington-Chase: The City will install approximately 560 linear feet of 8-inch sanitary sewer line and related appurtenances to enhance the level of service to this area. Mill Stone area: The City will install approximately 270 linear feet of 8-inch sanitary sewer line and related appurtenances to enhance the level of service to this area.

Administrative and other municipal services: The City provides a full range of services. Basically key professional and department directors specializing in public works, police protection, fire protection, urban land use planning and zoning, building code enforcement, legal matters, parks and reaction and various other municipal activities and functions. The City is active in minimum housing code and State building code administration, zoning and subdivision ordinance administration, recreational programs and parks administration, community revitalization and affordable housing grants administration, economic development efforts and many other planning and related activities.

Financial Impact:

Revenue: Total ad valorem property tax revenue - $375,547; Total state utility tax revenue - $51,300; Total local option sales tax - $144,058; Total Powell Bill allocation - $37,393; and Total fees, permits, licenses and charges for services - $47,149. Total revenue - $655,447.

Annual recurring expenditures: Fire (rural fire department contracts expected to be in place for at least 5 years) - $64,564; Solid waste (tonnage fee) - $9,632; and Street lighting (electrical charge to CP&L) - $6,644. Total recurring expenditures - $80,840.

Annual capital expenditures: Water line improvements - $310,000; Sewer line improvements - $101,000; Solid waste (economic loss compensation for private solid waste haulers) - $25,920; Rollout containers - $12,040; Street signs - $1,599; Street repair - $2,500; and Street lighting - $2,307. Total one-time annual capital expenditure - $455,366.

Mr. Benson explained the impact on insurance rates to property owners and commercial properties.

City Attorney Oast noted that if this Plan is found to be deficient after the public information meeting or after the City Council public hearing, it could be amended during Council deliberation of adoption of the ordinances.

Mr. Benson responded to various questions/comments from Council, some being, but are not limited to: does the City automatically take in all the streets in the annexation areas; are people required to tap into water or sewer after annexation; how much does it cost to tap into an existing water line; how long do we contract with the rural fire departments; how does the City handle street lights when subdivisions have more decorative street lights installed; are there different size roll-out containers; do we anticipate growth and more development around these proposed areas that will require building another fire station in the future; what is the status of multi-family apartments having recycling pick-up; how does the street scheduled maintenance rotation work; does the City feel that the police/citizen ratio is sufficient to protect our citizens; where does the City rank in crime throughout the state; what is the average response call for a Priority 1 police call; what constitutes Priority 1 police calls; and describe fire insurance rates.

Upon inquiry of Councilman Mumpower, City Manager Westbrook said that the City is legally bound to provide services to the annexation areas on the effective date of annexation, except water and sewer line improvements which can be completed within a two year period after the effective date of an annexation.

Councilman Dunn briefed Council on a problem in Hollybrook where elderly people cannot roll down the trash containers for pick-up. He felt that if the City annexes an area, they should have the equipment to take care of the needs of that area. He understood the need for efficiency, but he felt that we are sacrificing services. Public Works Director Mark Combs explained the circumstances in Hollybrook and said that he is working with the homeowners association on that concern. He also noted that the City does have a set-out system in place for people who are physically not able to get their trash out to the curb.

Councilman Mumpower said that he wouldn't feel comfortable going forward with further annexations if the City is not providing good service to the current residents. However, Council does have assurance by staff that they are trying to provide good service. He invited City residents to contact Council to report if they see patterns of inadequate service.

At 7:25 p.m., Mayor Worley announced a short break.

Mr. Fred English, resident in Haw Creek, felt that the City should maintain what they have before trying to annex more people. He pointed out that there is only one short section of sidewalk in the whole Haw Creek valley.

Mr. Dennis Seeney, Forest Lake Subdivision resident, spoke against the annexation and said that even though he will be saving approximately $180-200 a year on fire insurance, it doesn't equal the amount of $1,000 of additional property taxes. He felt that he has adequate law enforcement protection already from the Sheriff's Department and their response time would be pretty much the same as the Asheville Police Department's response time. He wondered if the City would start maintenance of the common area that the association currently pays for.

In reply to Mr. Seeney, Mr. Benson said that the Forest Lake common area would be private property, however, if they would like to dedicate the land to the City, our Parks and Recreation Department may take over the maintenance.

Mayor Worley said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

RESOLUTION NO. 02-75 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE LEICESTER HIGHWAY AREA

Councilman Ellis moved for the adoption of Resolution No. 02-75. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Councilman Dunn voting "no."

RESOLUTION BOOK NO. 27 – PAGE 145

RESOLUTION NO. 02-76 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE SHERWOOD HEIGHTS AREA

Councilman Peterson moved for the adoption of Resolution No. 02-76. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Councilman Dunn voting "no."

RESOLUTION BOOK NO. 27 – PAGE 146

RESOLUTION NO. 02-77 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE HUNTINGTON CHASE AREA

Councilman Ellis moved for the adoption of Resolution No. 02-77. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Councilman Dunn voting "no."

RESOLUTION BOOK NO. 27 – PAGE 147

RESOLUTION NO. 02-78 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS A PORTION OF BELL ROAD

Councilwoman Jones moved for the adoption of Resolution No. 02-78. This motion was seconded by Councilman Peterson and carried on a 6-1 vote, with Councilman Dunn voting "no."

RESOLUTION BOOK NO. 27 – PAGE 148

RESOLUTION NO. 02-79 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE FOREST LAKE AREA

Councilwoman Jones moved for the adoption of Resolution No. 02-79. This motion was seconded by Councilman Ellis and carried on a 6-1 vote, with Councilman Dunn voting "no."

RESOLUTION BOOK NO. 27 – PAGE 149

RESOLUTION NO. 02-80 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE MILL STONE AREA

Councilman Peterson moved for the adoption of Resolution No. 02-80. This motion was seconded by Councilman Ellis and carried on a 6-1 vote, with Councilman Dunn voting "no."

RESOLUTION BOOK NO. 27 – PAGE 150

RESOLUTION NO. 02-81 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE KENSINGTON-WINDSOR AREA

Councilman Ellis moved for the adoption of Resolution No. 02-81. This motion was seconded by Councilman Peterson and carried on a 6-1 vote, with Councilman Dunn voting "no."

RESOLUTION BOOK NO. 27 – PAGE 151

Councilman Dunn said that he is not against annexation and he would have voted in favor had he felt like the City was not stretched as far as we are. He was not convinced this was the right time to annex.

B. RESOLUTION NO. 02-82 - RESOLUTION APPOINTING A MEMBER TO THE ASHEVILLE SCHOOL BOARD

Vice-Mayor Bellamy said that on April 16, 2002, City Council interviewed Allison Jordan, Marsha Bate, Roxie Wynn, Pegi O'Hagan and Keith Thomson for a vacancy on the Asheville School Board.

After each Council member spoke about the excellent credentials of all candidates, Councilman Ellis nominated Allison Jordan, Councilman Dunn nominated Allison Jordan, Councilwoman Jones nominated Marsha Bate, Mayor Worley nominated Allison Jordan, Councilman Mumpower nominated Marsha Bate, Councilman Peterson nominated Marsha Bate, and Vice-Mayor Bellamy nominated Roxie Wynn. There being a tie between Allison Jordan and Marsha Bate, Vice-Mayor Bellamy changed her vote in support of Allison Jordan.

Therefore, Allison Jordan was appointed as a member of the Asheville School Board to fill the unexpired term of Mr. Mark Gordon. Said term will begin immediately and expire on April 1, 2005, or until his successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 152

VI. OTHER BUSINESS:

Salvation Army Boys & Girls Club

Vice-Mayor Bellamy presented the City with several hand-made thank you cards and pictures from the Salvation Army Boys & Girls Club thanking firefighters and police officers.

Southeastern Airport Managers' Association

Mayor Worley said that he was presented with a resolution from the Southeastern Airport Managers' Association thanking the City of Asheville and the Asheville Regional Airport Authority for their generosity in assisting the 2002 Annual Conference held in Asheville.

Consolidation of Services

There was a brief discussion on the issue of consolidation with Buncombe County, in particular parks and recreation services. City Manager Westbrook said that as a result of a list of items Councilman Dunn had given him with regard to a proposal from Buncombe County, he prepared a memo to City Council noting that staff is analyzing the proposal and he would report back to Council within the next month on those items. Councilman Peterson felt that a subcommittee of Council working with a subcommittee of County Commissioners might be a better approach than having City staff working with County staff on consolidation proposals.

With regard to the consolidation of after-school programs, City Manager Westbrook said that at the budget worksession on May 13, 2002, Parks & Recreation Director Irby Brinson will explain his proposal.

Claims

The following claims were received by the City of Asheville during the period of April 5-11, 2002: Tim Vorst (Fire), Joy Reid (Water) and Michael H. Carter (Transit Services).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Veterans Memorial Request

Mr. Tuck Gudger, North Asheville resident, presented City Council with a petition containing approximately 650 names which read: "There is not a Veterans' Memorial in downtown Asheville commemorating those who have served, are serving and will serve in the military forces of the United States of America, especially during times of armed conflict, and there has long been a need for an appropriate veteran's memorial. The last open space in the city for a Veterans' Memorial is in the Pack Square/City/County Plaza area which area is being configured for better public use. We petition for a reservation of space in the Pack Square/City/County Plaza area for erection of a monument commemorating all veterans and, to the extent feasible, for erection of such monument." He asked that Council adopt a resolution supporting a veterans' memorial to be included in the projected plans for the renovation of the City/County Plaza. He also asked that the City contribute $50,000 towards the $100,000 total project cost. The other $50,000 is being requested from the Buncombe County Commissioners. He said that the City could maybe allocate the $50,000 over 3 years since the project may not be completed until that time.

Mr. Bill Griffin also spoke in support of the veterans' memorial and passed out to Council a sketch on what they would like the memorial to look like.

Mr. Richard Griffin supported the veterans memorial and stressed they need a place in Asheville that is appropriate and accessible for large crowds.

Mayor Worley asked the City Manager to place this item on Council's worksession agenda within 30 days and asked that Pack Square Conservancy Inc. (group contracted with the City) be invited to the worksession for a briefing on the project.

Comments by Walter Plaue

Mr. Walter Plaue invited City Council to attend the Memorial Day Services at 10:00 a.m. on Monday, May 27, 2002, at the City/County Plaza. He hoped this celebration would be the first of many.

Comments by Fred English

Mr. Fred English, Haw Creek resident, felt that the $15,000 appropriation to the Asheville Youth Sports Program voted on by Council at their worksession on April 9, 2002, was a conflict of interest for Vice-Mayor Bellamy and she should not have voted on that issue.

Closed Session

At 8:42 p.m., Councilwoman Jones moved to go into closed session to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Henderson County, Cane Creek Water and Sewer District, Asheville-Buncombe-Henderson Water Authority, James E. Martin, Jeffrey A. Martin, Susanne A. Zuerner, Donald E. Williams, Paul E. Fruits, B. Joy MacFadyen Bulluck, Buncombe County, and City of Asheville – G. S. 143-318.11(a)(3). This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

At 10:10 p.m. Councilman Mumpower moved to come out of closed session. This motion was seconded by Councilman Dunn and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 10:10 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – April 30, 2002
North Asheville Community Center
37 East Larchmont Road

7:00 p.m. - Community Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

The following topics were raised by residents and addressed by City Council and City staff: request to withhold any decision regarding the renovation of the Civic Center until a plan can be produced for the alternate use of the Civic Center at no cost to the City; determination needs to be made if Dunwood Road is a private or City-maintained street; large potholes on Dunwood Road; Dunwood Road is in such disrepair that trash trucks cannot collect garbage; annexation policies in the past with regard to street maintenance; Black Oak Drive, which was annexed several years ago, is in bad disrepair and residents requested the City take over maintenance of that private road; street assessment process unfair to property owners on Black Oak Drive who have a lot of street frontage; request to have Black Oak Drive's potholes repaired and snow removal service even if it is a private road; request for a pedestrian signal at the corner of Larchmont Road and Merrimon Avenue; request for sidewalk between Burger King and Swannanoa Cleaners on Merrimon Avenue; request for speed bumps on Fenner Avenue; request for sidewalks on Fenner Avenue; need for more speed enforcement on Fenner Avenue; request for "Children at Play" or "Slow" signs on Fenner Avenue near the bottom of the hill or near the corner of Lookout and Fenner; need Police Department to enforce parking violations on Fenner Avenue; Civic Center renovation should not include a sport activities complex because that should be built by the river or closer to the Airport in order to have adequate parking; City should make a determination on what to do at the Civic Center soon because the price tag is getting higher every year; library at the North Asheville Community Center is small and perhaps should be expanded over the air rights of the parking lot; no speeding enforcement on Merrimon Avenue or Kimberly Avenue; need to look at City departments, e.g., Civic Center and Transit Services, for prioritization; need for the City to do a better job of communicating with the community; request for community to give input to the City's 2025 Comprehensive Plan; request for County Commissioners' meetings to be viewed on the City's Government Channel; and request for more greenways.

After discussion, Council requested City staff prepare a report regarding streets that are in the City of Asheville but not maintained by the City. Said report is to contain a list of streets; the cost of bringing the streets up to City standards; and a financial plan with potential funding options, e.g. how much the City would pay and where those funds would come from, and how much the property owners would pay. Due to the current budget concerns, the City Manager requested this information be provided to Council between September 2002 – March 2003. Councilman Mumpower requested a worksession before late fall as he just wanted to explore possibilities without dollars being attached.

Mayor Worley adjourned the meeting at 8:42 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – May 7, 2002 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

Resolution setting a Public Hearing on May 28, 2002, for the Voluntary Annexation of Reynolds Mountain Subdivision, Phase I

Budget Amendment for Mobile Safety House Grant from Federal Emergency Management Agency

Summary: The consideration of a budget amendment, in the amount of $52,277, to receive grant money from the Federal Emergency Management Agency (FEMA) for a mobile safety house and associated equipment.

The City of Asheville Fire and Rescue Department requested $52,277 from FEMA for the purchase of a mobile safety house and associated equipment. Staff was successful in obtaining those funds and was awarded Federal grant EMW-2001-FG-06774. The grant provides 70% of the total project, with the remainder from Fire Department's operating budget.

The safety house is primarily designed to educate adults about fire safety and home safety. Part of the mobile house is also to educate the public about residential fire sprinkler systems.

City staff recommends City Council approve the budget amendment to receive grant money from FEMA.

Contract to Audit City Accounts

Summary: The consideration of a resolution authorizing the Mayor to execute a contract with Crisp Hughes Evans LLP, Certified Public Accountants, for auditing services for Fiscal Year 2001-2002.

N.C. General Statute sec. 159-34 requires that local governments of North Carolina have their accounts audited each fiscal year and submit a copy of the audit to the Local Government Commission.

In 1998 the City solicited proposals from 36 accounting firms to perform the City's annual audit. City Council selected Crisp Hughes Evans LLP to conduct the Fiscal Year 1997-98 audit and has re-engaged them annually through Fiscal Year 2000-2001. They completed all of those engagements in a satisfactory manner and have now submitted an engagement letter for the Fiscal Year 2001-2002 audit. The base fee has been proposed at $54,000 (this is the same fee as last year and $700 less than two years ago). Funds are appropriated in the budget of the Accounting Division of the Finance Department.

City staff recommends City Council adopt the resolution, which authorizes the Mayor to execute a contract with Crisp Hughes Evans LLP for auditing services for Fiscal Year 2001-2002.

Budget Amendment for Master Street Tree Plan, Phase III

- Summary: The consideration of a budget amendment, in the amount of $10,000, from a grant from the North Carolina Department of Environment and Natural Resources for implementation of the Master Street Tree Plan, Phase III.

The City of Asheville applied for funds in August 2001 for a grant from the North Carolina Department of Environment and Natural Resources, Division of Forest Resources in the Urban and Community Forestry Grants Program. The grant was recently awarded in the amount of $10,000 and designated for implementing the next phase of the Master Street Tree Program (MSTP) in the east area of Asheville.

The Parks and Recreation Department has completed the first two phases of the MSTP, and the Public Works Department will complete the remaining phases. Once complete, the MSTP will be an inventory of all the street trees on City right-of-ways located within the City limits of Asheville. The existing inventory is almost fifteen years old and does not accurately reflect the trees of the City. The next phase of the process will identify the location, size, condition, and site conditions of trees located in the east area of Asheville. The MSTP will serve as a critical link in developing a long term management plan for Asheville's urban trees, provide information for future tree planting and forestry planning, and provide educational and volunteer opportunities for community organizations.

The Parks and Recreation Department recommends City Council to approve the budget amendment in the amount of $10,000 to establish a budget for the next phase of the MSTP.

Youth Employment Program

Summary: The consideration of accepting a proposal by Community Solutions for Youth Employment to fund and manage the Youth Employment Program for the Summer of 2002, and approval of a budget amendment, in the amount of $37,400, to fund the program.

Community Solutions for Youth Employment (CSYE), part of a multi-agency support system for high risk youth ages 14 – 21 years of age, was informed of the City's inability to continue its youth employment program for 2002 due to budget constraints caused by State revenue shortfalls. CSYE is a program of Eliada Homes, Inc. CSYE, in cooperation with the Parks and Recreation Department, immediately began work to determine the best way to continue funding the youth employment program.

CSYE is proposing to fund summer jobs for 26 youth for eight weeks at 30 hours per week. In addition, CSYE agrees with the department that employment for these youth is only one part of the overall assistance that they need and therefore has agreed to manage the program for the Department at no additional cost. This management will include: recruitment of applicants, application activities, recruitment of employers in addition to the City of Asheville, interviewing activities, hiring, pre-employment training and orientation, job retention activities, mid-summer training, and volunteer placement for any additional youth needing experience but not included in the employment process. CSYE staff will provide weekly onsite contact with each youth employee to monitor their work and to supply support. CSYE will conduct an evaluation of the program. A special event at the end of the eight weeks is planned to celebrate the successful conclusion of the program.

The City of Asheville will accept a grant from the Community Solutions for Youth Employment for $37,400 to fund the cost of the program. The City of Asheville will use these funds to pay the wages and social security for each youth and provide pre-employment drug screening. Cost to the City will be the staff and time necessary to process payroll and to administer the drug screening program.

Traditionally, youth employed through this program have worked in a number of different City Departments including Parks and Recreation, Fire, Public Works and Human Resources.

The Parks and Recreation Department recommends that the City accept the proposal and grant funds from CSYE for the 2002 summer youth employment program and approve the budget amendment to fund the program.

Upon inquiry of Vice-Mayor Bellamy, Superintendent of Recreation Butch Kisiah explained the recruitment procedure.

Provisions for Possession & Consumption of Malt Beverages and/or Unfortified Wine at Goombay Festival, Greek Festival, Asheville Mountain Sports Festival, Asheville Downtown Association's events and the Bele Chere Festival

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the following events: 2002 Goombay Festival, 2002 Mountain Sports Festival, 2002 Greek Festival, Asheville Downtown Association's 2002 events and Bele Chere 2002.

The Asheville Goombay Festival is a unique celebration of African heritage and traditions. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held August 23-25, 2002. The 2002 Goombay Festival has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

The Asheville Greek Festival is a unique celebration of Greek heritage and traditions at City/County Plaza. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held September 27-29, 2002. The 2002 Greek Festival has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

The Asheville Mountain Sports Festival is a unique combination of competitions and demonstrations throughout Asheville. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held September 27-29, 2002. The 2002 Mountain Sports Festival has requested permission to allow possession and consumption of beer and wine during these events.

For many years, the Asheville Downtown Association has co-sponsored with the City of Asheville events to bring both the public and visitors to the downtown area. These events include: *Moonlight Over Downtown and four Downtown After Five activities.* The Asheville Downtown Association has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

For many years, the Bele Chere Board in cooperation with the Asheville Parks and Recreation Department has produced Bele Chere to bring both the public and visitors to the Downtown area. This year the request is being made for July 26-27, 2002. The Bele Chere Board and Asheville Parks and Recreation has requested permission to allow possession and consumption of beer and wine during this event as they have been allowed in the past.

The Asheville Parks and Recreation Department recommends approval of the resolutions to authorize the possession of malt beverages and/or unfortified wine for the above-mentioned events at specific locations and times noted in the resolutions.

Vice-Mayor Bellamy asked that these be voted on separately at the next formal meeting.

- **Grant from U.S. Dept. of Justice for Three New Police Officer Positions**

Summary: The consideration of a resolution authorizing the City Manager to apply for a federal grant from the U.S. Department of Justice to fund three new police officer positions.

The City is eligible to receive a $225,000 grant form the U. S. Department of Justice, Office of Community Oriented Services, to fund three new police officer positions for a period of three years. It is intended to assign three police officers to provide additional police services to the City's public housing communities. In consideration thereof, the Housing Authority of the City of Asheville has agreed to provide $107,736 for the required local cash match. No City funds are required for the match.

City staff recommends City Council authorize the City Manager to apply for and enter into an agreement with the U.S. Department of Justice to fund three new police officer positions.

Police Chief Will Annarino answered various questions from Council regarding these three positions.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

I-26 CONNECTOR UPDATE

Metropolitan Planning Organization Coordinator Dan Baechtold said that this is a presentation to City Council on the traffic projections to be used in the design of the I-26 Connector Project.

Mr. Baechtold said that Stantec Consulting, traffic consultant from Raleigh, recently completed an update to the traffic model for the Asheville urban area. The traffic model is a computer simulation of traffic patterns that predicts traffic volumes on major streets and highways over the next 25 years. This traffic data will be used as the basis for designing the I-26 Connector project in Asheville. Stantec had a contract with the City of Asheville in the amount of $145,300 to produce this product. Eighty Percent (80%) of this cost was paid for with federal funds. The City of Asheville provided the local match of twenty percent (20%) in the amount of $29,060.

He said the traffic model presentation would also be given to the Community Coordinating Committee, which is the citizen's group that has been working with the NCDOT on the design of the connector project. That presentation will take place on the morning of May 7th. The following day, on May 8th, the presentation will be given to the Transportation Advisory Committee for the Asheville Area MPO (TAC). The TAC serves as the body that provides local input to the NCDOT. The TAC will be asked, after their public hearing on May 16, 2002, to give their input to the NCDOT.

Mr. Drew Joyner, with the N. C. Dept. of Transportation (NC DOT) Project Development and Environmental Analysis Department, explained that for the past 1-1/2 years they have (1) added I-26/I-40/I-240 interchange; (2) updated the I-26 Connector website; (3) added two new alternatives – beginning functional design and completing field studies for environmental impacts; (4) worked with NC DOT staff to provide visualization of project alternatives; and (5) updated the Asheville Urban Area Traffic Model.

The traffic data was one of the factors used to determine the number of lanes that will be built through West Asheville. He explained the results of the traffic model stating that the NC

DOT would like to continue forward with their planning. Since the NC DOT now has the information they need to make a determination on the number of lanes, and in order to move forward, the NC DOT recommends an 8-lane cross-section on I-240. After the TAC provides input to the NC DOT, then Stantec will be able to provide NC DOT with updated full traffic forecasts. After receiving that information from Stantec, then the NC DOT can work on detail functional designs for each of the four alternatives.

Ms. Beverly Williams, Asheville Coordinator for the NC DOT Statewide Planning Branch, explained some specifics of the traffic model, noting that City staff provided the housing, land use and employment data. She reiterated that the NC DOT recommendation is that this portion of the project receives an 8-lane cross-section on I-240. She noted that the NC DOT is not asking for concurrence on the larger I-26 Connector at this time, just the I-240 west traffic.

NC DOT and Stantec representatives answered various questions from Council with regard to the traffic model, some being, but are not limited to: how much is through trip traffic; was peak traffic considered in the model; what does the different level of services mean, what is the existing level of service; how many people would be relocated; any consideration in the traffic model for public transportation or new railway; will a short delay of a decision from the TAC slow the project down from it's anticipated 2008 construction date; and what happens if the TAC makes a recommendation of 6 lanes.

Councilwoman Jones, member of the TAC, asked for Council's support to ask the TAC to postpone their decision for at least 30 days in order for members to hear more from the public and understand the project more fully. She stressed that this request is not to delay the project.

After discussion, it was the consensus of City Council to add on the formal meeting agenda next week a discussion of a 30-day extension regarding the I-26 connector.

On behalf of Council, Mayor Worley thanked the NC DOT and Stantec representatives for their presentation.

STANDARDS FOR LIGHTING OF MOST NON-RESIDENTIAL DEVELOPMENT

Planning and Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Asheville Standard Specifications and Details Manual to establish standards for lighting of parking lots, outdoor display areas, vehicular canopies and similar activities/uses to ensure adequate safety, night vision, and comfort and not cause excessive glare onto adjacent properties and public street rights-of-way.

Citizens have consistently identified glare and light trespass as an adverse impact of non-residential development. In addition, citizens have expressed concern about the "over-lighting" of uses such as gas stations and convenience stores. In response to these concerns, the staff of the Public Works and Planning and Development Departments have worked with staff of CP&L to develop lighting standards designed to ensure adequate lighting for all uses while minimizing glare and light trespass. The ordinance establishes general lighting standards and specific standards for the following uses:

- Parking lots and outdoor areas;
- Vehicular canopies;
- Outdoor display areas;
- Outdoor sports fields and performance areas;
- Parking decks; and
- Signs.

The goal of the proposed standards is to provide developers, contractors, and property owners with standards that will ensure adequate lighting for the development being proposed while minimizing adverse impacts on adjacent properties and public rights-of-way caused by glare and light trespass. The City staff was fortunate to have the assistance of a lighting expert employed by CP&L to assist in the development of the lighting standards. Our goal was to provide reasonable standards that would meet the needs of and benefit the entire community.

The Public Works and Planning and Development staff recommend approval of the ordinance establishing lighting standards for the City of Asheville.

Mr. Shuford noted that before staff requests final action by Council they will run the ordinance through a focus group which will include neighborhood representatives and people in the lighting industry. After that focus group reviews the changes, they will bring the final ordinance before Council for action.

PUBLIC COMMENT AT PUBLIC HEARINGS

When Councilman Dunn asked if any suggestions have been forthcoming on how to structure public comment at public hearings, Mayor Worley replied that Council members have not given him any input but would welcome such input.

CLOSED SESSION

At 5:04 p.m., Councilman Mumpower moved to go into closed session to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: City of Asheville, Kenneth Bowman, Joseph Boerner and others. This is the City's appeal of the Civil Service Board decision on the police officer pay grievance and unless a request is made, the list of about 25 names will not be read. The City Attorney has a written list of the names if anyone wants to see it. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilman Dunn and carried unanimously.

At 6:20 p.m., Councilman Ellis moved to come out of closed session. This motion was seconded by Councilman Dunn and carried unanimously.

At 6:20 p.m., Mayor Worley recessed the meeting to be reconvened at 6:30 p.m. at the Asheville City Schools Administrative Offices at 85 Mountain Street.

JOINT CITY COUNCIL/SCHOOL BOARD MEETING

At 6:30 p.m., Mayor Worley reconvened the meeting at the Asheville City Schools Administrative Offices to hear the State of the System address by Superintendent Robert L. Logan.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:00 p.m.

Magdalen Burleson
CITY CLERK

Charles R Worley
MAYOR

Tuesday – May 14, 2002 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Councilman Dunn gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF UNC-CHAPEL HILL'S DEAN WILLIAM H. CAMPBELL

Mayor Worley recognized UNC-Chapel Hill's Dean William H. Campbell for his many contributions to pharmacy, health care and the City of Asheville's initiatives.

B. RECOGNITION OF THE ASHEVILLE URBAN TRAIL COMMITTEE

Mayor Worley read the proclamation proclaiming the Asheville Urban Trail Committee as the Asheville Parks & Recreation Department's 2002 Volunteer of the Year. He presented Ms. Grace Pless, Chair, with the proclamation. She then briefed City Council on the history of the Committee, which began in 1989 noting that their completed trail celebration will be on May 16, 2002.

C. PROCLAMATION PROCLAIMING MAY, 2002, AS "ORGAN DONATION AWARENESS MONTH"

Councilman Mumpower read the proclamation proclaiming May, 2002, as "Organ Donation Awareness Month" in the City of Asheville. He presented the proclamation to Mr. Alan T. McKenzie, CEO of the Buncombe County Medical Society, and Dr. Jim Montgomery, President of the Buncombe County Medical Society, who briefed Council on some activities taking place during the month.

D. PROCLAMATION PROCLAIMING MAY 18-24, 2002, AS "NATIONAL SAFE BOATING WEEK"

Councilman Dunn read the proclamation proclaiming May 18-24, 2002, as "National Safe Boating Week" in the City of Asheville. He presented the proclamation to Mr. Russ Martin, Local Commander of the Asheville Power Squadron, who briefed Council on some activities taking place during the week.

II. CONSENT:

Vice-Mayor Bellamy requested Consent Agenda Items K-O be removed from the Consent Agenda to be voted on separately.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON APRIL 23, 2002; THE COMMUNITY MEETING HELD ON APRIL 30, 2002; AND THE WORKSESSION HELD ON MAY 7, 2002

B. RESOLUTION NO. 02-83 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO LICENSE AGREEMENTS WITH MORRIS COMMUNICATIONS INC. FOR ANTENNAS AT 36 RESERVOIR ROAD AND PEACH KNOB RESERVOIR

Summary: The consideration of a resolution authorizing the City Manager to execute License Agreements with Morris Communications, Inc. for antennas at 36 Reservoir Road and Peach Knob Reservoir.

The properties at 36 Reservoir Road (White Fawn) and Peach Knob Reservoir are the sites of telecommunication towers owned by the City of Asheville. The City leases antenna space on the towers and ground space for related equipment.

Morris Communications, Inc., has operated an antenna and related equipment at each of the sites since December, 1996. There are three towers at 36 Reservoir Road and the Morris antenna is located on the tower known as the "U. S. Cellular Tower" which is immediately east of the proposed Sister Cities Park. The proposed License Agreements will enable Morris to continue operating antennas at each site; however, there is a provision, which allows either the Licensor or the Licensee to terminate the agreement upon 180 days notice. The term of the License Agreements will be 3 years with 2 renewal periods of 3 years. Morris will pay a License Fee of $6,300 for the White Fawn site and $5,100 for the Peach Knob site, the first term with a 10.5% increase at each renewal thereafter. In addition to the License Fee, Morris will pay a Utility Fee of $150.00 per annum at each site.

The Notice of Intent to enter into License Agreements with Morris Communications was published on Friday, April 26, 2002, in the Asheville Citizen-Times. Ten days have passed since the publication and authorization to execute the License Agreement is being requested,

Planning Department staff recommends adoption of the resolution authorizing the City Manager to execute License Agreements with Morris Communications, Inc. for antennas at 36 Reservoir Road and Peach Knob Reservoir.

RESOLUTION BOOK NO. 27 – PAGE 154

D. ORDINANCE NO. 2915 - BUDGET AMENDMENT TO RECEIVE GRANT FUNDS FROM THE FEDERAL EMERGENCY MANAGEMENT AGENCY FOR A MOBILE SAFETY HOUSE

Summary: The consideration of a budget amendment, in the amount of $52,277, to receive grant money from the Federal Emergency Management Agency (FEMA) for a mobile safety house and associated equipment.

The City of Asheville Fire and Rescue Department requested $52,277 from FEMA for the purchase of a mobile safety house and associated equipment. Staff was successful in obtaining those funds and was awarded Federal grant EMW-2001-FG-06774. The grant provides 70% of the total project, with the remainder from Fire Department's operating budget.

The safety house is primarily designed to educate adults about fire safety and home safety. Part of the mobile house is also to educate the public about residential fire sprinkler systems.

City staff recommends City Council approve the budget amendment to receive grant money from FEMA.

E. RESOLUTION NO. 02-85 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A CONTRACT WITH CRISP HUGHES EVANS, LLP, CERTIFIED PUBLIC ACCOUNTANTS, FOR AUDITING SERVICES FOR FISCAL YEAR 2001-02

Summary: The consideration of a resolution authorizing the Mayor to execute a contract with Crisp Hughes Evans LLP, Certified Public Accountants, for auditing services for Fiscal Year 2001-2002.

N.C. General Statute sec. 159-34 requires that local governments of North Carolina have their accounts audited each fiscal year and submit a copy of the audit to the Local Government Commission.

In 1998 the City solicited proposals from 36 accounting firms to perform the City's annual audit. City Council selected Crisp Hughes Evans LLP to conduct the Fiscal Year 1997-98 audit and has re-engaged them annually through Fiscal Year 2000-2001. They completed all of those engagements in a satisfactory manner and have now submitted an engagement letter for the Fiscal Year 2001-2002 audit. The base fee has been proposed at $54,000 (this is the same fee as last year and $700 less than two years ago). Funds are appropriated in the budget of the Accounting Division of the Finance Department.

City staff recommends City Council adopt the resolution, which authorizes the Mayor to execute a contract with Crisp Hughes Evans LLP for auditing services for Fiscal Year 2001-2002.

RESOLUTION BOOK NO. 27 – PAGE 155

F. ORDINANCE NO. 2916 - BUDGET AMENDMENT FOR A GRANT FROM THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES TO IMPLEMENT THE MASTER STREET TREE PLAN, PHASE III

Summary: The consideration of a budget amendment, in the amount of $10,000, from a grant from the North Carolina Department of Environment and Natural Resources for implementation of the Master Street Tree Plan, Phase III.

The City of Asheville applied for funds in August 2001 for a grant from the North Carolina Department of Environment and Natural Resources, Division of Forest Resources in the Urban and Community Forestry Grants Program. The grant was recently awarded in the amount of $10,000 and designated for implementing the next phase of the Master Street Tree Program (MSTP) in the east area of Asheville.

The Parks and Recreation Department has completed the first two phases of the MSTP, and the Public Works Department will complete the remaining phases. Once complete, the MSTP will be an inventory of all the street trees on City right-of-ways located within the City limits of Asheville. The existing inventory is almost fifteen years old and does not accurately reflect the trees of the City. The next phase of the process will identify the location, size, condition, and site conditions of trees located in the east area of Asheville. The MSTP will serve as a critical link in developing a long term management plan for Asheville's urban trees, provide information for future tree planting and forestry planning, and provide educational and volunteer opportunities for community organizations.

The Parks and Recreation Department recommends City Council to approve the budget amendment in the amount of $10,000 to establish a budget for the next phase of the MSTP.

ORDINANCE BOOK NO. 19 – PAGE 471

G. ORDINANCE NO. 2917 - BUDGET AMENDMENT TO ACCEPT GRANT FUNDS FROM THE COMMUNITY SOLUTIONS FOR YOUTH EMPLOYMENT

Summary: The consideration of accepting a proposal by Community Solutions for Youth Employment to fund and manage the Youth Employment Program for the Summer of 2002, and approval of a budget amendment, in the amount of $37,400, to fund the program.

Community Solutions for Youth Employment (CSYE), part of a multi-agency support system for high risk youth ages 14 – 21 years of age, was informed of the City's inability to continue its youth employment program for 2002 due to budget constraints caused by State revenue shortfalls. CSYE is a program of Eliada Homes, Inc. CSYE, in cooperation with the Parks and Recreation Department, immediately began work to determine the best way to continue funding the youth employment program.

CSYE is proposing to fund summer jobs for 26 youth for eight weeks at 30 hours per week. In addition, CSYE agrees with the department that employment for these youth is only one part of the overall assistance that they need and therefore has agreed to manage the program for the Department at no additional cost. This management will include: recruitment of applicants, application activities, recruitment of employers in addition to the City of Asheville, interviewing activities, hiring, pre-employment training and orientation, job retention activities, mid-summer training, and volunteer placement for any additional youth needing experience but not included in the employment process. CSYE staff will provide weekly onsite contact with each youth employee to monitor their work and to supply support. CSYE will conduct an evaluation of the program. A special event at the end of the eight weeks is planned to celebrate the successful conclusion of the program.

The City of Asheville will accept a grant from the Community Solutions for Youth Employment for $37,400 to fund the cost of the program. The City of Asheville will use these funds to pay the wages and social security for each youth and provide pre-employment drug screening. Cost to the City will be the staff and time necessary to process payroll and to administer the drug screening program.

Traditionally, youth employed through this program have worked in a number of different City Departments including Parks and Recreation, Fire, Public Works and Human Resources.

The Parks and Recreation Department recommends that the City accept the proposal and grant funds from CSYE for the 2002 summer youth employment program and approve the budget amendment to fund the program.

H. RESOLUTION NO. 02-86 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR A FEDERAL GRANT FROM THE U.S. DEPT. OF JUSTICE TO FUND THREE NEW POLICE OFFICE POSITIONS

Summary: The consideration of a resolution authorizing the City Manager to apply for a federal grant from the U.S. Department of Justice to fund three police officer positions.

The City is eligible to receive a $225,000 grant form the U. S. Department of Justice, Office of Community Oriented Services, to fund three police officer positions for a period of three years. It is intended to assign three police officers to provide police services to the City's public housing communities. In consideration thereof, the Housing Authority of the City of Asheville has agreed to provide $107,736 for the required local cash match. No City funds are required for the match.

City staff recommends City Council authorize the City Manager to apply for and enter into an agreement with the U.S. Department of Justice to fund three police officer positions.

RESOLUTION BOOK NO. 27 – PAGE 156

I. RESOLUTION NO. 02-87 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT THE BID FROM MICHAEL FRISBEE TO PURCHASE 17 KENDALL STREET

Summary: The consideration of a resolution authorizing the Mayor to convey property at 17 Kendall Street in the West Asheville community to Michael Frisbee in the amount of $10,780.

The City originally received an offer to purchase 17 Kendall Street from Neighborhood Housing Services in the amount of $10,000. On April 9, 2002, the City Council directed the City Clerk to advertise for upset bids. The advertisement ran in the Asheville Citizen-Times on April 12, 2002, as provided in N. C. Gen. Stat. sec. 160A-269, and an upset bid was received by Michael Frisbee in the amount of $10,780. Another advertisement ran on April 26, 2002, and no upset bid was received. Therefore, the offer to purchase from Michael Frisbee in the amount of $10,780 was not upset and the sale to Michael Frisbee should be approved.

Community Development staff recommends adoption of the resolution authorizing the Mayor to convey the property at 17 Kendall Street to Michael Frisbee.

O. **RESOLUTION NO. 02-93 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE BELE CHERE FESTIVAL**

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the following events: 2002 Goombay Festival, 2002 Mountain Sports Festival, 2002 Greek Festival, Asheville Downtown Association's 2002 events and Bele Chere 2002.

ORDINANCE BOOK NO. 19 – PAGE 473

H. RESOLUTION NO. 02-86 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR A FEDERAL GRANT FROM THE U.S. DEPT. OF JUSTICE TO FUND THREE NEW POLICE OFFICE POSITIONS

Summary: The consideration of a resolution authorizing the City Manager to apply for a federal grant from the U.S. Department of Justice to fund three police officer positions.

The City is eligible to receive a $225,000 grant form the U. S. Department of Justice, Office of Community Oriented Services, to fund three police officer positions for a period of three years. It is intended to assign three police officers to provide police services to the City's public housing communities. In consideration thereof, the Housing Authority of the City of Asheville has agreed to provide $107,736 for the required local cash match. No City funds are required for the match.

City staff recommends City Council authorize the City Manager to apply for and enter into an agreement with the U.S. Department of Justice to fund three police officer positions.

RESOLUTION BOOK NO. 27 – PAGE 156

I. RESOLUTION NO. 02-87 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT THE BID FROM MICHAEL FRISBEE TO PURCHASE 17 KENDALL STREET

Summary: The consideration of a resolution authorizing the Mayor to convey property at 17 Kendall Street in the West Asheville community to Michael Frisbee in the amount of $10,780.

The City originally received an offer to purchase 17 Kendall Street from Neighborhood Housing Services in the amount of $10,000. On April 9, 2002, the City Council directed the City Clerk to advertise for upset bids. The advertisement ran in the Asheville Citizen-Times on April 12, 2002, as provided in N. C. Gen. Stat. sec. 160A-269, and an upset bid was received by Michael Frisbee in the amount of $10,780. Another advertisement ran on April 26, 2002, and no upset bid was received. Therefore, the offer to purchase from Michael Frisbee in the amount of $10,780 was not upset and the sale to Michael Frisbee should be approved.

Community Development staff recommends adoption of the resolution authorizing the Mayor to convey the property at 17 Kendall Street to Michael Frisbee.

N. RESOLUTION NO. 02-92 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE DOWNTOWN ASSOCIATION'S 2002 EVENTS

O. RESOLUTION NO. 02-93 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE BELE CHERE FESTIVAL

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the following events: 2002 Goombay Festival, 2002 Mountain Sports Festival, 2002 Greek Festival, Asheville Downtown Association's 2002 events and Bele Chere 2002.

The Asheville Goombay Festival is a unique celebration of African heritage and traditions. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held August 23-25, 2002. The 2002 Goombay Festival has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

The Asheville Greek Festival is a unique celebration of Greek heritage and traditions at City/County Plaza. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held September 27-29, 2002. The 2002 Greek Festival has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

The Asheville Mountain Sports Festival is a unique combination of competitions and demonstrations throughout Asheville. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held September 27-29, 2002. The 2002 Mountain Sports Festival has requested permission to allow possession and consumption of beer and wine during these events.

For many years, the Asheville Downtown Association has co-sponsored with the City of Asheville events to bring both the public and visitors to the downtown area. These events include: *Moonlight Over Downtown and four Downtown After Five activities.* The Asheville Downtown Association has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

For many years, the Bele Chere Board in cooperation with the Asheville Parks and Recreation Department has produced Bele Chere to bring both the public and visitors to the Downtown area. This year the request is being made for July 26-27, 2002. The Bele Chere Board and Asheville Parks and Recreation has requested permission to allow possession and consumption of beer and wine during this event as they have been allowed in the past.

The Asheville Parks and Recreation Department recommends approval of the resolutions to authorize the possession of malt beverages and/or unfortified wine for the above-mentioned events at specific locations and times noted in the resolutions.

Councilman Mumpower moved for the adoption of Resolution Nos. 02-89, 02-90, 02-91, 02-92, and 02-93. This motion was seconded by Councilman Dunn and carried on a 6-1 vote, with Vice-Mayor Bellamy voting "no."

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER REZONING OF 5 LOTS AT CLAYTON ROAD FROM RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO INSTITUTIONAL DISTRICT

ORDINANCE NO. 2918 - ORDINANCE TO REZONE 5 LOTS AT CLAYTON ROAD FROM RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO INSTITUTIONAL DISTRICT

Mayor Worley opened the public hearing at 5:30 p.m.

412

Urban Planner Carter Pettibone said that this is consideration of an ordinance to rezone 5 lots at Clayton Road from RS-2 Residential Single-Family Low Density District to Institutional District. This public hearing was advertised on May 3 and 10, 2002.

The project applicant, Biltmore Baptist Church, is requested the rezoning of approximately 61.97 acres (PIN Nos. 9634.08-89-1762, 9635.04-80-2415, 9635.04-81-4120, 9635.04-81-2207 and 9635.04-82-3111) to allow for future expansions and uses accessory to an existing place of worship. The RS-2 district does allow for Places of Worship as a use by right subject to special requirements. The Institutional District allows for a place of worship as a permitted use.

The properties are located in the City's extraterritorial jurisdiction (ETJ) near the intersection of Interstate-26 and Longs Shoals Road. Development in the area is sparse with the Coke-a-Cola distribution center located across the street to the southwest, a residential subdivision adjacent to the west side of the properties, and the French Broad River and vacant land surrounding the remainder of the site. The place of worship has been in existence for a number years and a master plan for the properties had been developed prior to its incorporation into the ETJ. The design of the master plan, which clearly defines future expansions for the place of worship and its accessory uses, is not consistent with the development standards of the RS-2 zoning district and/or the special requirements of Article 16 of the UDO (uses by right subject to special conditions). However, the master plan is consistent with the Institutional District requirements. It is the opinion of the Planning and Development Department that at the time the properties were incorporated into the ETJ, they should have rightfully been zoned Institutional to allow for the continued development of the master plan. In addition, it would cause a considerable hardship to require future development on the properties to meet the RS-2 district standards and special requirements of Article 16.

The Planning and Zoning Commission voted unanimously to recommend approval of the rezoning of the properties located at 35 Clayton Road from RS-2 to Institutional. The Planning and Development staff also recommends approval of the requested rezoning.

Mr. James Jones, representing Lampley and Associates, spoke in support of the rezoning so the Church can continue with their Master Plan.

Mayor Worley closed the public hearing at 5:35 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Bellamy moved for the adoption of Ordinance No. 2918. This motion was seconded by Councilman Peterson and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 475

B. PUBLIC HEARING TO CONSIDER REZONING 775 HAYWOOD ROAD FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO CENTRAL BUSINESS DISTRICT

ORDINANCE NO. 2919 - ORDINANCE TO REZONE 775 HAYWOOD ROAD FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO CENTRAL BUSINESS DISTRICT

Mayor Worley opened the public hearing at 5:36 p.m.

Urban Planner Carter Pettibone said that this is consideration of an ordinance to rezone 775 Haywood Road from RM-8 Residential Multi-Family Medium Density District to Central Business District. This public hearing was advertised on May 3 and 10, 2002.

The applicant, West Asheville Development LLC, has requested the rezoning of approximately 0.21 acres (PIN No. 9638.13-14-5875) to allow for further development of the area at the corner or Haywood Road and Herron Avenue. The purpose of the Central Business District is to encourage a strong supportive retail center along with high-density residential development, which will complement surrounding neighborhoods.

The existing land uses in the area include single and multi-family residences to the north and east and retail and planned mixed-use development to the south and west that are part of the Bledsoe Building renovation project. The site's frontage is on Herron Avenue, but since the parcel will be part of the mixed-use development to the south it will be able to take advantage of the driveway accesses to Haywood and Herron that currently exist and are used by the Bledsoe Building.

In consideration of the adjoining zoning and land uses in the area to the south and west of the site and the project site's proximity to the Haywood Road thoroughfare, the proposed zoning change appears to be consistent with the intent and purpose of the Unified Development Ordinance (UDO). The proposed rezoning is also in keeping with the intent of the Haywood Road Corridor Plan, which was approved in 1999 to serve as a guide for future development along Haywood Road in the West Asheville neighborhood. Two of the goals as specified in Plan are to enhance the existing balanced mix of uses on Haywood Road through commercial, institutional, open space, and small parks and to encourage new development that serves adjacent neighborhoods and helps create an economically vibrant pedestrian environment. The plan identifies this parcel as one of the properties included in the Haywood Road Corridor Study Area and rezoning it to CBD would help fulfill these goals.

In addition, the properties to the south that are zoned CBD contain mixed use buildings with associated parking areas with no buffering to the residentially-zoned properties to the north and east since they existed prior to the current UDO's planting and buffering requirements. Any uses developed on this property subsequent to a rezoning would necessitate appropriate buffering, street trees and/or parking screening to the adjacent residential properties.

The Planning and Zoning Commission voted unanimously to recommend approval of the rezoning of the property located at the northwest corner of Haywood Road and Herron Avenue from RS-8 to CBD. The Planning and Development staff also recommends approval of the requested rezoning.

Mr. David Ramsey, resident on Mildred Avenue and Project Manager of the Bledsoe Building, spoke in support of the rezoning for future development.

Vice-Mayor Bellamy said she attended an affordable housing forum recently and it was noted that the City has been rezoning multi-family residential land. She hoped the City would do a better job of keeping multi-family sites in the City and perhaps even rezone more for multi-family development.

Mayor Worley closed the public hearing at 5:42 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Peterson moved for the adoption of Ordinance No. 2919. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 477

C. PUBLIC HEARING RELATIVE TO CONSIDER A LEVEL III CONDITIONAL USE PERMIT FOR PROPERTY LOCATED ON RIVER HILLS ROAD OFF OF SOUTH TUNNEL ROAD KNOW AS DREAMLAND DEVELOPMENT (TARGET RETAIL STORE)

ORDINANCE NO. 2920 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED ON RIVER HILLS ROAD OFF OF SOUTH TUNNEL ROAD KNOW AS DREAMLAND DEVELOPMENT (TARGET RETAIL STORE)

City Attorney Oast reviewed with Council the conditional use permit process by stating that City Council will first hear from staff that will describe the proposal and provide some background information. Then the applicant may make a presentation and then comments from the public will be taken. He said that there would be an opportunity for questions and rebuttal comments, as necessary. Following the hearing, Council will then debate the proposal and will take action on the request.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

Mayor Worley said that at this public hearing Council will be discussing the issuance of a conditional use permit for a large national chain. Our review of this request is limited to issues that directly affect the City of Asheville and its public services and infrastructure. Many citizens may have strong feelings about corporate hiring and purchasing practices, wage structure for employees, compensation of executives, corporate public involvement in the community, effect on other businesses, and similar issues. Those views may be favorable to the applicant or unfavorable. While this Council respects these views and concerns, they are not relevant to our decision about the issuance of the conditional use permit, and we may not legally consider them in our deliberations. Because they are not relevant, their discussion will serve no purpose other than to distract our attention away from the many complex issues we are changed with addressing, as well as needlessly prolonging the meeting. Consequently, he asked that members of the audience not include these statements in comments. In addition, he asked that members of the audience not repeat comments already made as unnecessary redundancy can needlessly prolong a hearing and likewise distract Council from the issues that they must consider.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:43 p.m.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Mr. Gerald Green, Chief Planner, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Green said that this is the consideration of a conditional use permit for to construct a 125,400 square foot Target store in the River Hills Shopping Center, located at the intersection of Tunnel Road/Wood Avenue and Swannanoa River Road.

On March 29, 2002, Collett and Associates submitted development plans for Level III site plan review. The project is a new 125,400 square foot Target store with 627 parking spaces to be located in the River Hills Shopping Center. The 19.2 acre project site is zoned Commercial Industrial (Location Map – Attached to City Exhibit 3). There will be three points of access to the site; two primary points of access will be from River Hills Road and a secondary access will be from McArthur Lane. An outparcel of 0.8 acres will not be developed at this time. The Technical Review Committee (TRC) reviewed the plans at their April 15, 2002, meeting and recommended approval with conditions. Most of the TRC's comments were addressed in revised plans submitted April 25, 2002. The Planning and Zoning Commission at their May 1, 2002, meeting reviewed the revised plans. The Commission recommended approval of the plans with conditions.

Level III projects are conditional uses within the Commercial Industrial District. Conditional uses are uses, which because of their unique characteristics or potential impacts on the surrounding neighborhood and/or city as a whole require individual consideration of their location, design, configuration, and/or operation at the location proposed. In addition the project must meet the supplemental development standards for large retail structures due to its size. The applicant has met the necessary development standards as outlined in the supplemental development standards for large retail buildings. The building will be finished with split face concrete block with accent bands of smooth face block. The façade also incorporates arcades, display windows, and several distinct massing elements as well as articulation of the façade and of the roof. The parking area will be heavily landscaped with a buffer and interior planting islands.

The project site is located in an area dominated with commercial land uses and mixed with single-family residential, multi-family residential, and industrial type land uses. The project site sits at a higher elevation than most of the surrounding properties. The project site is highly visible from almost every direction, especially in the area of the Asheville Mall, Swannanoa River Road and Interstate-240.

The project plan proposes two accesses on River Hills Road and a third access on McArthur Lane (Site Plan – Attached to City Exhibit 3). River Hills Drive connects to Wood Avenue, which connects to South Tunnel Road and Swannanoa River Road. The closest interstate interchange is approximately one (1) mile away on Tunnel Road. McArthur Lane connects to Glendale Avenue, which connects to Swannanoa River Road. The building is situated towards the rear of the site with the majority of the parking in front. The project proposes 627 parking spaces at a ratio of five (5) spaces per 1,000 square feet of gross floor area. The UDO allows for a minimum of one (1) space per 350 square feet and a maximum of one (1) space per 200 square feet or five (5) per 1,000 square feet.

The building will be single story at a height of 28 feet not including the decorative parapet (Building Design – Attached to City Exhibit 3). At the highest point, the building will be 36 feet in height. The Commercial Industrial district allows for a maximum height of eighty (80) feet. The face and rear of the building is approximately 393 feet in length and the sides are approximately 269 feet in length. The building will have a single entrance located to the left side of the building face and the site plan depicts a sidewalk along the length of the face of the building. The rear of the building has an area for loading, deliveries, and a compactor. The building will be constructed

416

of split-face concrete masonry units (CMU) with five cream-colored smooth face CMU accent bands. The developer has submitted revised drawings (City Exhibit 4).

The plan depicts three attached signs; two of which are the "Target with bulls-eye" signs measuring approximately 181 square feet, one located on the front face of the building and one on the right side of the building. The remaining sign, approximately 72 square feet, is located on the front of the building (right side) and reads "PHARMACY." The total square footage of all attached is approximately 434 square feet. This attached signage is not out of scale with the building and seems appropriate in meeting the needs of building identification given its size and location. The plan does not depict a freestanding sign anywhere on the site, however, the applicant has requested an 80 square foot sign to be located off the site along River Hills Drive to orient customers to the site. The size of this sign appears excessive since its purpose is primarily to orient persons already on River Hills Drive to the Target store; it is essentially a directional sign. Variances or other adjustments permitted in our code will be required to address these signage issues.

The UDO requires 100 square feet of open space for every 1,000 square feet of gross floor area. The plan depicts the required 12,540 square feet of open space.

Per the Supplemental Design Standards for Large Retail Structures, the project must provide a 50-foot buffer, which incorporates 150% of the plantings called for in a "D" buffer. The buffer shall apply to the entire frontage along River Hills Road, Springvale Avenue, and the south corner of the site.

The UDO requires that new commercial developments provide one large maturing tree (over 35 feet in height at maturity) for every 40 linear feet of property abutting a street, or one small-maturing tree (less then 35 feet in height at maturity) for every 30 linear feet of property abutting a street.

UDO requires sidewalk installation along the frontage of all adjacent public streets. The applicant may pay a fee in lieu of sidewalk installation, provided that the applicant makes a written request to the City Engineer.

In addition to the development standards for the zoning district in which they are located, conditional uses must meet certain general conditions in order to ensure that the use is appropriate at a particular location and to ensure protection of the public health, safety, and welfare. The general conditions, which apply to all conditional uses, can be found in Section 7-16-2(c) of the UDO. City Council must make seven (7) findings based on the evidence and testimony received at the public hearing or otherwise appearing in the record of the case. The findings are listed below. Following each finding is technical information from staff to assist Council in making these findings. The City Council shall not approve the conditional use application and site plan unless and until it makes the following findings, based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case:

1. **The proposed use or development of the land will not materially endanger the public health or safety.** The proposed use will not materially endanger public health and safety since it has multiple access points, is served by a public street and is located in an area of similar uses.

2. **The proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** The proposed use constitutes the redevelopment of previously developed land and its development will not result in excessive grading or other

alteration of the natural landscape. If developed according to the plan, it will increase the extent of trees and shrubs on the site above current conditions.

3. **The proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** The proposed use is located in an area of similar uses and will be buffered from adjoining residential uses in accordance with the supplemental landscaping standards for large retail uses. Site lighting and building design will be in accordance with the supplemental standards as well.

4. **The proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** The proposed use is located in an area of similar uses and will be appropriately buffered from adjoining uses of lesser intensity.

5. **The proposed use or development of the land will generally conform with the comprehensive plan, smart growth policies, sustainable economic development strategic plan, and other official plans adopted by the city.** The proposed use is consistent with both the current zoning of the property and the designation of the property in the comprehensive plan.

6. **The proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** If developed in accordance with the conditions proposed by staff, there will be no undue public service impacts. The project has been reviewed by TRC, which found that services and facilities are available to meet the needs of the proposed development.

7. **The proposed use will not cause undue traffic congestion or create a traffic hazard.** The applicant has submitted a traffic impact analysis for the site that has been found to be generally acceptable by staff. If developed in accordance with the conditions proposed by staff, there will be no undue impact on the traffic circumstances in the surrounding area. Offsite improvements to the access from McArthur Lane and the intersection of River Hills Drive and the access point to the Dick's, Office Max and Circuit City development, in addition to the provision of a transit stop/shelter, will address the traffic impacts of the project.

The Planning and Zoning Commission reviewed the plans for the Dreamland Development (Target) at their May 1, 2002, meeting and recommended approval of the project subject to conditions (please note that the developer is working to address the conditions identified by the Planning and Zoning Commission; some of these issues may be addressed prior to City Council review). The staff of the Planning and Development Department concurs with this recommendation. The proposed conditions are:

The project applicant shall:

1. Provide lighting plan detail for parking and sidewalk areas. The light fixtures must be cut-off type and the height of the lighting standards shall not exceed 30 feet.
2. Provide signage package for the proposed development that meets the store's need for signage while minimizing the need for variances from the signage requirements set forth in Article 13 of the UDO.
3. The applicant shall install a type "B" buffer along the southwest side of Springvale Avenue, the northwest side of Dogwood Lane, and the northeast side of Glendale Avenue in the area of the stormwater facility.
4. The calculations for the parking lot landscaping require adjustment. The landscaping must meet the requirements set forth in the supplemental standards

for large retail structures, resulting in a need for additional parking lot landscaping.

5. No parking will be permitted in front of the building to be constructed on the outparcel at the time of Outparcel 1 development.
6. No curb-cuts on River Hills Road will be approved for Outparcel 1.
7. Work with Planning and Development staff to investigate the feasibility of providing pedestrian access to the Carmike Theater site and the Michael's/Goody's site.
8. Provide pedestrian connection from primary site to Springvale Avenue.
9. Provide a buffered sidewalk in the western portion of the parking lot to provide a safe pedestrian passage through the parking area.
10. Work with staff to investigate the feasibility of a pedestrian connection with the Glendale neighborhood.
11. Install street trees along River Hills Road.
12. Work with the Transit Director to locate a transit stop and shelter on the site or, alternately, at the Transit Director's discretion, in the immediate vicinity of the site in order to provide convenient transit access to the proposed development. The transit stop/shelter shall be located within easy walking distance of the store entrance and not on the periphery of the site.
13. Implement traffic improvements recommended by the traffic impact analysis (TIA).
14. Address concerns raised by the Engineering Department about the intersection of River Hills Drive and the Dick's/Office Max/Circuit City driveway resulting from traffic generation by the proposed development. This condition may require a reconfiguration of the intersection as a roundabout or signalization of the intersection.
15. Address concerns raised by residents and the Engineering Department concerning access from McArthur Lane by installing a right-turn out only traffic directional island and appropriate signage.
16. In addition to the display windows added to the front façade, add additional display windows that are either internally accessed or externally accessed (such as those provided for movie theaters) in order to improve the extent of the "window" areas along the façade frontage so as to provide pedestrian interest and to create the appearance of a continuous line of windows. Displays provided in these "windows" shall not be considered signage.
17. Address all stormwater requirements of the Engineering Department.

Mr. Green said that City staff has been working with the developer and reviewed with Council the following set of revised conditions (City Exhibit 5):

1. Provide lighting plan detail for parking and sidewalk areas. The light fixtures must be cut-off type and the height of the lighting standards shall not exceed 30 feet. – The applicant has provided City staff with an elevation of the lighting fixtures that meets this standard and they have assured the City that there will be cut-off fixtures.
2. Provide signage package for the proposed development that meets the store's need for signage while minimizing the need for variances from the signage requirements set forth in Article 13 of the UDO. – The applicant has provided City staff with a signage package that is acceptable and seems reasonable in light of the size of the development. City staff will be working with the developer to obtain the necessary variances and adjustments to permit that signage package.

3. The applicant shall install a type "B" buffer along the southwest side of Springvale Avenue, the northwest side of Dogwood Lane, and the northeast side of Glendale Avenue in the area of the stormwater facility.
4. The calculations for the parking lot landscaping require adjustment. The landscaping must meet the requirements set forth in the supplemental standards for large retail structures, resulting in a need for additional parking lot landscaping.
5. No parking will be permitted in front of the building to be constructed on the outparcel at the time of Outparcel 1 development.
6. No curb-cuts on River Hills Road will be approved for Outparcel 1.
7. Work with Planning and Development staff to investigate the feasibility of providing pedestrian access to the Carmike Theater site and the Michael's/Goody's site. – The developer does not have any interest in either of these projects and City staff has agreed to make contact with the owners and developers of those two sites to try to work out some type of pedestrian access.
8. Provide pedestrian connection from primary site to Springvale Avenue.
9. Provide a buffered sidewalk in the western portion of the parking lot to provide a safe pedestrian passage through the parking area.
10. Work with staff to investigate the feasibility of a pedestrian connection with the Glendale neighborhood.
11. Install street trees along River Hills Road.
12. Prior to the issuance of a building permit, the developer shall identify a design and location for a transit shelter and bus loading area acceptable to the City of Asheville Transit Director. The transit shelter and bus loading area shall be constructed by the developer at this location according to the approved design prior to the issuance of a certificate of compliance for the building, except as follows: In the event that transit service is not ready to be provided to the development at this time of the issuance of the certificate of compliance, the developer shall construct the bus loading area and escrow sufficient funds for the construction of the transit shelter at a later date, the amount of such escrow to be determined by the Transit Director. – This revised condition has been provided to the developer and they are in agreement with it.
13. Implement traffic improvements recommended by the traffic impact analysis (TIA).
14. Address concerns raised by the Engineering Department about the intersection of River Hills Drive and the Dick's/Office Max/Circuit City driveway resulting from traffic generation by the proposed development. This condition may require a reconfiguration of the intersection as a roundabout or signalization of the intersection.
15. Address concerns raised by residents and the Engineering Department concerning access from McArthur Lane by installing a right-turn out only traffic directional island and appropriate signage.
16. Address all stormwater requirements of the Engineering Department.

Upon inquiry of Councilman Ellis, Mr. Green said that the responsibility of development and implementation of any reconfiguration of the intersection of River Hills Drive and the Dick's/Office Max/Circuit City driveway will have to be borne by the developer and approved by City staff.

Mr. Green and Target development staff responded to various questions from Council, some being, but are not limited to: where will sidewalks be installed, where are the residential homes in the area, what will the signage package include, what are the requirements about lights not trespassing onto residential properties, what are some of the details of a Traffic Impact Analysis, potential to use pervious pavement on the project, what was on the property prior to the flea market, and what are the elevation differences of the development compared to those buildings around it.

Upon inquiry of Councilwoman Jones, Mr. Green said that after a Traffic Impact Analysis (TIA) is completed, it is then submitted to the City for review by the City's Traffic Engineer and, in this case, by a consultant retained by the City. The City and the consultant review every aspect of the TIA to make sure the data is correct, the traffic counts are done at the correct time, etc. In this project, there was an initial review of the TIA and City staff gave comments back to the engineer who prepared the TIA. They then provided revised information.

Mr. Dan Baechtold, representing the City's Engineering Department, noted that TIA's have to follow national engineering standards and professional engineers prepare them. He felt that we generally see TIA's predict the impacts pretty accurately.

Mr. Bob Stultz, Partner in Collett and Associates, spoke in support of the development, which will be a Target retail store to be located on a 19-acre site, which is primarily industrial and commercial in nature. They have received a wastewater allocation from the Metropolitan Sewerage District, a conditional approval for a water allocation from Water Resources Department and Carolina Power & Light Company has advised them that there is sufficient power at that location to support the proposed development. The TIA has been completed and reviewed by the City and the N. C. Dept. of Transportation. They have agreed to implement the recommendations in the TIA, which will keep all roadways affected by the project at acceptable levels of service. According to the current project schedule they anticipate commencement of construction in the fourth quarter of 2002, with a fall 2003 store opening. They look forward to being a part of the Asheville community.

Councilman Peterson was concerned about the access onto McArthur Lane and felt it may open the door for increase traffic in the residential area. Mr. Stultz responded in that in their initial design, they did not have a rear access. However, it was included, as a recommendation by City staff, for safety reasons, e.g. it will allow emergency vehicles access if River Hills Road is blocked. They will work with City staff to restrict left-turn access back onto Glendale off of McArthur Lane to prohibit traffic leaving the Target store going through the Oakley neighborhood. He said they would not put any signage on Glendale to encourage people to go into Target from the rear, noting that they even intend to have deliveries through the front entrance.

Upon inquiry of Councilman Mumpower, Mr. Stultz said that the cost to implement the recommendations of the TIA will be approximately $129,000 and is similar to what they experience in other locations. He said that they have been working with City staff for approximately 4 months; however, he was pleased to note that the formal process has taken only 6 weeks.

Ms. Debra Houser, President of the Oakley Community Association, said they are deeply concerned about the traffic impact. Even though this is not the largest development proposed to be built in this area, the City need to look at the cumulative effect of traffic. Her main area of concern is Fairview Road. The N.C. Dept. of Transportation website shows that currently there 19,000 vehicles a day that go through the intersection of Cedar Avenue and Wood Avenue onto Fairview Road. Also, there are 19,000 vehicles a day that drive on Fairview Road going to the intersection of Swannanoa River Road. The Oakley community has initiated traffic calming efforts on Fairview Road and Fairview Avenue because the traffic now is unacceptable. Out of 462 children in Oakley School, only five families allow their children to walk home because of traffic concerns. She said that the Fire Department and Police Department vehicles are unable to get through the area in emergencies because of traffic gridlock. She noted that all these streets are two lanes and no one has mentioned about widening them to accommodate the traffic. They

421

requested the City to use more forethought. She stressed the cumulative effect of the traffic will lead to a dangerous situation.

Ms. Rebecca Campbell, west Asheville resident, felt the City needed to do holistic planning. She presented City Council with information from the N.C. Dept. of Transportation for the year 2000 of average traffic counts in the East Asheville/Oakley community (Neighborhood Exhibit 1).

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 6:48 p.m.

Upon inquiry of Councilman Peterson about traffic calming measures in the Oakley community, City Engineer Cathy Ball said that there have been some efforts for traffic calming. In 2000, Wood Avenue was selected as a traffic calming project but the City could not get the community support to move forward on that project. Our policy requires that we receive 40% of people affected to sign stating that they are willing to support some type of traffic calming, before the City spends time in doing the design. We were unable to get the 40% of signatures in the project area. In 2001, Fairview Avenue was selected as a traffic calming project and once again they were unable to get enough signatures to move forward on the project. City staff has looked at Fairview Road, particularly in the school area. And, about two years ago. the City had an opportunity to purchase the house at the intersection of Cedar and Fairview in hopes of realigning the intersection at Liberty/Cedar/Fairview. About four years ago some plans were done to improve that intersection but we weren't able to implement them because of needing some property. That is an unfunded capital project we have on this year's Transportation Program. We have tried to comprehensively look at the Fairview Road as a whole.

Councilman Peterson said that if the City approves this project we are providing some benefits to the businesses and people who live in the larger community in and outside of Asheville, but the people in Oakley are bearing part of the brunt of that. He felt the City has a responsibility to direct staff to go back and try to look at the Fairview/Cedar/Liberty intersection for some traffic calming measures and to make improvements.

Councilman Mumpower moved to adopted Ordinance No. 2920 granting a conditional use permit for a proposed development known as Dreamland Development (Target Retail Store), located at the intersection of Tunnel Road/Wood Avenue and Swannanoa River Road, subject to the revised 16 conditions outlined above. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 479

Vice-Mayor Bellamy said that the people at the affordable housing forum said that our development process is not working, however, Target representatives have said that their experience with the City has been very positive and streamlined. As a result of those comments, she hoped that the City could repeat the positive process more often.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

VI. OTHER BUSINESS:

Transit System

Councilwoman Jones invited the Council and public to a meeting co-sponsored by the City on Friday, May 17, 2002, at the Civic Center from 10:30 a.m. – 4:00 p.m. The meeting is to talk about improving our transit system. A person from Boulder, Colorado, will be in attendance to talk about some innovative things their City has been doing and how it can be applied in Asheville.

Claims

The following claims were received by the City of Asheville during the period of April 12-25, 2002: Cynthia Burris (Streets), Kelly Fielden (Police), Brian Delmas (Streets), Ronald Sebilo-Tibbets (Fire), Donna Fender (Streets), Sherwin Pevaroff (Water) and Kim MacQueen (Fire).

The following claims were received during the period of April 26-May 2, 2002: BellSouth (Water), Michael Keating (Water), Timothy J. Rabb (Water), Denise Vanselow (Streets) and Charlene Lamb (Streets).

These claims have been referred to Asheville Claims Corporation for investigation.

Lawsuits

The City filed a Complaint, motion for preliminary injunction and motion for temporary restraining order on April 23, 2002, against Jemini Inc., d/b/a Patton Avenue Pub, Mitch Fouts and James Medford. The nature of the proceeding was a complaint for a permanent injunction prohibiting defendants from holding a concert in the parking lot of the Patton Avenue Pub; directing defendants to hold the event inside the Pub; and for a temporary restraining order. This matter was handled in-house.

The City was served with a Complaint on April 22, 2002, as follows: Connie Jones v. City of Asheville. The nature of the proceeding is an EEOC charge of racial discrimination. This matter will be handled in-house.

The City was served with a Complaint on April 19, 2002, as follows: Monique and Mike Usher v. Transit Authority, et al. The nature of the proceeding is a complaint for personal injury as a result of traffic accident involving a bus. An attorney outside the City Attorney's Office will handle this matter.

The City was served with a Petition for a Contested Case Hearing on May 6, 2002, as follows: Christopher L. Baker v. City of Asheville. The nature of the proceeding is money owed for water bills, pursuant to the Setoff Debt Collection Act. This matter will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Comments by Fred English

Mr. Fred English spoke about several items, in particular he was opposed to the City raising property taxes and felt the City should not annex more people until they take care of the current City residents.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:07 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – May 21, 2002 - 3:00 p.m.

Worksession

Present: Vice-Mayor Terry M. Bellamy, Presiding; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Mayor Charles R. Worley

CONSENT:

Setting a Public Hearing on May 28, 2002, to Designate the South Asheville Cemetery on Dalton Street as a Local Historic Landmark

Legislative Request for 2002 Short Session

Summary: The consideration of a request for legislation to reduce the terms of Housing Authority members.

At Council's retreat in February, there was some discussion regarding reducing the lengths of terms for Housing Authority members from five years to three years. Vice Mayor Bellamy initiated this discussion, and there was general support for the proposal.

The terms of Housing Authority members are established by statute, N.C.G.S. 157-5(d), as five years. Therefore, in order to obtain a reduction in the length of the term, an amendment to the law is required, and only the N.C. General Assembly can do it. The City of Charlotte has already done this in 1990.

The local bill submission deadline for this year's short session of the General Assembly is June 5. Therefore, in order for this request to be transmitted to our delegation and a bill to be introduced, Council action is required before then, and should probably occur on May 28. For short session consideration, local bills must be non-controversial.

Vice-Mayor Bellamy asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

METROPOLITAN SEWERAGE DISTRICT UPDATE

Mr. Tom Hartye, General Manager of the Metropolitan Sewerage District (MSD) updated City Council on MSD in general. He explained the make-up of the MSD 11-member Board and explained the treatment plant and it's activities.

He gave a brief history of the collection system: (1) prior to 1990 the District was comprised of the Treatment Plant and less than 100 miles of interceptors; (2) in 1990 the District became the proud owner of an additional 750 miles of small collection lines most of them aged and failing structurally and a good portion of them undersized; (3) these lines were mostly run in the 1920's and not a lot of maintenance was performed on them; and (4) the District's in-house design and construction division has "cranked-up" and is rehabbing or replacing an average of 50,000 LF/year.

Mr. Hartye said that residential/commercial users make up 9 million gallons per day; industrial users make up 3 million gallons per day; and ground water (infiltration)/rain water (inflow) make up 8 million gallons per day. The said that the Treatment Plan can handle up to 40 million gallons per day.

Mr. Hartye explained the major sanitary sewer overflow (SSO) problems come from major defects, roots and grease and RDI/I. Preventive maintenance efforts include a grease program, preventive maintenance contract, technical services, mapping, and right-of-way maintenance.

He reviewed the Council the capital improvement plan for the next six years (until Fiscal Year 2006): interceptors rehabilitation ($31.4 million); collection rehabilitation ($36.8 million); reimbursements ($4.5 million); plant/pump station/general ($10.6 million); and Master Plan Wet Weather ($8.5 million) – totaling $91.8 million.

Mr. Hartye explained that since the consolidation of 15 different collections systems in 1990, there has been a total of $66 million of sewer line rehabilitated or replaced and they currently serve 130,000 customers.

Comprehensive issues include future in-fill growth; potential new service area(s) assessment; Buncombe County Land Use Plan; and other jurisdictional planning documents.

Mr. Hartye explained that revenue for Fiscal Year 2003 is anticipated to be $17.3 million from domestic sewer fees; $2.8 million from industrial sewer fees; $900,000 from facility and tap fees; $991,000 from interest income and other; and $10.7 million from grants and bonds. Expenses are anticipated to be $10.7 for operations and maintenance; $16.4 for capital improvement plan; and $5.5 for debt payments.

Mr. Hartye and Mr. Brady Blackburn, Chair of the MSD Board, answered various questions from Council, some being, but are not limited to: MSD's extension policy; what is MSD doing for affordable housing; how can MSD work with the City and Chamber of Commerce regarding economic development; how can the City work closer to MSD in planning our growth; and does MSD have any cost-containment efforts.

City Manager Westbrook said that about 3-4 years ago he sent MSD a list of homes in the City that did not have sewer. Mr. Hartye was unaware of that list and asked City Manager Westbrook to send him a copy to review.

On behalf of City Council, Vice-Mayor Bellamy thanked Mr. Blackburn and Mr. Hartye for their informative update.

VETERANS MEMORIAL AT CITY/COUNTY PLAZA

Ms. Carol King, Chair of the Pack Place Conservancy, updated City Council on the different phases and designs for the Pack Square and City/County Plaza areas. She stressed that a place has been set aside for a veterans' memorial at City/County Plaza. The timeline for construction to begin is late 2003 with an anticipated finish date of July 4, 2005.

Regarding the veterans' memorial, Ms. King said that earlier Mr. Richard Griffin, representing a group requesting a veterans' memorial, had approached her with a petition for a memorial and she advised him that a place has been set aside for the memorial, but they would have to raise money to pay for the construction of it. She suggested Mr. Griffin contact all the veteran organizations in the City and County to see how much they would be willing to contribute. She said that other groups have requested items to be constructed and they are raising their own money.

Ms. King noted that the Public Art Board has been working with the Pack Square Conservancy through the entire design of the project and Mr. Griffin will need to contact them regarding the design of the memorial.

Upon inquiry of Councilman Dunn, Ms. King said that there is a lot of support for this project and fund-raising will encompass a combination of governmental, not-for-profits, for-profits, individuals, grants, organizations, etc.

Councilman Ellis moved to allow Mr. Griffin and his group supporting the veterans' memorial time within which to speak at this worksession. This motion was seconded by Councilman Dunn and carried unanimously.

Mr. Tuck Gudger, representing the group requesting a veterans' memorial, was pleased that a prominent place and adequate room has been set aside in the design for a veterans' memorial. He then asked City Council to contribute $50,000 towards the $100,000 total design cost. He noted that they have also requested $50,000 from Buncombe County. He said that they would work through the Pack Square Conservancy to raise the money.

When Mr. Gudger asked how much space would be set aside, Ms. King suggested that Mr. Gudger and Mr. Griffin meet with the architects to discuss the specifics.

Mr. Griffin said that his group is not a 501 (c) (3) organization and they have no ability to raise charitable contributions. In addition, he felt it was awkward to impose their group to raise funds for the memorial. He said they would work with the Pack Square Conservancy to raise funds, but believed the City and the County should fund the veterans' memorial,

Councilman Mumpower said that City Council does endorse the concept and felt that all of Council was pleased that adequate space has been set aside for a veterans' memorial. However, a request has been made for the City and County to contribute $50,000 each to construct the memorial. He did not want to create any illusions that the City would be able to monetarily contribute to the construction.

Councilwoman Jones felt it was premature to make any commitments since there are so many unknowns the City is dealing with now. She advised Ms. King that in researching for grants, if they find one that would fit for a veterans' memorial that may require a match, to advise City Council.

City Manager Westbrook said that the City would be participating in the project through infrastructure work. Even though it is not a direct contribution to the veterans' memorial, the infrastructure is needed to complete the entire project. He asked Ms. King to let the City know as soon as possible the results of the feasibility study so the City may begin to fund their responsibilities.

Vice-Mayor Bellamy thanked Ms. King for her presentation and hoped to hear from the Pack Square Conservancy again on another update.

CONTRACT FOR TRANSIT MANAGEMENT SERVICES

Transit Services Director Bruce Black said that this is the consideration of a resolution authorizing the City Manager to sign a contract for the provision of transit operations management services to the City of Asheville.

Because of a conflict between state and federal law, the City is required to hire an operations management company who in turn will employ the drivers, mechanics, supervisors, and other personnel necessary for the operation of the transit service. The current contract will expire on June 30, 2002. The Transit Services Department issued a Request for Proposals for the operations management of the transit system beginning July 1, 2002. This is a three-year contract, with two one-year renewal options.

Five management companies respond. Of those five, three were interviewed by a committee consisting of the Chair of the Transit Commission, representatives from the Finance Department and Risk Management Division, the Transit Planner, and the Director of Transit Services.

The committee awarded the top scoring firm, Professional Transit Management (PTM), from Cincinnati, Ohio, 343 points out of 400 possible (85%). The other two management companies interviewed were MV Transportation, from Fairfield, California, which received 295 points (74%); and CCL Management, from Jacksonville, Florida, which received 242 points (61%).

The fees proposed in the PTM proposal have been negotiated to be sure that the City has their best offer. The total contract fee cost for the first three years is $395,595, the two remaining one year option fee costs being $131,424 for the forth year, and $136,068 for the fifth year.

The second choice, MV Transportation, fees pre-negotiation are very similar. If the proposed contract is not acceptable to PTM, discussions will begin with MV Transportation.

City staff recommends the City Council authorize the City Manager to sign the transit operations management agreement with either Professional Transit Management or MV Transportation.

Vice-Mayor Bellamy asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

BOARDS AND COMMISSIONS

It was the consensus of City Council to instruct City Clerk Burleson to prepare the proper paperwork to reappoint Ms. Sophie Dixon to the Civil Service Board to serve an additional two-year term.

It was the consensus of City Council to readvertise for a vacancy on the Public Art Board, as the Board's request.

OTHER BUSINESS

It was the consensus of City Council to hold a budget worksession (after the regular worksession) on Tuesday, June 4, 2002. In addition, it was the consensus of City Council to hold a special meeting on Thursday, June 27, 2002, at 3:00 p.m. in the Council Chamber of the City Hall Building, to consider adoption of the Fiscal Year 2002-03 Annual Operating Budget.

Discussion surrounded an upcoming visit to our local delegation regarding the Governor withholding monies generated in Asheville for Asheville. Councilman Mumpower has arranged the meeting on Wednesday, May 29, 2002, and discussion was held on how the City could raise public awareness by possibly soliciting letters from those affected that could be hand delivered to our delegates. After discussion, it was the consensus of City Council to not solicit letters from

427

those affected at this time, but to meet with our legislators and ask them what they need from us. In addition, it was the consensus of Council to add this topic to the next formal meeting agenda.

ADJOURNMENT:

Vice-Mayor Bellamy adjourned the meeting at 5:30 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – May 28, 2002 - 5:00 p.m.

Regular Meeting

Present:	Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson
Absent:	None

INVOCATION

Councilman Ellis gave the invocation.

MEMORIAL DAY CELEBRATION

Mayor Worley thanked Mr. Walter Plaue and Council members Mumpower, Dunn and Ellis for their efforts in planning the outstanding City-County Memorial Day Celebration.

I. PROCLAMATIONS:

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 14, 2002, AND THE WORKSESSION HELD ON MAY 21, 2002

B. MOTION SETTING A PUBLIC HEARING ON JUNE 11, 2002, FOR THE FISCAL YEAR 2002-03 ANNUAL OPERATING BUDGET

C. RESOLUTION NO. 02-94 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CONTRACT FOR THE PROVISION OF TRANSIT OPERATIONS MANAGEMENT SERVICES TO THE CITY OF ASHEVILLE

Summary: The consideration of a resolution authorizing the City Manager to sign a contract for the provision of transit operations management services to the City of Asheville.

Because of a conflict between state and federal law, the City is required to hire an operations management company who in turn will employ the drivers, mechanics, supervisors, and other personnel necessary for the operation of the transit service. The current contract will expire on June 30, 2002. The Transit Services Department issued a Request for Proposals for the operations management of the transit system beginning July 1, 2002. This is a three-year contract, with two one-year renewal options.

Five management companies respond. Of those five, a committee consisting of the Chair of the Transit Commission, representatives from the Finance Department and Risk Management Division, the Transit Planner, and the Director of Transit Services, interviewed three.

The committee awarded the top scoring firm, Professional Transit Management (PTM), from Cincinnati, Ohio, 343 points out of 400 possible (85%). The other two management companies interviewed were MV Transportation, from Fairfield, California, which received 295 points (74%); and CCL Management, from Jacksonville, Florida, which received 242 points (61%).

The fees proposed in the PTM proposal have been negotiated to be sure that the City has their best offer. The total contract fee cost for the first three years is $395,595, the two remaining one year option fee costs being $131,424 for the forth year, and $136,068 for the fifth year.

The second choice, MV Transportation, fees pre-negotiation are very similar. If the proposed contract is not acceptable to PTM, discussions will begin with MV Transportation.

City staff recommends the City Council authorize the City Manager to sign the transit operations management agreement with either Professional Transit Management or MV Transportation.

RESOLUTION BOOK NO. 27 – PAGE 170

D. RESOLUTION NO. 02-95 - RESOLUTION REQUESTING INTRODUCTION OF LEGISLATION AFFECTING THE CITY OF ASHEVILLE IN 2002 SESSION OF THE NORTH CAROLINA GENERAL ASSEMBLY

Summary: The consideration of a request for legislation to reduce the terms of Housing Authority members.

At Council's retreat in February, there was some discussion regarding reducing the lengths of terms for Housing Authority members from five years to three years. Vice Mayor Bellamy initiated this discussion, and there was general support for the proposal.

The terms of Housing Authority members are established by statute, N.C.G.S. 157-5(d), as five years. Therefore, in order to obtain a reduction in the length of the term, an amendment to the law is required, and only the N.C. General Assembly can do it. The City of Charlotte has already done this in 1990.

The local bill submission deadline for this year's short session of the General Assembly is June 5. Therefore, in order for this request to be transmitted to our delegation and a bill to be introduced, Council action is required before then, and should probably occur on May 28. For short session consideration, local bills must be non-controversial.

RESOLUTION BOOK NO. 27 – PAGE 171

E. RESOLUTION NO. 02-96- RESOLUTION AMENDING THE FISCAL YEAR 2002-03 BUDGET SCHEDULE AND CITY COUNCIL MEETING SCHEDULE FOR ADOPTION OF THE FISCAL YEAR 2002-03 ANNUAL OPERATING BUDGET AT A SPECIAL MEETING ON THURSDAY, JUNE 27, 2002, AT 3:00 P.M. IN THE COUNCIL CHAMBER, 2ND FLOOR, CITY HALL BUILDING

RESOLUTION BOOK NO. 27 – PAGE 172

F. RESOLUTION NO. 02-97 - RESOLUTION APPOINTING A MEMBER TO THE CIVIL SERVICE BOARD

Summary: The consideration of appointing a member to the Civil Service Board.

The term of Sophie Dixon, as a member of the Civil Service Board, expired on May 21, 2002.

On May 21, 2002, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint Ms. Dixon, as a member of the Civil Service Board, to serve an additional two-year term. Her term will expire May 21, 2004, or until her successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 173

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilman Ellis moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

III. PUBLIC HEARINGS:

A. CONTINUATION OF PUBLIC HEARING TO REZONE A PORTION OF PROPERTY LOCATED AT 1153 SWEETEN CREEK ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT

ORDINANCE NO. 2921 - ORDINANCE TO REZONE A PORTION OF PROPERTY LOCATED AT 1153 SWEETEN CREEK ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

Mayor Worley said that this public hearing was opened on October 23, 2001, and continued until December 18, 2001, in order to give staff time to work with the property owner and his realtor to refine the uses and at the same time to work with the neighborhood to coordinate the uses through them. On December 18, 2001, the petitioner requested a continuance of this public hearing until January 22, 2002. At the January 22, 2002, meeting, the petitioner and the neighborhood representative requested the public hearing continued again to February 26, 2002, in order to achieve something that will be agreeable for all concerned. At the February 26, 2002, the petitioner and the neighborhood representative requested the public hearing continued again to May 28, 2002, in order to achieve something that will be agreeable for all concerned.

Ms. Stacy Merten, Urban Planner, said that this is the consideration of an ordinance to rezone a portion of 1153 Sweeten Creek Road from RS-8 Residential Single-Family High Density District to Commercial Industrial District. This public hearing was advertised on October 12 and 19, 2001.

On August 28, 2001, Chris Jarrett submitted an application for the rezoning of the eastern portion of the property located at 1153 Sweeten Creek Road (PIN No. 9657.18-30-1919). The property is located on the east side of Sweeten Creek Road, between W. Chapel and Busbee View Road. The parcel is currently split zoned, with the front portion, adjacent to Sweeten Creek, zoned Commercial Industrial District and the back portion zoned RS-8 Residential Single-Family High Density District. The rezoning request is for the back portion of the property only, which is approximately 2.5 acres. The entire parcel is approximately 4 acres and 745 feet deep, extending into a residential neighborhood. Currently, the only access to the parcel is via Sweeten Creek Road.

This rezoning request originally came before Council on October 23, 2001. At that time the owner was requesting that the entire parcel be zoned Commercial Industrial. In recognition of the unique nature of the parcel in question, Planning & Development staff had suggested a conditional use rezoning for the property, but because there were no plans for the parcel, Mr.

Chris Jarrett, owner of the property, did not choose to pursue this option. Consequently, Planning staff recommended that the property be rezoned to Community Business II, instead of Commercial Industrial. Although many of the uses allowed in CB II District overlap with those allowed in Commercial Industrial, the CB II is a less intensive zone than Commercial Industrial and would provide a more appropriate transition from the Commercial Industrial portion of the property to the residentially zoned property surrounding the parcel. The Planning & Zoning Commission reviewed this at their meeting on October 3, 2001, and recommend 6-1 to approve with conditions that the parcel be rezoned CB II.

There was considerable comment at the City Council public hearing and concern about commercial encroachment into the Shiloh Community. Council ultimately decided to continue the hearing in hopes that a more amenable compromise could be worked out amongst all of the parties. The hearing was subsequently continued three more times to give the applicant time to pursue other options and work with the community. Despite a great deal of effort by all parties it was difficult to develop a compromise agreeable to all. Mr. Jarrett is reluctant to place a conditional use zoning on the property as he has no specific plans for development but is merely attempting to sell the parcel and believes it will be more marketable if entirely zoned Commercial Industrial.

Staff's continuing effort to work with Mr. Jarrett has resulted in the recommendation of RM-16 Residential Multi-Family High Density District for the rear portion of this parcel. Although Mr. Jarrett would prefer this property be rezoned to Commercial Industrial, he would be agreeable to the RM-16 designation. The continuation of single family zoning for this portion of the property is not suggested as the only access is via the front portion of the property. However the RM-16 zoning coupled with the Commercial Industrial provides more opportunity for a high density mixed use development conveniently located with respect to transportation and other commercial services, while at the same time respecting the residential character of the surrounding community. This rezoning would not preclude a potential buyer from pursuing a conditional use zoning for the property.

Vice-Mayor Bellamy was concerned about encroachment into the residential neighborhood and asked if RM-8 Residential Multi-Family Medium Density District was considered. Ms. Merten said that it was considered, but the owner did not agree to it. Again Ms. Merten stated that the RM-16 designation is a compromise, which will allow the residential character of the neighborhood to remain while at the same time making it more marketable for the owner.

Ms. Norma Baynes, liaison for the Shiloh Community Association, said they do not want the property zoned Commercial Industrial. The commercial intrusion into the residential neighborhood will result in additional traffic, lights and noise problems. They would like the property to remain zoned RS-8 but would be willing to compromise at an RM-6 designation, which they feel is better for community and development of the neighborhood. She said they would be willing to work with whoever buys the property. Since the Shiloh community has commercial encroachment on three sides, they need help to define their boundaries so they can preserve their community.

Mr. Jarrett pointed out that his property is on the boundary of the Shiloh community. He noted that only area residents, not adjoining property owners, have expressed concern over the rezoning. He said that he would like to be able to market the property and with the split zoning, the tax value on the property is more than what the property is worth. He said that he lives in Charlotte, N.C., and has no use for the property.

Even though Mr. Jarrett's realtor has met with the Shiloh neighborhood to discuss compromises, Ms. Baynes said that they did not talk with them about the RM-16 designation.

432

Mayor Worley closed the public hearing at 5:39 p.m.

Discussion surrounded the appropriate zoning designation for the property taking into account the marketability of the property and the protection of the residential neighborhood.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved to rezone the portion of 1153 Sweeten Creek Road from RS-8 to RM-16. This motion was seconded by Councilman Ellis.

Vice-Mayor Bellamy explained that her concern with rezoning the property to RM-16 was the uncertainty of what would be built on the property. If a specific use was planned, the conditional use tool could be applied with additional conditions on the development.

Councilman Peterson did not support the RM-16 zoning in that a developer could build 40 units and would not have to come to City Council for any kind of approval. He supported the rezoning to RM-8 instead.

The motion made by Councilman Mumpower and seconded by Councilman Ellis carried on a 5-2 vote with Vice-Mayor Bellamy and Councilman Peterson voting "no."

ORDINANCE BOOK NO. 19 – PAGE 485

B. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING ON PROPERTY LOCATED AT BROTHERTON AVENUE AND VIRGINIA AVENUE FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT/ CONDITIONAL USE AND ISSUANCE OF A CONDITIONAL USE PERMIT TO ALLOW FOR CONSTRUCTION OF A 32-UNIT CONDOMINIUM DEVELOPMENT

ORDINANCE NO. 2922 - ORDINANCE TO REZONE PROPERTY LOCATED AT BROTHERTON AVENUE AND VIRGINIA AVENUE FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT/CONDITIONAL USE

ORDINANCE NO. 2923 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT BROTHERTON AVENUE AND VIRGINIA AVENUE TO ALLOW FOR CONSTRUCTION OF A 32-UNIT CONDOMINIUM DEVELOPMENT

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:58 p.m.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Planning & Development Director Scott Shuford explained the history of this project noting that it achieves several of the City's smart growth policy goals. The major concern of the neighborhood was fire flow, however, the Water Resources Department has completed a project that has resulted in increased fire flow to the area which they believe resolves the concern.

Mr. Gerald Green, Chief Planner, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Green said that this is the consideration of a request to rezone property located at Brotherton Avenue and Virginia Avenue from RS-8 Residential Single-Family High Density District to RM-8 Residential Multi-Family Medium Density District/Conditional Use and a motion to issue a Conditional Use Permit to allow for construction of a 32-unit condominium development.

At their May 1, 2002, meeting the Asheville Planning and Zoning Commission recommended rezoning of property (7.4 acres) located at the intersection of Brotherton Avenue and Virginia Avenue from RS-8 to RM-8 (Location Map – Attached to City Exhibit 3). The property is currently owned by the City of Asheville. The applicant, Jack Morse of Morse Properties, has an option to purchase the property. The project site is located in a predominantly detached single-family residential area. The site has public street frontage along Brotherton Avenue and Virginia Avenue. The project site is currently zoned RS-8, which allows for a maximum density of 8-units per acre. The RS-8 zoning does not allow for multi-family or attached single-family structures. Consequently, the project applicant is requesting RM-8 zoning, which allows for multi-family and attached single-family structures at a maximum density of eight units per acre. The project proposes nine residential buildings, two of which will have 6-units each, 3 that will have 4 units per building, and the remaining 4 buildings will have 2 units per building. The project will have a total of 32 units located on 7.364 acres, or 4.35 units per acre (Site Plan – Attached to City Exhibit 3).

The request is to conditionally zone the property to permit the applicant to construct a 32-unit condominium development. The project site plan indicates nine residential buildings, a one-story with basement Common House, three small storage buildings, a bicycle shed, a 38-space parking area, a 10-space parking area, a central Village Green, a Court Yard, and a Plaza. One of the key elements of the proposal is the woodland conservation easement and the extensive network of nature trails and pedestrian paths meandering throughout the majority of the site.

The buildings are all situated facing the interior of the lot with parking located along the periphery of the lot. All of the buildings are located in southwest corner of the lot, providing for the preservation of a large undisturbed area. The site plan depicts that the five buildings on the interior of the site will have three stories at a height of 30 feet and the buildings closer to the streets will be two stories at a height of 20 feet. The individual units will have an average of 1,300

434

square feet of floor area. All units will utilize the two common parking lots and no individual driveways are planned. The plan also depicts the preservation of existing trees along the street frontages, providing a buffer between the development and properties across the street.

The site plan depicts a 20-foot front yard along Virginia Avenue, with porches and/or patios encroaching into the front yard. The plan depicts a 15-foot front yard setback along Brotherton Avenue with an 8-foot porch or patio encroachment into the setback. The RM-8 district requires a 15-foot front yard setback along Virginia Avenue. Section 7-10-2 (c) of the Unified Development Ordinance (UDO) reduces the front setback along side streets by 50% of the requirement, therefore requiring a 7 ½ -foot setback along Brotherton Avenue. Section 7-10-2 (f) states that patios and uncovered decks with a height of not more than 30 inches may encroach up to ten feet into a required front yard setback. Parking has been provided at a ratio of 1.5 spaces per unit. The site plan depicts a "B" (10-foot with alternative compliance) buffer with a 6-foot fence along the adjacent detached single-family residences.

An issue raised by persons from the neighborhood commenting on this project involves the adequacy of the water infrastructure to support this development. The Water Resources Department has recently completed some improvements to the infrastructure. Tests of fire hydrants in this neighborhood indicate that these improvements have been effective in resolving this concern.

Mr. Green displayed three photos (City Exhibit 4) of a similar development built by Mr. Morse.

City Council must take formal action as set forth in section 7-5-5(e) of the UDO, and must find that all seven standards for approval for conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case [UDO 7-16-2 (c)]. Staff's opinion is that all seven standards appear to be met.

1. *That the proposed use or development of the land will not materially endanger the public health or safety;*

   All public health and safety concerns have been addressed through the site plan development process and it appears that the proposed use and development will not materially endanger the public health or safety.

2. *That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and in the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant;*

   The project site has been designed with every consideration for the natural and topographic features on the site and in the immediate vicinity. The development was designed to provide for the minimum changes and alterations to the existing conditions on the site.

3. *That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property;*

   The project will preserve a significant amount of open space that may be used by people in the area. In addition, the project's proposed density is below the permitted density of either the existing or the proposed zoning. Building design and scale will be compatible with the surrounding development.

4. *That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located;*

The project is designed to take advantage of the natural slope by incorporating basement units, instead of building higher buildings. The proposed density is consistent with the area's current development and the project will be compatible with the character of the area.

5. *That the proposed use or development of the land will generally conform with the comprehensive plan, smart growth policies, sustainable economic development strategic plan, and other official plans adopted by the City;*

   The project proposes low density residential, which appears to be consistent with the 2010 plan.

6. *That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities; and*

   The project received conditional approval from City's Technical Review Committee, including the Water Resources Department, the Fire Department, Metropolitan Sewerage District, Engineering Department and Public Works Department. Tests of fire hydrants in this neighborhood indicate that recent improvements to the water infrastructure have been effective in resolving a neighborhood concern about fire flow.

7. *That the proposed use will not cause undue traffic congestion or create a traffic hazard.*

   The project is designed with pedestrian oriented characteristics. Any traffic impact generated by the proposed use will be minimal.

The Planning and Zoning Commission unanimously recommended approval of the request, with conditions, at their May 1, 2002, meeting. This recommendation incorporates comments made by members of the public at that meeting. Staff concurs with the recommendation to approve the conditional use rezoning and to issue the Conditional Use Permit for the proposed use. The recommended conditions are: (1)The site plan must be revised to identify forested areas to be preserved and provision must be made to protect these areas; (2) The applicant and/or landscaper shall work with the Planning and Development Department to determine the best placement of buffering and landscaping materials throughout the development; and (3) The architectural design of the proposed buildings shall be compatible with the surrounding neighborhood; in particular, the design of the buildings facing Virginia and/or Brotherton Avenues shall not present the appearance of "turning their back" to these streets.

Mr. Green responded to questions from Councilman Mumpower as they related to the property being previously owned by the Housing Authority and their earlier proposal to Council for development of the area.

Upon inquiry of Councilman Dunn, Community Development Director Charlotte Caplan said that we purchased the site from the Housing Authority for $120,000 and have invested less than $10,000 in preliminary work, i.e., site work, appraisals, environmental review, etc. The City has committed to the developer $250,000 plus the value of the land (which is now valued at $147,000). That total of $397,000 will be invested in the infrastructure, i.e., site work, putting in utilities, grading, retaining walls, etc. The City is prohibited in using Community Development Block Grant (CDBG) funds into the actual housing construction.

When Councilman Dunn asked about the average selling price for the affordable units, Ms. Caplan said that they would range from approximately $70,000 for a one bedroom up to $130,000 for a three bedroom unit and two or three of those are going to be market rate units that may go a little higher than that. But with the subsidy second mortgages, the affordable units will come down and will be priced within what a family at or below 80% of area median can afford.

Upon inquiry of Councilman Dunn, Ms. Caplan explained that a common house is similar to a clubhouse in a condominium development. It will have a large room used for dining or for meetings, a kitchen, office, couple of guest bedrooms, etc.

In response to Councilman Dunn, Ms. Caplan said that the property is not paying any taxes now, but when it is fully developed, it bring in roughly $20,000 annually in property tax revenue.

Ms. Caplan explained the Request for Proposal process that occurred for this development and also how the City of Asheville got involved.

Upon inquiry of Vice-Mayor Bellamy, Mr. Green said that if the property is not rezoned, 56 homes could be built on this property. He said a conditional use permit was requested to provide the Council, staff and the neighbors with more assurance of what will be built on that property. Given the topography of the site, development of it could have a significant detrimental impact on the neighborhood if it were completely developed. The City challenged the developer from the start to develop the site with housing that would be available for the working people and still preserve the unique features on the property.

Fire Marshal Wayne Hamilton said that a water line project on the southern part of the site adjacent to the interstate has been completed. One of the problems they had previously with this project was on the lower fire flows due primarily to dead-end fire lines in this immediate area. Due to the recently completed waterline extension from Virginia Avenue all the way around to Hubbard Avenue, there has been a significant change in the fire flow. Testing in previous years showed 340-400 gallons a minute and since the waterline has been extended, testing now shows an average of about 670 gallons a minute. This does meet our minimum standard for the proposed development. Another significant item is that since this property will be moving from single-family to a multi-family type facility, that will fall under the purview of State Fire and Building Codes and therefore more restrictive fire protection requirements will be established. The Fire Department has also been working with the developer to designate an interior pedestrian path as a fire line for the Fire Department's use only or other emergency vehicles. In addition, the Fire Department will require the developer to place an on-site fire hydrant in the interior part of the development. Even though he has not seen the proposed square footage of the common house, based upon the fire flow requirements that we currently have in our Standard Specifications and Details Manual, we can adjust the construction type and square footage type to meet the water amount that is available on the site.

Mr. Richard Nantelle, President of the West Asheville Community League, felt that this development does not fully meet some of the seven conditional use standards. He said that when development was proposed on this site seven years ago by the Housing Authority, it suffered from three major safety infrastructure deficits: (1) inadequate water supply; (2) congested streets plagued with speeding traffic; and (3) lack of sidewalks. The City has now corrected the water issue but not the other two unresolved safety factors. With the recent budget cuts and a possible tax increase, the City has no funds to resolve these concerns. He felt it would be best to construct this development somewhere else where improvements are not necessary.

Mr. Dick Rice, representing the West Asheville Business Association, was opposed against the rezoning and conditional use permit for this project. He felt that the single-family designation should not change. He felt that four of the seven conditional use standards have not been met. He said that Virginia Avenue, which is narrow and dangerous with no sidewalks, couldn't handle the additional traffic from the development. He urged Council to keep the character of the neighborhood intact.

Ms. Sylvia Montgomery, resident on Virginia Avenue, spoke in opposition of the development in that they have just received adequate fire flow protection and now the City plans to add more houses to the line which will reduce the flow again.

Mr. Carlos Montgomery, resident on Virginia Avenue, was opposed to the development for water fire flow reasons. He also was concerned that if I-240 is widened, water problems will occur again in that area.

Mr. Jack Morse, representing Morse Properties, spoke in support of the development. He said that the most expensive unit would be $160,000 but they will have 21 affordable units, which will average in the mid-$70,000. He said this is a mixed income development and there will be 11 units at the market rate. He said the project meets some affordable housing goals and smart growth goals that the City has set for itself. He pledged to work with the neighborhood.

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 7:22 p.m.

Discussion occurred with regard to the additional traffic from the development on Virginia Avenue. Mr. Shuford said that this proposal does not change the density that would be allowed under the existing zoning, so in effect there is no net increase beyond what could occur with the current zoning.

Mr. Hamilton responded to various questions from Councilman Peterson regarding water, some being, but are not limited to: what would happen to the waterlines if I-240 were widened, why are they requiring an additional fire hydrant on the site, are there adequate fire hydrants along Virginia Avenue, what are the requirements for fire separation between the units, and is there any report of a problem on Virginia Avenue of the waterline being inadequate and having frequently leaks.

Councilman Mumpower asked if the new waterline extension was a planned extension or in response to this site need. Mayor Worley, Vice-Chair of the Regional Water Authority, said that there has been a serious concern about fire flow in that area since the Housing Authority project was before Council about seven years ago. At that time, it was reported that the Regional Water Authority had plans in progress to make this connection, but it hadn't been done at that point in time.

Upon inquiry of Vice-Mayor Bellamy, Mr. Hamilton explained that since the rezoning is from a single-family development to a multi-family development more stringent requirements are place on it – not just from the fire flow aspect, but also from the commercial building code and the statewide fire codes. There are more stringent requirements on this project than would be on a single-family development.

Councilman Ellis moved to adopt Ordinance No. 2922 to rezone the property located at Brotherton Avenue and Virginia Avenue from RS-8 Residential Single-Family High Density District to RM-8 Residential Multi-Family Medium Density District/Conditional Use. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 487

Councilman Mumpower was concerned about the real traffic safety issue on Virginia Avenue and asked if it would be appropriate to get the developer involved in traffic management on that street and what kind of cost factors are involved for traffic calming devices. Mr. Green responded that a condition could be placed on the conditional use permit regarding traffic calming on Virginia Avenue. He said that a study and implementation could cost $50-60,000.

Mr. Shuford said that speed humps cost approximately $1,500-2,500 and suggested that Council direct staff to make sure that Virginia Avenue is on the priority list for traffic calming measures. He said the City certainly would not want to install traffic calming devices in a neighborhood without getting the neighborhood involved in deciding what those would be.

Councilman Mumpower suggested a condition be placed on the permit that some arrangement be made whereby the developer pays a set amount (perhaps $5-7,000) and the developer, staff and neighborhood work together to develop traffic management on Virginia Avenue.

City Attorney Oast said that a condition could be placed in the conditional use permit that would require the developer to contribute an amount of money towards the effort of traffic calming on Virginia Avenue, if the City makes that recommendation within a certain amount of time.

Upon inquiry of Councilman Peterson, Ms. Caplan said that CDBG funds could not be used for traffic calming.

Councilwoman Jones and Councilman Ellis felt that Virginia Avenue is not a major thoroughfare but just a neighborhood street traveled primarily by the residents. They felt that residents in the area need to hold each other accountable for the speeding.

Councilman Peterson was concerned about the water, however, it looks as though the Water Department has taken measures to correct those concerns and satisfy the Fire Department. The developer has tried to make the property along Virginia Avenue to be similar to the property across the street from it and whatever gets developed on the site will increase traffic. He didn't think that co-housing would be the best approach for that property; however, the developer has made it as sensitive as possible. He said that the problems on Virginia Avenue (water pressure, need for road improvements, traffic calming) are not uncommon to other streets in the City and we don't restrict development on those streets.

Vice-Mayor Bellamy moved to adopt Ordinance No. 2923 to issue the conditional use permit to allow for construction of a 32-unit condominium development, subject to the following conditions: (1) The site plan must be revised to identify forested areas to be preserved and provision must be made to protect these areas; (2) The applicant and/or landscaper shall work with the Planning and Development Department to determine the best placement of buffering and landscaping materials throughout the development; and (3) The architectural design of the proposed buildings shall be compatible with the surrounding neighborhood; in particular, the design of the buildings facing Virginia and/or Brotherton Avenues shall not present the appearance of "turning their back" to these streets. This motion was seconded by Councilwoman Jones.

Discussion occurred about (1) whether Virginia Avenue should by-pass the traffic calming policy since there are currently a number of streets that have already been identified; (2) the uncertainty of what type of traffic calming measures are needed since no study has been done; (3) whether the developer or the City should pay for a study and implementation; and (4) getting neighborhood involvement in the process.

Councilman Mumpower moved to amend the motion made earlier to add a condition that the developer to provide financial support up to $15,000 to support a traffic management plan as designed and implemented by City staff, with the understanding that it include strong neighborhood input. This motion was seconded by Councilman Peterson.

Mr. Morse pointed out that one main facet of the project is the affordable units and he has a fixed fee. Therefore, anything added to the cost of the project will have to be passed onto the buyers, which will affect the affordability of the units.

Vice-Mayor Bellamy asked that City staff follow-up with the residents on the neighborhood. City Manager Westbrook said that City Council has adopted a traffic calming priority list and he would look to see if Virginia Avenue is on that list. He said the list might have to come back to Council for re-prioritization.

The amended motion by Councilman Mumpower and seconded by Councilman Peterson failed on a 2-5 vote, with Councilman Mumpower and Councilman Peterson voting "yes" and Mayor Worley, Vice-Mayor Bellamy, Councilman Dunn, Councilman Ellis, and Councilwoman Jones voting "no".

The main motion made by Vice-Mayor Bellamy and seconded by Councilwoman Jones carried on a 6-1 vote, with Councilman Mumpower voting "no."

Mayor Worley announced a short break.

ORDINANCE BOOK NO. 19 - PAGE 489

C. PUBLIC HEARING TO CONSIDER THE REZONING OF PROPERTY AT 400 CARIBOU ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO NEIGHBORHOOD BUSINESS DISTRICT

Mr. Robert Tucker, property owner at 400 Caribou Road, withdrew his petition to rezone 400 Caribou Road from RS-8 Residential Single-Family High Density District to Neighborhood District since the neighbors are opposed to this rezoning request.

D. PUBLIC HEARING RELATIVE TO ANNEXING REYNOLDS MOUNTAIN SUBDIVISION, PHASE I

ORDINANCE NO. 2924 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE PROPERTY LOCATED NORTH OF WINDSOR ROAD AND IDENTIFIED AS REYNOLDS MOUNTAIN SUBDIVISION, PHASE I

Mayor Worley opened the public hearing at 8:28 p.m.

Urban Planner Paul Benson said that this is the consideration of an ordinance extending the corporate limits of the City of Asheville to include property located north of Windsor Road and identified as the Reynolds Mountain Subdivision, Phase I. This public hearing was advertised on May 17, 2002.

Thomas O. Meyer, representing T & T Meyer, LLC, and Kirk Boone, representing Reynolds Mountain Development, LLC, sole owners of the Reynolds Mountain Subdivision, Phase I, have submitted an annexation petition for that subdivision. This area is contiguous to the existing corporate limits, being bordered to the south by the existing municipal boundary.

The area proposed for annexation consists of approximately 80 acres and is platted for single-family residential development. The area will be accessed by primarily by Elmwood Place. This area is within the City's extraterritorial jurisdiction and is currently zoned RS-2 Residential Single-Family Low Density District.

The owners/petitioners are developing utilities and streets. City services will begin on the effective date of annexation. The petitioners have requested that the effective date of annexation be set for June 30, 2002.

City staff recommends that City Council adopt the ordinance extending the corporate limits to include Reynolds Mountain Subdivision, Phase I.

Upon inquiry of Vice-Mayor Bellamy, Mr. David Foster from the Public Works Department, said that the streets in this subdivision would be constructed to City standards.

City Manager Westbrook responded to an inquiry of Vice-Mayor Bellamy regarding the school system.

Mr. Benson responded to Councilman Peterson with regard to the extraterritorial jurisdiction extension in that area.

Mayor Worley closed the public hearing at 8:45 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Peterson moved for the adoption of Ordinance No. 2924. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 495

E. PUBLIC HEARING TO CONSIDER THE DESIGNATION OF THE SOUTH ASHEVILLE CEMETERY ON CHURCH ROAD AT THE END OF DALTON STREET AS A LOCAL HISTORIC LANDMARK

ORDINANCE NO. 2925 - ORDINANCE DESIGNATING THE SOUTH ASHEVILLE CEMETERY ON CHURCH ROAD AT THE END OF DALTON STREET AS A LOCAL HISTORIC LANDMARK

Mayor Worley opened the public hearing at 8:46 p.m.

Ms. Victoria Houser, former intern from UNC-A who worked with the Historic Resources Commission Director, said that this is consideration of an ordinance designating the South Asheville Cemetery on Church Road at the end of Dalton Street as a local historic landmark. This public hearing was advertised on May 17 and 24, 2002.

The South Asheville Cemetery is located within the Kenilworth neighborhood on a plot of land consisting of 2.025 acres. The cemetery is nestled north of St. John "A" Baptist Church, off Church Road, at the end of Dalton Street. The cemetery is in the mist of a wooded area. To the north and east of the cemetery is the encroachment of mid-twentieth century residential development. To the west is a steep hillside of dense woods approachable by the cemetery access road. The Cemetery itself is hilly, however, the sinking graves have contributed to the falling and rising landscape. Several estimates have been made about the number of graves and it is most likely that number is around twenty-four hundred.

The South Asheville Cemetery, established by James McConnell Smith around 1850 for burial of his slaves, is a site that possesses local historic significance as a tangible reminder of the ethnic heritage of African Americans in western North Carolina from the mid-nineteenth century to the mid-twentieth century. The South Asheville Cemetery serves not only as a visual reminder of the African-American heritage, it also serves as a reflection of the social history of African American burials. African-Americans in the South attached great importance to the death and burial of their fellow community members. The funerals were deemed a religious ritual in African American culture. Although no records exist that outline the specific burial practices, the Cemetery exhibits many characteristics among African-American burial grounds in the southeast.

Designation of this site as a local historic landmark makes the property owner eligible for a 50% reduction in property taxes; however, this site is owned by the South Asheville Cemetery Association, a non-profit organization, and the property is tax exempt.

When a property is designated historic, restrictions are placed on the property and any modification to the land, the graves or grave markers must receive a Certificate of Appropriateness from the Historic Resources Commission of Asheville and Buncombe County. All improvements must follow the Secretary of the Interior's Standards for Rehabilitation and Illustrated Guidelines for Rehabilitating Historic Buildings.

This ordinance designates the South Asheville Cemetery as a local historic landmark. It is important that properties of local significance are preserved and protected for cultural, historic, and economic reasons for future generations.

The Historic Resources Commission of Asheville and Buncombe County (HRC), by unanimous vote, recommends to City Council that the South Asheville Cemetery be designated a local historic landmark. Staff concurs with the recommendation of the HRC to designate the South Asheville Cemetery a local historic landmark.

Upon inquiry of Councilman Peterson, Ms. Houser explained the efforts that volunteers made to restore the cemetery.

Mayor Worley closed the public hearing at 8:49 p.m.

Vice-Mayor Bellamy and Councilwoman Jones thanked the AmeriCorps volunteers and other members of the community who devoted countless hours to regain this rich history that had been lost.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Bellamy moved for the adoption of Ordinance No. 2925. This motion was seconded by Councilman Peterson and carried unanimously.

ORDINANCE BOOK NO. 19 - PAGE 496

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. DISCUSSION OF LEGISLATIVE CONCERNS RELATED TO THE BUDGET

Mayor Worley said that we have budgetary issues this year due to the State's budget crisis and we have a team from City Council traveling to Raleigh on May 29, 2002, to express concern to our delegation about the State's budgetary situation and its effect on cities. He thanked Councilman Mumpower for spearheading this trip.

Councilman Mumpower said they would share Council's concerns about two issues. One issue is that the State is hanging onto significant City funds in the form of reimbursements and we will ask that they not do that in the coming year. Secondly, to ask that they give consideration to providing the City with a more stable and reliable menu of revenue sources. Council would like to make our delegation aware of their concerns and would also like to make City residents aware that the City does not currently have a budget crisis – except as has been created by the State withholding funds. Some of Council feel strongly that if you have the authority to spend monies then you should have the responsibility for raising those monies too and not put that on the backs of cities like Asheville.

Mayor Worley said that the impact of the State withholding local government revenues from the City of Asheville has been devastating to our current year's budget. We ask our legislators to support the legislation which will be introduced to protect these local reimbursement revenues (utility franchise fees and alcohol taxes) from being taken by the Governor ever again. We also ask our legislators to support legislation to move up the implementation of the ½ cent local option sales tax, which will replace the other portion of our reimbursements. This is the third time in ten years that reimbursements have been withheld from cities and counties. Therefore, we urge our legislation to support giving cities and counties a menu of revenue options to chose from and eliminate our dependency on state reimbursements. This would place the burden of imposing those revenue sources at the local level and allow each city and county to utilize those sources that best suit local resources and needs.

Councilman Dunn stressed the need to find another revenue stream. He felt that the City should keep some of the room tax and earmark it for infrastructure. In addition, he felt a menu of revenue options is crucial to cities and counties.

Vice-Mayor Bellamy emphasized that Asheville provides many of the economic development opportunities and recreational activities for our citizens as well as those who are from neighboring cities and counties. She urged our local delegation to consider increasing the State's cigarette tax, the State's beer tax, and the wine tax. These three taxes would tax the users, not everyone, while providing a steady stream of income to our State. She also expressed the need of a menu of revenue options for cities and counties in order to have the revenue structure we need to be successful.

B. RESOLUTION NO. 02-98 - RESOLUTION AMENDING THE ASHEVILE STANDARD SPECIFICATIONS AND DETAILS MANUAL

Chief Planner Gerald Green said that this is the consideration of a resolution to amend the Asheville Standard Specifications and Details Manual to establish standards for lighting of parking lots, outdoor display areas, vehicular canopies and similar activities/uses to ensure adequate safety, night vision, and comfort and not cause excessive glare onto adjacent properties and public street rights-of-way.

Mr. Green said that this ordinance has been reviewed by a focus group, which included neighborhood representatives and people in the lighting industry. They are in agreement with the amendment to the Manual.

Citizens have consistently identified glare and light trespass as an adverse impact of non-residential development. In addition, citizens have expressed concern about the "over-lighting" of uses such as gas stations and convenience stores. In response to these concerns, the staff of the Public Works and Planning and Development Departments have worked with staff of CP&L to develop lighting standards designed to ensure adequate lighting for all uses while minimizing glare and light trespass. The ordinance establishes general lighting standards and specific standards for the following uses:

- Parking lots and outdoor areas;
- Vehicular canopies;
- Outdoor display areas;
- Outdoor sports fields and performance areas;
- Parking decks; and
- Signs.

The goal of the proposed standards is to provide developers, contractors, and property owners with standards that will ensure adequate lighting for the development being proposed while minimizing adverse impacts on adjacent properties and public rights-of-way caused by glare and light trespass. The City staff was fortunate to have the assistance of a lighting expert employed by CP&L to assist in the development of the lighting standards. Our goal was to provide reasonable standards that would meet the needs of and benefit the entire community.

The Public Works and Planning and Development staff recommend approval of the ordinance establishing lighting standards for the City of Asheville.

Mr. Green thanked Mr. Robert Henderson from Carolina Power & Light Company, and Mr. David Foster from the City's Public Works Department, who were primarily responsible for the development of these standards.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Ellis moved for the adoption of Resolution No. 02-98. This motion was seconded by Councilman Mumpower and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 174

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of May 3-16, 2002: Bernice Penn (Fire), Karen Tessier (Streets), Econo Lodge (Water) and McDowell Co. (Fire).

The following claims were received by the City during the period of May 17-23, 2002: Charles E. Clark (Engineering), Teresa Caldwell (Inspections), Stephanie Solomon (Streets), Blue Ridge Center (Water), Battery Park Apartments (Streets) and Jonathon Clark (Fire).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:19 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

444

Tuesday – June 4, 2002 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

Multi-Family Housing Revenue Bonds for Asheville Terrace Apartments by Housing Authority

Summary: The consideration of a resolution approving the issuance of revenue bonds by the Housing Authority for the Asheville Terrace Apartments project.

The Housing Authority of the City of Asheville proposes to issue revenue bonds in the amount up to $7,500,000 to refund existing bonds at a lower interest rate, and to provide funds for interior renovations for the 248 unit apartment development known as Asheville Terrace Apartments, which is operated by Asheville Assisted Housing, Inc., a nonprofit corporation affiliated with the Authority, for rental to elderly, disabled and handicapped persons and families of low and very low income.

The Housing Authority will hold a public hearing on June 11, 2002, on the question of the issuance of the bonds. The bonds must now be considered and approved by the Asheville City Council.

The bonds being issued are "private activity bonds" under IRS regulations. Essentially, this is a form of financing that allows private entities (both for profit and not-for-profit) to engage in public purpose projects, with some of the advantages of tax exempt financing. There are many requirements and limitations in the use of the money derived from bond proceeds. One of the requirements is that the governmental unit having jurisdiction over the area in which the activity occurs must approve the issuance of the bonds, and this approval may only come after a public hearing. According to the Housing Authority's attorney, concurred in by bond counsel and the attorneys for Asheville Assisted Housing and issuer, this public hearing requirement will be satisfied by the public hearing to be held by the Housing Authority prior to the City taking action, and a separate hearing by the City is not necessary. Our bond counsel has confirmed this, and this is the position of the Local Government Commission.

If City Council wishes to approve issuance of the revenue bonds for the Asheville Terrace Apartments project, as required by Sec. 147(f) of the Internal Revenue Code, adoption of the resolution is recommended.

Minority Business Commission Appointment

Summary: The consideration of a resolution confirming the appointment of a member of the Minority Business Commission.

On May 26, 1998, City Council adopted Resolution No. 98-63 adopting a City-County Minority Business Plan.

The Minority Business Commission consists of 13 members, 10 of whom are nominated by various groups and three of who are minority business owners nominated by the Minority Business Commission. All nominees are considered and appointed by both the City Council and County Commission.

Ms. Carmella D. Watkins has been named by the NAACP to represent them on the Minority Business Commission. Ms. Watkins has been nominated to fill the position left vacant by Ms. Grace Dorn who died unexpectedly in December 2001. Ms. Watkins' term will run through August 2002 and then she will serve a full two-year term, which will run through August 2004.

City staff recommends City Council adopt the resolution confirming the appointment of a member of the Minority Business Commission.

New Street Name of "Secluded Vista Drive"

Summary: The consideration of a resolution accepting the new proposed street name of "Secluded Vista Drive."

Leo and Kendell Wentzel, owners of lots off of Ballantree Drive, have petitioned the City of Asheville to accept the street name " Secluded Vista Drive." The new street will begin at Ballantree Drive and end at the cul-de-sac on Secluded Vista Drive.

City staff recommends adoption of the resolution.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

ECONOMIC DEVELOPMENT STRATEGIC PLAN TASK FORCE

Mr. Jack Cecil, Chair of the Economic Development Strategic Plan Task Force, reviewed with Council the Plan history and the economic development "influencers." He then updated Council on the Plan focus areas with strategic actions (which included the riverfront development, the development process, workforce education/training, and real estate).

Mr. Cecil said that the Task Force recognizes the past, current and future contributions by the City to many of the projects and initiatives highlighted and for the need for continued commitment to those efforts. In making the following recommendations, they also recognize the extreme pressures on local governments resulting from the ripple effect of the state budget crisis to meet existing commitments, much less take on new ones. Therefore, several of the recommendations presented require little or no cost. Their recommendations include (1) build and enhance community quality of place; (2) pursue aggressive/pro-active urban redevelopment; and (3) continuous improvement of development process. Additional recommendations include: (1) advocate legislative agenda seeking new or expanded local fiscal and regulatory powers to enhance development "toolbox"; (2) support "new economy" skills training programs of UNC-A, NCSU Mechatronics Engineering/Multimedia/Computer Science; (3) continue support of Buncombe County ECD specifically for marketing Asheville to "knowledge-based" enterprises; and (4) foster small business and entrepreneur development, retention, expansion and recruitment.

On behalf of City Council, Mayor Worley thanked Mr. Cecil and the entire Task Force for their dedication to this task and will look forward to another update.

AUTOMATED COLLECTION SYSTEM PROJECT

Mr. Richard Grant, Solid Waste Manager, said that an automated trash collection system for households was implemented April 3, 2000.

He explained that the automated trash collection system has many advantages over the traditional rear packer system. Savings are generated from utilizing one person with the automated system compared to three people for the rear packer system. This saves approximately $40,000 per year per truck in labor costs. Injuries to personnel are reduced to almost zero. Street cleanliness is improved as all bagged trash is placed in a roll out container with a lid. The city-supplied containers also provide uniform containers for all residents.

In 2000 staff conducted a pilot program for 3,400 customers. After one year of program assessment, comments and a survey, citizens were overwhelmingly in favor of such a system. Based on the pilot program, City Council approved the full implementation of the program for all residents.

Beginning July 1, 2002, 8,000 customers will be added to the new system. Containers and literature are currently being distributed.

Councilman Dunn wanted to make sure that we are not sacrificing efficiency for service. City Manager Westbrook assured him that this is not the case.

Mr. Grant responded to Councilman Mumpower's question regarding recycling.

On behalf of Council, Mayor Worley thanked Mr. Grant for the briefing.

HOUSING CODE REVIEW TASK FORCE

Mr. Jeff Baker, Housing Code Coordinator, said that this is the consideration of a resolution supporting a Housing Code Review Task Force.

At the City Council 2002 planning retreat, staff gave a presentation that reviewed the development and regulatory processes. City Council was presented with 10 issues that would need Council consideration for streamlining and improving the processes in the City. One of the issues was reviewing and updating the Housing Code. Since Council has approved no updates to the Code since May 1999, staff is recommending that a Citizen Task Force be established to review the Housing Code and its enforcement.

The Housing Code was amended in 1993, effective July 1, 1994, with rental units required to be in compliance with the Code effective July 1,1999. In May 1999 City Council approved some updates to the Code and approved a 6-month extension for rental units to be in compliance by January 1, 2000. Other fees and penalties were approved to encourage landlords to be in compliance with the ordinance. The Code has been effective in bringing over 12,000 of the 30,000 residential units of the City up to a minimum standard. The Code was designed to be proactive in that it requires all rental units, and units being sold to show proof that the unit is up to the minimum requirements. Enforcement of the Code has allowed owners, landlords, and investors and staff an opportunity to assess the strength and weaknesses in the Housing Code. Staff has reviewed with the Council's Housing and Community Development Committee various areas of the Code that needed revisions. A review of the Code should involve the sectors of the population who have significant involvement with the Code. It is recommended that the Task Force be comprised of representatives from the Carolina Real Estate Investor Association, the Apartment Association, the Board of Realtors, Homebuilders Association, nonprofit organizations and other industry representatives. The review would be lead by staff that will forward suggested amendments and issues to the Council's Housing and Community Development Committee. The review will take place during the summer with presentation of an amended Code targeted for the fall.

City staff recommends City Council approve the resolution to create a Housing Code Task Force to review and recommend changes to the Housing Code and its enforcement. A list of the potential membership has been provided to Council. If any City Council member would like an additional citizen(s) to participate, they should contact Terry Summey before June 30th in order for the Task Force to begin work in mid-July.

Upon inquiry of Vice-Mayor Bellamy, Mr. Baker said that a list of approximately 30 items has already been compiled that need specific attention and he would be happy to furnish Council with a copy of that list. In addition, at the request of Vice-Mayor Bellamy, Mr. Baker said that he would try to obtain statistics regarding the number of deaths associated with fire resulting from substandard housing.

Vice-Mayor Bellamy wanted to make sure that the Housing Code remains top-notch and that we continue to have a product for safe, decent and affordable housing.

At the request of Councilman Jones and Councilman Peterson, it was the consensus to expand the Task Force membership to include three tenants, a representative from the local architectural association, and two or three representatives from neighborhood groups that have substantial rental housing.

Councilman Mumpower felt that the existing Housing Code lays a heavy regulatory hand on our City and is expensive, thus ultimately affecting affordable housing in our community. He was pleased that both positive and negative impacts of the Code would be reviewed.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

CITY-COUNTY HOUSING TASK FORCE

Community Development Director Charlotte Caplan said that this is the consideration of a resolution endorsing the creation of a joint County-City Task Force to provide information on current housing issues, and recommend policy changes.

The Affordable Housing Coalition has approached Buncombe County and City of Asheville officials with a view to setting up a joint task force to look at housing needs and policies County-wide. The problems created by a high-priced housing market in a relatively low-wage economy are common to both the County and the City, and are serious enough to warrant exploration of new policies. While there is at present no clear consensus on what approaches to adopt, there is widespread agreement that any solution will require a coordinated approach in which both County and City governments take action together.

The Coalition's proposal is to explore options through an advisory task force, with members appointed jointly by the Mayor and the County Commission Chairman. The purpose of the task force would be to provide the Buncombe County Commissioners and the Asheville City Council with information on current housing needs and programs, recommend changes to current housing policies, including the potential for a joint Housing Trust Fund, and help raise awareness and support throughout the community for housing issues.

The task force would have an inclusive membership representing all local stakeholders with an interest in housing, including for-profits, non-profits, and neighborhood residents. The County, the City, and the Coalition would jointly provide staff support.

The task force's first job would be to review its purpose and membership and create a work program. Its first report back to the County Commission and City Council would be to present this program and recommend any changes needed to its purpose and membership.

No budget changes are required to implement this proposal.

City staff recommends City Council approve a resolution to create a County-City Housing Task Force.

Councilwoman Jones felt there needed to be a balance from the public and private sector on the Task Force. As a result, it was the consensus of Council to ask the Affordable Housing Coalition to provide two additional recommendations from the public sector.

Ms. Caplan responded to Councilman Peterson about the scope of the work from the Homes for Asheville-Buncombe Task Force created by the Chamber of Commerce.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

At 4:30 p.m., Mayor Worley announced a short break.

BUDGET WORKSESSION

Discussion was held regarding the Fiscal Year 2002-03 budget.

CLOSED SESSION

At 8:00 p.m., Councilman Mumpower moved to go into closed session to (1) establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease - G.S. 143-318.11(a)(5); and (2) consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Betty Donoho, County of Buncombe, Western North Carolina Air Pollution Control Agency, Noccalula M. Moon and City of Asheville. - G.S. 143-318.11(a)(3). This motion was seconded by Councilman Ellis and carried unanimously.

At 9:10 p.m., Vice-Mayor Bellamy moved to come out of closed session. This motion was seconded by Councilwoman Jones and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:10 p.m.

Councilwoman Jones gave the invocation.

I. PROCLAMATIONS:

II. CONSENT:

Mayor Worley asked that an additional item be placed on the Consent Agenda conferring the Mayor's powers and duties to the Vice-Mayor during his absence next week.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 28, 2002, AND THE WORKSESSION HELD ON JUNE 4, 2002

B. RESOLUTION NO. 02-99 - RESOLUTION APPROVING ISSUANCE OF MULTI-FAMILY HOUSING REVENUE BONDS (ASHEVILLE TERRACE APARTMENTS)

Summary: The consideration of a resolution approving the issuance of revenue bonds by the Housing Authority for the Asheville Terrace Apartments project.

The Housing Authority of the City of Asheville proposes to issue revenue bonds in the amount up to $7,500,000 to refund existing bonds at a lower interest rate, and to provide funds for interior renovations for the 248 unit apartment development known as Asheville Terrace Apartments, which is operated by Asheville Assisted Housing, Inc., a nonprofit corporation affiliated with the Authority, for rental to elderly, disabled and handicapped persons and families of low and very low income.

A public hearing will be held by the Housing Authority on June 11, 2002, on the question of the issuance of the bonds. The bonds must now be considered and approved by the Asheville City Council.

The bonds being issued are "private activity bonds" under IRS regulations. Essentially, this is a form of financing that allows private entities (both for profit and not-for-profit) to engage in public purpose projects, with some of the advantages of tax exempt financing. There are many requirements and limitations in the use of the money derived from bond proceeds. One of the requirements is that the governmental unit having jurisdiction over the area in which the activity occurs must approve the issuance of the bonds, and this approval may only come after a public hearing. According to the Housing Authority's attorney, concurred in by bond counsel and the attorneys for Asheville Assisted Housing and issuer, this public hearing requirement will be satisfied by the public hearing to be held by the Housing Authority prior to the City taking action, and a separate hearing by the City is not necessary. Our bond counsel has confirmed this, and this is the position of the Local Government Commission.

If City Council wishes to approve issuance of the revenue bonds for the Asheville Terrace Apartments project, as required by Sec. 147(f) of the Internal Revenue Code, adoption of the resolution is recommended.

RESOLUTION BOOK NO. 27 – PAGE 182

C. RESOLUTION NO. 02-100 - RESOLUTION CONFIRMING THE APPOINTMENT OF A MEMBER TO THE MINORITY BUSINESS COMMISSION

Summary: The consideration of a resolution confirming the appointment of a member of the Minority Business Commission.

On May 26, 1998, City Council adopted Resolution No. 98-63 adopting a City-County Minority Business Plan.

The Minority Business Commission consists of 13 members, 10 of whom are nominated by various groups and three of who are minority business owners nominated by the Minority Business Commission. All nominees are considered and appointed by both the City Council and County Commission.

Ms. Carmella D. Watkins has been named by the NAACP to represent them on the Minority Business Commission. Ms. Watkins has been nominated to fill the position left vacant by Ms. Grace Dorn who died unexpectedly in December 2001. Ms. Watkins' term will run through August 2002 and then she will serve a full two-year term, which will run through August 2004.

City staff recommends City Council adopt the resolution confirming the appointment of a member of the Minority Business Commission.

RESOLUTION BOOK NO. 27 – PAGE 183

D. RESOLUTION NO. 02-101 - RESOLUTION ACCEPTING THE NEW STREET NAME OF "SECLUDED VISTA DRIVE"

Summary: The consideration of a resolution accepting the new proposed street name of "Secluded Vista Drive."

Leo and Kendell Wentzel, owners of lots off of Ballantree Drive, have petitioned the City of Asheville to accept the street name " Secluded Vista Drive." The new street will begin at Ballantree Drive and end at the cul-de-sac on Secluded Vista Drive.

City staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE 184

E. RESOLUTION NO. 02-102 - RESOLUTION CREATING A HOUSING CODE TASK FORCE

Summary: The consideration of a resolution supporting a Housing Code Review Task Force.

At the City Council 2002 planning retreat, staff gave a presentation that reviewed the development and regulatory processes. City Council was presented with 10 issues that would need Council consideration for streamlining and improving the processes in the City. One of the

451

issues was reviewing and updating the Housing Code. Since Council has approved no updates to the Code since May 1999, staff is recommending that a Citizen Task Force be established to review the Housing Code and its enforcement.

The Housing Code was amended in 1993, effective July 1, 1994, with rental units required to be in compliance with the Code effective July 1,1999. In May 1999 City Council approved some updates to the Code and approved a 6-month extension for rental units to be in compliance by January 1, 2000. Other fees and penalties were approved to encourage landlords to be in compliance with the ordinance. The Code has been effective in bringing over 12,000 of the 30,000 residential units of the City up to a minimum standard. The Code was designed to be proactive in that it requires all rental units, and units being sold to show proof that the unit is up to the minimum requirements. Enforcement of the Code has allowed owners, landlords, and investors and staff an opportunity to assess the strength and weaknesses in the Housing Code. Staff has reviewed with the Council's Housing and Community Development Committee various areas of the Code that needed revisions. A review of the Code should involve the sectors of the population who have significant involvement with the Code. It is recommended that the Task Force be comprised of representatives from the Carolina Real Estate Investor Association, the Apartment Association, the Board of Realtors, Homebuilders Association, nonprofit organizations and other industry representatives. The review would be lead by staff that will forward suggested amendments and issues to the Council's Housing and Community Development Committee. The review will take place during the summer with presentation of an amended Code targeted for the fall.

City staff recommends City Council approve the resolution to create a Housing Code Task Force to review and recommend changes to the Housing Code and its enforcement. If any City Council member would like an additional citizen(s) to participate, they should contact Terry Summey before June 30th in order for the Task Force to begin work in mid-July.

RESOLUTION BOOK NO. 27 – PAGE 185

F. RESOLUTION NO. 02-103 - RESOLUTION ENDORSING THE CREATING OF A JOINT COUNTY-CITY TASK FORCE TO PROVIDE INFORMATION ON CURRENT HOUSING ISSUES AND RECOMMEND POLICY CHANGES

Summary: The consideration of a resolution endorsing the creation of a joint County-City Task Force to provide information on current housing issues, and recommend policy changes.

The Affordable Housing Coalition has approached Buncombe County and City of Asheville officials with a view to setting up a joint task force to look at housing needs and policies County-wide. The problems created by a high-priced housing market in a relatively low-wage economy are common to both the County and the City, and are serious enough to warrant exploration of new policies. While there is at present no clear consensus on what approaches to adopt, there is widespread agreement that any solution will require a coordinated approach in which both County and City governments take action together.

The Coalition's proposal is to explore options through an advisory task force, with members appointed jointly by the Mayor and the County Commission Chairman. The purpose of the task force would be:

To provide the Buncombe County Commissioners and the Asheville City Council with information on current housing needs and programs, recommend changes to current housing policies, including the potential for a joint Housing Trust Fund, and help raise awareness and support throughout the community for housing issues.

The task force would have an inclusive membership representing all local stakeholders with an interest in housing, including for-profits, non-profits, and neighborhood residents. The County, the City, and the Coalition would jointly provide staff support.

The task force's first job would be to review its purpose and membership and create a work program. Its first report back to the County Commission and City Council would be to present this program and recommend any changes needed to its purpose and membership.

No budget changes are required to implement this proposal.

City staff recommends City Council approve a resolution to create a County-City Housing Task Force.

RESOLUTION BOOK NO. 27 – PAGE 186

G. RESOLUTION NO. 02-104 – RESOLUTION CONFERRING MAYOR'S POWER AND DUTIES TO VICE-MAYOR DURING MAYOR'S ABSENCE

RESOLUTION BOOK NO. 27 – PAGE 187

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Vice-Mayor Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

III. PUBLIC HEARINGS:

ANNEXATION PUBLIC HEARINGS

Mr. Paul Benson, Urban Planner, explained that purpose of these hearings is for the City to explain the plan for extending City services to the proposed annexation area, and to give all persons resident or owning property within the areas, and all residents of the City, the opportunity to be heard. The effective date of the annexations will be June 30, 2003.

Mr. Benson said that the State of North Carolina enables cities to grow by annexation, and provides incentives in the form of various shared revenues tied to population and street mileage. This state legislation is based on the proposition that strong cities are the basis of a strong state economy and essential to the continued economic development of the state, and that cities are the best units of government to meet the needs of urban areas. The state's intent is often summed up as "what is urban should be municipal."

In a growing urban area, annexation becomes an equity issue. This stems from the fact that the true "City of Asheville" (like most cities) is always growing and at any given time is larger than the area in the current city limits. North Carolina state law recognizes that the cities need to expand their boundaries to include this growth so that we don't end up in a situation where an increasingly relatively smaller number of citizens are financing the urban infrastructure used by a much larger population. The fact is that people living in close proximity to cities benefit from the cities, and state annexation law is designed to include these people in the costs and benefits of governing and servicing the City.

Mr. Benson then reviewed with Council the three statutory tests necessary to qualify areas for annexation. He explained the City's annexation strategy has been to target areas (1) that are clearly developed, (2) where water and sewer infrastructure is in place, (3) that improve the City's boundaries, (4) eliminate pockets of urban development that are essentially surrounded by the City or where all access is through the City; and (5) disburse the annexation areas geographically instead of just targeting one direction.

Mr. Benson then reviewed the various services that would be provided to the annexed areas. He then reviewed the following financial plan:

Revenue: Total ad valorem property tax revenue - $375,547; Total state utility tax revenue - $51,300; Total local option sales tax - $144,058; Total Powell Bill allocation - $37,393; and Total fees, permits, licenses and charges for services - $47,149. Total revenue - $655,447.

Annual recurring expenditures: Fire (rural fire department contracts expected to be in place for at least 5 years) - $64,564; Solid waste (tonnage fee) - $9,632; and Street lighting (electrical charge to CP&L) - $6,644. Total recurring expenditures - $80,840.

Annual capital expenditures: Water line improvements - $310,000; Sewer line improvements - $101,000; Solid waste (economic loss compensation for private solid waste haulers) - $25,920; Rollout containers - $12,040; Street signs - $1,599; Street repair - $2,500; and Street lighting - $2,307. Total one-time annual capital expenditure - $455,366.

Mr. Benson then reviewed with Council a chart of how Asheville is growing in comparison with other cities. It showed that Asheville's growth through annexation is 65%.

City staff responded to various questions from Councilman Dunn relating to the City's ability to provide faster police response, solid waste collection services and street maintenance services to the proposed annexed areas.

A. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE LEICESTER HIGHWAY AREA

Mayor Worley opened the public hearing at 5:35 p.m.

Mr. Benson explained the Leicester Highway area – This is a one-mile corridor along Leicester Highway. This has 68 lots, is 64 acres, and has an estimated population of 113. It has a mixture of commercial and residential development and provides a more rational City boundary. Current boundary excludes a pocket on east side of the highway. This area meets all three qualifying tests. There is a one-time capital cost of $160,000 for improvements in fire protection water service.

Mr. Mike Anders, resident on Old County Home Road, spoke against the annexation in that he could not understand why the City wanted to annex only one side of Old County Home Road. He felt it wasn't fair that one side of the road will get free street lights and the other side would have to pay for it. Also, he felt they will never get sidewalks and there will be confusion in providing police and fire services.

Ms. Laura Hopper, property owner on Smile Avenue, felt that the Unified Development Ordinance is a random set of guidelines, which increases the cost of development.

454

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner Paul Benson and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 5:47 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on June 25, 2002.

B. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE SHERWOOD HEIGHTS AREA

Mayor Worley opened the public hearing at 5:47 p.m.

Mr. Benson explained the Sherwood Heights area – This is a subdivision in North Asheville. This is the only pocket of development out of the City in this area and their only access is through the City of Asheville. This has 50 lots, is 97 acres and a population of 73. This area meets two of the qualifying tests.

Mr. Bruce Stirling, resident on Robinhood Road, felt that the residents in the Sherwood Heights area would not be receiving better service if annexed. They are happy with what they have. He asked that in the future, Council strongly consider whether they are inappropriately skewed toward annexation as a revenue base rather than other methods of tax revenue.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner Paul Benson and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 5:50 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on June 25, 2002.

C. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE HUNTINGTON-CHASE AREA

Mayor Worley opened the public hearing at 5:50 p.m.

Mr. Benson explained the Huntington Chase area – This is a new subdivision in Haw Creek and forms isolated pocket out of the City. Their only access is through the City of Asheville. This has 41 lots, is 63 acres and a population of 68. This area meets two of the qualifying tests. There is a one-time capital cost of $105,000 for some sewer and fire protection water service improvements, which are planned.

Mr. Benson said that City staff will ask Council to amend the Annexation Services Plan on June 25, 2002, to eliminate a 12-acre tract classified agriculture vacant. Staff initially looked at including it for just boundary purposes, however, in line with our intent not to include vacant and agriculture land, staff is recommending that the Plan be amended to exclude this property.

Ms. Nancy Williams, resident in Huntington-Chase, felt that for City Council to annex any areas at this time is insensitive to the individuals involved. She felt that Council should consider staff's recommendations only as one source of information and then take that information and overlay the human component.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner Paul Benson and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 5:56 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on June 25, 2002.

D. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF A PORTION OF BELL ROAD

Mayor Worley opened the public hearing at 5:56 p.m.

Mr. Benson explained the Bell Road area – This is a section of Bell Road between two existing sections of the City in Haw Creek. There is currently a service delivery problem. This has 14 lots, 22 acres and a population of 32. This area meets one of the qualifying tests. There is a one-time capital cost of $116,000 for fire protection water service improvements, which are planned.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner Paul Benson and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 5:57 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on June 25, 2002.

E. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE FOREST LAKE AREA

Mayor Worley opened the public hearing at 5:57 p.m.

Mr. Benson explained the Forest Lake area – This is a large subdivision in South Asheville off of Sweeten Creek Road. Its access is only through the City. This has 128 lots, is 53 acres and a population of 250. This area meets all three qualifying tests.

Ms. Delores Constantino, resident of Forest Lake Subdivision, said the City would annex regardless of whether they have services to offer or not. They have adequate services in their subdivision and will not benefit from being annexed. Single parents, widows and retired senior citizens will feel the overburden of increase in taxes. She felt that if Asheville continues to grow that crime will increase and it will be a less desirable place to live. The City should strive to take care of existing residents before trying to annex more. She stressed that the City has nothing to offer Forest Lake residents except higher taxes.

Mr. Dennis Seeney, President of the Forest Lake Homeowners Association, presented City Council with a petition containing 180 signatures asking Council to vote against annexation of the Forest Lake Subdivision. He felt that now is not a good time for forced participation. He said the City doesn't have anything to offer the residents. The only benefit for him personally would be solid waste collection and after calculating expenses, he feels it would be a net loss of over $800 annually for him to become an Asheville citizen.

Mr. Stephen Galatioto, resident on Glen Woods Court, felt that the residents paid for all the work to be done in their subdivision and then the City comes in and takes over. He felt that it's time the City work with what they have or do less with what they currently have.

Mr. Jeff Grimm, resident on Goldfinch Lane, felt the City cannot provide better police protection service by asking the department to cover more territory with the same amount of officers.

Ms. Peggy Lyle, resident on Forest Lake Drive, stressed how annexation will double her taxes on an already stretched monthly budget.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner Paul Benson and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 6:15 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on June 25, 2002.

F. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE MILL STONE AREA

Mayor Worley opened the public hearing at 6:15 p.m.

Mr. Benson explained the Mill Stone area – This is a subdivision off Round Top Road and is in a corner formed by the City limits. This has a population of 51. This area meets all of the three qualifying tests. There is a one-time capital cost of $30,000 for some sewer improvements, which are planned.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner Paul Benson and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 6:16 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on June 25, 2002.

G. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE KENSINGTON-WINDSOR AREA

Mayor Worley opened the public hearing at 6:16 p.m.

Mr. Benson explained the Kensington-Windsor area – This is a large residential area off Sweeten Creek Road and Mills Gap Road. It includes two apartment complexes (Kensington Place and Pine Ridge Apartments) and the Windsor Park Subdivision. This has 30 lots, is 67 acres and has a population of 500. This area meets one of the qualifying tests.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner Paul Benson and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 6:17 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on June 25, 2002.

On behalf of City Council, Mayor Worley thanked all speakers and stressed that all of Council approach annexation seriously and will recognize their obligations to the entire City of Asheville.

Upon inquiry of Vice-Mayor Bellamy, City Attorney Oast explained the County representation on the City's Planning & Zoning Commission and the Board of Adjustment. He said that County's representatives vote on issues within the City of Asheville, even if they live in the extraterritorial jurisdiction area.

Police Chief Will Annarino responded to questions from Vice-Mayor Bellamy regarding 911 calls.

Upon inquiry of Vice-Mayor Bellamy, City Manager Westbrook explained how the Unified Development Ordinance was formed, noting that it was not a new document adopted in 1997 – just a compilation of development rules and regulations. He felt that less than 5% was new land use planning techniques that were not available in prior years.

At the request of Vice-Mayor Bellamy, City Attorney Oast said that in order to get water service in other cities, a developer has to petition the City for a voluntary annexation. In Asheville we don't have that degree of control.

After discussion, Councilman Dunn felt that the City should earmark the revenue brought in from annexation for specific things, like streets and sidewalks.

H. PUBLIC HEARING TO CONSIDER A REQUEST TO APPLY THE MANUFACTURED HOUSING OVERLAY ZONING CLASSIFICATION TO FIVE LOTS ZONED RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT AND RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT LOCATED ON POWERS ROAD AND GORMAN BRIDGE ROAD

ORDINANCE NO. 2926 - ORDINANCE APPLYING THE MANUFACTURED HOUSING OVERLAY ZONING CLASSIFICATION TO FIVE LOTS ZONED RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT AND RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT LOCATED ON POWERS ROAD AND GORMAN BRIDGE ROAD

Mayor Worley opened the public hearing at 6:37 p.m.

Mr. Carter Pettibone, Urban Planner, said that this is the consideration of an ordinance to apply Manufactured Housing Overlay District zoning to five properties located on Powers Road. This public hearing was advertised on May 31 and June 7, 2002.

The applicants, represented by Ricky Norton, are requesting the overlay zoning district to allow the construction of manufactured homes on the vacant lots within the proposed area, which is 7.02 acres (PIN Nos. 9639.05-09-3756, 9730.17-00-3012, 4135, 0315, and 6370). Two of the five properties are currently zoned RS-2, while the remaining three are RM-8. These properties are located within the extraterritorial jurisdiction (ETJ), in an area dominated by single-family residential land uses. Based upon a field investigation of the surrounding area, a mixture of stick-built, brick, and manufactured homes was observed, with 9 of the 20 immediately surrounding properties occupied by manufactured homes. Under "Guidelines for Identifying Manufactured Housing Districts," as listed in Section 7-9-4 of the Unified Development Ordinance, there are four criteria that shall be used in identifying potential areas for Manufactured Housing Overlay districts. The first criteria only applies during the development process, while the second criteria states that "Manufactured homes should be located in the area prior to its designation and at least 20% of the homes in area should be manufactured homes", the third criteria states that "vacant land should be available upon which to locate manufactured homes", and the fourth criteria states that "The area should be a minimum of five acres". Based on the information submitted by the applicant and a field investigation of the project and the surrounding areas, staff has determined at least 20% of the homes in the proposed area are manufactured homes, there is vacant land on which manufactured homes could be located, and the project area exceeds five acres (7.02 acres). In addition, the proposed overlay district would allow the establishment of manufactured homes on the lots, while the underlying zoning districts of RS-2 and RM-8 would still regulate density and setback requirements for the homes on the lots.

The Planning and Zoning Commission voted 6-1 to recommend approval a manufactured housing overlay for the five properties on Powers Road. The Planning and Development staff recommends approval of the requested rezoning as well.

Mr. Ricky Norton, property owner, spoke in support of the rezoning.

Mr. John Howard Olesky, resident on French Broad Street, spoke about police tactics.

Mayor Worley announced a short break.

Mayor Worley closed the public hearing at 7:10 p.m.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Peterson moved for the adoption of Ordinance No. 2926. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 19 - PAGE 500

I. PUBLIC HEARING ON THE FISCAL YEAR 2002-03 ANNUAL OPERATING BUDGET

Mayor Worley opened the public hearing at 7:12 p.m.

Budget Director Ben Durant said that the Fiscal 2002/2003 Annual Operating Budget and Capital Improvements Program was presented to City Council on May 13, 2002. On June 4, 2002, City Council held a worksession. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, a summary of the Budget along with a notice of the public hearing was published on May 31 and June 7, 2002. Adoption of the budget ordinance is scheduled for June 27, 2002, at the City Council meeting.

The Fiscal Year 2002/2003 Annual Operating Budget is balanced with an Ad Valorem Tax rate of $0.51 per $100 of assessed value, which is lower than the current rate $0.56 per $100 as a result of re-valuation. Minor service reductions are included in this budget to offset potential state cuts to local reimbursement revenues.

A copy of the budget is available for public inspection in the City Clerk's office. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, the budget may be changed by City Council in any way before adoption. It may also be changed by budget amendment after adoption with the only exception being the ad valorem tax rate, which cannot be changed once adopted.

The following residents spoke in support of not closing the Burton Street Community Center:

Mr. Dwayne Barton, resident of West Asheville
Ms. Gloria Johnson, President of the Burton Street Community Center (presented Council with a petition containing 113 names)
Louis Grant, Pastor of Mt. Carmel Baptist Church in West Asheville
Ms. Anna Marie Smith
Ms. Alison Smith
Ms. Mary Thomas, resident on Bryant Street

City Manager Westbrook explained that the recommended budget does not include closing any community center, however, in the unlikely event that the State withholds franchise reimbursement fees in the amount of $4.2 million, the Burton Street Community Center is just one of many necessary cuts.

Mr. Water Plaue hoped that City Council would deal with cuts fairly and objectively.

Captain Michael Knisely, resident of West Asheville and Chief of the Executive Council of the Asheville Firefighters Association, presented City Council with a proposal for the creation of a special separation allowance for career firefighters. He showed how implementing the proposal would have immediate savings, in addition to savings in the future. As a result of this information, it was the consensus of City Council to place this proposal on the next worksession agenda for further information.

Mayor Worley closed the public hearing at 7:44 p.m.

Mayor Worley said that adoption of the budget has been scheduled for Thursday, June 27, 2002, at 3:00 p.m. in the Council Chamber, located on the 2nd Floor of the City Hall Building.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

Widening of I-240

At the request of Councilman Peterson and Councilwoman Jones, and after discussion of whether or not to take a formal vote at the June 18, 2002, worksession, it was the consensus of City Council to add the topic of I-240 improvements on the June 18, 2002, worksession agenda. Said topic will include review of a draft resolution prepared by Councilman Peterson giving direction to City staff as to what the sense of City Council stands with regard to the number of lanes on the I-26 connector. The public hearing by the Transportation Advisory Committee is scheduled for June 12, 2002, regarding their recommendation on the number of lanes and their final vote will be taken on June 20, 2002. Therefore, some form of Council direction is requested at Council's June 18, 2002, worksession.

Super Wal-Mart Public Hearing

After discussion, it was the consensus of City Council to hold the City Council public hearing on the Super Wal-Mart in the Council Chamber on June 25, 2002. Measures will be taken to assure that the process will be orderly and every effort will be taken to set up monitors and speakers for persons who will not be able to be promptly seated in the Chamber or in the First Floor North Conference Room.

As public comment is very important to City Council, a request will be made to those who wish to speak to adhere to time limits, not to repeat comments, present only relevant information, and to focus on the issues.

After discussion, it was the consensus of City Council to recess the June 25 meeting, if necessary, at approximately 11:00 p.m. At, or near that time, Council will then discuss when to reconvene or how they will proceed.

Bob Pressley

Councilman Dunn asked for City Council to honor Mr. Bob Pressley, a local NASCAR driver, for his contributions to our community.

VI. OTHER BUSINESS:

Lawsuits

The City filed a lawsuit on April 19, 2002, against Miranda Lynn and Jerry Rhew. The nature of the proceeding is a complaint for medical expenses resulting from injuries sustained by a City employee in a motor vehicle accident with defendants. This matter will be handled by attorney outside the City Attorney's Office.

The City received the following Complaint on June 4, 2002, filed by Michael T. and Rose Dixon. The nature of the proceeding is alleged denial of building and zoning permits for quadraplex at Morningside Park pursuant to approved site plan prior to property rezoning from R-3 to R1-A. This matter will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Dennis Seeney, resident of Forest Lake Subdivision, felt he could support annexation if he could be assured his money would be used for something worthwhile, like keeping the Burton Street Community Center open.

Mr. Walter Plaue asked City Council to consider forming a task force to review the Unified Development Ordinance. He felt it has done irreparable harm in terms of affordable housing in the City and needs to be more user-friendly.

Ms. Rebecca Campbell, resident in West Asheville, felt the Unified Development Ordinance needed to be reviewed as well. In addition, she felt the public hearing on the Super Wal-Mart should be moved to a larger venue.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:32 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

462

Tuesday – June 18, 2002 - 3:00 p.m.

Worksession

Present: Vice-Mayor Terry M. Bellamy, Presiding; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Mayor Charles W. Worley

CONSENT:

Clerk to Advertise for Upset Bids on Disposal Parcel 218 on Water Street

Summary: The consideration of a resolution establishing the minimum price and directing the City Clerk to advertise an offer to purchase for upset bids regarding Disposal Parcel 218 on Water Street.

Louise Gardner has submitted a bid for the purchase of Disposal Parcel 218 in the East Riverside Redevelopment Project in the amount of $1,500.

Disposal Parcel 218 is a residential lot near the corner of Water Street and Camby Street comprising 4,350 square feet. The assessed tax value on the lot is $8,300. Disposal Parcel 218 has been in the Community Development inventory for over 20 years and no previous bids have been received. The lot has been "shopped" to several non-profits and individuals and the upset bid process will determine the actual market value of the lot.

The bid from Louise Gardner for Disposal Parcel 218 includes the proposal to incorporate the lot with her property at 36 Water Street.

Approval of the resolution will establish the minimum price for Disposal Parcel 218 at $1,500 and initiate the sale of the property through the upset bid process as provided in N. C. G. S. 160A-269.

Community Development staff recommends adoption of the resolution establishing the minimum price and directing the City Clerk to advertise an offer to purchase for upset bids regarding Disposal Parcel 218 on Water Street.

Abandonment of Waterline Easement on Buckstone Place

Summary: The consideration of a resolution abandoning a waterline easement and authorizing the City Manager to execute documents to effect same.

In 2000 and 2001, during construction and development of the Spring Hill Suites Hotel on the north side of Tunnel Road, a waterline was damaged, resulting in its relocation by the developer on the same property, but in a different place. Appropriate easements and agreements have been executed for the relocated waterline, and the property owners are now requesting the City to abandon and release the old water line easement.

The Water Resources Department advises that it has no further use for the waterline (which will remain in the ground, but not be used) or the easement. The Water Authority's attorneys have reviewed this request, and concur. The resolution declares the waterline and easement to be abandoned, and authorizes the City Manager to execute appropriate documents to effect the abandonment.

Adoption of the resolution is recommended.

Vice-Mayor Bellamy asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

AIRPORT PROPERTY REQUEST FOR PROPOSALS

Director of Economic Development Mac Williams said that this is the consideration of a resolution authorizing the City to issue a Request for Proposals (RFP) to developers soliciting proposals for development of city-owned land located across from Asheville Regional Airport.

The City owns a 13.08-acre parcel located directly across from the Asheville Regional Airport. A portion of the site had previously been used to house a small office building for the Federal Aviation Administration. The building was destroyed by fire and has since been demolished and the site cleared.

The location of the parcel in proximity to the Airport and I-26, the frontage and access off Airport Road, and the nature of existing development around the site make the parcel a valuable asset. Thus the City objectives (as stated in the proposed RFP) are *"to leverage this asset to enhance the City tax base, generate income to support other economic development initiatives, and establish high development standards for this important City corridor."*

The proposed RFP has been created to provide guidance to developers interested in partnering with the City to develop the site. In accordance with City procedure, the RFP has been circulated internally among department directors.

Staff recommends City Council authorize the City to issue the Request for Proposals as drafted.

Vice-Mayor Bellamy asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

COUNCIL REVIEW OF I-240 IMPROVEMENTS

Using a page from the Florida Highway Capacity Manual and information regarding traffic volume, projected traffic demand and concerns for air quality, Councilman Peterson explained why he was requesting City Council consideration and adoption of the following resolution: "City Council commits to cooperate with the I-26 Connector Project to the fullest possible extent and request the Federal Highway Administration, the N.C. Dept. of Transportation and the Transportation Advisory Committee of the Asheville Urban Area Metropolitan Planning Organization to (1) expedite the construction of the new I-26 Connector bridge over the French Broad River to the earliest possible date by concurrent study and design of the various lane options, the possible interchange alternatives, and the Connector bridge alternatives; or by reducing the number of interchange alternatives that would need to be studied in an Environmental Impact Statement (EIS); (2) recognize that it is the preference of Asheville City Council that any widening of I-240 through west Asheville be limited to six lanes; (3) study in the EIS for I-240 through west Asheville the options of varying cross sections for less than eight lanes; (4) as part of the EIS or other planning processes, provide for the City of Asheville possible options to reduce traffic demand in the I-26/240 corridor; and (5) minimize the future right-of-way purchases needed to accomplish this project so as to reduce the negative impact on the businesses and affordable housing." He said that since the Transportation Advisory Committee will be making their recommendation to the N.C. Dept. of Transportation on June 20, 2002, he requested City Council take action on the drafted resolution at this meeting.

Each Council member explained their comments/concerns with regard to adopting the resolution, and after discussion mostly surrounding procedure, Councilman Peterson moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilwoman Jones. Said motion failed on a 3-3 vote, with Vice-Mayor Bellamy, Councilman Peterson and Councilwoman Jones voting "yes" and Councilman Dunn, Councilman Ellis and Councilman Mumpower voting "no."

Councilman Mumpower felt that it might be beneficial to arrange a trip to Raleigh to visit N.C. Dept. of Transportation representatives on this very important project.

SPECIAL RETIREMENT SEPARATION ALLOWANCE PROPOSAL FOR FIREFIGHTERS

City Manager Westbrook said that he has investigated the special retirement separation allowance proposal for firefighters that Fire Captain Mike Knisely presented at the budget public hearing on June 11, 2002. He explained the history of the Asheville Firefighter social security contribution in which they voted not to join the Social Security Retirement Plan in 1953. Referendums were held again in 1978, 1988 and 1992 and each time firefighters voted not to join the Plan. He said that City Council must approve reimbursement of the City of Asheville employer contribution prior to the State entering into an agreement to accept the firefighters under the system and the estimated cost to the City annually would be $500,000. If instituted, the majority of the Fire Department would have to vote in favor of joining the system and they would begin contributing 7.65% of their gross pay as the required employee match.

He said that even though an actuarial study would be necessary, a ballpark estimated cost of instituting the firefighter special separation allowance would be $285,000. He said that if the benefit is adopted, it in no way relieves the City of responsibility to provide employer Social Security contribution if the benefit is later approved. Also, since there is no "catch-up" provision related to this benefit, based on the number of retirees within the next five to seven years, the cost of this program to the City may increase significantly.

City Manager Westbrook explained how based upon an annual salary of a firefighter upon 30-year retirement, their projected retirement earning would equate to 62% of the employee's annual gross salary.

He said that whenever a special retirement plan is set up, an actuarial study should be performed. An estimated cost would be approximately $1-2,000.

After an investigation of the proposal and due to the current budget crisis, City Manager Westbrook recommended that the City not enter into this proposal for a special retirement separation allowance for firefighters. He stressed that firefighters are valuable City employees and have a good retirement plan, however, this supplemental but Council needs to be careful about setting a precedent in allowing allowance would make it better.

City Manager Westbrook said that he would like to look at several fringe benefits items regarding all City employees, i.e., raising the 401-K to 5%, pay and classification issues, etc.

Fire Captain Mike Knisely spoke in support of the plan. He realized that the City is in a budget crisis, however, he explained why he felt there was a savings to the City. He said police officers receive a special separation retirement allowance, but their allowance was mandated by the State.

After discussion from Council about possible compensation to firefighters, the possibility of firefighters reconsidering joining the Social Security Retirement Plan, and if new hires can be required to join the Plan, it was the consensus of Council to have the City Manager let them know before the end of August the cost of an actuarial study and then consider this proposal again at the retreat when City Council sets it's goals and priorities.

Vice-Mayor Bellamy announced a short recess.

BOARDS AND COMMISSIONS

It was the consensus of City Council to (1) reappoint Arlis Queen to the WNC Regional Air Quality Agency; (2) reappoint Rhett Grotzinger and Albert Anderson to the Airport Authority; (3) reappoint Jimmy Hungerford and Betty Budd to the Citizens-Police Advisory Committee and readvertise for the East, Central and North representatives; (4) reappoint Denise Goodson to the Civic Center Commission and interview Leonard Jones and Max Alexander. In addition, Kathryn Nash is to be a candidate, but no interview is necessary; (5) reappoint Leslie Hennessee to the Crime-Stoppers Board of Directors and to interview Bill McGuire; (6) readvertise for one month the vacancies on the Historic Resources Commission; and (7) reappoint Ann Babcock and Jim Drummond to the Recreation Board; and to appoint Chuck Cloninger to the Board. In addition, City Council would like to interview Christopher Barkley.

MISCELLANEOUS

Councilwoman Jones asked City Council to reconsider changing the venue of the June 25, 2002, City Council public hearing on the Super Wal-Mart conditional use permit. After discussion, Councilwoman Jones moved to suspend the rules to take formal action at this meeting to change the venue of the June 25, 2002, City Council meeting. This motion was seconded by Councilman Peterson. Said motion failed on a 3-3 vote, with Vice-Mayor Bellamy, Councilwoman Jones and Councilman Peterson voting "yes" and Councilman Dunn, Councilman Ellis and Councilman Mumpower voting "no."

Councilman Dunn asked that the City Council recognize Bob Pressley (racing icon) for his contributions in our community.

At the request of Councilman Dunn, City Manager Westbrook said that he would provide Council with a budget report showing actual expenditures through May of 2002.

ADJOURNMENT:

Vice-Mayor Bellamy adjourned the meeting at 5:41 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

466

Tuesday – June 25, 2002 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Councilman Mumpower gave the invocation.

I. PROCLAMATIONS:

A. WELCOME OF DELEGATION FROM OUR SISTER CITY - SAUMUR, FRANCE

Mayor Worley welcomed Claude and Liliane Besomes; Andrea and Marie-Claude Daheuille; Jean and Josiane Lemair; and Michel and Colette Norman, all volunteers from ASRI (Association {of} Saumur {for} Relations International) and stated that the City of Asheville was delighted to have the delegation visit our area. The delegation thanked Mayor Worley and presented the City with a gift.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JUNE 11, 2002, AND THE WORKSESSION HELD ON JUNE 18, 2002

B. RESOLUTION NO. 02-105 - RESOLUTION ESTABLISHING THE MINIMUM PRICE AND DIRECTING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE FOR UPSET BIDS FOR DISPOSAL PARCEL 218 ON WATER STREET

Summary: The consideration of a resolution establishing the minimum price and directing the City Clerk to advertise an offer to purchase for upset bids regarding Disposal Parcel 218 on Water Street.

Louise Gardner has submitted a bid for the purchase of Disposal Parcel 218 in the East Riverside Redevelopment Project in the amount of $1,500.

Disposal Parcel 218 is a residential lot near the corner of Water Street and Camby Street comprising 4,350 square feet. The assessed tax value on the lot is $8,300. Disposal Parcel 218 has been in the Community Development inventory for over 20 years and no previous bids have been received. The lot has been "shopped" to several non-profits and individuals and the upset bid process will determine the actual market value of the lot.

The bid from Louise Gardner for Disposal Parcel 218 includes the proposal to incorporate the lot with her property at 36 Water Street.

Approval of the resolution will establish the minimum price for Disposal Parcel 218 at $1,500 and initiate the sale of the property through the upset bid process as provided in N. C. G. S. 160A-269.

Community Development staff recommends adoption of the resolution establishing the minimum price and directing the City Clerk to advertise an offer to purchase for upset bids regarding Disposal Parcel 218 on Water Street.

RESOLUTION BOOK NO. 27 – PAGE 188

C. RESOLUTION NO. 02-106 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ISSUE A REQUEST FOR PROPOSALS FOR THE DEVELOPMENT OF LAND ON AIRPORT ROAD

Summary: The consideration of a resolution authorizing the City to issue a Request for Proposals (RFP) to developers soliciting proposals for development of city-owned land located across from Asheville Regional Airport.

The City owns a 13.08-acre parcel located directly across from the Asheville Regional Airport. A portion of the site had previously been used to house a small office building for the Federal Aviation Administration. The building was destroyed by fire and has since been demolished and the site cleared.

The location of the parcel in proximity to the Airport and I-26, the frontage and access off Airport Road, and the nature of existing development around the site make the parcel a valuable asset. Thus the City objectives (as stated in the proposed RFP) are *"to leverage this asset to enhance the City tax base, generate income to support other economic development initiatives, and establish high development standards for this important City corridor."*

The proposed RFP has been created to provide guidance to developers interested in partnering with the City to develop the site. In accordance with City procedure, the RFP has been circulated internally among department directors.

Staff recommends City Council authorize the City to issue the Request for Proposals as drafted.

RESOLUTION BOOK NO. 27 – PAGE 189

D. RESOLUTION NO. 02-107 - RESOLUTION ABANDONING WATERLINE AND EASEMENT ON BUCKSTONE PLACE AND AUTHORIZING THE CITY MANAGER TO EXECUTE INSTRUMENTS EFFECTING SAID ABANDONMENT

Summary: The consideration of a resolution abandoning a waterline easement and authorizing the City Manager to execute documents to affect same.

In 2000 and 2001, during construction and development of the Spring Hill Suites Hotel on the north side of Tunnel Road, a waterline was damaged, resulting in its relocation by the developer on the same property, but in a different place. Appropriate easements and agreements have been executed for the relocated waterline, and the property owners are now requesting the City to abandon and release the old water line easement.

The Water Resources Department advises that it has no further use for the waterline (which will remain in the ground, but not be used) or the easement. The Water Authority's attorneys have reviewed this request, and concur. The resolution declares the waterline and easement to be abandoned, and authorizes the City Manager to execute appropriate documents to effect the abandonment.

Adoption of the resolution is recommended.

RESOLUTION BOOK NO. 27 – PAGE 190

E. RESOLUTION NO. 02-108 - RESOLUTION APPOINTING A MEMBER TO THE WNC REGIONAL AIR QUALITY AGENCY

Summary: The consideration of appointing a member to the WNC Regional Air Quality Agency.

The term of Arlis Queen, as a member on the WNC Regional Air Quality Agency, expires on July 1, 2002.

On June 18, 2002, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Mr. Queen to serve an additional six year term, term to expire July 1, 2008, or until his successor has been appointed.

Staff recommends City Council appoint a member to the WNC Regional Air Quality Agency.

RESOLUTION BOOK NO. 27 – PAGE 191

F. RESOLUTION NO. 02-109 - RESOLUTION REAPPOINTING MEMBERS TO THE ASHEVILLE REGIONAL AIRPORT AUTHORITY

Summary: The consideration of appointing members to the Asheville Regional Airport Authority.

The terms of Rhett Grotzinger and Albert Anderson, as members on the Asheville Regional Airport Authority, expire on June 30, 2002.

On June 18, 2002, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Mr. Grotzinger and Dr. Anderson to each serve a four year term respectively, terms to expire June 30, 2006, or until their successors have been appointed.

Staff recommends City Council appoint members to the Asheville Regional Airport Authority.

RESOLUTION BOOK NO. 27 – PAGE 192

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilwoman Jones moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

III. UNFINISHED BUSINESS:

RESOLUTION NO. 02-110 - RESOLUTION AMENDING THE 2002 ANNEXATION SERVICES PLAN TO REFLECT REDUCTION IN THE HUNTINGTON-CHASE ANNEXATION AREA

Urban Planner Paul Benson said that this is the consideration of a resolution amending the Annexation Services Plan for the 2002 annexations to reflect reduction in one of the annexation areas.

In adopting an annexation ordinance, the City has the authority to annex all or some of an area proposed for annexation, as long as that area qualifies for annexation. The City may also amend the services plan, as long as the requirements for providing service to the annexation areas continue to be met.

At the public hearing on June 11, 2002, staff recommended that the size of the Huntington Chase Annexation Area be reduced by dropping one of the larger lots out. The lot is classified for tax purposes as "agricultural vacant," is currently unimproved, and is one of two "non-urban" areas in Huntington Chase. It is not part of the Huntington Chase subdivision. The effect of this change is that it causes the qualifications of the remaining area to improve somewhat, but does not cause the area to qualify under any additional tests.

Adoption of the resolution is recommended.

Upon inquiry of Vice-Mayor Bellamy, City Attorney Oast said that as long as the Annexation Services Plan does not show the Huntington Chase Area, or any other area, as qualifying under any additional statutory tests, no additional public hearing is required for this amendment to the Plan.

Councilman Dunn asked if the City could postpone for two weeks taking action on the amending the Plan in order to give Huntington-Chase area residents the opportunity to review the information to see if they find any errors with said amendment. City Manager Westbrook responded by saying that the Buncombe County Tax Office sends out property tax bills and requests the information be provided to them prior to June 30 for timely processing.

Councilman Peterson asked if Council could delay adoption of the Plan amendment and annexation ordinances until their scheduled meeting on June 27, 2002. City Manager Westbrook explained that the Annexation Services Plan is an integrated plan which incorporates information on all proposed seven annexation areas. If Council chooses not to annex one area, the Plan would need to be amended again.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Peterson moved to adopt Resolution No. 02-110. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 193

ANNEXATION AREAS

Councilman Peterson moved to postpone action on adopting the following proposed seven annexation areas until June 27, 2002: Leicester Highway area, Sherwood Heights area, Huntington-Chase area, portion of Bell Road, Forest Lake area, Mill Stone area and Kensington-Windsor area. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT TO ALLOW FOR CONSTRUCTION OF 379,000 SQUARE FEET OF RETAIL SPACE FOR PHASE 1 OF THE DEVELOPMENT; AND REZONING OF A PORTION OF PROPERTY LOCATED AT 437 SWANNANOA RIVER ROAD, FORMERLY SAYLES BILTMORE BLEACHIERS, FROM

COMMERCIAL INDUSTRIAL DISTRICT TO URBAN VILLAGE DISTRICT FOR PHASE 2 OF THE DEVLEOPMENT

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. This matter does not require a conditional use rezoning, which is a legislative act, but it does require the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant or deny the conditional use permit. If the permit is granted, the second vote will be to grant the rezoning to Urban Village District. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

Mayor Worley said that Council would be discussing the issuance of the conditional use permit for a large national chain. Council's review of the request is limited to issues that directly affect the City of Asheville and its public services and infrastructure. Many citizens may have strong feelings about corporate hiring and purchasing practices, creation of jobs, wage structure for employees, economic benefits to Asheville, compensation of executives, corporate public involvement in the community, other potential uses for the property and similar issues. While this Council respects the views and concerns, they are not relevant to our decision about the issuance of the conditional use permit. Because they are not relevant, their discussion will serve no purpose other than to distract our attention away from the many complex issues we are charged with addressing, as well as needlessly prolonging the meeting. Consequently, he asked that these issues not be included in comments. He would remind the public of this request if the remarks stray into these areas. He asked that comments not be repeated as unnecessary redundancy can needlessly prolong a hearing and likewise distract Council from the issues that it must consider.

Mayor Worley then reviewed the order of the hearing itself and reviewed the standard time limitations. He reminded Council that the meeting will recess at 11:00 p.m., if necessary, and reconvene on another date.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:35 p.m.

Mr. Gerald Green, Chief Planner, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Green said that this is the consideration of a motion to approve a Conditional Use Permit as outlined in the Unified Development Ordinance (UDO) to allow development of approximately 379,000 square feet of retail space on approximately 60 acres in Phase I of the development located at 437 Swannanoa River Road at the site of the former Sayles Biltmore Bleacheries; and to consider the rezoning of a portion of the site (approximately 19 acres) from Commercial Industrial District to Urban Village District in Phase II of the development.

Level III site plans for the development at the Sayles Biltmore Bleacheries located at 437 Swannanoa River Road (PIN No. 9658.15-52-4618) were initially submitted March 29, 2002. No plans have been submitted for Phase III of the development. The Technical Review Committee (TRC) reviewed these plans at their April 15, 2002, meeting. The submitted plans were found to be incomplete and TRC continued action on the request to their May 20 meeting. Revised plans were submitted May 6, 2002, that included the information needed for TRC action. At their May 20, 2002, meeting, the TRC recommended approval with conditions of the Level III site plan for the development of the Sayles Biltmore Bleacheries property. Many of the comments made by TRC identify technical requirements that must be addressed by the applicant when detailed site plans are submitted following political approval of the project by City Council.

The Planning and Zoning Commission reviewed the plans at their June 5, 2002, meeting. The Commission's meeting included a public hearing, during which significant public input was received regarding the proposed development. After receiving the public input, reviewing the plans, and considering the request, the Commission, with a vote of 4-2, to recommend that the Conditional Use Permit be issued with conditions for Phase I, and with a unanimous vote that Phase II be rezoned to Urban Village District. Efforts are underway by the project's design team to address the conditions identified by TRC and the Planning and Zoning Commission.

The City of Asheville River District Design Review Committee has reviewed the site plans and building designs. The applicant's design team worked with the Review Committee members and staff to develop building designs that would comply with the River District Design Guidelines. By a unanimous vote, the site plans and building designs have received conditional approval from the River District Design Review Committee.

The proposed site for the development is the former Sayles Biltmore Bleacheries property located at 437 Swannanoa River Road and consists of approximately 79 acres (City Exhibit 4). The property is split zoned, with a portion of it zoned River District and a portion zoned Commercial Industrial District (City Exhibit 3 – Location Map). Access to the property is currently via Swannanoa River Road, a two-lane N. C. Dept. of Transportation (NCDOT) road with a maximum capacity of 14,000 vehicles per day. As part of the development, a new road providing access from the project site to Fairview Road is proposed.

The proposed development will consist of three (3) phases, with the site plans providing information on the first two (2) phases. Phase I (approximately 60 acres) will consist of a major retail development that will have a total of 367,876 square feet of floor area and 1,839 parking spaces (City Exhibit 3 – Conceptual Site Plan). The following will be included in Phase I:

- A 219,622 square foot retail store with 1,095 parking spaces;
- An 88,474 square foot retail store with 442 parking spaces;
- 32, 000 square feet of retail shops with 152 parking spaces;
- 27,780 square feet of retail shops with 139 parking spaces; and
- Two outparcels, one at 1.31 acres and one at 1.41 acres.

A new 4-lane bridge crossing the Swannanoa River and the new access road that will provide access from the project site to Fairview Road near its intersection with I-240 and Stevens Street will be constructed in Phase I of the proposed development. Construction materials for the buildings in Phase I will include brick, quik-brik, and integral block. Building facades and roofs will be articulated and awnings will be used to help break up the massing of the buildings. The garden area will be fenced with a decorative metal fence. The parking areas will be heavily landscaped and the site will be buffered from Swannanoa River Road with a minimum 50' buffer.

Primary access to the site will be via Swannanoa River Road. A new 4-lane bridge will be constructed east (upstream) of the current bridge providing access to the site. The existing bridge will be demolished. Secondary access will be provided by a new 2-lane road that will link the development to Fairview Road. The new road will intersect Fairview Road at Stevens Street, west of the I-240/Fairview Road intersection. An unused railroad right-of-way and existing "tunnel" under I-240 will be used for the alignment of the new road.

The applicant is requesting Level III site plan review and issuance of a conditional use permit for the Phase I portion of the development to allow the development of approximately 379,000 square feet of retail space. Level III projects are conditional uses within the Commercial Industrial District. Conditional uses are uses, which, because of their unique characteristics or potential impacts on the surrounding neighborhood and/or the city as a whole require individual consideration of their location, design, configuration, and/or operation at the particular location proposed. In addition, this project must meet the supplemental development standards for large retail structures due to its size. The applicant appears to have met the applicable supplemental development standards.

The applicant is also requesting rezoning of the Phase II portion of the development of approximately 19 acres from Commercial Industrial District to Urban Village District. Phase II will provide a mix of retail, office, and residential uses in an Urban Village. Of the 19 acres in the proposed Urban Village, approximately 11 acres will be in residential uses and the remaining 8 acres will be occupied by retail/office uses. TRC review has indicated that the design of the Urban Village is not in complete accordance with the design standards for such developments. The proposed breakdown for the Urban Village is:

Residential

- 84 multi-family units
- 8 single family units
- 75 parking spaces

Retail/Office

- 115,042 square feet
- 172 parking spaces

An area adjacent to the Swannanoa River will be preserved as a park and the applicant proposes to convey this area to the City of Asheville for use as a public park. A greenway trail will be constructed along the river, through this park, and also proposed to be conveyed to the City for public use.

The Sayles Biltmore Bleacheries site has development constraints that make development or redevelopment of the site an expensive undertaking. A large scale project on this site will be necessary to overcome the constraints of the site. These constraints include (1) Access – The site is currently accessed by a narrow 2-lane bridge over the Swannanoa River. The current bridge is located downstream of the proposed bridge. Development on the site will require construction of a new bridge, which must meet federal flood standards of sufficient size to provide safe access to the site. (2) Building Rehabilitation or Demolition – The demolition or rehabilitation of the industrial buildings on the site is a major undertaking that will require significant investment. There are also environmental concerns resulting from the industrial use of the site that must be addressed. (3) Flood Designations of the Site – A large section on the site located in the northeast corner is designated as a floodway with no construction or fill permitted within a floodway. With a larger area designated as flood fringe, buildings must be elevated above the flood elevation if located in the flood fringe. Substantial cost is involved in complying with the flood protection standards that apply to the site.

The critical issues associated with the review of this project are stormwater and flood protection, traffic and design.

The applicant's proposal for handling stormwater involves the construction of stormwater holding ponds and the provision of some areas of pervious paving. Much of the project site is located within a designated flood hazard area, but the portion of the area to be developed currently is located within the designated floodway. The applicant is proposing to revise the floodway on the project site by providing storage areas for floodwaters. The floodway expansion areas will also serve as stormwater detention basins. To construct the floodway expansion areas, an area outside of the River Resource Yard (50' from the bank of the Swannanoa River) will be excavated to create a large holding area for floodwaters and stormwater runoff. The expansion areas will be approximately 10' to 15' deep, 50' to 125' wide, and 1100' long.

The site plan calls for a significant amount of paving in the areas currently designated as floodway. This results in a need to provide a compensating area that will contain floodwater on site and not result in a rise in the downstream flood elevations. Since an amount of land making up the floodway will be reduced, it is necessary to provide a deeper channel for containing the floodwater. Details of the plans to address stormwater and flood protection are addressed through the City's permitting process and the TRC conditions. The applicant's engineering consultant will present details and technical information regarding the measures planned to address the floodwaters.

The applicant is proposing the construction of a new bridge over the Swannanoa River to serve as a primary entrance to the proposed development (City Exhibit 5 – Proposed Overall Master Plan for Riverbend Marketplace). The proposed 4-lane bridge will be constructed upstream of the existing bridge. The main access road, which will be designed and constructed as a public street, will carry traffic through the development and will intersection Fairview Road at Stevens Street. The intersection of the proposed road and Fairview Road will serve as the secondary entrance to the proposed development. A Traffic Impact Analysis (TIA) was prepared for the proposed development. The TIA identifies traffic system improvements designed to mitigate the anticipated traffic impacts of the development.

A major concern identified that must be addressed prior to the approval detailed plans for the project is the traffic impact on Swannanoa River Road. Of the 17,000 weekday trips estimated to be generated by the proposed development, 10,700 or 63% will access the site from Swannanoa River Road. This impact has not been completely addressed due to the extensive study required to evaluate the viability of options for mitigating the impact. Four options for addressing this concern have been identified and are currently being studied by the applicant and by City staff. Selection of an alternative for addressing this concern has not been completed due to the need to get feedback from both the applicant and the NC Dept. of Transportation (NC DOT). The traffic issue for this proposed development is more complex than the traffic issue at the Gerber Road site due to the larger size of the development and the more integrate traffic patterns at the Tunnel Road site.

The third major issue to be considered in the review of this request is the design – both site and building design. The need to address the flood area designation of a portion of the site and the needs of the proposed tenants for number and location of parking spaces heavily influence the site design. The site design may change as a result of the need to accommodate the traffic impact mitigation. Building design for all buildings in Phase I of the development has been reviewed by the River District Design Review Committee for compliance with the River Design Guidelines. The Design Review Committee approved the design with conditions.

Mr. Green then showed pictures of building elevations (City Exhibit 6, City Exhibit 7 and City Exhibit 8).

In addition to the development standards for the zoning district in which they are located, conditional uses must meet certain general conditions in order to ensure that the use is appropriate at a particular location and to ensure protection of the public health, safety, and welfare. The general conditions, which apply to all conditional uses, can be found in Section 7-16-2 (c) of the UDO. City Council must make seven findings based on the evidence and testimony received at the public hearing or otherwise appearing in the record of the case. The findings are listed below. Following each finding is technical information from staff to assist Council in making these findings.

1. That the proposed use or development of the land will not materially endanger the public health or safety;

   The project received technical approval from the Water Resources Department, the Fire Department, Metropolitan Sewerage District, Engineering, and other City departments. The project must meet the technical standards set forth in the UDO, the Asheville Standard Specifications and Details Manual, the N. C. Building Code and other applicable laws and standards that protect the public health and safety. Proposed stormwater management control measures exceed City standards (the stormwater detention basins will accommodate the 100 year storm).

2. That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant;

   The project is proposing the minimum grading necessary to develop the property with this type of intense use. A significant buffer will be preserved, including an area with mature trees that define the character of the area.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property;

   The size of the tract of land allows room for adequate buffering to alleviate impacts of noise and lighting on adjacent properties. Traffic impacts are an important consideration and are discussed in another section of this report. Stormwater control measures appear to result in an improvement over the current basinwide stormwater conditions if the project is developed as proposed. The development is consistent with the zoning requirements for the property.

4. That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located;

   The property is zoned Commercial Industrial and River District, which have no structure size standards. Much of the neighboring property is zoned Commercial Industrial or River District and is for the most part already developed with retail uses. The development will be heavily buffered from adjacent residential uses and from the highway.

5. That the proposed use or development of the land will generally conform with the Comprehensive Plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City;

   The proposed development will comply with the City's plans and policies provided the traffic issue below is resolved.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities;

   The project received technical approval from the TRC, which includes representatives of the Water Resources Department, Metropolitan Sewerage District, Engineering, the Fire Department, and Public Works Department. The adequacy of the transportation facilities is addressed in a Traffic Impact Analysis conducted by the developer and supplemented by staff findings and requirements.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

   The developer submitted a TIA as required by the UDO. This analysis indicated the need for some off-site improvements, including the installation of a new traffic signal at the intersection of Fairview Road and Stevens Street, linking this new signal to other signals along Fairview Road in the immediate vicinity of this intersection, and the contribution of funding for traffic calming. Some of the proposed improvements may not be necessary, but others may require augmentation, according to staff and staff consultant analysis of the TIA. A major concern identified by TIA that must be addressed prior to the approval of the conceptual plans for the project is the traffic impact on Swannanoa River Road. The TIA prepared by the applicant's traffic consultant indicates that the proposed development would use essentially all the remaining capacity of the section of Swannanoa River Road east of South Tunnel Road. This would mean that if the proposed development were constructed with no improvements to Swannanoa River Road, additional development or redevelopment on other properties along this corridor might be precluded. This would violate the City's Sustainable Economic Development Strategic Plan and Smart Growth Policies, as well as not comply with some of the required standards for approval for conditional uses. A potential solution or solutions must be agreed to by the applicant in order for the development proposal to meet this standard for approval, as well as standards for approval 3, 5 and 6 above.

There are four options that have been identified to mitigate the traffic impact on Swannanoa River Road resulting from the proposed development. Staff is amenable to any of these options, combinations of these options, or other feasible alternatives not included below, such as access through the River Ridge shopping center or construction of a new road parallel to and on the opposite side of the river as Swannanoa River Road so long as a significant mitigation of the traffic impact is achieved. Each of the options would need to be fully designed, permitted, and constructed entirely at the developer's expense (or, alternately, through some other source of non-City funding) and in accordance with all appropriate local, state and federal procedures and regulations. In addition, while each option appears to have the potential to mitigate the traffic congestion impact, formal study of the selected option would be necessary to ascertain its specific effectiveness in addressing the capacity issue prior to approval of final plans by the City. The options, in order of staff preference, are:

1. Developer or non-City funding of a public transportation system that would create a "Shopper's Loop" that would circulate among the major retailers in the immediate vicinity. This option would involve the provision of a public transit system that would transport shoppers to major retailer destinations in a manner similar to a "park once and ride" program in use in many downtowns. If designed appropriately, this option has the benefits of maximizing the existing infrastructure, reducing air pollution, and providing a customer convenience amenity. Concerns include whether the system would be successful in reducing the traffic impact sufficiently and the permanence of the system.
2. Developer construction of an extension of Wood Avenue paralleling I-240 and intersecting the proposed Stevens Street extension. This option has several benefits in addition to reserving some capacity on Swannanoa River Road for future development,

including the resolution of a major cut-through traffic problem and maximization of the use of existing right-of-way. It is also the least expensive of the three options for the developer to construct and provides the most access for the developer's Phase III project site. There is some concern about the feasibility of using interstate right-of-way for a frontage road.

3. Developer construction of a "half-diamond" interchange (east-bound off-ramp and west-bound on-ramp) on I-240 between the Tunnel Road and Fairview Road interchanges. This would provide direct interstate access to the development site and improve the function of the Stevens Street extension. There is some concern about the feasibility of this option given the proximity of the new interchange to the interchanges immediately to the east and west as well as the cost of construction.
4. Developer widening of Swannanoa River Road to a three lane cross-section from the I-240 overpass to Fairview Road. This improvement would directly increase the capacity of Swannanoa River Road. Feasibility of right-of-way acquisition by the developer and cost of construction are the primary drawbacks of this option.

The Planning and Zoning Commission, at their June 5, 2002, meeting, recommended by a vote of 4 to 2 issuance of a Conditional Use Permit subject to conditions for the Phase I development of the site. The Commission unanimously recommended approval of the rezoning from Commercial Industrial to Urban Village District of the Phase II portion of the site. If the Council agrees and issues the Conditional Use Permit, staff recommends the following conditions be part of the motion to recommend approval:

1. All conditions identified by the Technical Review Committee shall be met.
2. The developer shall mitigate the traffic impact of the development to Swannanoa River Road through implementation of a transportation improvement project acceptable to City Engineering staff. This project shall be designed, permitted, and constructed entirely at the developer's expense (or, alternately, using other non-City sources of funding) and in accordance with all appropriate local, state, and federal procedures and regulations. In addition, formal study of the selected mitigation project would be required at the developer's expense to ascertain its specific effectiveness in addressing the capacity issue prior to approval by the City; this study shall be performed under the City's supervision by a traffic consultant under contract with the City. Design, permitting, and initiation of construction of the mitigation project shall occur prior to the issuance of a building permit for any building in Phase I and project construction shall be completed within 12 months of the issuance of any certificate of occupancy, except that the public transportation option shall be in effect within 60 days of the issuance of any certificate of occupancy. The developer shall provide any necessary financial guarantees of this project completion schedule to the City Engineering Department.
3. The applicant shall install or fund the recommended improvements indicated in the TIA, except those specifically not desired by the City Engineering Department. In addition, the applicant shall be responsible for the full cost of linking the new signal at Stevens Street with the other signals in the immediate vicinity in such manner as required by City staff. The applicant shall escrow not less than $65,000 for a traffic calming study for the surrounding neighborhoods and its implementation, with any unused funds to be returned to the applicant upon completion of the traffic-calming project.
4. The applicant shall work with the Asheville Transit Services Director to locate and construct a transit center on the site to serve as a transit node. The transit center shall be constructed at the developer's expense and shall be architecturally compatible with the development design.
5. The applicant shall work with the City Parks and Recreation Department to convey the park area and greenway to the City of Asheville; such conveyance may require the applicant to create and fund a maintenance plan for this property.
6. A signage package that complies with the City's sign code shall be submitted for review and approval prior to formal approval of this project.

7. The design of the urban village shall be modified in accordance with the standards for such developments as enumerated in the Urban Village zoning district; the applicant shall be able to construct the proposed number of residential units and the proposed square footage of the office and retail space.
8. Within 90 days of the issuance of a certificate of occupancy for the Wal-Mart building, the Wal-Mart Corporation (or any individual, partnership or corporate entity acting on behalf of the Wal-Mart Corporation) shall terminate any leasehold of the existing Tunnel Road Wal-Mart building and property or, in the event the building and/or property is owned by the Wal-Mart Corporation, said corporation (or any individual, partnership or corporate entity acting on behalf of the Wal-Mart Corporation) shall place the building and/or property for sale or lease for commercial or other purposes allowed under the applicable zoning at fair market prices. The purpose of this condition is to ensure that the Tunnel Road building and/or property is not kept in a vacant state for an extended period of time.
9. The access easement on the south side of the Swannanoa River running from the developer's property to Fairview Road shall be transferred to the City of Asheville for the purpose(s) of extending the Swannanoa River greenway and/or construction of the Riverside Parkway. The City shall have the ability to transfer this easement to the State of North Carolina or some other entity or entities for one or both of these purposes.

In addition to the above conditions, should City Council choose to approve this request, staff recommends that Council direct staff to undertake the following two tasks:

1. Perform a zoning study for the River District to ascertain the geographical extent of future large-scale retail structures in the district.
2. Work toward making the Riverside Parkway the City's top priority on the Metropolitan Planning Organization Transportation Improvement Program.

The condition for mitigating the traffic impact identifies four options for further study rather than a single solution. Options are provided due to the need for extensive study of each option to ensure that the selected options will address the problem. The feasibility of these options to the City staff, the City's traffic engineer consultant and the developer's schedule requires a timely decision from Council regarding this project.

Mr. Green entered into the record City Exhibit 9 - Smart Growth Definition and Policies, City Exhibit 10 – Executive Summary of A Strategic Plan for the Sustainable Economic Development of the City of Asheville, North Carolina, and City Exhibit 11 – Riverbend Marketplace Traffic Impact Evaluation (TIA) dated March 2002.

Mr. Mark Teague, Division Traffic Engineer for the NC DOT, said that they have done preliminary reviews on the half-diamond interchange, the frontage road, and the widening of Swannanoa River Road. Ultimately the decision is going to rest with the Federal Highway Administration (FHWA) on all three issues, however, an FHWA representative was consulted and they have been told that it's a very slim chance that approval would be given, but not totally out of the question. In order for approval, there would have to be extensive studies performed and there are a list of conditions that have to me met in order for approval.

With regard to the "half-diamond" interchange, typically the federal government likes to see a one-mile separation between interchanges and this proposed location is much closer than that. Mr. Teague said that to violate the one-mile interchange spacing rule, it has to be shown that what is out there right now cannot be improved anymore to accommodate the traffic. He said all reasonable alternatives have to be exhausted. Another rule is that the proposed access point does not have a significant adverse affect on the affect of safety, and operation of the interstate facility. With regard to cost, a ballpark figure for the "half-diamond" interchange would be about $5 million.

Councilman Peterson asked if it was typical for a developer to pay the costs if the interchange was more than one mile from another interchange or if the NC DOT pays if there is going to be a lot of traffic. Mr. Teague said that it's fairly typical for a developer to pay for the costs and cited the example of a developer in Durham who is heavily involved in funding a new interchange on I-40. There may be cases where the NC DOT can assist.

Councilman Peterson said that most NC DOT funds are for fixed projects and if NC DOT participated in this project, would there be a potential that our other fixed road projects might not be funded. Mr. Teague said that if this goes through the Transportation Improvement Plan process, and most likely it would need to, there would be certain projects that would have to be bumped back in order to move other projects forward.

Councilman Peterson asked about the construction of an extension of Wood Avenue paralleling I-240 and intersecting the proposed Stevens Street extension. Mr. Teague said that was explored in the same light as the "half-diamond" interchange option and the FHWA will have the final decision on that as well. Again, he has been told that it is slim that it would be approved. He said that their reasoning is that when I-240 was built a designated right-of-way was established. To give up that right-of-way for a frontage road, with the risk of needing the right-of-way back it in the future is doubtful. With regard to cost, Mr. Teague felt it might be the least expensive alternative of the three options NC DOT reviewed.

With regard to whether there has been any exploration of the widening of Swannanoa River Road, which is a state road, Mr. Teague said that widening that road is currently not on the NC DOT's TIP program. Any expense in doing that would most likely would fall on the developer. He said that if the road was widened to multi-lanes that would solve the problem of capacity. He said if you could take the rock cliff curve out of the picture, the rest of the construction would be a lot easier, but you would still have right-of-way issues. With regard to cost, Mr. Teague was not able to give Council even a ballpark figure.

Upon inquiry of Councilman Dunn, Mr. Teague said that the "half diamond" interchange can be presented to the FHWA and it would take approximately one year for a decision to be made on whether the project is feasible or not or whether they will even entertain the idea. If NC DOT were totally involved, with planning, permitting, right-of-way, construction, etc., it would take approximately 20 years for total completion (using the Sweeten Creek Road interchange as an example). A lot of times private developers can do things faster and if the money and the approval were there, he felt the developer could probably achieve it in approximately two years.

Mr. Robert Deutsch, attorney representing both applicants, said that this is almost a 100 acre parcel of land in the City limits which the sustainable economic development and smart growth urges be infilled with some development in order to discourage sprawl. To widen Swannanoa River Road is in the City's 2025 plan. The area is a dilapidated eyesore for Asheville. There are a lot of factors supporting development of this process and the applicants have bent over backwards to try to meet the various requirements of the City, state and federal agencies. They have attempted to address the legitimate concerns of the opposition. They have received the unanimous approval of the River District Design Review Committee, the approval of the TRC, and the affirmative vote of the Planning & Zoning Commission. He felt the applicants are entitled to a conditional use permit with the conditions set forth. He said there are a few areas in which they do not agree with the staff recommendations and they mainly have to do with traffic mitigation. We feel that building this additional access road at a cost of approximately $4 million, and adding the additional capacity to your existing traffic system, that we have beyond anything reasonable to mitigate the traffic. However, we are willing to attempt to do the other conditions in order to further mitigate the traffic. He pointed out that the preference of the City's staff is the transportation loop. He said that it fits in with sustainable growth goals. He said that another condition concern is that the applicants have not agreed to fund the maintenance of the park set forth in Condition No. 5. With respect to Condition No. 8, he said that was not something totally within the control of the applicants. They will do the best they are able to in order to make sure that the building does not stay dark for a continuous period, but he wasn't sure who owns the building. Regarding No. 9 of the access easement through River Ridge, this is something that will take their agreement and it's his understanding they do not agree to this. This is not within their control and urged Council not to include this as a condition on the permit. He said that the proposed development satisfies the City's smart growth land use policies for mixed use developments, infill development, sustainable land development patterns, environmentally sensitive areas and smart growth transportation. He urged Council to adopt both applications in that they comply with the UDO and they would be good for Asheville and Buncombe County. We will be taking away a deteriorating, eyesore building from an obvious part of the community, it will also have a lot of other good impacts on the City. He asked that the following documents be entered into the record: Applicant Exhibit 1 – Site Plan; Applicant Exhibit 2 – Grading Plan; Applicant Exhibit 3 – Landscape Plan; Applicant Exhibit 4 – Preliminary Hydrology Study and Water Quality Calculations; Applicant Exhibit 5 – Pole Lighting Specifications; Applicant Exhibit 6 – Hydraulic Analysis; Applicant Exhibit 7 – Floodway Expansion Cross Sections; Applicant Exhibit 8 – Elevation Drawings for Wal-Mart; Applicant Exhibit 9 A & 9 B– Elevation Drawings for Kohls; Applicant Exhibit 10 A & 10 B – Elevation Drawings for Shops and Additional Retail

Mr. Harley Dunn, Riverbend Business Park, LLC, briefly reviewed with Council the development team and a history of the site. (Applicant Exhibit 11 - Power Point Presentation). After the building closed there were significant numbers of containers containing various chemicals left around the building and an environmental study was commissioned in 1993. In 1995 there was a fire in the building and Superfund came in and cleaned up all the containers. In 1999 the N.C. Dept. of Environment and Natural Resources (DENR) said that there was one small area (150 feet x 300 feet) that had dry cleaning fluid in it and needed remediation. He said that this level of contamination of water is about 4.7 parts per billion and the federal drinking water standard is 5 parts per billion. DENR has required them to remediate that down to .7 parts per billion. He wanted Council to understand this is not some toxic waste dump leeching something into the river – that someone could drink the water and not be at a risk.

Mr. Mark Masters, Architect from Masters Gentry Architects, explained how all the different features of the site were examined and then planned how best they site could be utilized. They believe that the historical value of the site meets Condition No. 4 as far as the character. Even though they cannot keep any of the existing structures, they do pay respect to the existing structures. One example is by using the round-around (which is the location of the existing smokestack) as a focal and entrance point to the site. With regard to Condition No. 4 regarding scale, he pointed out that in addition to a large scale retail project, they also have other small scale buildings within the property as well as creating a walkable community with an urban village. Because across the river is the Lowe's site, Home Depot site and the Asheville Mall they feel the project is well within the keeping of the scale and bulk of the vicinity. With regard to Condition Nos. 2 and No. 5 regarding connectivity, this project reconnects the site to Fairview Road as well as the proposed connection to River Ridge Marketplace and the Swannanoa River. The site is currently somewhat isolated from the surrounding neighborhoods and at one time the site was connected to Oakley before I-240 split those connections. They think that reconnecting isolated sites for properties is good for smart growth planning. He felt that Condition No. 2 has been met regarding providing good services, housing, streets and parks because they are proposing 100 inter-urban residential units and preserving open spaces. They feel that Condition No. 5 is met due to the uniqueness of the project creating the Urban Village concept Condition No. 2 is met in that they feel the project adds amenities to the City that will serve a large cross-section of the population by creating living, working and recreational opportunities to the general public.

Mr. Dunn said that the complex issue of floodway management is governed by Federal Emergency Management Agency (FEMA), which requires that the average elevation of the land surface is not raised. They require a Conditional Letter of Map Revision and again, it is a complex process. We have existing some 800-1,200 feet of existing asphalt riverbank and they are proposing to take it up and seed and grass it.

Mr. Todd Seldonridge, engineer, said that the City's minimum stormwater requirements is to provide detention for a 10 year storm. They are providing stormwater detention for up to a 100 year storm. They will also implementing some best management practices to handle water quality. He said they have pervious pavement on some of the fringes of the parking lots. They are going to see how well the pervious pavement holds up over time since it is a heavily traveled area and the pervious material is very porous and tends to break up over time. He said they have approximately 22,000 square feet of pervious material, which is about 2-3% of the entire paving area.

Upon inquiry of Councilman Mumpower, Mr. Seldonridge said that there is approximately 22 acres of impervious material now and in Phase I there will be about 30 acres.

Mr. Greg Holden, environmental engineer, said that there is an area of groundwater that extends to the river, which contains tetrachloroethylene. Whether it actually goes into the river or not is unknown, but that will be a subject of further feasibility study. When they do the remediation plan, everything will be in compliance with the state requirements.

Upon inquiry of Councilman Dunn on if there is any water contamination now, Mr. Holden explained that at very low flow conditions during an extreme drought, there might be actual charge of the river from the groundwater. Under those conditions there could be some movement of the plume into the river. Under normal conditions, it's the opposite – the river is actually a hydraulic barrier and the water is higher in the river than it is in the groundwater so the water flows from the river into the groundwater.

Mr. Dunn explained the stormwater detention in Phase II. Using pervious pavement to satisfy the runoff around one of the seven buildings in the retail village, instead of placement of a pond, is just one of many combination of things which are very cost effective. This seems to work very well in small scales. It's just that it's very expensive on a large scale. Pervious pavement is approximately $5 a square foot compared to asphalt at $2.00-$2.25 a square foot.

Mr. Becky White, Traffic Engineer, said that the development team has taken very seriously their obligation to mitigate the traffic impacts associated with this development. Through that process they developed a mitigation plan. That plan includes construction of 1.7 miles of new roadway that is the connector roadway that extends from Swannanoa River Road to Fairview Road. The primary motivation for constructing this new public roadway was to provide additional capacity for this development's traffic in order to offset impacts to Swannanoa River Road and also to provide connectivity for other public travel in this area. It is stated in the TIA that the proposed project will generate approximately 17,000 vehicles trip per day. That includes a portion of traffic that is currently on the roadway network and would stop by the development on way to another destination. Those trips are not new trips. Once you take out that portion of traffic, we estimate we are generating 14,500 new trips on the roadway network. The new roadway, which they are planning to construct, will have a minimum capacity of 14,000 vehicles per day. In other words, we are constructing approximately 2 miles of roadway that would have a capacity equivalent to the number of new trips that the development would add to the roadway network. In addition to the construction of this new roadway, which is estimated at a cost of about $4 million, it includes a bridge over the river as well as a bridge over the railroad that runs through the Oakley area. The development team has agreed to fund traffic calming improvements in adjacent neighborhoods, construct a signal system on Fairview Road that would extend from the

Cedar/Liberty intersections to the new intersection that we propose to build at Stevens Street. We also propose to construct additional turn-lane improvements on Swannanoa River Road. That is a safety, as well as a capacity, improvement to Swannanoa River Road where our proposed new road would tie into that facility. We believe these improvements more than mitigate the impacts of this development and we disagree with the staff findings that the development uses all of the available capacity on Swannanoa River Road. She clarified that by staying that the traffic volume projections in the TIA are a conservatively high estimate of traffic on the adjacent roadways. A couple of things were not allowed to be taken into account in the TIA. The development has proposed a connection to the existing River Hills Shopping Center, but no trip reductions were allowed. In addition, no trip reductions were allowed for the traffic that will enter the development through the existing intersection that aligns with the ramps on Fairview Road. But, in order to be conservative, we did not include that in the TIA. Further, we believe as congestion builds on Swannanoa River Road, shoppers to Riverbend Marketplace will divert to the point of least resistance which is the back access to Fairview, which we have already projected with our TIA will have excess capacity on it. It is expected to have a minimum capacity of 14,000 vehicles and our projections are only for using up only about 6,000 vehicles per day. Traffic congestion is an important issue in this area. Although we disagree with the staff recommendation that further options are necessary, we have agreed to pursue Option No. 1, the transit system, as our preferred alternative. Options 2-4 contain many requirements that are out of our control. Not only are they extremely expensive, they require permitted from a federal agency, which takes time. Option No. 1 is the most doable of the four options. We have committed to pursue Option No. 1. Improved transit service in this area goes along with the smart growth policies in this area. It reduces pollution and there are a lot of benefits to the overall area. We believe we have mitigated the traffic impacts associated with this development and that we have successfully addressed Condition No. 7.

Upon inquiry of Vice-Mayor Bellamy about Option No. 1, Ms. White said that they envision a shoppers loop that would serve this area of retail development, the Asheville Mall area, the K-Mart shopping center area, and the new Target area – all the retail concentrated in this specific interchange area. It would not only shave trips off this development, but also potentially reduce traffic impact of the existing shopping centers. We envision it would be a public bus system and we are currently pursuing options for some public funding for transit for this area. This is an on-going commitment - not like a construction project that you go in and build it and you are done. It would need to continue in perpetuity so it goes beyond something that just this one development would take on.

Mr. Dunn said that this exciting shoppers loop is envisioned for anyone to go to one of the shopping areas in this area and park. From there, they can get on a bus that would run frequently throughout the loop. He thinks this is a good marketing tool for the area. The idea is that there would be dedicated buses that would possibly be overseen by the City's Transit Services Department. In fact, when they talked to Congressman Charles Taylor for possible federal funding of interstate highways, he suggested a concept like this. Mr. Dunn said that he sees this as a blending of public and private transportation and a way that we can not only mitigate this traffic issue, but at the same time start having people who drive buy into the idea of public transportation. He said that Congressman Taylor has committed to helping us find funding for this concept.

Upon inquiry of Councilwoman Jones, Ms. White said that they have additional research on areas where transit and shopping is combined successfully. There are excellent models of a transit loop system.

Mr. Bill Boyden, architect, said they went through a very thorough process with the River District Design Review Committee and it was because of their willingness to give very frank feedback that we were able to design buildings that are very reflective of what you see down in the River District. In the process of documenting and cataloging all the buildings in the district, it became apparent that the industrial feel of the River District is only part of the story and that the Biltmore Village and some of the other buildings are every bit as important and part of the fabric of the river as the traditional warehouses that we see along there. What we have come up with in terms of building designs is a new definition of the river based on what was there and what is on there now. He felt we have a very successful design that is unique to Asheville and the River District area.

Upon inquiry of Councilman Mumpower, Mr. Boyden said that this in no way is a traditional Wal-Mart model. He said the traditional Wal-Mart building is a navy and gray with a red strip and it's built out of cinderblock and painted. This is a brick-type product with decorative canopies, vestibules, an enhanced central sign element and garden area. This deviates from a traditional Wal-Mart in just about every respect.

Mr. Vic Knight, landscape engineer, said that the basis for the landscape plan was to create a pallet of trees and shrubs that are indigenous to the Asheville area and that frequently occur in wet areas such as along the Swannanoa River. Plants will be located along the public roadway, the parking areas and on the buffers of the property. The trees that will be used along the public roadway are sycamores and this was done for the purpose of tying back to the historical context to the property. Over 600 trees to be used in and around the parking areas will be positioned to spread out the canopies. In the 50-foot required buffer along Swannanoa River Road, there are close to 800 trees. There is a large preservation area to the north side of the property which they will be preserving a lot of mature hardwood trees. The greenway will be connected into the development in several locations to allow visitors to the shopping center. Along the greenway there are several spaces provided for public art to be displayed and that area will be turned over to the City. The concept is to use indigenous plants that are typical along river areas and through this we hope to control noise and light pollution and help to filter sediment as they move from the parking areas into the sediment basins.

Mr. Dunn said that the Wal-Mart Corporation is sponsoring a design competition for our local artists to bring art into the four art exhibit areas along the greenway. We envision funding the competition in such a way that we can sell off a piece or two every six months to a year and re-bid it so the exhibit areas would continue to grow and develop.

Mr. Rick Presley, President of Horne Properties, Inc., which is the lead developer in this partnership in the Phase I retail development, said that good ideas have come out of all the groups they have met with but there were certain economic limitations and site limitations to some of the ideas. They were diligent to put into the plan all of the good ideas. This gives us a plan that works, it is functionally responsible, is a good plan and quite an economic upgrade for an under-producing site in the community. The facts before Council include (1) FEMA will certainly take care of floodway management for the community; (2) there will be environmental clean up. There will be demolition of the building to get to our construction point. It will be a better site from an environmental standpoint; (3) this development represents one of the largest revenue resources for the community and City when built. Those dollars can go toward other road improvements or wherever City Council deems it most important; (4) the involvement of Wal-Mart stores is good for underwriting the program; and (5) the community can count on parking, fire, safety, police protection, etc. through all the standards which need to be met. We feel that all seven conditional use standards have been met and we believe this is a project that serves the highest and best use for this piece of property. With all the roadway improvements, we hoped that the mitigation proposed with the Fairview Road involvement, would be enough, however, we are willing to look at the other proposals.

Mr. Deutsch said that his legal research on traffic mitigation shows that it is not necessary or incumbent upon the developer to show zero traffic impact. What they have to show is reasonable mitigation measures.

Mr. Lawrence Henson, President of D.O. Creasman Co., said that his company is located on Swannanoa River Road directly across from where the proposed new bridge will be built. He felt this development would increase his property values.

Mr. John Carson, restaurant owner on Swannanoa River Road, said that the property value of his business would increase if this development occurs and urged Council to vote in favor of the conditional use permit. (Note by City Clerk: This witness was not sworn in.)

At 7:40 p.m., Mayor Worley announced a short break.

Ms. Betty Lawrence, one of two attorneys representing the Beverly Hills Neighborhood Association, the Oakley Community Association and Community Supported Development, said that they are asking City Council to deny the conditional use permit because it fails Conditions No. 1 and 2. In terms of the topography, it will be shown that they are actually digging into the channel of the Swannanoa River according to their cross-sections - 1,300 linear feet of the Swannanoa River banks will be changed. The widening of Swannanoa River Road would be cutting into a cliff. There is a tremendous amount of impact on the site itself. In terms of trying to meet the floodway ordinance, they are actually doing an awful lot of moving of the floodway. It will be shown that there will be damage to property value to property owners who live close by. The proposed development will not be in harmony with the scale, bulk, coverage, density and character of the area or neighborhood in which it is located. Even the River Ridge Shopping Plaza pales in comparison to this proposed development. There is no doubt that the development will cause undue traffic congestion and create a traffic hazard. Council's only question is if it's possible to mitigate and evidence will be presented to show that it is not - at least not under any scheme thus far.

Mr. Charles Houser, resident of Houser Road in Oakley, announced his credentials which includes a BS in Civil Engineering and formerly being employed by the FHWA as a field engineer manager. Using both City Exhibit 5 (overall master plan) and portions of Applicant Exhibit 2 (grading plan), Mr. Houser explained in detail the existing topography of the site and the differences of the topography after the site is developed, noting that one of the conditions is that the topography and the terrain before and after should be somewhat similar, the nature of the site should not be changed, etc. He explained how there would be probably in excess of 25,000-30,000 cubic yards of material moved out to dig the ravine for the overflow effort, which is a significant amount. He wasn't sure if the area would be seen by drivers on Swannanoa River Road, but if so, it would be a significant visual impact In one of the hydraulic reports, it was noted that the channel would be impacted by dredging and that it will extend probably 1,600 feet up and down left and right of the bridge. Using the grading plan, he showed how even with the proposed stormwater management control measures of the 100 year storm, the back-up would impact the center of the bridge. He explained how the new channel excavation will be graded stating that there will be a different view of the riverside than what is there now. Mr. Houser showed on grading diagram (Applicant Exhibit 2) where 75 feet of a hill is proposed to be removed, which will be a visual impact as you drive on Swannanoa River Road. Mr. Houser said that the portion of the hill to be removed appears to be outside of the property line shown on the grading plan. He explained that there is quite a massive cut section (roughly 110 feet in elevation), which lies to the south of I-240 and that is a significant amount of change to the site. On the new access road proposed to be built, Mr. Houser said he wasn't sure that the old railroad right-of-way could accommodate three lanes and that would limit the capacity of this section of road. In his experience with contaminated sites, once you get in and start excavating and digging, you will find more than you really bargained for which will mean more time and expense.

Mr. Bob Born, consulting civil engineer with over 50 years of experience in the design of flood control and hydrology projects, said that he is a member of the Board of Directors of the Viewpointe Homeowners Association and is speaking on their behalf. He said it is a joke to think that FEMA is going to take care of the City of Asheville. He has had experience in representing FEMA in two actions they have brought against contract cities, such as the City of Asheville, for violating their own floodplain ordinance. In one case, the community lost its participation in the Flood Insurance Program because of its failure to follow its own ordinance. He pointed out that the ordinance the City of Asheville adopted is a contract between the City and FEMA and it is enforceable under contract law. Using Page CD7:261 from the UDO with a figure entitled "Area of Application for Flood-Proofing Regulations (Neighborhood Exhibit 1), Mr. Born explained that there is an illegal fill in the Swannanoa River Watershed and that upstream illegal fill could influence the flooding of the downstream area. There is a report prepared by the Tennessee Valley Authority (TVA) on the history of flooding of the Swannanoa River and the French Broad River and the report points out the potential for extreme flooding along the Swannanoa River in the area under discussion. In looking at the engineering for this project, he didn't think that the upstream development that has occurred over the years has been properly considered. The most recent flood insurance rate map is not recent and there have been a lot of developments, including the question of the illegal fill along the Swannanoa River. (Neighborhood Exhibit 2 – 3 pages from Flood Insurance Rate Map) Those points have not been considered, as far as he could tell, in the technical analysis of the flooding potential at this site. He said that on the hydraulic analysis (Applicant Exhibit 6), they considered the SCS analysis method of analysis for the hydraulics of the flooding potential at this site. In his view, that is not a recent type of analysis – it's only suitable for determining hydrographic shape and cannot be used for analysis of the actual magnitude of the flood that would occur under the 100-year or other magnitudes. He doesn't think that the full potential for development and the urbanization that has already occurred upstream of the development has been considered in calculating what will be the 50 or 100-year flood event. That is a significant deficiency in the analysis presented.

Mr. John Sticpewich said that the problem of remediation of the groundwater pollution is a state concern, however, what is important in Council's decision is when that mediation takes place. The work done preformed by the environmental associates is thorough but he disputed the model of the plume presented to Council. He doesn't agree with the exchange between the groundwater and the river water. There is quite a lot of evidence, and it is well published, that the water table changes as the flood level rises in the immediate environment. The problem is that to contour the concentrations in this way (Neighborhood Exhibit 3 – Analysis Report from Holton Environmental Associates), you must have uniformity between two data points, and the last thing we have in these sediments is continuity. He explained in detail that as soon as the first bulldozer cut is made over the area or adjacent to it, the way the rain is taken into the ground and affects the groundwater table and its pollutants will change – change in a way that is not predictable by any methods he was of aware of for the past 40 years. If remediation is done before any groundbreaking occurs, then there is a fairly good idea where the pollutants are but as soon as you change the nature of the surface, we don't. He felt it was very important to do the remediation before there is any work on the site. Using Neighborhood Exhibit 4, he explained what the wells are and what data is coming from them. In addition he showed what features are being built on top of area of the plume. Using a portion of the grading map (Applicant Exhibit 2), he showed that the area of contamination lies in the excavation for the floodway. Again, when you start digging you change the conditions.

Professor David Clark, teacher of civil engineering at Clemson University, said that he thoroughly reviewed the material prepared by the developer's consultants regarding traffic. He said the methodology that was used to prepare the TIA in general is very standard and straightforward and would work in the vast majority of situations. It is apparent here though that there are some traffic problems and specifically capacity concerns on Swannanoa River Road. In looking at Swannanoa River Road and the numbers that were generated, he agreed that it appears that we are very close to using up all the available capacity – at least during some hours during the day, if not during the entire day. When he looked at the traffic volume data that was used, especially the background and the adjusted future year for development, he had some concerns about the count information that was used. Specifically it looked like one day or two day counts were used to come up with the volumes at surrounding intersections. He could not ascertain whether these counts had been adjusted to represent true averages. He obtained information from the NC DOT'S Office of Statewide Planning which showed higher ADT's in the year 2000 from their count program on Swannanoa River Road, or portions thereof in the vicinity of the development, than were reflected in the counts that were taken and used in the study. It's possible that traffic has gone down, but in general I think there is a continual escalation in traffic volumes. He would feel more comfortable if the traffic data were adjusted using data from continuous count stations somewhere in the vicinity to reflect true average values throughout the year. It's well known that traffic volumes fluctuate and there is no way to tell on the basis of one day's count. The report examined morning and p.m. peak hours and these are typically high hours of the day for most locations, especially during the week. However, the City took traffic data on Fairview Road near the intersection of Stevens Street, which indicated that the noontime hour was a peak. In essence, it was higher than the morning hour. That could have an affect on the overall analysis and he would feel more comfortable if that were addressed. If traffic follows that pattern on Fairview Road, then one wonders whether the other roads, which are in close proximity in the study area, would have similar characteristics. If we were not so close to the apparent capacity on Swannanoa River Road, this may not matter at all but it should be looked at in more detail. Swannanoa River Road has a number of deficiencies and it does not meet current AASHTO recommendations for roadway design. The lanes are narrow, there are minimal shoulders, there are numerous restricted lateral clearances, and it's 100% no pass zones. This leads me to believe that the capacity issue is a real one. All of those deficiencies would lower the ability of the road to handle traffic. In addition, the horizontal alignment has numerous curves as the road follows the river. Despite those curves, you have a relatively high speed limit of 45 miles per hour. To my mind, improvements to that road need to be looked at very carefully if it's going to bear the type of traffic that it is being counted on to withstand as a result of this development. He did not see anything in the analysis to look at safety issues – either on Swannanoa River Road or on other roads in the vicinity. The UDO requires that the TIA look at safety issues and maybe there aren't any, but this needs to be addressed. The NC DOT provided their latest crash data and Swannanoa River Road showed a higher crash rate than Tunnel Road – despite the fact that Tunnel Road has twice the average daily traffic. We had a fatality on Swannanoa River Road within the State's reporting period. He felt that since there will be additional traffic on Swannanoa River Road and in view of the fact that the design of the road is not up to current standards, it needs to be carefully looked at as part of whatever mitigation process is done. Ms. White pointed out that the new Stevens Street extension would provide adequate capacity for approximately 14,000 vehicles a day and provide a backdoor to the site and that would hopefully alleviate some of the congestion and the problems with Swannanoa River Road. That is very likely the case, however, if we are going to count on that, then the analysis needs to be redone such that traffic equilibrium is included as part of the analysis methodology. You have to consider shifts in traffic due to congestion, as travelers due tend to seek routes that have lower travel times. We may very likely be introducing additional traffic to other areas that was not counted on in the TIA and a refined analysis might point those out. We might find additional mitigation to be needed or we might find less mitigation to be needed. These questions should be answered before a final decision is made. The use of I-240 for either the right-of-way for the Wood Avenue extension or for the interchange for the site offers probably better chances for removing traffic from the existing service street system. But, as Mr. Teague pointed out, there are very severe questions about whether the FHWA would allow the use of their rights-of-way for these projects or whether the operational impacts of a new interchange would be detrimental to the overall performance of I-240. I-240 obviously carries very high traffic volumes compared to these streets and problems there would have a major impact on more citizens in the Asheville area. The existing road configuration of the major entrances on Swannanoa River Road and Fairview Road might possibly draw through cut-through traffic that hasn't been counted in the TIA. He wondered what would the effect of that be on traffic in the other areas. The trip generation rates for super centers are a fairly small sample at present. He recalled the current ITE has about nine observations in the data set. Statisticians say that does not give a very tight tolerance on any estimates that are produced with such a small sample. They would prefer to have at least 30-100 data points from super centers in the data set to reliably and confidently use the generation rates that are in ITE. In addition, none of those nine sites are in the western North Carolina area, so we don't know if they represent travel behavior that reflects the citizens of Asheville. That normally is not a major problem, but given we are at the marginal capacity right now, we have to be very cautious about the trip generation rates. His opinion is that the use of transit as a mitigating option will not be very successful. His reason is that we are dealing with a large number of shopping-type trips. If we have a shuttle-type service serving shopping-type destinations, then he thought only captive transit riders would use the transit service. It is very inconvenient to carry packages around with you if you are going from store to store. The automobile will still attract the majority of trips to the site no matter what kind of transit system is put in. In addition, the developer has provided ample parking, which is going to further encourage people to drive to the site. The transit option is very appealing but he didn't think in the majority of cases they would get much ridership from this segment. The only way he could say safety to encourage transit use would be to cut the parking out and force people to come in on transit. His sense is transit will probably not do a whole lot to mitigate unless there is some sort of major incentive to get people into those shuttles. His opinion is that we need to have a solution in hand before we go forth with the development. A little extra time and effort on this may develop that solution and give us the confidence that this whole package will fit in with the sustainable growth goals.

Upon inquiry of Vice-Mayor Bellamy, Professor Clark said that the frequency of crashes on Swannanoa River Road was higher and the rate per million vehicles miles was approximately twice the rate of Tunnel Road (section east of I-240 approximately one mile toward the Highway Patrol Station), despite the fact that Tunnel Road had the average annual daily traffic of approximately twice that of Swannanoa River Road.

Professor Clark responded to various questions from Councilman Peterson regarding how new and existing trips are calculated, what is the capacity of Swannanoa River Road and how is that determined, what will happen on Swannanoa River Road if the capacity is used up, and what would the process be if others want to development on that road.

Ms. Lawrence said that the new road through Stevens Street will not solve the traffic problem and rather than alleviating traffic on Swannanoa River Road, there is every chance it will create more traffic because of the attractive cut-through from Fairview to Swannanoa River Road. You may be adding trips on Swannanoa River Road at the same time you are building this new road. City staff says we have four alternatives and they want them all studied more. Then they want the City Engineering Department decide which one should be implemented. They all have problems. The interstate exit – you heard slim to none; the possibility of public funding is very slim; and if it is done through the TIP, it will delay the projects that we as a community have identified a need for. Wood Avenue extension – they would have to persuade the NC DOT to give up right-of-way, which they have already purchased and have in wait to widen I-240 in the future. Widening Swannanoa River Road – if they can get past the cliff, there would still be the problems of widening the road in the floodplain, neighborhoods, golf course, and problems in the City's River Parkway Plan. Many are passionate advocates for transit but we can't build our way out of traffic congestion. We need alternate forms of transportation that will work for people. However, we need a systems-wide approach to transit and clearly more than a shuttle bus between the Mall, K-Mart, Target and Wal-Mart stores. The UDO is not about giving conditional use permits so that you can give away things that the City as a whole would otherwise have and that's traffic. The hydraulic analysis (Applicant Exhibit 6) clear states that between cross sections

3.534 and 3.79 will be excavation from the existing channel of the Swannanoa River to the proposed 2 to 1 slope of the proposed fill. They are talking about 1,300 linear feet of the riverbank according to what has been presented. A portion of the letter from DENR dated June 24, 2002, states, "a remedial action plan must be submitted for the site. ... Plans currently underway for future development of the site must accommodate future remedial action at the site. The placement of structures around the plume, or significant grading may affect the groundwater gradient, and or hinder future remediation activities. Therefore, we recommend for construction plans to be designed to accommodate the contaminated plume and any possible type of remedial action that could take place. Please note that the best type of remedy to be used to address contaminated groundwater at the site has not yet been determined." (Neighborhood Exhibit 5) There is a deadline of 30 days to submit the plan. What Council needs to be aware of is the developer says they will remediate and they will also build over and dig in where it needs remediation. This is not good. Because the current owners of the property did not cause the pollution, there is a possibility they will not be required to do any remediation. They may say we'll follow DENR but that may mean do nothing. We think there is a very serious danger to public health and safety now because of the toxic plume because you don't know what is going to happen if it will be released into the river. Now is not the time to permit this kind of development around that sort of site.

Ms. Corinne Kurzmann, resident on Sayles Road, said that on a portion of Wood Avenue there are curves and no sidewalks. Building an access road is certainly a concern. She is concerned that her property value will decrease if a Super Wal-Mart is allowed in her backyard. Traffic on Wood Avenue is horrendous already. Fairview Road and Swannanoa River Road traffic is a mess. The site is contaminated and she could not imagine how building on it will not endanger the health of everyone in the community. She personally grows her own food on a 2,300 square foot site and this development is not in harmony with her property. You would not want this kind of development in your backyard. She could not find any smart growth principles that would apply to this development. This is not the best thing we can do with this site. Traffic will greatly impact her neighborhood.

Ms. Lawrence wanted to, but did not, request, at this time, that City Council table action on this request, since the UDO states that "Asheville City Council, after conducting the public hearing, may table the application pending submittal of additional information." She said that she believes they have put on a convincing case that this is a danger to public health and safety. The toxic plume effect on the river, being perhaps the most obvious, is not at all clear. The plan does call for putting fill on the floodway and raising the grade. That will have an affect on what happens with the water. They feel that the river resource yard is going to be violated. Regarding the compatibility with natural and topographic features, there are 43 extra acres paved, 1,300 linear feet of the riverbank that is not going to be natural anymore, and the cliff on Swannanoa River Road is a significant topographic feature. There has been evidence about property values. With regard to traffic, the staff's recommendation is to delegate to the City Engineer the authority to choose among those four options. The case Lancaster v. Mecklenburg County makes it very clear that that is an impermissible delegation to an administrative person. This is a quasi-judicial decision about what traffic would mitigate the congestion and hazard. If Council did delegate this authority, Council would be doing something that is clearly illegal. Since Council doesn't have enough information to decide about the traffic, she believed Council should either deny the permit or table it.

Mr. Deutsch asked Mr. Houser if it was his testimony that after the development is over, under the conditional use factors, that the terrain cannot be significantly different than it was before the development. Mr. Houser replied yes in that was how he read the condition. Mr. Deutsch then asked Mr. Houser where Condition No. 2 says it has to be the same. Mr. Houser said the terrain has to be similar in terms of the overall concept. Mr. Houser said that Condition No. 2 reads that the completed project should be compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given ...." Mr. Houser said that in other words, "reasonably compatible" to him means you don't build a mountain on it and you don't dig a lake on it. He said the developer will be digging significant excavation for the water and cutting some high cuts – not a lot of volume of earth work, but there is some high cut sections that he felt will be new from what is there now.

Mr. Deutsch said that they would waive their right to ask any further questions due to the cumbersome process.

Mr. Greg Gregory, one of two attorneys representing the Beverly Hills Neighborhood Association, the Oakley Community Association and Community Supported Development, asked Mr. Green if there is a property value impact analysis in the record for this project? Mr. Green replied that there was not.

Mr. Gregory asked Mr. Seldonridge if the floodway excavation areas and sediment ponds would be fenced to keep children away. Mr. Seldonridge replied yes. Mr. Gregory then asked how many feet of fence would be required. Mr. Seldonridge said he wasn't sure at this time but that they will fence all of the pond areas and the fence will probably be a chain-link fence unless there is some other type of City ordinance that would require them to do more than that.

City Attorney Oast said that Council should disregard e-mails and other items received from individuals who are not speaking at the hearing for purposes of the conditional use permit decision. Because those people are not present, they are not subject to being cross-examined. If speakers submit information, that information can be entered into the record. Petitions and other documents will be received for whatever value they have, but they have no evidentiary value and will not be considered with connection to the issuance of the conditional use permit.

The following individuals spoke against the issuance of the conditional use permit and rezoning. If concerns were expressed by prior speakers or if the comments are not relevant to the decision before Council, they will not be repeated or included. Other comments/concerns include, but are not limited to: rezoning only a portion of the property to Urban Village would represent a lack of vision because small locally-owned businesses will not be able to compete with a Supercenter and if the Urban Village were Phase I instead of Phase II people may not purchase homes right next to a big-box retail store; this proposal contradicts smart growth goals in that it does not meet the needs of the present without compromising future generations to meet their needs; this development will preclude any future development on Swannanoa River Road; if there is no traffic mitigation by the developer, people will complain to City Council and the taxpayers will have to pay for that mitigation; smart growth policy states that industrial land should be preserved and this is turning that land into commercial; the development will destroy the peace and quiet of the Beverly Hills and Oakley neighborhoods; the applicant's conceptual site plan fails to comply with UDO in that the Parcel Identification Number shown on the plans is incorrect, all zoning districts are not shown on the plan, they have not depicted violations of existing federal, state, and local laws and regulations, and the plan indicates significant impacts on the resource yard and that the resource yard will be excavated on adjacent properties; concerns about the application and review process for the proposed development in that required documents were not submitted or major deficiencies were found in the site plan, flood hazard area plan, soil erosion and sedimentation plan, stormwater discharge plan, TIA and sign plan; UDO requires all TRC conditions be met on the revised plans prior to proceeding to public hearings and to date no new plans have been submitted; there are no studies for the four traffic mitigation options to be reviewed for feasibility; UDO states that for a phased project, Council must approve a master plan for the entire development site at the same time a conditional use permit is considered and the applicant has not supplied almost all the information required for Phase II of the project; topography in the Oakley community will be significantly altered if the Wood Avenue extension is built; unaware of plans for bike lanes on the existing dangerous roads and/or any new roads;

planet pollution; the development will saturate the traffic capacity thus violating smart growth policies; bad location for a new shopping center; values of the family will be negatively affected; commercialization along Swannanoa River Road will further degrade the residential neighborhoods; malls do not want any form of public transportation to service them so the shoppers loop to include the Asheville Mall will not work; the developer should link more routes with the Asheville Transit Services into neighborhoods and provide permanent funding guarantees; residents on Fairview Road would like a traffic calming project; the project has a maximum shell life of 30 years and therefore is not sustainable project; this project has "could be anywhere appearance" and isn't good for a gateway to the City; residents do not want a 10-acre parking lot on the Riverfront; choose a less intensive plan for development with smaller buildings, less paved area and more ground cover that absorbs flooding; there is no clear traffic plan in place; cumulative effect of the traffic from this development as well as the Target and other more appropriate smaller projects must be considered; the trees and topography of the site and the serenity that exists in the area will be gone; the NC Superfund Section of the NC Division of Waste Management will not grant a "no further action status" until the contaminants have been documented at/or below state groundwater standards; the City must require, before any recommendation, (1) a remediation plan which has completed the process for state approval including the public comment period to be sure that any construction will not impact groundwater remediation, (2) complete diagrams overlaying the characterized plume, sowing depth of monitoring wells, with planned construction of all buildings, parking lots, ditches and any other features that could either interfere with the hydrology of the site or present an exposure risk to the public; and (3) installation of any extraction wells and remediation equipment and at least six months of demonstration that the plume of contamination is being "captured" by the pump and treat system, before any site construction with 200 feet or up/gradient of the plume is to begin; City Council should require substantial warranties, such as completion bonds, to cover all unfulfilled proposals allowed in any conditional approval; limited stormwater control measures do not begin to address the stormwater impacts that will be attributable to the site and the additional roadways required for access; developers are just promising their way into compliance with environmental, traffic congestion, flood, pollution and safety guidelines; developer's connector to Fairview Road needs a bridge constructed over a privately-owned railroad and working with the railroad takes a long time; air, noise and light pollution impacts; destruction of historic buildings; who will take responsibility for the liability due to the holding ponds being located next to the greenway; request to add condition to permit to close Beechwood Road at or near its intersection with Swannanoa River Road in order to eliminate cut-through traffic; empty building on Tunnel Road will be an eyesore; no guarantee that Phase II of the Urban Village will occur; average price of the proposed condominiums is $150,000 which is not affordable housing; approximately 25 acres will require fill, up to 10 feet, in order to raise the No. 1 anchor store and associated parking out of the floodplain and floodway; 100 feet must be sliced off of a hilltop to create a level area of approximately 4 aces to accommodate the second anchor store; 75 feet of elevation off of a hill adjacent to the river will have to be removed; extensive floodway expansion and stormwater retention ponds will require conservatively another five acres of excavation; 19 acres in Phase II will be altered by cut and fill leaving nothing undisturbed; there is a point across from the U-Haul business just west of the property that looks like a good spot for a bridge to be built into that property; the applicant has made no showing that the railroad will permit the alteration to the overpass of the tracks; and crime will increase and additional police protection will be needed:

Ms. Sharon Martin, Asheville resident (Audience Exhibit 1)
Mr. Christopher Fielden, Liberty Street resident (Audience Exhibit 2)
Ms. Polly Gates, Canterbury Road resident
Mr. Mike Moody, Fairview Drive resident (Audience Exhibit 3)
Mr. Ned Guttman, Beechwood Road resident and speaking on behalf of the Coalition of Asheville Neighborhoods (Audience Exhibit 4)
Ms. Lola LaFey, London Road resident
Mr. Cicada Brokaw (Audience Exhibit 5)

Ms. Pamela Benes, Caledonia Road resident
Mr. Jeff Kelley (Audience Exhibit 6)
Mr. Stuart Roper, Fairview Road resident (Audience Exhibit 7 which included a Petition containing 82 signatures to initiate a traffic calming project on Fairview Road)

Ms. Connie Duncan, Redwood Forest resident
Ms. Hazel Fobes, North Asheville resident
Mr. David Roat, Asheville resident (Audience Exhibit 19)
Ms. Heather Steele, Montford resident (Audience Exhibit 20)
Mr. John Perry, Sherwood Road resident (Audience Exhibit 21)
Mr. Clarence Lytle, Governor's View Road resident
Ms. Pam Harders, Skyland Circle resident (Audience Exhibit 22)
Mr. Gilian Kearns, Asheville resident
Mr. Brian Evans
Mr. George Clark

The following individuals spoke in favor of the conditional use permit and rezoning. If remarks were expressed by prior speakers or if they are not relevant to the decision before Council, they will not be repeated or included. Other comments include, but are not limited to: all conditions have been met except for traffic mitigation and the developers are addressing that; it will take big investors to renovate the magnificent site; cut-through traffic will not be significant; the crash data on the portion of Tunnel Road used and Swannanoa River Road is not a good comparison; developer will build a new street at their own expense to handle much of the traffic; the public transportation route will help to mitigate traffic congestion and diminish the environmental impact of automobile emissions; concept of Supercenter at one location for groceries and other goods will eliminate unnecessary car trips; project will include other retail establishments and housing on-site which will reduce traffic; actual footprint of new development is smaller than the old Sayles Biltmore Bleacheries factory; development is a vast improvement over the eyesore that is on the site now; change is inevitable; once three traffic signals on Fairview Road are synchronized, traffic will flow smoother; project will be a clean, open and friendly environment; the City will have another greenway at no charge; the project will add affordable housing; the Swannanoa River is designated mountain trout stream and if there was a water issue there, the N.C. Wildlife Resources Commission would not stocking it with fish; the River has mallard and wood ducks and no harm has been done to the wildlife on the river; this unused property is ready for development with water and sewer already in place; when big development goes in, property values have risen; and don't give the signal to the development community that they are not welcome in Asheville for future development:

Mr. John Jensen, Bent Tree Drive resident
Mr. Larry Smith, Greenwood Road resident
Ms. June Grant, owner of property in Asheville

During the rebuttal period, Mr. Deutsch said that there was testimony that there was going to be grading in the river resource yard. He asked Mr. Gary Tysinger, hydrological engineer to respond. Mr. Tysinger said that the cross-section map that was used was the old plan submitted before they met with City staff and went through the technical review. That map has been revised.

When Mr. Deutsch asked Mr. Tysinger what disturbance there will be within the river resource yard, Ms. Lawrence objected.

Ms. Lawrence objected on the basis that this was not information that was available until, as they heard it from the City, last week. Section 7-5-20 of the UDO states that "When the Planning & Development Director has determined that an application is complete and that a public hearing is required by this chapter, the director shall request that a date, time, and place be set for the required hearing and shall insure that all notices are provided pursuant to subsection 7-5-20 (a) above, this chapter, and the statutes." (Neighborhood Exhibit 6) This sets the time after which the application is completed will be considered on the merits at that time. This public hearing was noticed on June 14 and 21, 2002. It's all a matter to due process. Other boards, for example the Asheville-Buncombe Historic Resources Commission, that require quasi-judicial reviews have a two week deadline after which nothing can be considered because it has not been previously submitted. The reason for those deadlines is so the public has notice of what is being proposed.

Mr. Deutsch said he was not so concerned about the actual plan but the testimony given about what either will or will not be done in the river resource yard He assumed Council would prefer to have accurate information. He didn't think it was critical whether or not the actual map comes into evidence, because Council has already ruled that the actual map is the latest one in the possession of the City staff. All he would like is to have Mr. Tysinger tell Council what, if any, grading there will be done in the river resource yard.

Ms. Lawrence said this is a due process question and that if Mr. Deutsch wants up to the minute information that was not supplied to the public, that was not supplied to the staff before the application was certified as complete, and before the public had a right to expect that that's what they should study and prepare for at this meeting, then she believed that a continuance based on that fact alone would be in order. She did not believe it was legal under the UDO or under the Constitution for Council to consider this now. And whether it's in the form of introducing the map or introducing what he says the map says, the plan was submitted and was certified by the Planning Director as complete.

City Attorney Oast said that in the nature of projects like this as they proceed into development, there are details about plans that can and will change because of compliance with technical requirements. He doesn't think that it is relevant to the political approval of what is being sought here. A map could even change even after a conditional use permit is allowed. They may get into site development after the conditional use permit is issued that would case them to have changes to some of their plans. He didn't think that there is a basis for continuance that the revised map has since been submitted. He didn't know how relevant it is from either standpoint that this kind of technical information enters into Council's consideration at this point. Again, he didn't think there is a basis for a continuance. It was his option that it would be appropriate to overrule the objection and let Mr. Deutsch proceed, with the understanding that the information that he is eliciting may not be relevant to Council's consideration.

Ms. Lawrence submitted Wade v. Town of Ayden, 125 N.C.App. 650, 482 S.E.2d 44 as Neighborhood Exhibit 7.

Planning & Development Director Scott Shuford said that many of the opponents and some of the proponents think that at the conclusion of this hearing, if Council issues a conditional use permit, that's tantamount to issuing a building permit and that is not true. What was required from the applicant is a concept plan and if it is approved through this review process, Council will impose conditions that will make changes to that plan. That's why it's a conditional use permit. If it were fully complete, staff would come to Council and ask for approval as is, and then Council may or may not be in a position to make many adjustments to it. Assuming it gets passed, and this is true for any conditional use permit, there will still need to be formal site plan review by the Technical Review Committee, formal erosion and stormwater control review by City staff, and when the building permits come in, they will have to be reviewed by Building Safety Department and by the Fire Department. DENR will enforce any of the contamination requirements. FEMA rules will have to be followed and the Army Corp of Engineers, from what he understands, will have a say over the development of this project. There is a huge amount of technical information that still is going to be required of the developer in order to actually construct the project. This is a static plan subject to some change and modification through this process. However, the material that was presented by the represented opposition was based upon information that was in the Planning Department's files. That information changed. He didn't know when the changed information was received, but apparently it was last week. So, to hold the represented opposition accountable might not be fair. He noted that the City Attorney has advised Council that it may not be a relevant issue anyway.

Mr. Shuford said the City Engineer indicated that when the changed information was received, she did contact Mr. Guttman and passed it onto him at that time.

In the interest of time, Mr. Deutsch waived their right to put on any further rebuttal evidence.

Mayor Worley said that since Mr. Deutsch waived any rebuttal evidence, it would render the objection moot.

At 8:09 p.m., Mayor Worley announced a break.

Ms. Lawrence, one of the attorneys for the represented opposition, said the burden of proof in a conditional use permit hearing is on the applicant to make out a main case that he can meet these standards. She referred to the case SBA Inc. v. City of Asheville. We contend that the applicant has not met this burden of proof. Condition No. 1 has not been met – the proof she noticed was the assurances that it wouldn't, assurances that the toxic plume would be dealt with at some point, and that their extension of the floodplain would protect it from flood. None of these are substantial evidence. Council did hear substantial evidence that a toxic plume exists on the site, it will be around for another 5-15 years unless remediation takes place quicker, that it is about 15 feet underground and at one of the places above it, the plans call for grading down 14 feet – just being one foot of ground to protect the movement of that toxic plume. The recommendation is to get the remediation in place and working before you can be assured that it will be dealt with. All of the plans of the developer use the land over the toxic plume. This is a serious health and safety issue. It does not mean they can never do anything with the property. It means that right now you have a very serious safety issue. The runoff and the retention ponds are being used for two purposes – for stormwater and for flood control. To use them for two may mean that when the flood comes along, the ponds are full. There is significant work, according to the plans, in the river resource yard. Our ordinances prohibit anything going into the river resource yard that would require fill and this would. The requirement is that the proposed restricted use does not require fills or that the average elevation of the land surface is not raised. If you do not fill and you do not raise the land surface, then you can put parking areas there. But they are filling and they are raising the elevation of the land. They are putting some permeable parking but mostly impermeable because it costs more to put in permeable pavement. This is a flood hazard. This is 58 acres of pavement. Condition No. 2 – Council has heard how this will involve grading 25 acres and 1,300 linear feet of the river is going to be scooped out and straightened to a 2 to 1 fill. If you chose the widening of the Swannanoa River Road for traffic mitigation, that would mean a big impact on the cliff and many people have testified that it would cause horrible damage to the natural and topographic features. The applicant said that it would be compatible. We believe that is not meeting the burden of proof. Condition No. 3 – They would be overburdening the easement on the River Ridge Apartments and grading adjoining property. That certainly will have a value on River Ridge Apartments after it's graded. The applicant did not present any kind of market analysis as to property values. You heard a lot of opinion testimony but didn't have strong evidence acceptable to the finding that there would not be a decrease in property values. Condition No. 4 – The scale of the Wal-Mart building would be twice the size of the biggest building around which is Lowe's. There is a case called Vulcan Quarry that talks about what this standard might mean. Two of the three conditions they use is that it's surrounded by residential property and that it's a violation of the comprehensive plan. The 2010 plan does zone this site industrial. We admit that in the Vulcan case the nearest different use was a commercial use two miles away and given the City, we don't believe that we could meet that condition. But we think that the two out of three conditions are so compelling, along with the testimony that Council had on this point. Condition No. 5 – The developer testified that it would be smart growth and that the 2025 plan said it would be good. According to the 2010 plan, which is the official comprehensive plan, this is zoned industrial and that does not comply with our official plan. There was testimony that it does not comply with economic sustainability and the 2025 plan. In the 2025 draft plan, it makes a list of smart growth vs. sprawl and under sprawl is big-box development. The proof that it will conform is not there. Condition No. 6 – The evidence is that it did pass all of the technical boards that it's been through so far. The only thing we have brought up to question is that traffic congestion is going to interfere with all finds of emergency services and that is very substantial. Condition No. 7 – The applicant admitted that it would cause undue traffic congestion and a traffic hazard. The question is whether they can successfully mitigate that so that Council can make that finding in good faith. We have four choices. City staff is saying to leave that choice to the developer, with the final approval to be by staff. Lancaster County, S.C. vs. Mecklenburg County, N.C. (Neighborhood Exhibit 8) is a case that shows what you can and cannot delegate to an administrator. It says in quasi-judicial situations, such as this, you cannot give decisions which require decision-making discretion to your administrators. It is not their role to take on that kind of responsibility. If they make the final decision there will be no opportunity for the public to have input on any kind of specific mitigation plan. We have four choices – none of which are developed and none of which can be shown to work. It's hard to have meaningful input or study on that plan. If you look at all four choices, you see serious problems with each one. The shuttle buses - all we know is that Congressman Taylor may be able to find some money for it. We don't know if it will work. We have had vague reference to other cities where the bus systems in question are significantly different, such as Boulder and Chattanooga. Everyone will drive to the area to get on the bus and the obvious conclusion is that they will drive to Wal-Mart to park, even if they are going to get on the bus. If public transit funding is spent on this private shuttle system, it will deprive the Asheville community of desperately needed funding for the City bus system. The "half-diamond" interchange from I-240 is a remote possibility. It violates FHWA safety standards concerning the placement of exits. If they are too close, there is too much weaving and there is a safety hazard. You don't solve a safety hazard by creating another one. It will also be very costly and if done with public funds would push back the completion of the projects already identified as priority needs for the City. It would also require the taking of privately held lands. The construction of a frontage along Wood Avenue – this is an extremely remote possibility because the NC DOT is not fond of giving away right-of-way along interstates which they assume will need added lanes in the future. This would also be very costly. This option has the drawback of severely impacting the Sayles Village neighborhood and creating a traffic hazard there. The widening Swannanoa River Road. Many people think that would be a solution but it would be a very complex project because of the geography, environmental concern, and the cliff. This is a years long proposition and to widen a road in this state takes 10-12 years. To get a conditional use permit that you couldn't use for 10-12 years is not much good. If they use up all the capacity of Swannanoa River Road then that road is too congested, which would prohibit other large undeveloped lots along Swannanoa River Road to be developed. There is one small point about Stevens Street – we don't know how the developer will accomplish going over the railroad tracks. The minimum height clearance that NC DOT has been asking for gets raised almost every year and it's now to 25 feet. Whether or not that road can be engineered to meet Norfolk Southern's specifications is still an open question. The applicant has the burden of proving that traffic can be accommodated safely. It seems unlikely to us that that condition can be met. It certainly has not been proven to be met. Many, many rules of procedure of the City, in her opinion, have not been followed. The conceptual site plan was never revised after the TRC review and there is a very clear requirement for that to happen. It says it "shall" be amended and a new one presented before the Planning and Zoning Commission. That never happened. It makes it very hard to know what you are judging. She cited a case Freewood Association where the applicant applied for a conditional use permit for a private family campground and it turned out they were going to put in a nudist camp. The court said the use of the property has to be stated truthfully and accurately in the application. It's the right of the public to examine these things before so they can address Council. We haven't had that chance. Phase 2 is before Council for rezoning. We don't think that all of those requirements have been met. We don't really know what is going to happen in Phase 2 and Phase 3. It seems to me that the only way you can approach those two in terms of impacts that might be adverse, is that you need to look at the impacts of this proposal. Council needs to realize that there is absolutely no requirement for them to ever build the Urban Village. Will their plans erode the opposite bank of the Swannanoa River? We don't know. We do know that they will take down a 100-foot hill, there will be 25 acres of fill, and an additional 5 acres in the floodway. We do know that they are going to disturb 1,300 linear feet of the riverbank. We do know they will disturb the river for a new bridge. What will happen to property values? We don't know. You have heard a list of other reviews this project has to go through but what you didn't hear is any other chance for the public to have any input on this. We believe you cannot meet your duty responsibly by granting the conditional use permit on the basis of the evidence before Council today. We would urge you to deny it. If you do not deny it, we would urge you to continue it so that everybody does have a chance to examine the information. We believe if all the plans were submitted and all of the conditions that the TRC has asked to be complied with were done, they could not show you a plan that would work. They could only show you a plan that would require a variance because of disturbing the river resource yard and there are no variances from that. You cannot ask for a variance in a conditional use permit. We think this project would not happen if they had complete information.

Mr. David Matney, attorney representing the developers, emphasized that this project has been approved unanimously by the River District Design Review Committee, approved by the TRC and by the Planning & Zoning Commission. City staff has recommended approval with certain conditions. We agree the conditions with the exception of a couple. We do not agree that Ms. Lawrence and Mr. Gregory represent anyone who is distinctly affected by this project. We object to everything they said to the extent of their views doing that. Condition No. 1 – An important term is "materially" endanger the public health and safety. Anything anybody does affects somebody. That's not the issue. Is there going to be a little more traffic or is there going to be a little more danger – is it material? We have to comply with the engineering requirements about flooding. We have to make no difference for the floodway. Regarding environment, we have to comply with the State. The State isn't going to let us do anything that materially endangers. You don't have all the plans for that because this is a use. City Council is not the technical people to make that decision. Council needs to look to see if the use meets the seven conditional standards. You have all the evidence from City staff and from the City agencies that says it does not materially endanger. There will be someone injured or killed on Swannanoa River Road whether this development is built or not. Condition No. 2 – The proposed use is "reasonably" compatible. The only way you can make it totally compatible is to build it underground. Every development changes something. Staff has looked at this and has said the developer has disturbed the site as little as possible. It is correct that we will be disturbing on the riverbank, but what we are doing (and Ms. Lawrence was not at the Planning & Zoning Commission hearing when this issue was first brought up) is removing asphalt that the Sayles people put along the riverbank to stabilize it. We don't think that's a good idea So, yes, we are disturbing that part of the riverbank to take up asphalt. If you don't want us to do that, we won't – but it seems like the sensible thing to do is to change it from asphalt to the natural topography of dirt and plants. The only other two things they will be doing is taking up one bridge and putting in another bridge. In reading through the report of our flood engineer, moving that actually helps the flood because the existing bridge is narrow and restricts the flow and the new bridge will not restrict the flow. So, moving it from the one location to the different location and making it wider will actually be helpful. We are not doing any digging or drilling in the river resource yard and we know we can't – that could be one of the conditions is that we don't do that. We won't do that The flood water issue is a non-issue from Council's perspective other than saying "comply with our technical people." Whatever permits we have to have, we will comply. Pollution. It's the same non-issue from Council's perspective because what the City requires is that we meet applicable governmental requirements. We will meet DENR requirements. If the Environmental Protection Agency is involved, we will meet those requirements as well. One man testified that this is on a Superfund site because of the groundwater. That's incorrect. It was on the Superfund site because the drums that were left there when Sayles Biltmore Bleacheries went out of business. The Superfund had to clean up the chemicals that were contained in drums - not because of the groundwater. The opposition experts talked about the environmental, water, etc but not a single one of them had done a study. They looked at our reports and said those reports were good but disagreed with their conclusions. That is not evidence. They haven't done their own studies – they just don't like what we've done. Condition No. 3 – "...development . . will not substantially injure the value of adjoining or abutting property." The people who testified for the applicant talked about the property around the development and that it's value will not go down. The people who said it's going to hurt their property values were up on Fairview Road and in Beverly Hills – they are not adjoining or abutting. The closest residence is either across either I-240 or on the other side of Swannanoa River Road and behind the commercial development. The closest residents are people in the apartments and there was no testimony that it would hurt their values. Condition No. 4 – We are taking a 650,000 square foot building that is presently on the property and reducing it to 400,000 square feet. We are making it smaller. The neighborhood consists of commercial development and the interstate. When you look at the scale, yes, this is bigger than what is around it, but it is smaller than what is there now. Condition No. 5 – "...development ... will generally conform ..." There are a lot of things in the proposed 2025 plan which talks about concentrated pockets of urban development (our urban village) because they are easier to serve with public transit and the opportunity for people to park once and go to several destinations. It talks about concentrated urban villages along major corridors. When we start looking at the City's plan, the Riverside Parkway says that there would be a gateway boulevard, which adjacent development should occur on larger parcels with few access points. That is what we are doing. It said it should also be apartment complexes, office parks or a concentrated commercial development. I think we meet all of that. The plan talks about infill (taking vacant or underused lots) and this development is not sprawl – this is coming back in. Condition No. 6 – All of City staff and agencies that have said this condition is met. A concern was expressed about rescue vehicles. What they are talking about is problems right now. No one has done a traffic study and said that there will be interference with rescue vehicles. Condition No. 7 – "... use will not cause undue traffic ..." Most people say we have traffic problems right now. The development is not causing those. People on Fairview Road say that there is a problem. There is no evidence that this is going to "cause" traffic. We were instructed by City staff to make a decision that won't use up all the capacity on Swannanoa River Road. First traffic mitigation – we build a 1.7 mile road from Swannanoa River Road to Fairview Road. Second, we are doing to synchronization the lights on Fairview Road, which helps existing as well as future traffic. Third, we are going to widen Swannanoa River Road at our entrance and add

turning lanes for people traveling each way to help the traffic and make it safer. Plus, we have agreed to pay a substantial sum for a traffic calming study to see what else might be needed. If you look through our numbers, which he doesn't think the City's traffic engineer has disagreed with – we use substantially all of the capacity on Swannanoa River Road. That's not all, most, but not all. We think we have satisfied everything and we don't need to do anymore. But, it's a political decision if substantially all is close enough to all or if something more is needed. We recognize that being close is enough to have to do something. We met with City staff and the NC DOT and City staff felt that all four options would all work from a traffic mitigation standpoint. Whether or not any or all of them can be done is a different issue. What Council is looking at is if City staff and our engineers say these work, Council can approve the permit saying that they find that any one of these four options would be a significant traffic mitigation. Then the developer would work with the City's technical staff to see if they can meet one of these. If the developer can meet one of these options, the project proceeds. To put off the use until we meet one of these would probably be another lengthy meeting. Contrary to what Ms. Lawrence says, Council can delegate certain things, but not the decision. Council would be saying to staff that they approve this, provided the developer meets the technical requirements. City staff has to confirm that the developer has met technical requirements. In each one of the four options it would be up to City staff to determine that the developer has met the technical requirements on the one that the developer picks. And basically that is the way procedurally to do it. Professor Clark was very careful about what he said and what he said was that he couldn't say it was wrong. He said he might have done it differently, but he can't say it's wrong. That is not evidence. If he had done it differently, that would have been evidence. So, the only evidence Council has is the developer's staff saying the mitigation things that the developer has done is enough. City staff is saying what you have done is almost enough – but you need to do one of these other four things.
In number 8 of the staff's recommended conditions, about the Wal-Mart lease over the existing facility, we don't want it dark either. We understand Wal-Mart's intentions are to sell it (as a matter of fact our developer wants to buy it if it's been on the market), but we have no control. We are not lessor and we are not lessee. No applicant has any control over that. We don't mind a condition that we exert our best efforts to talk them into this, but we can't control that. In number 9 of the staff's recommended conditions, regarding the access easement, we don't have the control or ability to transfer that without the permission of the adjoining property owner. We are willing to do whatever we can legally do, but he believed the City Attorney has received a letter from the adjoining property owner's attorney saying they don't know that they are going to agree to it. Given all of the discussion, in number 2 of the staff's recommendations, he wasn't sure if 12 months is long enough if the developer ends up having to do one of the options off I-240. He asked that Council extend that to 24 months.

At 9:10 p.m., Mayor Worley closed the public hearing.

City Attorney Oast said that this action requires two separate votes. There are two applications in an integrated plan. The applicants would prefer that Council vote up or down on the conditional use permit before a vote is taken on the rezoning for the Urban Village District. It was his understanding that the applicant might with withdraw their application for the rezoning if they conditional use permit is not granted.

Mr. Shuford said that one purpose of a public hearing is to get more information on a particular project and the end result is usually to get a better project. He said that traffic engineering numbers are not derived from an exact science. Some facts are not in dispute from a general sense is that the current volume on Swannanoa River Road traffic volume is roughly 8,600 cars a day and that current volume is about 60% of the bottom level of Level of Service D capacity of the roadway. The proposed development would add roughly 5,000 trips a day to that roadway. That development would use about 35% of the total Level of Service D capacity of that roadway, which is more than a 50% increase over the base conditions. That is the basis for staff's insistence on mitigating that impact. As we went through this process we did discuss the turning lanes for people traveling each way to help the traffic and make it safer. Plus, we have agreed to pay a substantial sum for a traffic calming study to see what else might be needed. If you look through our numbers, which he doesn't think the City's traffic engineer has disagreed with – we use substantially all of the capacity on Swannanoa River Road. That's not all, most, but not all. We think we have satisfied everything and we don't need to do anymore. But, it's a political decision if substantially all is close enough to all or if something more is needed. We recognize that being close is enough to have to do something. We met with City staff and the NC DOT and City staff felt that all four options would all work from a traffic mitigation standpoint. Whether or not any or all of them can be done is a different issue. What Council is looking at is if City staff and our engineers say these work, Council can approve the permit saying that they find that any one of these four options would be a significant traffic mitigation. Then the developer would work with the City's technical staff to see if they can meet one of these. If the developer can meet one of these options, the project proceeds. To put off the use until we meet one of these would probably be another lengthy meeting. Contrary to what Ms. Lawrence says, Council can delegate certain things, but not the decision. Council would be saying to staff that they approve this, provided the developer meets the technical requirements. City staff has to confirm that the developer has met technical requirements. In each one of the four options it would be up to City staff to determine that the developer has met the technical requirements on the one that the developer picks. And basically that is the way procedurally to do it. Professor Clark was very careful about what he said and what he said was that he couldn't say it was wrong. He said he might have done it differently, but he can't say it's wrong. That is not evidence. If he had done it differently, that would have been evidence. So, the only evidence Council has is the developer's staff saying the mitigation things that the developer has done is enough. City staff is saying what you have done is almost enough – but you need to do one of these other four things. In number 8 of the staff's recommended conditions, about the Wal-Mart lease over the existing facility, we don't want it dark either. We understand Wal-Mart's intentions are to sell it (as a matter of fact our developer wants to buy it if it's been on the market), but we have no control. We are not lessor and we are not lessee. No applicant has any control over that. We don't mind a condition that we exert our best efforts to talk them into this, but we can't control that. In number 9 of the staff's recommended conditions, regarding the access easement, we don't have the control or ability to transfer that without the permission of the adjoining property owner. We are willing to do whatever we can legally do, but he believed the City Attorney has received a letter from the adjoining property owner's attorney saying they don't know that they are going to agree to it. Given all of the discussion, in number 2 of the staff's recommendations, he wasn't sure if 12 months is long enough if the developer ends up having to do one of the options off I-240. He asked that Council extend that to 24 months.

At 9:10 p.m., Mayor Worley closed the public hearing.

City Attorney Oast said that this action requires two separate votes. There are two applications in an integrated plan. The applicants would prefer that Council vote up or down on the conditional use permit before a vote is taken on the rezoning for the Urban Village District. It was his understanding that the applicant might with withdraw their application for the rezoning if they conditional use permit is not granted.

Mr. Shuford said that one purpose of a public hearing is to get more information on a particular project and the end result is usually to get a better project. He said that traffic engineering numbers are not derived from an exact science. Some facts are not in dispute from a general sense is that the current volume on Swannanoa River Road traffic volume is roughly 8,600 cars a day and that current volume is about 60% of the bottom level of Level of Service D capacity of the roadway. The proposed development would add roughly 5,000 trips a day to that roadway. That development would use about 35% of the total Level of Service D capacity of that roadway, which is more than a 50% increase over the base conditions. That is the basis for staff's insistence on mitigating that impact. As we went through this process we did discuss the

498

traffic matter in great detail from the very beginning with the applicant. Of the four proposed traffic mitigation options presented by staff, the first three were all suggested by the applicant as possible ways to resolve it. The only option that unilaterally came from staff was the widening of Swannanoa River Road. Given the testimony heard at this hearing, it is clear that the most direct method of addressing the capacity issue is imposing a condition of widening Swannanoa River Road from South Tunnel Road to Fairview Road as a condition. As a consequence, and given the information we have heard through the public hearing, staff would now recommend that Council select that option as a condition of approval, if they wish to select a specific option. The road widening will be quite expensive and we would not want to put ourselves in a situation where there wasn't some flexibility on the part of the applicant to perhaps consider eliminating the 1.7 mile connection through to Fairview Road as a means of reducing that expense. He explained that the developer proposed the 1.7 mile new road as a method to mitigate the traffic on Swannanoa River Road and it takes off approximately 15-20% of the total project traffic that would use Swannanoa River Road. Since the 1.7 mile new road is a very expensive option on the part of the developer to create a road improvement that mitigates a fairly small amount of the impact on the network, staff is suggesting that if they didn't want to go to that expense and build the 1.7 mile of new road at this time, to use that money to widen Swannanoa River Road, so long as the mitigation of the traffic gets to a reasonable number. That would be something at the developer's option to address. There has been some pressure from both sides to try to get to that number more exact. He read the following suggested condition: "The developer shall mitigate the traffic impact of the development to Swannanoa River Road through the implementation of the following transportation improvement project: Swannanoa River Road shall be widened from South Tunnel Road to Fairview Road to such an extent that it retains not less than 10% of its design capacity (for that Level of Service D) for use by future development. This project shall be designed, permitted, and constructed entirely at the developer's expense and in accordance with all appropriate local, state, and federal procedures and regulations. In addition, formal study of the mitigation project would be required at the developer's expense in order to ascertain its specific effectiveness in addressing the capacity condition prior to approval by the City. This study shall be performed under the City's supervision by a traffic consultant under contract with the City. Design, permitting, and initiation of construction of the mitigation project shall occur prior to the issuance of a building permit for any building in Phase I and project construction shall be completed within 12 months of the issuance of any certificate of occupancy. The developer shall provide any necessary financial guarantees of this project completion schedule to the satisfaction of the City Engineering Department." The reason for the delay is, as are the first building to be constructed will be the largest building on the site, but that is only a percentage of the total site development for this project, so having time for future build-out as that project occurs, it does make sense to have a delay built in there. In effect, if Council wants to select a particular option, that would be the one staff recommends. Should Council approve the conditional use permit subject to that option and we get to some point in the future where there is some reason why it cannot be done, that option can come back to City Council (go through the same public process) for further debate and decision.

When Councilman Mumpower asked about the 1.7 mile access road, Mr. Shuford said that access road was a component of the developer's project at the beginning as a way to address the traffic which would have some benefit for their project. Obviously having a connection to another spot in which there is an interstate interchange would be a great way to address that issue and it also provides a good access when they get ready to develop the Phase 3 area in the future. It was not until City staff got through the TIA in mid-to-late May that we knew the total extent of the relief that that particular option provided to Swannanoa River Road and that was at the point in time that City staff started discussing options for the developer. That was when the developer brought forward the first three options that they felt were appropriate. Then staff suggested the fourth option of widening Swannanoa River Road.

When Councilman Mumpower asked if it is staff's opinion that the mitigation efforts on the part of the developers on the traffic issue are not adequate, as they currently exist in the plan. Mr. Shuford replied that they are not and that has been said from the very beginning. The issue is what method to use to get to that point. At the outset of the process we suggested four alternatives and as we have gone through the public hearing process, we feel comfortable in narrowing it to one option and to leave it broad enough so that some aspects of it can result in cost savings for the developer by adjusting it.

Vice-Mayor Bellamy said that Professor Clark gave his opinion on the four traffic mitigation options and he did spend a little more time in talking about the improvements on Swannanoa River Road. After listening to his testimony, she felt he did support the widening of Swannanoa River Road.

Upon inquiry of Councilman Mumpower, City Attorney Oast said that Professor Clark was rendering his opinion on technical information that had been supplied to him by the staff. An earlier point Mr. Matney made was that Professor Clark is not a licensed professional engineer in North Carolina and as such may not qualify as an expert in some forms in this state. City Attorney Oast felt Council can take note of his qualifications and evaluate them however they wish.

Ms. Gaye Sprague, the City's traffic consultant who is licensed in the State of North Carolina, said that the City had presented four alternatives to Council of ways that the issue of almost being at the top of Level of Service D on Swannanoa River Road could be addressed. After listening to the public hearing and the issue of what can and cannot be delegated to staff, the staff decided that the one we can most firmly put our finger on knowing that we can add a certain amount of more capacity on the road was widening.

Ms. Sprague said Council has to have is an objective and reasonable way to assess the operations of traffic with and without whatever the proposal is. And you have to also clearly lay out what is required to address any deficiencies identified. In Asheville, you require an applicant to produce a TIA. You have very clear methodology on how that has to be handled and that methodology is the generally accepted methodology. You can take the method of doing it and any traffic engineer should accept it. In Asheville the precedence has also been set that the applicant must make recommendations on how to mitigate any location that exceeds Level of Service D. In most cases we are looking at intersections only. This applicant was required to analyze 13 intersections because this is a big development. The applicant's traffic engineer worked with the City's traffic engineer and went over all the assumptions. They were cleared through the City's traffic engineer. There are assumptions in any study that is done. They then identified those intersections where we were going over Level of Service D. The intersections that the applicant identified and recommended mitigation are (1) at the entrance to the development, and (2) a signal at Fairview Road and Stevens Street. In addition they recognized that traffic calming is an issue. City staff agreed with those recommendations, but we disagreed on the degree of problem that traffic calming was and we asked them to give more money to that. We pointed out that the closed spacing along Fairview Road was a problem and that we would want them to do a signal system to correct that. The issue that is getting the most attention is the operation of Swannanoa River Road. We, as staff, want Council to remember that we are close to going over the guideline number we use for Level of Service D over 24 hours.

Upon inquiry of Councilman Peterson, Ms. White defined interceptor trips as people who stop by a development on route to another destination, which is their primary destination. We did not try to forecast how much cut-through traffic might use the new 1.7 mile access road.

Councilman Peterson said that we now estimate Swannanoa River Road can handled approximately 14,000 trips per day. If it were widened to 4 lanes, divided with perhaps nice turn lanes, how much traffic could it hold then? Mr. Shuford guessed if the road were widened to a 3-lane cross section, which is an acceptable gateway design in both our proposed 2025 plan and in the long range TIP that the Transportation Advisory Committee has adopted, it would hold approximately 18,000. It the road was widened to 4-lanes, it would hold approximately 27,000. Either one of those widenings appears to overcome the issue, with or without the 1.7 mile new access road to Fairview Road.

Councilman Peterson's traffic calculations show that if the new 1.7 access road is not built and all the traffic comes in from Swannanoa River Road, then they would have to widen Swannanoa River Road to 4-lanes.

Mayor Worley understood (and Mr. Shuford confirmed) that the staff's new condition is not 3-lanes or 4-lanes, but to widen Swannanoa River Road to the point where you maintain a minimum of 10% unused capacity. He took that to mean that if it's 3 lanes, they may still need to keep the new 1.7 mile access road and if it's 4 lanes they may not need to keep the access road. The condition would be the mitigation necessary to maintain at least 10% unused capacity on Swannanoa River Road.

Councilman Peterson felt that if Swannanoa River Road were designed as a 4-lane parkway and there was no access road the impact in Oakley would be a lot less.

Mr. Shuford said since traffic engineering is not an exact science, that instead of getting into a preference, the condition would need to be studied and go through a process in a way that would result in us having at least a series of very strong assumptions about what would happen before we have a final decision – that is why we structured the condition that way.

Councilman Peterson felt the public expects Council to make that decision. He was a little uncomfortable of giving too many options. He didn't want to give the public the impression that Council is not making the decision about where major roads will be constructed.

Councilman Mumpower asked if the developer's traffic engineer agrees with staff's position that there needs to be a 10% minimum excess capacity on Swannanoa River Road and that their mitigation efforts do not provide for that. Ms. White said that she understands how they came up with the 10% but she doesn't agree that it should necessarily be a requirement. The requirements for the TIA require us to mitigate to a Level of Service D and it does not specifically say to a Level of Service D with 10% of the traffic still remaining. This is the first time a percentage has been defined.

Ms. White agrees that widening Swannanoa River Road is an ideal solution. If that were totally within our power we would have pursued that as the total access plan for the site and would not have pursued the 1.7 mile road access to the back. What is problematic for us from a standpoint of making that happen is that the right-of-way is very prescriptive and very narrow. The end of Swannanoa River Road near Fairview Road runs by the golf course. As a private entity we have no power to take property from the golf course to provide the required amount of right-of-way for a wider section. That would mean we would be restricted to the one side of the river, which is a narrow piece of land off of the existing shoulder of the road to do all of the widening. We don't believe that it is physically possible for us to accommodate that given the limits of our power as private landowners. We cannot condemn property and we cannot force someone to sell to us in order to provide the required amount of right-of-way. City staff has indicated that the City is not able to offer assistance in that way. Our next best plan to mitigate the traffic impacts of this development was to seek alternative access to the site and that's where the rear access proposal was developed.

Mr. Shuford said that the TIA requirement for the City deals with a Level of Service D at intersections and not necessarily for a road segment, because it's intersections that generally are the controlling factor in the level of service determination. Ms. White is correct in that the developer did the right thing according to the TIA requirements, but there is a condition regarding traffic with the issuance of a conditional use permit. It is in staff's opinion that we are close enough to the traffic capacity on this road that there is going to be an undue level of congestion. We have tried to work with the developer to resolve this. There are limits on what the developer can do for any of the four traffic mitigation options. They don't have the ability to condemn land and we did discuss the possibility of the state doing that. This particular project would have to be put on the TIP before they would be in a position to do that. The City is not able to assist with the condemnation of property if that is what is necessary. The golf course is owned by Buncombe County and he didn't know if they would be willing or able to accommodate the right-of-way but that is something that needs to be study, especially if Swannanoa River Road is going to be widened in the future.

Councilwoman Jones asked if consideration was given to make the development smaller thus creating less traffic. Ms. White said that there was a different proposal presented and because there were problems with dealing with traffic on that issue, the developers made a lot of changes to that development plan incorporating the urban village concept to get sharing of trips between different land uses, the intensity of out-parcel usage (like restaurants) was downsized. That proposal was more intensive from an overall traffic standpoint.

When Councilwoman Jones asked what percentage of traffic would come from the Supercenter, Ms. White said it would be approximately half for full build-out, which would include Phase 3.

Councilman Ellis preferred the new 1.7 mile new access road. It appears that a lot of the traffic can get to the project with access to I-240. That would serve Swannanoa, Black Mountain, south Asheville and east Asheville. He felt that keeping the new access road, they might not need as much of mitigating traffic from the bridge to Fairview Road. What seems very important is from the bridge to South Tunnel Road.

Ms. White said that when they met with City staff to discuss options, Councilman Ellis' suggestion was discussed. City staff was not satisfied with that.

City Engineer Cathy Ball explained that what that option showed was that even with the access road built, there was the same amount of traffic on both sections of Swannanoa River Road from the bridge to South Tunnel Road and then from the bridge to Fairview Road. Even with having the back entrance it didn't decrease the amount of traffic on the section of Fairview Road to the bridge.

Upon inquiry of Mayor Worley, Ms. Ball said in reviewing the TIA, there is actually more traffic from the bridge to Fairview Road even with the back entrance. That was the basis of staff's recommendation that Swannanoa River Road be widened from South Tunnel Road to Fairview Road.

Mayor Worley asked if the money is made available, would that impact the State's ability, willingness and speed within which the project could be done. Mr. Ken Putman, Division Operations Engineer with the NC DOT, said that one of the big hurdles is money, so if the money came from a private source, that would take care of that issue. But, the planning, design and all environmental impacts would still have to be met. Availability of money would probably speed up the process some because if we were to put a new project in TIP today, it might be ten years before we see it done. In this case, that might knock off two-four years, so we are still talking about in excess of five years of all that planning and design.

Upon inquiry of Councilman Mumpower, Ms. White said that transit is a way to reduce vehicle trips. Turn lane improvements will also provide some additional capacity.

Councilman Mumpower asked if a continuance of this matter provide staff with an opportunity to explore options and possibilities on this one aspect. Mr. Shuford replied that it would and might be advisable to allow this option to be explored.

City Attorney Oast said that Council could continue this matter to obtain further information.

Councilman Peterson would be in favor of continuing the matter because he would like to see some preliminary designs of a nice 4-lane parkway on Swannanoa River Road, with some turn lanes. Also he'd like to know how much the impact would be, whether it is feasible, etc.

Councilman Dunn felt that the golf course has a lot of character and should not be disturbed for a 4-lane road.

Vice-Mayor Bellamy asked if some of the over 1,000 parking spaces could be reduced for more green space which might help control stormwater runoff. Mr. Green replied that the parking proposed by the developer is approaching the maximum that is permitted under the UDO. There is room to reduce the parking being proposed and still meet the City's UDO requirements. Their tenants have certain parking requirements so we would have to work closely with them. If the issue is continued and with the direction from Council, staff will work to assure that the tenant needs are being met also. Mr. Green said that staff will work with the developer, since reducing the stormwater runoff is the end goal, and maybe we can provide the parking but look at more pervious paving so that the needs of the tenants are met but the goal of reducing stormwater runoff is met also.

Ms. Lawrence felt that a continuance of this matter would be appropriate. We ask that it be continued until after all the requirements for all the different plans are met. We want a full and complete record so that Council can have that to consider and they can have that to give input on.

Mr. Matney said what he has heard the City say on the traffic issue is that we like this revised forth option that Mr. Shuford suggested. He didn't hear Mr. Shuford say that the others wouldn't mitigate he just thinks a lot of them couldn't be met because of other issues. If those could be accomplished that would be adequate mitigation. The revised forth option, if it could be accomplished, would be adequate mitigation. He felt Council could approve the permit and say you have five things that Council finds would mitigate the traffic. Some of them will not happen but leave it up to the developers to see if they can make it happen. If we can do any one of those, it is adequate mitigation. They would rather have more options than one.

Mayor Worley said that if Council decides to continue this matter, we would not be required to re-open the public hearing. City Attorney Oast said that the continuance would be to explore the option that Mr. Shuford has suggested (revised option no. 4). He didn't think that would require an additional public hearing.

Mayor Worley suggested that instead of the condition being to widen Swannanoa River Road so that we maintain a minimum capacity of at least 10%, what if we said to widen Swannanoa River Road and prepare a traffic mitigation plan that maintains the minimum of 10% excess capacity on Swannanoa River Road by whatever means that our traffic engineer confirms meets those tests.

City Attorney Oast said that there is case law to the effect that you should not leave some kinds of discretionary matters in the hands of the staff. He couldn't say for sure whether that proposal approaches that threshold or not. As long as staff's discretion is sufficiently confined within certain specific parameters, he felt it would be defensible. He noted that the less Council leaves in staff's discretion the more better defensible it is.

Vice-Mayor Bellamy and Councilman Peterson felt that Council should give clear direction to staff.

Mr. Shuford said that there are several other issues that can be addressed. One of the things raised was the urban village won't get built. The applicant did submit, as part of his materials, a schedule that basically ensures that there is simultaneous construction for all practical purposes of Phase I and Phase II (City Exhibit 12). If Council is concerned about that aspect, Council could make that a condition of the conditional use permit. He has some language, approved by DENR, on the environmental issue and how to address that. If Council is interested about the fencing issue raised, we have language we could suggest to Council. In addition, we have some responses for a couple of things that the developer's representatives indicated that they need some help on. One thing is the easement issue where they are not sure that it could be legally assigned to the City and obviously we would want to qualify it. Then the issue they raised about the possibility of having a condition that addresses the existing Wal-Mart store being kept vacant. We have a response to that as well. Basically, though, that response is that we would encourage Council to stay with the original condition. If this matter is continued, there may be another way to get some assurance that the building will not be kept vacant.

Vice-Mayor Bellamy asked about the feasibility of dead-ending Beechwood Road. Mr. Shuford said that instead of doing that, their condition is that there be a neighborhood calming study done. We're really not too enthusiastic about the possibility of simply closing that road off. If you restrict traffic in one area, it expands to another area. Solving the problem of Redwood Forest by simply closing the road might compound the problem of Governor's View Road or the roads in Beverly Hills. That is something that can be studied as part of the traffic calming study.

City Attorney Oast said that if the plan substantially changes then a modification with a public hearing on that part of it would be in order. We won't know if the plan substantially changes until we know the results of this discussion. Council can confine the subject matter, if an additional hearing is required, to just the new information.

At 10:40 p.m., Mayor Worley announced a short break.

Mr. Matney said that if the five options are approved, one of them being widening Swannanoa River Road, then allow the developer to do them, or some combination of them, to keep a minimum of 10% excess capacity on Swannanoa River Road, with the City's traffic engineer confirming the results. He felt that was a technical issue. He didn't think that was giving overbroad discretion to staff.

City Attorney Oast said that Mr. Matney is asking Council to establish a parameter of reserving 10% capacity on Swannanoa River Road and then leaving it to the developer within the five options suggested to figure out a way to reduce their volume to meet that 10% reserve. He advised Council again that the case law is that staff cannot have an undue amount of discretion although some discretion is permissible. The more Council confines that discretion, the more defensible the condition is. He felt that fairly strong arguments could be made that the developer would be expected to bear some of the burden of defending it.

Ms. Lawrence felt that Council should have a transportation plan on the table that Council can agree (after public input) would mitigate the traffic.

Councilman Mumpower is more concerned about the mitigation and that they resolve it based on our criteria rather than how they resolve it.

Mayor Worley said Council can (1) continue this matter to a date certain to give staff and the developer more time to explore the transit options; (2) approve the conditional use permit with a condition that sets standards for the mitigation but leaves some degree of flexibility of the five options or combinations to get the mitigation down; (3) approve the conditional use permit with one of the five conditions as being the flat out condition; and (4) turn it down.

City Manager Westbrook said the staff recommendation is widening Swannanoa River Road from South Tunnel Road to Fairview Road, to the point where a minimum of 10% unused capacity is maintained.

Mr. Shuford said that the way the conditional use permit process works, is that Council can vote on the permit and then at the next regular meeting the City Attorney presents an Order before Council, based upon the discussion, and Council has a chance to vote on that.

City Engineer Ball said that one of the things that has been very difficult for staff is that they do not particularly look forward to making a decision about one of these because there are technical issues that they would make a decision on that may not be the political will of the Council. So staff is not at all offended by Council saying they think they should make the decision. One of the things that has been a concern about the four issues raised is the feasibility of each of those. The reason staff made the revised fourth recommendation is primarily for that reason – there may be some legalities as to how much you can delegate to staff (not that staff is not technically capable of doing that. There is other information that comes in to make that decision, other than technical information. That is one of the reasons staff looked at this and said of the alternatives that we have on the table, which one do we think is most likely. In fact we have been working on a Riverside Parkway that would consist of widening this section of road in some form or fashion. That is the reason we came back to you and said these other ones are kind of up in the air, we don't know if they are going to happen, but we feel like this one is something we have been looking at anyway, so it's most likely to happen. We still don't know the cost. I don't think staff is opposed to, at this point in time, saying the developer needs to go back and explore the feasibility of each of these options and come back with a little more information on each of them. We have heard from the State that the changes of getting the off-ramps are questionable. The question of getting the frontage road is questionable. There has not been any detailed study on any of these options.

Councilman Peterson said that they will be building the development in phases and they will not be generating all the traffic in one year. He felt it would be best to continue to give staff time to look into their suggestion that the widening of Swannanoa River Road is the best option, how likely is that, what is the timeframe, and what would be the best and worst case scenarios. Then Council can have further discussion with staff about the other conditions and their concerns.

City Engineer Ball said that they would like to request that Council recommend that the developer assist City staff with the feasibility study of the four options, especially within the timeline we are talking about.

Mr. Matney said that he hasn't heard City staff say that the five options don't mitigate traffic and now they want the developer to pay money to do studies not knowing whether the concept will be approved. City staff said that the concept of each one of the options is acceptable if they can happen. We would request Council's approval on one of those five specifically or a 10% minimum capacity on Swannanoa River Road using one or more of the four. In addition, City staff has said that they were going to widen Swannanoa River Road anyway, so that means if we don't build this project you're going to widen it, but now they are asking us to widen it. That doesn't seem fair.

Councilman Mumpower moved to continue of this matter until July 23, 2002, to allow staff and developers time to come up with a doable concept traffic mitigation plan, within the confines of the four options (including the modified fourth option), that achieves a 10% extra capacity on Swannanoa River Road. This motion was seconded by Vice-Mayor Bellamy.

Upon inquiry of Vice-Mayor Bellamy, City Attorney Oast said that if Council specifies the developer do something as a condition and it turns out they couldn't do it, then they could not proceed with the build-out of their project, unless they come back to Council to get a modification to either eliminate that condition or have another condition.

Ms. Sprague said that the practical application of Councilman Mumpower's motion is that we would see from the developer some actual lines on a map that show a 3 or 4-lane road. We have not done that to date. The lines on a map to widen Swannanoa River Road will point out to us those pinch points (if they do exist), whether the widening can be done (if they can get the right-of-way), or if it can't be done under any circumstances. It just gives Council more information on which to base their final decision. Some reduction in square footage might be part of it too. If we find out that we can only get 3 lanes for 2,000 feet, but they are willing to reduce the square footage, maybe that would be the appropriate answer. She didn't think the other options would happen, except transit.

Mr. Shuford said that staff would be comfortable with continuing the matter to allow these options to be more fully explored with some better realization of their feasibility so that when it does come back before Council, Council has a better range of certainty as to how well they will work and what can be done.

City Attorney Oast said that it was his understanding that the motion is to delay Council's consideration of whether to issue the conditional use permit pending receipt of more information on traffic mitigation.

Mayor Worley said that if we approve the motion to continue the matter, then the other concerns Council has on other issues would still be up for discussion at the continued meeting.

The motion made by Councilman Mumpower and seconded by Vice-Mayor Bellamy carried unanimously.

V. NEW BUSINESS:

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of May 24-June 13, 2002: Billie MaryAnn Jones (Streets), Dan David (Inspections), Nathan Clark (Streets), Allen Boyd (Police), Lonnie Hoglen (Streets) and Howard Wise (Water).

The City received the following claims during the period of June 14-20, 2002: William R. Burton (Water), Rebecca Gudger (Fire), Francis Cummings (Water), Elizabeth Ballard (Water), J.W. Collins (Water) and Mark White (Streets).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Comments by Grant Millin

Mr. Grant Million, east Asheville resident, spoke about the visioning in Asheville in terms of the development of land.

Comments by Alan Ditmore

Mr. Alan Ditmore, Leicester resident, was concerned that Wal-Mart's pharmacies have a policy of refusing to carry emergency contraceptives.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 11:35 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Thursday – June 27, 2002 - 3:00 p.m.
Council Chamber – 2nd Floor – City Hall

Special Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Mayor Worley gave the invocation.

NEW BUSINESS

A. **ORDINANCE NO. 2927 - ORDINANCE ADOPTING AN INTERIM BUDGET FOR THE MONTHS OF JULY AND AUGUST 2002 FOR THE FOLLOWING FUNDS: GENERAL FUND, GENERAL CAPITAL RESERVE FUND, TRANSIT SERVICES FUND, CIVIC CENTER FUND, STREET AND SIDEWALK FUND, PRINT SHOP FUND, CENTRAL STORES FUND, FLEET MANAGEMENT FUND, AND RISK MANAGEMENT FUND**

ORDINANCE NO. 2928 - ORDINANCE ADOPTING THE BUDGET FOR FISCAL YEAR 2002-03 FOR THE FOLLOWING FUNDS: WATER RESOURCES FUND, PARKING SERVICES FUND, FESTIVALS FUND, WATER MAJOR CAPITAL IMPROVEMENT FUND, COMMUNITY DEVELOPMENT FUND, AND HOME INVESTMENT TRUST FUND

Mayor Worley said that a public hearing was held on the Fiscal Year 2002-03 Annual Operating Budget on June 11, 2002.

On May 13, 2002, a proposed Fiscal Year 2002/2003 Annual Operating Budget was presented to City Council, which included an Ad Valorem tax rate of $0.51 per $100 of assessed valuation, adjusted for revaluation. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, a summary of the Budget along with a notice of the public hearing was published on May 31 and June 7, 2002. The City Council conducted a public hearing on the budget on June 11, 2002.

City Manager Westbrook gave a brief review of the assumptions staff had in making up the budget. Changes Council has instructed staff to make thus far have been made. One item that we still have to include in the budget is $120,000 for the cost of the animal shelter. Phase I is based on the assumption that the State was not going to send the reimbursements to the cities this year which in Asheville's case is $2.6 million. That is in addition to the money they are withholding in the current fiscal year. As far as he is aware, there is no state legislation in the works right now that would send us that money now or in any other year. He thinks it is a permanent loss. In order to make that reduction in the budget, he prepared Phase I which showed $2.6 million in funding cuts. That is the budget in front of Council now. There is a potential reduction next year of an additional $4.2 million if the state decides to withhold the utility franchise fee. Thus far there are several pieces of legislation that have been introduced that would not allow the Governor to keep those next year, but that is still very much up in the air. To provide an alternative if that were to happen, we have presented Council with a Phase II budget which shows $4.2 million in reductions and it also had a 2-cent tax rate increase to make up part of that reduction. What we are talking about today is Phase I – there is no tax rate increase and that is simply to make up for the reimbursements from the State. In a worksession, Council instructed staff to add back into the budget a $116,000 in reductions for reduced hours and temporary staff at recreation centers. That has been done and is included in the budget in front of Council now. There was other discussion with regard to Phase I reductions and that was $900,000 in street and sidewalk maintenance. Where that discussion was left was that the Council would consider whether or not they would include that back in the budget when they consider adoption of the final budget on August 27, 2002, assuming Council adopts an interim budget today.

Budget Director Ben Durant said that there are a couple of issues that will impact our budget over a long-term period. He received information in early June about the structural problem that the state is experiencing with their budget. They are projecting a $2 billion deficit next year. They are also projecting a $1-$2 billion deficits on through 2007. They have a long-term structural problem in their budget that is going to impact municipalities on a long-term basis. Whatever decisions we made about our budget need to look beyond one year. We need to make sustainable cuts or adjustments to our revenue structure that will address long-term need.

In the current year the Governor took some money out of the Powell Bill fund and put it in his General Fund to help balance the budget and he has also plans to do that for next year as well. That is going to have an impact on our Powell Bill revenues because the revenues municipalities get for Powell Bill are based on what is in that state highway trust fund. We need to take a long-term focus. Next year we will lose $170,000 and we have accommodated that loss in our Phase I budget by additional cuts in department operating budgets. In 2004 we would lose $270,000 and so we are going to have to take steps to deal with that loss.

Another issue is what Buncombe County is going to do when they adopt their budget. If they adopt a 63-cent tax rate, which is what they have discussed, that will cost us $185,000 next year in estimated sales tax losses and we have not planned for that. In the subsequent year it would cost us $740,000. They have also talked about a 69.5-cent tax rate increase and we would lose $345,000 next year and $1.3 million in the following year.

Mr. Durant said that Buncombe County wants to charge the City $120,000 for taking animals to the animal shelter. City residents will be paying a double tax as a result. We have to make reductions outside of the Phase I and Phase II cuts already proposed. We propose to close one drop-off recycling site (South Asheville), which has only been opened for four month. That would save us approximately $50,000. We have looked at revenue estimates and we think we can increase those in order to accommodate the additional $70,000.

City Manager Westbrook recommended that, pursuant to N.C. General Statute sec. 159-16, City Council adopt an interim appropriation for the General Fund and other tax-supported funds covering the two-month period from July 1 to August 31, with the anticipation that no later than August 27, 2002, Council would pass a permanent budget and set the tax rate. If the Governor does not withhold other funding, such as the utility franchise fee, then the recommendation is that Council adopt the budget with a revenue neutral tax of 51 cents per $100 value. If the Governor does withhold additional funding, above the reimbursements which we are already sure of, then Council would have to look at the Phase II reductions and/or a tax rate increase to make up the difference. What staff presented was Phase II reductions of about $3 million and a 2-cent property tax increase which would create another $1 which would make up the roughly $4 million that we would lose. All that would be up to the Council discussion at that time. Also, by adopting an interim budget now, what that allows us to further monitor what the state does, allows us to further refine our revenue estimates, and work on the Phase II reductions to see if we can refine those to see if there are better reductions to make or if there are others that will cut long-term costs for us. There are some other benefits for adopting the interim budget at this time.

City Manger Westbrook also recommended City Council adopt the annual Budget Ordinance for the City's various enterprise and non-tax supported funds.

Councilman Peterson clarified that the pay raises for City employees under Phase I is a 3% increase to be paid in December and under Phase II there would be no raises at all. City Manager Westbrook recommended

Councilman Peterson also clarified that with regard to the outside agency funds, the Outside Agency Committee met to try to trim back approximately 15% and the Phase I recommendation is taking their recommendations and cutting them in half, but during the first two months, none of the outside agencies would get any of the funds. Under Phase II there would be no outside agency funding.

Councilman Peterson asked if the City has looked into the effect of the cuts in the Community Relations Council's budget. City Manager Westbrook said that he has made all of the outside agencies aware of status of the budget relative to Phase I and Phase II and he has not gotten any feedback from any of them. Vice-Mayor Bellamy said that City Council has received a letter from the Community Relations Council indicating that because of the drastic cuts they many not be able to fulfill all of the requirements needed for us to keep our Community Development Block Grant funds and HOME funds coming to the City of Asheville because of the staff – they will not be able to operate effectively. City Manager Westbrook said that he would get a copy of the letter and make a recommendation to Council.

It was the consensus of Council that even if the state does give the City the $4.2 million in utility reimbursement revenues, Council would like to review their priorities and what they really want to focus on. If the state does reimburse the City, City Manager Westbrook would recommend that the 3% merit increase remain for City employees.

Mayor Worley said that members of Council have been previously furnished with copies of the ordinances and they would not be read.

Councilman Ellis moved for the adoption of Ordinance No. 2927, with the addition $20,000 for 2/12 of the animal shelter costs. This motion was seconded by Councilman Mumpower.

Councilman Mumpower has made numerous efforts to look for waste, fat, and unhealthy processes in City government and he has been unsuccessful at every turn. He complimented the City Manager for presenting a budget to Council that is revenue neutral and is careful with taxpayer's money.

Upon inquiry of Councilwoman Jones, City Manager Westbrook explained how the $116,000 was adjusted for the recreation centers.

Upon inquiry of Councilwoman Jones, City Manager Westbrook said that as of right now, we are still balanced felt we will be okay at the end of the year. We will not add tremendously to Fund Balance this year, but we will wind up okay.

The motion made by Councilman Ellis and seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 502

Vice-Mayor Bellamy asked if she had a conflict of interest since HOME funds are included in the enterprise fund budget. City Attorney Oast advised her that he did not think she had a disqualifying conflict.

Councilman Mumpower moved for the adoption of Ordinance No. 2928. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 505

UNFINISHED BUSINESS

ANNEXATION ORDINANCES

Councilman Dunn said the City needs to grow. Citizens will gain some benefits from annexation and he realizes that voting against annexation is popular and easy and he doesn't really want to vote against it. The following are facts as he sees them. Annexation doesn't work. If you look at the City limits from 1927, the population is the same as it was about 30-50 years ago. Our staff has been diligent in explaining things, but he does not believe that we have enough police force in the City to take care of our citizens. The fact is that one policeman for every 300-400 citizens is the average and it was one for every 420 when we first started this. The Police Chief said that if we lose two or three officers, it would be critical mass. We have already lost two or three police officers. There was one police officer guarding the whole south end of town and he heard the Police Chief say they could have brought in more police officers from other parts of town. To him that is not adequate protection. We don't have enough police officers to patrol in downtown because our merchants complain about vagrants and dog feces. He didn't remember the statistics for our crime rates, but someone said that our crime rate is a lot higher than some other big cities in North Carolina. He just didn't think we have enough police officers. We are talking about cutting services due to the state and we are now annexing people and cutting services. He said that 1/6 of Asheville's population lives in Haw Creek and there are no sidewalks, no street maintenance or anything. We allocate $400,000 to parks and recreation, $400,000 to affordable housing, $380,000 to outside agencies, $400,000 for police and fire protection for festivals, and $150,000 for a division to oversee festivals – that is $1,730,000 that we allocate for other things but we can't seem to pave the streets in Asheville or take care of the people who live here. We don't even have animal control. People have animals in neighborhoods. When we annex people, it seems to me the money goes in a dark hole. I know that City staff cares about where the money goes but we have citizens that have been in the City for 20 years and they haven't had their streets paved. Yet, we are going to go out and take streets and sidewalks over and we can't even pave a street that's 20 years old. He felt there is a problem with the basic whole system of annexation. He bet that people in this city use streets and sidewalks a lot more than they use the parks and some other things in the City. Everybody uses streets. Between all the potholes and broken pavement, no wonder people can't get around. The fact is we need to make the City a little bit safer. We just wrestled with the budget. We don't know how we are going to fund street and sidewalks. We just cut $900,000 out of the budget but we are still going to keep these other things – affordable housing has $400,000 that is a sacred cow. You've got $400,000 that parks and recreation gets, but we'll sure cut $900,000 out of streets and sidewalks. When these people get annexed, he wants to look them in the eye and say we will provide service for you when we annex. My street in Ballantree was paved last year – it was the first time in 10-15 years. Annexation is important and he does think the people that don't want it is a little wrong. The City has to grow, but the City has to give you something in return and it's not doing it right now. If we are going to say these neighborhoods are qualified to be annexed then we should be qualified to take them over. And he's not sure we are right now. We need some money to do garbage pick-up. When are we going to do something for the people in Haw Creek? If we look at this proposal hard, it might work. We know in a year from now, if we annex these folks, we are going to get $400-500,000. Why can't we delegate $400,000 to streets and sidewalks and hiring a new police officer and make that etched in stone. It's just as important as the Housing Trust Fund and just as important as parks and recreation. If we fund $900,000 for streets and sidewalks – this needs to in addition to that. $1.2 million is what we need to keep our streets just in line. We need to stop worrying about keeping them level with other parts of the state, we need to get them fixed. That is the least we can do for people. I'd like to see us take $300,000 from the annexation and know right off the bat that we have that money – that it's untouchable and it's going to go into streets and sidewalks and the police. That it stays in place for three years – etched in stone, just like the Housing Trust Fund and parks and recreation. It can't be played around with. We know we are getting that now. That will help us solve some of our problems – streets. If we have to cut $900,000 out, maybe we could only cut $600,000 since we know that money is coming eventually. This locks in some money for streets and sidewalks. It creates some money for additional police patrol for downtown. Ten years from now the people that will be annexed will want their streets fixed. What are we going to do – tell them we don't have the money? That is the pattern now. We are not taking care of what we have right now. And we are going to go out and annex somebody else. He wants to vote with Council because he thinks the City has to grow. It's a tough decision for all of us to take people's money. Another thing that bothers him about this whole thing is that we annex just a small piece – where it's just enough people that can vote, but not vote out the Council. It protects us from hostile voters. If we are going to do it right, let's annex everybody that is qualified and quit playing political games here. That would keep some of the career politicians from running again. He thinks it's time for us to take a new look at how we are going to do things when we annex people. It's time to quit promising things that we know we can't deliver. There is no way we can deliver on what the staff has said. The police force isn't adequate. We haven't got the money to even pave the streets in a lot of the neighborhoods. We are cutting garbage service to people who we've annexed and blame it on the streets that are too small. Once you annex somebody that's our problem – not their problem. He asked Council that if we are going to annex, let's start looking ahead and maybe 10 years from now when we annex somebody we would have something to offer.

Councilman Mumpower felt that to imply that City Council and the people who guide us on annexation are selectively annexing people with an eye toward supporting our re-election or creating blocks of voters that would vote us out – he felt that was unkind. Nobody he knows on Council would approach it like that. He certainly doesn't feel safe from any voters. Council hears from them constantly about their frustrations. He is not voting on the basis of a need to be re-elected and he doesn't think that is what drives most of Council.

Councilman Dunn said that staff has told him that they want to protect Council from the voters. He said Council did not run to be protected. That's his point.

Councilman Mumpower said that he likes the idea to dedicate some monies that will come from the annexation for a short period of time. He didn't know if that would work with the budget structure we have or if it's pragmatic. But, he understands Councilman Dunn is trying to make an effort to say we will annex you, but we are going to try to see that some of your monies are dedicated. I would be willing to support that.

Councilman Ellis would be in favor of setting aside some money for streets and sidewalks, along with some other things. He doesn't think Council has the ability to make a commitment beyond one budget year.

Councilman Dunn said that he felt Council can commit monies. We have committed to the Housing Trust Fund, to parks and recreation, and police and fire protection for Bele Chere.

Vice-Mayor Bellamy understands Councilman Dunn's position and he is entitled to it. What you are asking us for is to make a decision based on knowledge that we don't really have.

She felt his suggestion was a good idea, after we have all the information, i.e., how can we do it, will it work.

Councilman Dunn said that his bottom line is for Council to start looking at the way we annex people.

Vice-Mayor Bellamy understands Councilman Dunn feels strongly about annexing and she feels strongly about the people who work in our day-cares, who are teachers, CNA's, non-profit organizations, bankers and where they have to live. She doesn't think it's bad to have a Housing Trust Fund to ensure that our community is representative. People who work in our community can actually afford to live in our community. She doesn't feel bad about supporting the Housing Trust Fund – it helps people. She says that when Council has discussions about taxes and other issues, the Housing Trust Fund has to be on the table as a negative thing. During the budget, everything is on the table. In fact, the Housing Trust Fund is already set to be cut for next year. She thinks we need to be fair because there are people who work hard in our community who live in affordable housing. She thinks it's insulting and frankly it needs to stop.

Councilman Dunn wasn't trying to insult people who live in affordable housing. He agrees that affordable housing is a very important priority and he's not asking to take it away, he's just saying let's have another priority of streets and sidewalks.

Mayor Worley responded to some of the comment by Councilman Dunn. There would be no zoning – there would be sprawl. We would just have a small enclave of orderly development within an urban area. We have one officer per 419 residents and that compares a little less favorably than the statewide average. The other statistic is that our crime rate is lower than the average city in North Carolina. Our fire incident rate and our deaths by fire have dropped drastically because of our high quality Fire and Building Safety Departments. If you look at the way we take in streets – we prioritize the need of every street in the City of Asheville and when we bring in an area that is annexed, those streets go into the same priority list. When they have needs in order to be repaired, they fall within the right priority. One of the keys of annexation is equal treatment. We are required when we annex an area to provide the same services – equal services and equal treatment to the annexed area that we provide the citizens already inside the City limits. You can't bring streets in an annexed area that fall low in the priority list and pave them quicker than you would those streets already in the City that have greater needs. Every one of Council is absolutely concerned about the money we put into streets and sidewalks. It's easy to say that he supports taking a portion of the annexation money and dedicating it to streets and sidewalks. Council has that capability each year when the budget is set. Of course this year we are looking at cutting $900,000 in streets and sidewalks and all of Council is concerned about that. We will continue over the next two months to be looking for ways to change that. We need to keep streets and sidewalks at the top of our priority list each year when we look at the budget with the needs that we have and the resources that we have to deal with. You talk about sacred cows and the penny that went for parks several years ago. Bear in mind that this year that penny is not dedicated. It is not a sacred cow – it is cut. The Housing Trust Fund is cut. The two-cents we dedicated to streets and sidewalks is cut. Those are one-year commitments. The fact that a prior Council said we're going to do a penny to deal with these things was just a one-year commitment at the time. It sort of sets a precedent, but each Council each year has the option to renew or not renew that commitment. Contrary to the belief of those annexed, annexation does provide them services and benefits as a part of the greater community and provides services and benefits in terms of maintaining their streets. We have even changed the rules with regard to annexing streets that are private streets that don't otherwise meet our standards. We now agree to maintain those. That is a substantial service to those residents in the private areas. On the balance, it is important for Asheville to grow and to annex not just for the money. He thinks that is one of the lesser things in the overall scheme of things. But, there is a net gain from annexation, but to maintain the cohesiveness, the services, and the safety of the entire urban area.

Councilman Mumpower said that Councilman Dunn serves on the Housing & Community Development Committee and he is passionate in his support of affordable housing. He did not hear his comments reflecting poorly upon the issue of affordable housing. What he did hear him saying is that he is concerned that it's too easy to push sidewalks and streets aside in the name of a lot of the pressing priorities and responsibilities that we have.

Mayor Worley said that he heard support for taking a good hard look and that is something Council has a year to do because if these annexations pass, we have one year before they come into effect.

A. ORDINANCE NO. 2929- ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE LEICESTER HIGHWAY AREA

Mayor Worley said that the public hearing on this matter was held on June 11, 2002.

Urban Planner Paul Benson said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Leicester Highway area.

On April 9, 2002, City Council adopted Resolutions of Intent beginning the annexation process for the following five areas: Leicester Highway area, Sherwood Heights area, Huntington-Chase area, portion of Bell Road, Forest Lake area, Mill Stone area, and Kensington-Windsor area. The Annexation Services Plan for all of these areas was approved on April 23, 2002, the Plan was amended on June 25, 2002. A public information meeting was held on June 3, 2002. Public hearings on each of annexations were held by City Council on June 11, 2002. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Benson said that a metes and bounds description and a map are attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is June 30, 2003.

Staff recommends adoption of annexation ordinance for the Leicester Highway area, with an effective date of June 30, 2003.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Vice-Mayor Bellamy moved for the adoption of Ordinance No. 2929. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Councilman Dunn voting "no."

B. ORDINANCE NO. 2930 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE SHERWOOD HEIGHTS AREA

Mayor Worley said that the public hearing on this matter was held on June 11, 2002.

Urban Planner Paul Benson said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Sherwood Heights area.

On April 9, 2002, City Council adopted Resolutions of Intent beginning the annexation process for the following five areas: Leicester Highway area, Sherwood Heights area, Huntington-Chase area, portion of Bell Road, Forest Lake area, Mill Stone area, and Kensington-Windsor area. The Annexation Services Plan for all of these areas was approved on April 23, 2002, and the Plan was amended on June 25, 2002. A public information meeting was held on June 3, 2002. Public hearings on each of annexations were held by City Council on June 11, 2002. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Benson said that a metes and bounds description and a map are attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is June 30, 2003.

Staff recommends adoption of annexation ordinance for the Sherwood Heights area, with an effective date of June 30, 2003.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Councilman Peterson moved for the adoption of Ordinance No. 2930 This motion was seconded by Vice-Mayor Bellamy and carried on a 6-1 vote, with Councilman Dunn voting "no."

ORDINANCE BOOK NO. 19 – PAGE 512

C. ORDINANCE NO. 2931 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE HUNTINGTON-CHASE AREA

Mayor Worley said that the public hearing on this matter was held on June 11, 2002.

Urban Planner Paul Benson said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Huntington-Chase area.

On April 9, 2002, City Council adopted Resolutions of Intent beginning the annexation process for the following five areas: Leicester Highway area, Sherwood Heights area, Huntington-Chase area, portion of Bell Road, Forest Lake area, Mill Stone area, and Kensington-Windsor area. The Annexation Services Plan for all of these areas was approved on April 23, 2002, and the Plan was amended on June 25, 2002. A public information meeting was held on June 3, 2002. Public hearings on each of annexations were held by City Council on June 11, 2002. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Benson said that a metes and bounds description and a map are attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is June 30, 2003.

At the public hearing, staff recommended that the size of the Huntington Chase Annexation Area be reduced by dropping one of the larger lots out. The lot is classified for tax purposes as "agricultural vacant," is currently unimproved, and is one of two "non-urban" areas in Huntington Chase. It is not part of the Huntington Chase subdivision. The effect of this change is that it causes the qualifications of the remaining area to improve somewhat, but does not cause the area to qualify under any additional tests.

Mr. Benson said that there were questions about two of the calculations. One was the area of Huntington-Chase. Prior to the amendment the Plan listed it as 62.7 acres for the entire area. Subsequent to the amendment, we listed that area as 51.2 acres, which is 11.5 acre difference. The question was raised accurately that Buncombe County indicates this is a 12 acre parcel. So, we are removing a 12-acre parcel, but only reducing the annexation area by 11.5 acres. The reason for that is the way we calculate the area. Because a lot of the annexation areas involve roads rights-of-way, railroad rights-of-way or situations like that where the acreage is not listed under a particular parcel. Therefore, we can't sum all the parcels in the area and get an area for the annexation. He added that he thinks the numbers that they get from the Buncombe County tax records on those areas are pretty accurate but we could run into problems relying on those solely for the size of the annexation areas. So, we use our GIS software to basically plimerter the perimeter of the area. The original acreage came from plimerating the area and the revised acreage came from the same method. There are a number of ways the .5 acre could have crept in. When going around 8,000 feet of boundary, even with a very precise software program, being a pixel off here and there could amount to a couple thousand square feet. It could also be the size of the parcels shown in the GIS database didn't match exactly what was exactly shown on the survey. The only resolution to a .5 acre in an area of this size, with this much parameter, would be to do an actual field survey. The statutes do not require that and that is not something we have typically done for any of the annexation areas. The City Attorney has reviewed that issue and feels that the variance is well within the margin of error the statutes allow.

Mr. Benson said the other issue was the number of lots. Prior to the amendment, we listed 39 lots in the annexation area. We then removed the lot and listed the number of lots as 39. He explained that the number of lots for this annexation shown in the qualification pages of the annexation plan is not the actual number of lots in the area because we used a non-urban area. Originally, the 12-acre lot was indicated as a non-urban area. When you do that the statutes allow you to just remove that from the qualification calculations. So as far as the calculations were concerned, that lot wasn't in the annexation prior to the amendment. So, for the purpose of determining the percentage of developed lots and the percentage of lots under or over a certain size, that lot wasn't counted. The statutes allowed us to remove it. That is why prior to the amendment that lot had been already removed.

City Attorney Oast said that with respect to the deleted parcel he wasn't sure it was real important how big that parcel is, as long as we are satisfied that the acreage of the area that we are annexing is accurate. We are required under the law to use methods that are calculated to produce reasonably accurate results – they don't require 100% accuracy. He was satisfied this was within the legal margin of error and was satisfied that this is correct.

Councilman Mumpower understands the explanation of the issues, but he didn't think that the property owners clearly understand. He said that he believes the City Attorney in that we don't hold legal liability, but he was uncomfortable with the fog that it creates.

Ms. Nancy Williams, resident of Huntington-Chase, said that she is uncomfortable with the answers when asked if there would be any legal ramifications for postponing this decision. The statutes are clear that Council can adopt the ordinance "no sooner than the 10th day after the public hearing and not later than 90 days." The public hearing was June 11, 2002. Council has 90 days to adopt this annexation ordinance. Once Council adopts the ordinance you can affix an effective date – "no sooner than 70 days and no longer than 400 days." So Council can still keep the June 30, 2003, effective date and give the property owners more time to process it. She said it was unfortunate Council cannot proceed with annexing the others areas because there is an Integrated Annexation Services Plan. Ms. Williams said that they picked up the page amendments yesterday afternoon and immediately found the errors Mr. Benson has addressed. She stressed they had a very short time to review them and might find more errors.

Councilman Ellis stressed that at the public hearing on June 11, 2002, Mr. Benson advised Council that there would be a plan amendment to delete the 12-acre parcel and property owners were at that meeting. He felt that over two weeks was adequate time within which to review the amendment.

Staff recommends adoption of annexation ordinance for the Huntington-Chase area, with an effective date of June 30, 2003.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Councilman Ellis moved for the adoption of Ordinance No. 2931. This motion was seconded by Councilwoman Jones, and carried on a 6-1 vote, with Councilman Dunn voting "no."

ORDINANCE BOOK NO. 19 – PAGE 517

D. ORDINANCE NO. 2932 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE A PORTION OF BELL ROAD

Mayor Worley said that the public hearing on this matter was held on June 11, 2002.

Urban Planner Paul Benson said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to a portion of Bell Road.

On April 9, 2002, City Council adopted Resolutions of Intent beginning the annexation process for the following five areas: Leicester Highway area, Sherwood Heights area, Huntington-Chase area, portion of Bell Road, Forest Lake area, Mill Stone area, and Kensington-Windsor area. The Annexation Services Plan for all of these areas was approved on April 23, 2002, and the Plan was amended on June 25, 2002. A public information meeting was held on June 3, 2002. Public hearings on each of annexations were held by City Council on June 11, 2002. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Benson said that a metes and bounds description and a map are attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is June 30, 2003.

Staff recommends adoption of annexation ordinance for a portion of Bell Road, with an effective date of June 30, 2003.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Councilwoman Jones moved for the adoption of Ordinance No. 2932. This motion was seconded by Councilman Ellis and carried on a 6-1, vote with Councilman Dunn voting "no."

ORDINANCE BOOK NO. 19 – PAGE 521

E. ORDINANCE NO. 2933 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE FOREST LAKE AREA

Mayor Worley said that the public hearing on this matter was held on June 11, 2002.

Urban Planner Paul Benson said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Forest Lake area.

On April 9, 2002, City Council adopted Resolutions of Intent beginning the annexation process for the following five areas: Leicester Highway area, Sherwood Heights area, Huntington-Chase area, portion of Bell Road, Forest Lake area, Mill Stone area, and Kensington-Windsor area. The Annexation Services Plan for all of these areas was approved on April 23, 2002, and the Plan was amended on June 25, 2002. A public information meeting was held on June 3, 2002. Public hearings on each of annexations were held by City Council on June 11, 2002. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Benson said that a metes and bounds description and a map are attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is June 30, 2003.

Staff recommends adoption of annexation ordinance for the Forest Lake area, with an effective date of June 30, 2003.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Councilman Ellis moved for the adoption of Ordinance No. 2933. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Councilman Dunn voting "no."

ORDINANCE BOOK NO. 19 – PAGE 525

F. ORDINANCE NO. 2934 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE MILL STONE AREA

Mayor Worley said that the public hearing on this matter was held on June 11, 2002.

Urban Planner Paul Benson said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Mill Stone area.

On April 9, 2002, City Council adopted Resolutions of Intent beginning the annexation process for the following five areas: Leicester Highway area, Sherwood Heights area, Huntington-Chase area, portion of Bell Road, Forest Lake area, Mill Stone area, and Kensington-Windsor area. The Annexation Services Plan for all of these areas was approved on April 23, 2002, and the Plan was amended on June 25, 2002. A public information meeting was held on June 3, 2002. Public hearings on each of annexations were held by City Council on June 11, 2002. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Benson said that a metes and bounds description and a map are attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is June 30, 2003.

Staff recommends adoption of annexation ordinance for the Mill Stone area, with an effective date of June 30, 2003.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Councilman Peterson moved for the adoption of Ordinance No. 2934. This motion was seconded by Vice-Mayor Bellamy and carried on a 6-1 vote, with Councilman Dunn voting "no".

ORDINANCE BOOK NO. 19 – PAGE 529

G. ORDINANCE NO. 2935 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE KENSINGTON-WINDSOR AREA

Mayor Worley said that the public hearing on this matter was held on June 11, 2002.

Urban Planner Paul Benson said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Kensington-Windsor area.

On April 9, 2002, City Council adopted Resolutions of Intent beginning the annexation process for the following five areas: Leicester Highway area, Sherwood Heights area, Huntington-Chase area, portion of Bell Road, Forest Lake area, Mill Stone area, and Kensington-Windsor area. The Annexation Services Plan for all of these areas was approved on April 23, 2002, and the Plan was amended on June 25, 2002. A public information meeting was held on June 3, 2002. Public hearings on each of annexations were held by City Council on June 11, 2002. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Benson said that a metes and bounds description and a map are attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is June 30, 2003.

Staff recommends adoption of annexation ordinance for the Kensington-Windsor area, with an effective date of June 30, 2003.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Councilman Ellis moved for the adoption of Ordinance No. 2935. This motion was seconded by Councilman Peterson and carried on a 6-1, vote with Councilman Dunn voting "no."

Regular Meeting

Present:	Mayor Charles R. Worley, Presiding; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson
Absent:	Vice-Mayor Terry M. Bellamy

INVOCATION

Councilman Peterson gave the Invocation.

I. PROCLAMATIONS:

A. MAYOR'S CUP RAFT RACE

Mayor Worley thanked Councilwoman Jones, Councilman Mumpower, Captain Mike Russell, Engineer Mark Rivord, Firefighter Jason Shoars and Firefighter Carley Cox for their substantial contribution participating in the City of Asheville's First Place Victory of the Mayor's Cup Raft Race held on June 2, 2002.

B. EXCELLENCE IN PUBLIC SERVICE AWARD WINNERS

Mayor Worley recognized the City of Asheville's Excellence in Public Service Award winners Rae Ferguson, Police Lieutenant in the Asheville Police Department, as Outstanding Manager; Jennifer Blevins, Secretary Senior in the Building Safety Department, as Outstanding Administrative Support; Keith Whittington, Park Warden in the Asheville Police Department, as Outstanding Trades, Crafts and Service Maintenance; and John B. Dankel, Crime Prevention Specialist in the Asheville Police Department as Outstanding Professional.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JUNE 25, 2002, AND THE REGULAR MEETING HELD ON JUNE 27, 2002

B. RESOLUTION NO. 02-111 – RESOLUTION AUTHORIZING THE SALE OF DISPOSAL PARCEL 218 ON WATER STREET TO LOUISE GARDNER

Summary: The consideration of a resolution authorizing the sale of Disposal Parcel 218 on Water Street to Louise Gardner in the amount of $1,500.

On June 25, 2002, the City Council directed the City Clerk to advertise for upset bids on Disposal Parcel 218 on Weaver Street. The advertisement ran in the Asheville Citizen-Times on June 28, 2002, as provided in N. C. Gen. Stat. sec. 160A-269. No response was received. Therefore, the offer to purchase from Louise Gardner in the amount of $1,500 was not upset and the sale should be approved.

Community Development staff recommends adoption of the resolution authorizing the sale of Disposal Parcel 218 on Water Street to Louise Gardner in the amount of $1,500.

RESOLUTION BOOK NO. 27 – PAGE 195

C. RESOLUTION NO. 02-112 – RESOLUTION MODIFYING THE CITY COUNCIL MEETING SCHEDULE FOR A COMMUNITY MEETING ON TUESDAY, JULY 30, 2002, BEGINNING AT 7:00 P.M. IN THE EAST ASHEVILLE COMMUNITY CENTER LOCATED AT 906 TUNNEL ROAD, ASHEVILLE, N.C.

RESOLUTION BOOK NO. 27 – PAGE 116

D. ORDINANCE NO. 2936 - BUDGET AMENDMENT FOR THE CULTURAL RENAISSANCE PROGRAM'S SUMMER ARTS PROGRAM AND THE MURAL AT REID COMMUNITY CENTER

Summary: The consideration of a budget amendment, in the amount of $20,000, for the Cultural Renaissance Program's Summer Arts Program and the Mural at Reid Community Center.

The City of Asheville applied for grant funds in February-June 2002 for two new Cultural Renaissance Program projects. Grants were recently awarded in the amount of $15,000, which are supplemented with $5,000 in matching funds already provided in the Parks and Recreation Department budget.

Cultural Renaissance Arts Program – A budget amendment, in the amount of $10,000, from a grant from the Wachovia Foundation to establish a budget for the Arts Program. Funds will be used for the operating cost of the program.

Cultural Renaissance Reid Mural– A budget amendment, in the amount of $5,000, from a grant from the North Carolina Arts Council to be matched with $5,000 in existing funds in the Parks and Recreation Department budget to establish a budget for the Reid Mural public art project. Funds will be used for the operating cost of the project.

The Parks and Recreation Department recommends City Council approve the budget amendment to establish budgets for the Cultural Renaissance Program's Summer Arts Program and the Mural at Reid Community Center.

ORDINANCE BOOK NO. [illegible] 20 – PAGE 1

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilman Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING RELATIVE TO REZONING 453 WEST HAYWOOD STREET FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 2937 – ORDINANCE REZONING PROPERTY AT 453 WEST HAYWOOD STREET FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

Mayor Worley opened the public hearing at 5:17 p.m.

Mr. Carter Pettibone, Urban Planner, said that this is the consideration of an ordinance to rezone property located at northeast corner of West Haywood Street and Roberts Street from RM-8 Residential Multi-Family Medium Density District to RM-16 Residential Multi-Family High Density District. This public hearing was advertised on June 28 and July 5, 2002.

Mr. Diego Apunte, applicant, is requesting the rezoning of 0.18 acre (PIN No. 9638.08-98-2613) to allow for the establishment of a residential duplex on the property. The purpose of the RM-16 District is to permit a full range of high-density multi-family housing types.

This property is located in the City limits and has street frontage on both West Haywood Street and Roberts Street, with an existing house on the property oriented toward West Haywood. Development in the area is fairly sparse with the properties immediately adjacent to the property and across the streets vacant. Properties to the east and south are zoned RM-8 while the property to the west across Roberts Street is Commercial Industrial. The property directly north is a property that was recently rezoned to Community Business I with a conditional use permit to allow for a mixed-use building, but is yet to be developed.

Even though the property is currently zoned RM-8, which is intended for multi-family residential dwellings, the small lot size and minimum lot requirements of the district only allow a single-family residence on the property. Rezoning the property to RM-16 would provide the opportunity to convert the existing building into a duplex since the minimum lot size per unit would be cut in half. And, due to the property's small size, the maximum number of units that could be realized is two if rezoned.

This site would also help provide a transition from the Commercial Industrial and Community Business I/Conditional Use properties to the north and west to the lower intensity residential uses in the RM-8 district to the east.

In consideration of the shape and size of the lot, the existing building on the site, and the adjoining zoning and land uses in the area around the site, the proposed zoning change appears to be consistent with the intent and purpose of the Unified Development Ordinance.

The Planning and Zoning Commission voted unanimously to recommend approval of the rezoning of the property located at the northeast corner of Haywood Street and Roberts Street from RM-8 to RM-16. The Planning and Development staff also recommends approval of the requested rezoning.

Upon inquiry of Councilman Peterson, City Attorney Oast explained why he didn't feel that this was a spot zoning issue.

Mayor Worley closed the public hearing at 5:24 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Peterson moved for the adoption of Ordinance No. 2937. This motion was seconded by Councilman Ellis and carried unanimously.

ORDINANCE BOOK NO. [illegible] 20 - PAGE 4

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

4

A. RESOLUTION NO. 02-113 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH H&M CONSTRUCTORS FOR RENOVATIONS TO FIRE STATION 3

RESOLUTION NO. 02-114 – RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH JERRY PAYNE CONSTRUCTION COMPANY FOR RENOVATIONS TO FIRE STATION 8

Director of Parks and Recreation Irby Brinson said that this is the consideration of a resolution authorizing the City Manager to enter into contracts for the renovation of Fire Station #3 and #8.

In an effort to maintain City facilities, the City Council has approved funds for renovations to Fire Stations # 3 and #8. City staff solicited sealed bids from both minority and non-minority general contractors and received qualified bids from seven general contractors, none of which were minority contractors, for renovations that include new roofing, heating and air conditioning systems and more useable space. City staff has reviewed all bids received and determined that the lowest qualified bidder for each Fire Station is as follows:

Fire Station #3 - H & M Constructors a division of M. B. Haynes Corporation	Total bid amount	$ 92,650.00
Fire Station #8 - Jerry Payne Construction Company	Total bid amount	$ 274,870.00

City staff recommends acceptance of the total bid amount for each Fire Station.

Approved funding is available in the capital improvement project account to pay for these renovations.

The Parks and Recreation Department, in conjunction with the Fire Department, requests City Council authorize the City Manager to enter into a contract with H & M Constructors for Fire Station #3 in the amount of $92,650.00; and with Jerry Payne Construction Company for Fire Station #8 in the amount of $274,870.00.

Mayor Worley said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

Councilman Ellis moved for the adoption of Resolution No. 02-113. This motion was seconded by Councilman Peterson and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 197

Councilman Mumpower moved for the adoption of Resolution No. 02-114. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 198

B. RESOLUTION NO. 02-115 – RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CONTRACT WITH WHEELER CONSTRUCTION COMPANY INC. FOR THE BREVARD ROAD ANNEXATION AREA PHASE III – CONTRACT "3" SANITARY SEWER SYSTEM IMPROVEMENTS

Mr. John Echeverri, Assistant Engineering Director said that this is the consideration of a resolution awarding the contract for Brevard Road Annexation Area Phase III Contract "3" Sanitary Sewer System Improvements to Wheeler Construction Company, Inc., in the amount of $167,680.00.

This project is the last Phase of the Brevard Road Annexation Area. It is called the Brevard Road Annexation Area Phase III - Contract "3" Sanitary Sewer System Improvements and consists of the installation of approximately 1,760 linear feet of eight inch (8") diameter sanitary sewer line and related appurtenances.

The Engineering Department received and publicly opened five (5) bids on Tuesday, June 18, 2002, 2000, at 2:00 p.m. After a thorough review of the bid documents by the Engineering Department and the Office of Minority Affairs, Wheeler Construction Company, Inc., was found to be the lowest responsible bidder with a total bid of $ 167,680.00. The Engineer's estimate for this project was $201,061.15.

Funding for this project was included in the Fiscal Year 2001/2002 Capital Improvement Program and will be financed with monies generated by General Obligation Bonds Series 2000 of December, 2000.

Wheeler Construction Company, Inc., has performed several projects of this nature in the past without any major problems.

The construction time for this project is identified as 120 calendar days in the contract documents. The contractor will be required to pay the sum of $250.00 as liquidated damages for each and every calendar day that he shall be in default after the time stipulated in the contract.

Staff recommends that City Council adopt a resolution awarding the bid for Brevard Road Annexation Area - Phase III - Contract "3" Sewer System Improvements to Wheeler Construction Company, Inc., the responsible low bidder and authorize the City Manager to execute all necessary agreements and contracts.

Upon inquiry of Councilman Peterson, Mr. Echeverri explained the different areas for the sewer line work.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Peterson moved for the adoption of Resolution No. 02-115. This motion was seconded by Councilman Ellis and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 199

C. RESOLUTION NO. 02-116 - RESOLUTION APPOINTING MEMBERS TO THE CIVIC CENTER COMMISSION

Mayor Worley said that the terms of Robert Swan, Richard Bowman and Denise Goodson, as members on the Civic Center Commission, expired on June 30, 2002.

On June 18, 2002, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Ms. Goodson to serve an additional three year term, term to expire June 30, 2005, or until her successor has been appointed.

On July 9, 2002, City Council interviewed Max Alexander.

6

Kathryn Nash is a candidate, however, she did not need to be interviewed. In addition, Leonard Jones is a candidate, however, Mr. Jones was unable to take off work for the interview.

Councilman Peterson moved to (1) reappoint Denise Goodson to serve an additional three year term, term to expire June 30, 2005, or until her successor has been appointed, and (2) to appoint Max Alexander and Kathryn Nash to each serve a three year term respectively, terms to expire June 30, 2005, or until their successors have been appointed. This motion was seconded by Mayor Worley and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 206

D. RESOLUTION NO. 02-117 - RESOLUTION APPOINTING MEMBERS TO THE CRIME-STOPPERS BOARD

Mayor Worley said that the terms of Josefine Matty and Leslie Hennessee, as members on the Asheville-Buncombe Crime Stoppers Board of Directors, expired on June 30, 2002.

On June 18, 2002, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Ms. Hennessee to serve an additional three year term, term to expire June 30, 2005, or until her successor has been appointed.

On July 9, 2002, City Council interviewed Bill McGuire.

Councilman Ellis moved to (1) reappoint Leslie Hennessee to serve an additional three year term, term to expire June 30, 2005, or until her successor has been appointed, and (2) appoint Bill McGuire to serve a three year term, term to expire June 30, 2005, or until his successor has been appointed. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 207

E. RESOLUTION NO. 02-118 - RESOLUTION APPOINTING MEMBERS TO THE RECREATION BOARD

Mayor Worley said that the terms of Ann Babcock, Susan Roderick, Charles Bullman and Jim Drummond, as members on the Recreation Board, expired on June 30, 2002.

On June 18, 2002, City Council instructed the City Clerk to prepare the proper paperwork to (1) reappoint Ms. Babcock and Mr. Drummond to each serve an additional three year term, terms to expire June 30, 2005, or until their successors have been appointed; and (2) appoint Chuck Cloninger to serve a three year term, term to expire June 30, 2005,or until his successor has been appointed.

On June 18, 2002, City Council instructed the City Clerk to arrange for an interview of Christopher Barkley. A phone message was left on June 19 for Mr. Barkley to call the City Clerk and on June 26, 2002, a letter was sent to Mr. Barkley asking him to contact the City Clerk to arrange for an interview. As of July 9, no response has been received.

Councilman Peterson moved to (1) reappoint Ms. Babcock, Mr. Bullman and Mr. Drummond to each serve an additional three year term, terms to expire June 30, 2005, or until their successors have been appointed; and (2) appoint Chuck Cloninger to serve a three year term, term to expire June 30, 2005; or until his successor has been appointed. This motion was seconded by Councilman Ellis and carried unanimously

VI. OTHER BUSINESS:

HOUSING AUTHORITY BOARD TERMS

Mayor Worley explained that our legislative delegation has an informal rule of not taking up anything controversial, in terms of local acts, in the Short Session. The City of Asheville has requested that the terms of the Housing Authority Board members be reduced from five years to three years. The Housing Authority disagrees. Therefore, Councilman Mumpower moved to ask our legislative delegation to delay consideration, by whatever means appropriate, on the City of Asheville's request until the Session of the General Assembly begins in 2003, in order for the City Council and Housing Authority Board members to discuss the matter. This motion was seconded by Councilman Ellis and carried unanimously.

POLICE PAY GRIEVANCE

Upon inquiry of Councilman Dunn and after discussion of the matter, City Manager Westbrook said that City Council has previously given staff guidance on how to proceed in the police pay matter and they are proceeding in accordance with those instructions. City Attorney Oast said that he would be prepared to update City Council at the next worksession in closed session since this is a legal matter and an attorney represents the officers. City Attorney Oast did point out that the City remains open to discussion on this matter.

CLAIMS

The following claims were received by the City of Asheville during the period of June 21 – July 3, 2002: Rick Haynes (Fire), Danny Shope (Police), Cheryl Simcox (Inspections), Gold Star Coatings (Engineering), Dana Dill (Water), Lisa Lindsay (Water), Bonnie Love (Transit Services), Christopher White (Sanitation) and Dan Throgmorton (Fire).

These claims have been referred to Asheville Claims Corporation for investigation.

LAWSUIT

The City filed a lawsuit on July 9, 2002, against Mattie Giles. The nature of the proceeding is a complaint, injunction, order of abatement for removal of aesthetic junked vehicle, which is in violation of Section 10-31 of the City of Asheville Code of Ordinances. This matter will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

COMMENTS BY SHARON MARTIN

Ms. Sharon Martin, representing the Community Supported Development, read a prepared statement in which she felt that at the City Council meeting on June 25, 2002, members of the public were subject to a discriminatory policy in which members of the public who were carrying backpacks were told they would have to leave their bags outside of the Council Chamber, while all those carrying purses and briefcases were allowed into the Chamber with no questions asked. She was given the response that the policy was for public safety reasons. She felt the policy singles out a single segment of our community. In trying to find out the reason for this discriminatory practice, she spoke to Police Chief Will Annarino who she felt treated her disrespectfully. She asked Council for a fair and equitable policy, where all members of the community are treated the same with respect to bags in the Council Chamber. She also asked

8

Council consider how our public officials interact with members of the public. She asked Council to work to insure that the values of the Police Department are upheld.

City Manager Westbrook said that he would investigate the concerns raised by Ms. Martin with the Police Chief.

COMMENTS BY MICKEY MAHAFFEY

Mr. Mickey Mahaffey said that he was disappointed with the progress of the Citizen Study Committee on Campaign Finance Reform. He felt that the Committee members, who have done their best, were put into a difficult situation since they had very little background and knowledge on the subject matter in which they are supposed to be studying.

Councilman Mumpower said that City Council made an effort to appoint a diverse committee who wanted to make a difference and attack the hard issues. The Committee members are moving forward in a positive way and will be reporting to Council in the near future with their progress.

COMMENTS BY STEWART DAVID

Mr. Stewart David, President of Carolina Animal Action, asked City Council to review the policy that limits the number of non-profit groups that are allowed to sell items at their booths during the Bele Chere Festival. He said that last year 15 non-profit groups were allowed booths and this year that number has been reduced to ten – Carolina Animal Action was not allowed this year. He explained that a lottery was used to select the ten non-profits. However, he said that the Bele Chere Festival is their number one way of community outreach. It allows them to bring in donations, hand out literature, network and bring in new members. He felt that since there is no shortage of street space, non-profits should not be excluded.

Mayor Worley said that he would check into that policy decision.

COMMENTS BY ALTHEA GOODE

Ms. Althea Goode, resident on Eastview Avenue, urged Mayor Worley to appoint a person with empathy and compassion to the Housing Authority Board of Directors. She felt the Board members need to talk and visit people who live in public housing to find out their needs. She favored reducing the Housing Authority Board terms from five years to three years.

COMMENTS BY GABRIEL FERRARI

Mr. Gabriel Ferrari, resident on Sulphur Springs Road, briefed City Council on problems he is encountering as a result of a tattoo business across the street from his home. City Manager Westbrook said that since this is a zoning issue, he would have our Planning Department contact Mr. Ferrari regarding his concerns.

COMMENTS BY GRANT MILLIN

Mr. Grant Millin urged City Council to amend Resolution No. 01-144 (near the anniversary of September 11) condemning the terrorist attack and supporting the President. He also asked Council to adopt a bill of rights defense resolution similar to Carrboro, North Carolina. Mr. Millin submitted information for the record.

9

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 6:25 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – July 16, 2002 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

Budget Amendment for Azalea Road Park

Summary: The consideration of a budget amendment for Azalea Road Park totaling $319,990.89 received from a grant in the amount of $249,165 from the N. C. Dept. of Environment and Natural Resources and from private donations in the amount of $70,825.

The City of Asheville applied for funds in January 2002 for a grant from the N.C. Dept. of Environment and Natural Resources, Department of Environment and Natural Resources, Division of Parks and Recreation in the Parks and Recreation Trust Fund. The grant was recently awarded in the amount of $249,165. The City has also received the first two installments of a $350,000 gift from the Lewis Family Foundation at $70,825.89.

The Parks and Recreation Department recommends City Council approve the budget amendment to increase the budget for development of Azalea Road Park.

Ms. Debbie Ivester, Superintendent of Administration, responded to questions from Vice-Mayor Bellamy.

Endorsement of TEA 21 Grants

Summary: The consideration of (1) a resolution authorizing the City Manager to apply to the N. C. Dept. of Transportation, through the Transportation Enhancement Program, for a grant for sidewalk improvements on New Haw Creek Road/Avon Road; and (2) a resolution for City sponsorship of grant applications from Pack Square Conservancy and Mountain Housing Opportunities.

Every two years, the N. C. Dept. of Transportation (NCDOT) puts out a call for applications for transportation enhancement funds. These are federal funds for transportation projects like sidewalks, greenways, streetscape improvements, beautification, and water quality improvements. The funds are part of the federal legislation that authorizes transportation funding known as TEA-21. If a project is awarded through the state selection process, costs are reimbursed at a rate of eighty percent (80%). The local match is twenty percent (20%).

Any public or private agency may apply for these funds, but each application must have a local government agency as the sponsor. In past years, the City of Asheville has received enhancements funds for projects such as the Urban Trail and the Weaver Boulevard Greenway. This year, the City of Asheville has prepared one application for sidewalk improvements on New Haw Creek Road and Avon Road. If awarded, the City of Asheville will provide the local match for the sidewalk project on New Haw Creek Road/Avon Road. This project was developed cooperatively with the Haw Creek Pedestrian Task Force over the past year. Staff has already surveyed and designed this project, and we are now waiting for a funding source for construction.

11

In addition to the application from the City of Asheville, two outside agencies have applied for funding and have asked for sponsorship from the City of Asheville. The Pack Square Conservancy has applied for funds for Pack Square Streetscape Improvements and Mountain Housing Opportunities has applied for funds to construct a greenway and streetscape improvements in the West End/Clingman Avenue neighborhood. The City of Asheville is not responsible for the local match for the applications from outside agencies. The match will be provided by the applying agency. For these applications, the City of Asheville will be responsible for maintenance of any improvements that fall within public right of way, and may provide staff support for project implementation.

Listed below are summaries of the three grant applications presented for consideration.

1. **New Haw Creek Road/Avon Road Sidewalk Improvements**
   City of Asheville Match: $195,000
   Enhancement Funds Requested: 312,044
   Total Project Cost: $507,044

   Project Description: The proposed project entails construction of sidewalk, curb, gutter and storm drainage along the east side of Avon Road from the entrance of the East Asheville Library and Community Center to the entrance of Haw Creek Park; along the west side of Avon Road from the entrance of Haw Creek Park to the intersection with Beverly Road; and along the south side of New Haw Creek Road from the intersection with Arco Road to the intersection with Beverly Road. The project will require the acquisition of twenty-one (21) right-of-way easements.

2. **Pack Square Streetscape Improvements**
   City of Asheville Match: None
   Match by Pack Square Conservancy: $125,000
   Enhancements Funds Requested: $250,000 (street improvements)
   Total Project Cost: $2,500,000 (total project)

   Project Description: Pack Square Renaissance is a significant civic improvement project in the historic center of downtown Asheville, N.C. The project will "knit" together more than six acres of fragmented public property into a major new public park and revitalized historic square. A primary focus of the project is to provide more balance to the accommodation of both pedestrians and vehicles. The project includes the reorganization of multiple small green spaces into an important new " town green" as well as enhanced pedestrian amenities such as: new plazas, terraces, and sidewalks. Streetscape features such as street trees, benches and lighting will accompany public art, performance stages and water features. This application is to assist in the pedestrian enhancement/streetscape portion of the Year One improvements – the reorganization of the existing City-County Plaza into the major portion of the new "green" as well as two "forecourts" directly adjacent to both the Buncombe County Courthouse and the Asheville City Hall. Redesign and enhancement of pedestrian and vehicular circulation will be key components of this portion of the overall project.

3. **Clingman Avenue Streetscape and Greenway**
   City of Asheville Match: None
   Match by Mountain Housing Opportunities (and other sources): $243,150
   Enhancement Funds Requested: $266,550
   Total Project Cost: $509,700 (phase I and II)

   Project Description: This project proposes multi-modal transportation enhancements to Clingman Avenue and its adjacent greenway, a gateway corridor that connects downtown

12

Asheville to its riverfront and West Asheville. The project area, approximately 25 acres, encompasses approximately 2000' of frontage on Clingman Avenue and Haywood Road and the adjacent right of way, extending from its intersection with Hilliard Street to the north and down to the West Asheville Bridge. This corridor includes Clingman Forest, an approximately 10 acre urban riparian forest parallel to Clingman Avenue to the east and extending to Aston Park to the north, the YWCA and Asheville Middle School to the East, and river warehouse district immediately to the south. Funding would provide for streetscape enhancements to Clingman Avenue, the historic heart of the racially and economically diverse West End/Clingman Avenue neighborhood that is currently undergoing dramatic revitalization. It would also support the development of a greenway parallel to Clingman Avenue through Clingman Forest, including innovative watershed-based stormwater management currently being developed. This project would build on existing broad based partnerships and community support to implement recommendations in the *City of Asheville 2010 Plan*, the *Asheville Greenways Master Plan*, and the award-winning *2001 West End/Clingman Avenue Neighborhood Citizens Master Plan*.

The TEA-21 Enhancements Grant Applications will be reviewed and awarded in the Fall of 2002.

City staff recommends City Council (1) approve a resolution authorizing the City Manager to apply to the State of North Carolina for a grant for New Haw Creek Road and Avon Road Sidewalk Improvements; and (2) approve a resolution designating the City of Asheville as the local government sponsor for grant applications for Pack Square Streetscape Improvements and Clingman Avenue Streetscape and Greenway.

Vice-Mayor Bellamy was pleased that the City is making a good effort to construct sidewalks in Haw Creek.

Upon inquiry of Councilwoman Jones, Mr. Dan Baechtold, Metropolitan Planning Organization Coordinator, said that the City should be notified in January of 2003 if they are awarded the grant.

After a brief discussion about the Pack Square Renaissance Project, Mayor Worley said that an agreement has been signed with the Pack Square Conservancy to move forward with the project and a copy of that agreement will be provided to Council. It was the consensus of Council to ask Pack Square Conservancy Inc. to update City Council at a future worksession and invite the Public Art Board to attend the meeting as well.

Acceptance of New Street Name "Applewood Drive"

Summary: The consideration of a resolution accepting the new proposed street name "Applewood Drive."

GPD of NC Inc., owner of lots in Applewood Subdivision, has petitioned the City of Asheville to accept the street name " Applewood Drive." The new street will begin at New Haw Creek Road and end at cul-de-sac on Applewood Drive.

City staff recommends adoption of the resolution accepting the new proposed street name "Applewood Drive."

Interlocal Agreement with the City of Durham, N.C.

Summary: The consideration of a resolution authorizing the City Manager to enter into an Interlocal Agreement with the City of Durham for the procurement of buses and bus equipment.

It is the plan of the Transit Services Department to replace several of the existing fleet each year with more modern low floor buses, pending state and federal funding. The Transit Services Department has therefore participated in a statewide effort to standardize transit bus purchases over the next two years. This is intended to radically diminish the lead time necessary to purchase buses, and to use the prospect of bulk purchases to intensify competition and obtain a lower bid from the bus manufacturers.

The lead agency, for the purpose of bidding the bus purchase, is the City of Durham. In order for Asheville to participate in this bid, there must be an interlocal agreement signed between the City of Asheville and the City of Durham. This agreement will not commit the City of Asheville to purchase any buses, but it allows the City to purchase buses off of the Durham bid if so desired. The City may also conduct its own bid process and purchase it's own buses if it wants to.

City staff recommends City Council authorize the City Manager to sign an Interlocal Agreement with the City of Durham, North Carolina.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

UPDATE ON ASHEVILLE'S ISO BUILDING CODE EFFECTIVENESS RATING

Director of Building Safety Terry Summey said that on March 6, 2002, the City of Asheville was re-evaluated for a five (5) year renewal of its Insurance Service Office (ISO) Building-Code Effectiveness Grading Schedule (BCEGS) Ratings; the City Manager was notified of our maintaining our ratings of "2" on June 6, 2002. The ratings continue to be the "best in the State."

As a result of Hurricane Andrew in 1992 knocking the wind out of property/casualty insurers that covered homes and businesses, it was recognized that effective building code enforcement could lower insured losses. The Insurance Services Office (ISO), in cooperation with numerous organizations, developed the Building Code Effectiveness Grading Schedule (BCEGS). Studies of various catastrophes graphically demonstrated that effective code enforcement reduces loss in catastrophic events. Experts estimate that Hurricane Andrew losses could have been reduced 30% to 55% if building codes had been strictly enforced.

Since 1995, ISO has classified over 9,000 communities in the United States. The City of Asheville was evaluated in mid 1995 and received a rating of "4" for both new commercial and residential construction. Normally jurisdictions are evaluated every five years unless significant changes occur within the jurisdiction's inspection department. Due to changes, the City was evaluated again in November 1997 and received new ratings of "2," which were effective on May 1, 1998. In the most recent five (5) year re-evaluation of the City, the City maintained its "2" status. We did gain 6 points; with a score of 91.43, we came within 1.57 points of obtaining a rating of "1". Currently only 2 jurisdictions in the country have obtained a rating of "1", and 78 jurisdictions have obtained a rating of "2."

The benefits of an excellent "BCEGS" rating include the following:

- Using up-to-date building codes;
- Better building departments and improved code enforcement;

14

- Catastrophe-resistant buildings;
- Reduced property losses from catastrophes; and
- A reduction in the economic and social disruption that results from catastrophes' serious and widespread destruction.

Staff has also appealed the score, and is still striving for a "1." Based upon a discussion with the ISO evaluator on July 2, several scores should change and we will be .75 points away from a "1." He will be visiting the City again in late July to re-examine the documentation.

No action by City Council is required. Due to rating credit tables not currently developed for North Carolina, staff will report back hopefully in the near future with any insurance cost savings to property owners as a result of the ratings. Staff will also be notifying Council of the final ISO ratings as a result of the appeal.

Councilman Ellis said that he had received high compliments from a developer in the area about Asheville's professional Building Safety Department. In the conversation, however, the developer questioned a landscape ordinance requirement. City Manager Westbrook said that he would obtain further information from Councilman Ellis and investigate the matter.

Vice-Mayor Bellamy felt that our "best in the State" ratings should be acknowledged on our Government Channel.

Councilman Dunn was concerned about the City imposing stricter regulations on homeowners. He was not saying that safer buildings are not important, however, he wondered if the City is imposing too many regulations, especially since he has talked to insurance companies and they have said that they will not use ISO ratings with regard to insurance costs.

SPECIAL MEETING FOR FINAL BUDGET ADOPTION

Due to a Council member being out of town on August 27, 2002, the date the final budget was scheduled to be adopted, it was the consensus of Council to schedule a special meeting on Thursday, August 29, 2002, at 5:00 p.m. to consider the final adoption of the 2002-03 Annual Operating Budget. In addition, it was the consensus of Council to have a budget worksession on Tuesday, August 20, 2002.

BOARDS/COMMISSIONS

It was the consensus of City Council to postpone filling two vacancies on the Historic Resources Commission until they receive a report from the City Manager on an overall review of the Asheville-Buncombe Historic Resources Commission, the City's Historic Resources Division and the funding. City Manager Westbrook said that he would have a report within a couple of months.

It was the consensus of City Council to confirm the reappointments of Clara Jeter, Claudia Thomas and Marvin Vierra on the Minority Business Commission. In addition, there will continue to be a vacancy for a minority businessperson on the Commission and Council will wait until they receive a recommendation from the Commission.

It was the consensus of City Council to reappoint Stephanie Cooper, James Lewis and Alexander Maitland to the Police Officers and Firefighters Disability Review Board.

It was the consensus of City Council to interview Louise Glickman, Joe Helms, Barbara Cary and Lois Mills for a vacancy on the Public Art Board.

15

HEERY INTERNATIONAL FINAL CIVIC CENTER REPORT

Chair of the Future of the Civic Center Task Force Edward Hay said that it is extremely important to have a plan of action in order to move forward with whatever City Council chooses to do with the Civic Center.

Mayor Worley said that Council received a verbal final report from Heery International back in March of 2002 and received the written report in April. He acknowledged that there are degrees of concern regarding the Civic Center. Funding is highly dependent on assistance of our local delegation and the climate at the State level for funding is not very conducive for this year and we don't know what next year will bring. He felt that Council needs to discuss the issue at his point rather than have any final decision.

Mayor Worley expressed his personal overview of the issue in that the concept is possible and feasible to keep the arena and entertainment in the same location. It adds banquet, reception and mixed use areas; and maintains the downtown location.

He said objections regarding location has always been controversial. Access – you can't get there; and parking – there's not enough. Regarding access, people want the arena in a location on the interstate where they can get back home quickly. He reviewed with Council an aerial photo, which showed there are a multitude of ways to exit the Civic Center from the downtown location. Regarding parking, there are three parking garages within easy walking distance, another parking garage is being built, and there is on-street parking. He then reviewed with Council an aerial photo that showed the parking available around the Civic Center location.

Other concerns include (1) Cost – can we as a community finance the cost? We can work with architects to reduce costs, seek funding sources from the state, work with private sector to fund portion, call upon community to contribute to the entertainment portion of the project, and be realistic about our state's economic condition; (2) Community Consensus – other efforts are underway in the community which include a performing arts at another location; UNC-A discussed as potential arena site; and craft center or museum discussed for Civic Center site behind arena.

Although many think the arena should be moved, there is an effort underway to locate a sports complex at another site.

How can we move forward? We can work with serious efforts for performing arts. If others succeed in financing and construction, then we all have succeeded and can move to alternatives. We can work with ideas for a craft center or museum. If one idea is successful elsewhere, it will nurture others. We can also support a privately funded sports complex. If it succeeds, many of the City's burdens will be relieved.

In conclusion, Mayor Worley felt we have an excellent concept that will give us a modern arena; give us a new performing arts center; give us exhibition, banquet and meeting space; allow us to attract conventions and conferences; maintain a vibrant downtown that generates sales tax dollars and growing property tax values; and is flexible if one or more other efforts succeed.

On behalf of City Council, Mayor Worley thanked Mr. Richard Fort and his firm of Pearce, Brinkley Cease & Lee, P.A., (PBC & L) for preparing an alternative vision of urban design improvements to the area of town adjacent to and including the existing Civic Center. Said alternative proposal was uncommissioned and City Council appreciated the time, effort and costs associated with it.

16

All of Council agreed that funding was a major obstacle in the proposal and that there was not a clear consensus on a plan for the Civic Center.

Mr. Hay stressed that the options need to be narrowed down so there is a concept you can work towards. Then you can start building community consensus and look for funding options.

Councilwoman Jones felt that the community needs to step forward within a timeframe so that the City will know what they can depend on.

Councilman Mumpower agreed that it would be nice to commit to a plan, but it has to be a plan of reasonable consensus. He suggested Council add this item to their monthly worksession meetings for updates. In addition, he suggested the Mayor appoint Council members to actively pursue some options and sort out the well-intended wishes from those which are workable realities that the City can help develop.

Vice-Mayor Bellamy felt the City should put the question on the November ballot and ask the community what they want.

Councilman Peterson did not feel like there was a consensus on Council for the Heery concept or anything else. Since he personally did not support the Heery concept, he suggested Council look at other options, some of which were in the recent proposal submitted by PBC & L. He agreed that we do need a plan of action, however, there is no consensus on what that plan needs to be.

Mr. Hay noted that the Future of the Civic Center Task Force's recommendation was to move forward with the following: CP-1 ($72.8 million) site improvements including utilities, grading and roadwork; Lexington Street motor court; performance center auditorium; lower bowl seating and lower concourse in arena; rotunda; and service plaza for areas; and CP-2 ($13.1 million) conversion of the Thomas Wolfe Auditorium to great hall ballroom, including kitchen and support; and expansion and improvement of arena support and operations spaces. This would be a total cost of $85.9 million. The rest of the $115 million price tag were enhancements.

After discussion, it was the consensus of Council to postpone action on this matter for at least 5-6 months, with the possibility of developing legislation to go to our local delegation during their Long Session. In the meantime, Mayor Worley will contact individual Council members to assign them to actively pursue options and work with the Task Force members for background information. This period of time will also give other groups the opportunity to come forward with solid plans.

CLOSED SESSION

At 5:27 p.m., Councilman Mumpower moved to go into closed session to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: City of Asheville, Kenneth Bowman, Joseph Boerner and others. This is the City's appeal of the Civil Service Board decision on the police officer pay grievance. There are about 25 names and the City Attorney has a written list of the names if anyone wants to see it. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilman Ellis and carried unanimously.

At 6:35 p.m., Councilman Ellis moved to come out of closed session. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 6:35 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – July 23, 2002 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Mayor Worley gave the invocation.

I. PROCLAMATIONS:

II. CONSENT:

Vice-Mayor Bellamy asked that Consent Agenda Item "D" be removed from the Consent Agenda due to her conflict of interest.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JULY 9, 2002, AND THE WORKSESSION HELD ON JULY 16, 2002

B. ORDINANCE NO. 2938 - BUDGET AMENDMENT FOR AZALEA ROAD PARK

Summary: The consideration of a budget amendment for Azalea Road Park totaling $319,990.89 received from a grant in the amount of $249,165 from the N. C. Dept. of Environment and Natural Resources and from private donations in the amount of $70,825.

The City of Asheville applied for funds in January 2002 for a grant from the N.C. Dept. of Environment and Natural Resources, Department of Environment and Natural Resources, Division of Parks and Recreation in the Parks and Recreation Trust Fund. The grant was recently awarded in the amount of $249,165. The City has also received the first two installments of a $350,000 gift from the Lewis Family Foundation at $70,825.89.

The Parks and Recreation Department recommends City Council approve the budget amendment to increase the budget for development of Azalea Road Park.

ORDINANCE BOOK NO. 20 – PAGE 6

C. RESOLUTION NO. 02-119 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY TO THE N.C. DEPT. OF TRANSPORTATION FOR A GRANT FOR SIDEWALK IMPROVEMENTS ON NEW HAW CREEK ROAD/AVON ROAD

Summary: The consideration of (1) a resolution authorizing the City Manager to apply to the N. C. Dept. of Transportation, through the Transportation Enhancement Program, for a grant for sidewalk improvements on New Haw Creek Road/Avon Road; and (2) a resolution for City sponsorship of grant applications from Pack Square Conservancy and Mountain Housing Opportunities.

Every two years, the N. C. Dept. of Transportation (NCDOT) puts out a call for applications for transportation enhancement funds. These are federal funds for transportation projects like sidewalks, greenways, streetscape improvements, beautification, and water quality improvements. The funds are part of the federal legislation that authorizes transportation funding known as TEA-21. If a project is awarded through the state selection process, costs are reimbursed at a rate of eighty percent (80%). The local match is twenty percent (20%).

Any public or private agency may apply for these funds, but each application must have a local government agency as the sponsor. In past years, the City of Asheville has received enhancements funds for projects such as the Urban Trail and the Weaver Boulevard Greenway. This year, the City of Asheville has prepared one application for sidewalk improvements on New Haw Creek Road and Avon Road. If awarded, the City of Asheville will provide the local match for the sidewalk project on New Haw Creek Road/Avon Road. This project was developed cooperatively with the Haw Creek Pedestrian Task Force over the past year. Staff has already surveyed and designed this project, and we are now waiting for a funding source for construction.

In addition to the application from the City of Asheville, two outside agencies have applied for funding and have asked for sponsorship from the City of Asheville. The Pack Square Conservancy has applied for funds for Pack Square Streetscape Improvements and Mountain Housing Opportunities has applied for funds to construct a greenway and streetscape improvements in the West End/Clingman Avenue neighborhood. The City of Asheville is not responsible for the local match for the applications from outside agencies. The match will be provided by the applying agency. For these applications, the City of Asheville will be responsible for maintenance of any improvements that fall within public right of way, and may provide staff support for project implementation.

Listed below are summaries of the three grant applications presented for consideration.

1. New Haw Creek Road/Avon Road Sidewalk Improvements
   City of Asheville Match: $195,000
   Enhancement Funds Requested: 312,044
   Total Project Cost: $507,044

   Project Description: The proposed project entails construction of sidewalk, curb, gutter and storm drainage along the east side of Avon Road from the entrance of the East Asheville Library and Community Center to the entrance of Haw Creek Park; along the west side of Avon Road from the entrance of Haw Creek Park to the intersection with Beverly Road; and along the south side of New Haw Creek Road from the intersection with Arco Road to the intersection with Beverly Road. The project will require the acquisition of twenty-one (21) right-of-way easements.

2. Pack Square Streetscape Improvements
   City of Asheville Match: None
   Match by Pack Square Conservancy: $125,000
   Enhancements Funds Requested: $250,000 (street improvements)
   Total Project Cost: $2,500,000 (total project)

   Project Description: Pack Square Renaissance is a significant civic improvement project in the historic center of downtown Asheville, N.C. The project will "knit" together more than six acres of fragmented public property into a major new public park and revitalized historic square. A primary focus of the project is to provide more balance to the accommodation of both pedestrians and vehicles. The project includes the reorganization of multiple small green spaces into an important new " town green" as well as enhanced pedestrian amenities such as: new plazas, terraces, and sidewalks. Streetscape features such as street trees, benches and lighting will accompany public art, performance stages and water features. This application is to assist in the pedestrian enhancement/streetscape portion of the Year One improvements – the reorganization of the existing City-County Plaza into the major portion of the new "green" as well as two "forecourts" directly adjacent to both the Buncombe County Courthouse and the Asheville City Hall. Redesign and enhancement of pedestrian and vehicular circulation will be key components of this portion of the overall project.

3. Clingman Avenue Streetscape and Greenway
City of Asheville Match: None
Match by Mountain Housing Opportunities (and other sources): $243,150
Enhancement Funds Requested: $266,550
Total Project Cost: $509,700 (phase I and II)

Project Description: This project proposes multi-modal transportation enhancements to Clingman Avenue and its adjacent greenway, a gateway corridor that connects downtown Asheville to its riverfront and West Asheville. The project area, approximately 25 acres, encompasses approximately 2000' of frontage on Clingman Avenue and Haywood Road and the adjacent right of way, extending from its intersection with Hilliard Street to the north and down to the West Asheville Bridge. This corridor includes Clingman Forest, an approximately 10 acre urban riparian forest parallel to Clingman Avenue to the east and extending to Aston Park to the north, the YWCA and Asheville Middle School to the East, and river warehouse district immediately to the south. Funding would provide for streetscape enhancements to Clingman Avenue, the historic heart of the racially and economically diverse West End/Clingman Avenue neighborhood that is currently undergoing dramatic revitalization. It would also support the development of a greenway parallel to Clingman Avenue through Clingman Forest, including innovative watershed-based stormwater management currently being developed. This project would build on existing broad based partnerships and community support to implement recommendations in the *City of Asheville 2010 Plan*, the *Asheville Greenways Master Plan*, and the award-winning *2001 West End/Clingman Avenue Neighborhood Citizens Master Plan*.

The TEA-21 Enhancements Grant Applications will be reviewed and awarded in the Fall of 2002.

City staff recommends City Council (1) approve a resolution authorizing the City Manager to apply to the State of North Carolina for a grant for New Haw Creek Road and Avon Road Sidewalk Improvements; and (2) approve a resolution designating the City of Asheville as the local government sponsor for grant applications for Pack Square Streetscape Improvements and Clingman Avenue Streetscape and Greenway.

RESOLUTION BOOK NO. 27 – PAGE 209

D. RESOLUTION AUTHORIZING THE CITY SPONSORSHIP OF GRANT APPLICATIONS FROM PACK SQUARE CONSERVANCY AND MOUNTAIN HOUSING OPPORTUNITIES THROUGH THE TRANSPORTATION ENHANCEMENT PROGRAMS

This item was removed from the Consent Agenda due to Vice-Mayor Bellamy's conflict of interest.

E. RESOLUTION NO. 02-121 - RESOLUTION ACCEPTING THE STREET NAME OF "APPLEWOOD DRIVE" OFF OF NEW HAW CREEK ROAD

Summary: The consideration of a resolution accepting the new proposed street name "Applewood Drive."

GPD of NC Inc., owner of lots in Applewood Subdivision, has petitioned the City of Asheville to accept the street name " Applewood Drive." The new street will begin at New Haw Creek Road and end at cul-de-sac on Applewood Drive.

City staff recommends adoption of the resolution accepting the new proposed street name "Applewood Drive."

RESOLUTION BOOK NO. 27 – PAGE 211

F. RESOLUTION NO. 02-122 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN INTERLOCAL AGREEMENT WITH THE CITY OF DURHAM, N.C., TO PURCHASE BUSES

Summary: The consideration of a resolution authorizing the City Manager to enter into an Interlocal Agreement with the City of Durham for the procurement of buses and bus equipment.

It is the plan of the Transit Services Department to replace several of the existing fleet each year with more modern low floor buses, pending state and federal funding. The Transit Services Department has therefore participated in a statewide effort to standardize transit bus purchases over the next two years. This is intended to radically diminish the lead time necessary to purchase buses, and to use the prospect of bulk purchases to intensify competition and obtain a lower bid from the bus manufacturers.

The lead agency, for the purpose of bidding the bus purchase, is the City of Durham. In order for Asheville to participate in this bid, there must be an Interlocal agreement signed between the City of Asheville and the City of Durham. This agreement will not commit the City of Asheville to purchase any buses, but it allows the City to purchase buses off of the Durham bid if so desired. The City may also conduct its own bid process and purchase it's own buses if it wants to.

City staff recommends City Council authorize the City Manager to sign an Interlocal Agreement with the City of Durham, North Carolina.

G. RESOLUTION NO. 02-123 - RESOLUTION AMENDING THE CITY COUNCIL MEETING SCHEDULE FOR THE FOLLOWING REASONS (1) SPECIAL MEETING ON THURSDAY, AUGUST 29, 2002, TO CONSIDER THE ADOPTION OF THE FINAL FISCAL YEAR 2002-03 ANNUAL OPERATING BUDGET; AND (2) CANCEL TUESDAY, SEPTEMBER 17, 2002, CITY COUNCIL WORKSESSION

RESOLUTION BOOK NO. 27 – PAGE 213

H. RESOLUTION NO. 02-124 - RESOLUTION CONFIRMING MEMBERS TO THE MINORITY BUSINESS COMMISSION

Summary: The consideration of a resolution confirming the reappointment of three members to the Minority Business Commission.

22

On May 26, 1998, City Council adopted Resolution No. 98-63 adopting a City-County Minority Business Plan.

The composition of the Minority Business Commission consists of 13 members, 10 of whom are nominated by various groups and three of who are minority business owners nominated by the Minority Business Commission. All nominees are considered and appointed by both the City Council and County Commission.

The following MB Commission members whose term expires August, 2002, have requested reappointment:

Ms. Clara Jeter	Asheville-Buncombe Community Relations Council
Mr. Marvin Vierra	Asheville Business Development Center
Ms. Claudia Thomas	Minority Business Owner (CAT Network Systems)

City staff recommends City Council adopt the resolution confirming the reappointment of three members of the Minority Business Commission.

RESOLUTION BOOK NO. 27 – PAGE 214

I. RESOLUTION NO. 02-125 - RESOLUTION APPOINTING MEMBERS TO THE POLICE OFFICERS & FIREFIGHTERS DISABILITY REVIEW BOARD

Summary: The consideration of appointing members to the Police Officers' & Firefighters Disability Review Board.

The terms of Stephanie Cooper, Alexander Maitland and James Lewis, as members on the Police Officers' & Firefighters Disability Review Board, expired on July 19, 2002.

On July 16, 2002, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint Ms. Cooper, Mr. Lewis and Dr. Maitland to each serve an additional two year term respectively, terms to expire July 19, 2004, or until their successors have been appointed.

RESOLUTION BOOK NO. 27 – PAGE 215

J. MOTION SETTING A PUBLIC HEARING ON AUGUST 13, 2002, TO AMEND THE 2002 CONSOLIDATED COMMUNITY DEVELOPMENT BLOCK GRANT & HOME ACTION PLAN

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Ellis moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Dunn and carried unanimously.

ITEM REMOVED FROM THE CONSENT AGENDA

RESOLUTION NO. 02-120 - RESOLUTION AUTHORIZING THE CITY SPONSORSHIP OF GRANT APPLICATIONS FROM PACK SQUARE CONSERVANCY AND MOUNTAIN HOUSING OPPORTUNITIES THROUGH THE TRANSPORTATION ENHANCEMENT PROGRAMS

See Consent Agenda item "C" above for descriptive information.

Councilman Peterson moved to excuse Vice-Mayor Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilwoman Jones and carried unanimously.

Councilman Peterson moved to adopt Resolution No. 02-120. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 210

III. PUBLIC HEARINGS:

IV. UNFINISHED BUSINESS:

A. ORDINANCE NO. 2939 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR CONSTRUCTION OF 379,000 SQUARE FEET OF RETAIL SPACE FOR PHASE 1 OF THE DEVELOPMENT LOCATED AT 437 SWANNANOA RIVER ROAD, FORMERLY SAYLES BILTMORE BLEACHERIES

ORDINANCE NO. 2940 - ORDINANCE TO REZONE A PORTION OF PROPERTY LOCATED AT 437 SWANNANOA RIVER ROAD, FORMERLY SAYLES BILTMORE BLEACHIERS, FROM COMMERCIAL INDUSTRIAL DISTRICT TO URBAN VILLAGE DISTRICT FOR PHASE 2 OF THE DEVELOPMENT

Planning & Development Director Scott Shuford submitted into the record the following Staff Report Addendum with Exhibits A, B & C (City Exhibit 13). "The report is intended to (1) provide analysis of comments made by both the developer and members of the public at the public hearing; and (2) provide guidance and recommendations for conditions to address concerns raised at the public hearing.

The process concerns raised by Dr. Guttman and others speaking at the public hearing can generally be characterized as resulting from a basic misunderstanding of the UDO submittal requirements. The applicant has submitted for the following reviews: Level III (conditional use permit) for Phase I; rezoning for Phase II; and River District design review for Phase I. At the time of formal review, all necessary application requirements were met. Code sections cited under Dr. Guttman's list include formal site plan review, conditional use rezoning review, formal flood ordinance review, formal erosion control review, etc. These code requirements will be imposed on the applicant IF the concept plan required for the conditional use permit and the rezoning are approved by City Council AND if the applicant submits applications for these reviews. It should be noted that no building permit would be issued until these additional reviews occur. Finally, as to the contention that the code requires that the most stringent review requirements be met for any application and therefore the concept plan has to comply with formal site plan submittal requirements, etc. Dr. Guttman's contentions appear to indicate a misunderstanding of the UDO and the Conditional Use Permit process.

Traffic Capacity Options

At the outset of this discussion, it should be noted that of the four proposed traffic capacity mitigation options, the applicant suggested the first three. The only mitigation option unilaterally proposed by staff was the widening of Swannanoa River Road. Staff received the suggestion from the applicant about the transit option just prior to the development of our staff report for the public hearing.

Next, given the direction of Council for staff to work with the applicant to pursue any feasible option for addressing the traffic impact of the development, staff met with the applicant on July 16, 2002 to discuss what measure(s) would be proposed to accommodate the traffic impact mitigation. Since staff had provided extensive information to the applicant's transit consultant, including information about transit ridership, financial information about trolley costs, route and "headway" (time between trolley stops to pickup passengers) data, and similar information, we felt confident that our discussion would center on transit. However, the applicant indicated that the option they would prefer to pursue at the current time is to reduce the scale of the project in order to meet the 10% capacity retention standard proposed at the City Council meeting. Included in this option is the provision of an expanded connection, via a public street to be constructed by the applicant, to the River Ridge Shopping Center. In other words, they propose to delete some land uses from this request and to change others to such an extent that the total projected traffic on Swannanoa River Road falls below 12,600 vehicles per day.

This reduction of land use intensity is described in the following table, which the applicant provided at the July 16 meeting. Preliminary staff analysis indicates that the proposed land use intensity reductions would result in the stated trip reductions on Swannanoa River Road.

DEVELOPMENT PLAN FOR SAYLES SITE

ORIGINAL PLAN		**REVISED PLAN**	
Land Use	**Size**	**Land Use**	**Size**
Discount Superstore	219,622 sq. ft.	Discount Superstore	219,622 sq. ft.
Shopping Center	148,254 sq. ft.	Shopping Center	148,254 sq. ft.
High-Turnover Sit-Down Restaurant	5,000 sq. ft.	High-Turnover Sit-Down Restaurant	5,000 sq. ft.
High-Turnover Sit-Down Restaurant	5,000 sq. ft.	Removed from plan	
Specialty Retail	50,000 sq. ft.	General Office	54,000 sq. ft.
Hotel	75 rooms	Removed from plan	
Residential Condo/Townhouse	100 dwelling units	Residential Condo/Townhouse	125 dwelling units

In discussing this mitigation method with the applicant, we learned that the other options under consideration were rejected for the time being due to either their speculative nature or cost of implementation. As part of the discussion, the applicant provided considerable information about how a transit option would perform. The applicant did indicate a willingness to continue to pursue the interchange and the extension of Wood Avenue options unilaterally, as well as to work with staff and surrounding property owners to develop a transit option. In the event one or more of these options are implemented, Swannanoa River Road is widened or traffic does not increase as much as projected, the applicant may choose to go back through the review process to modify the plans to restore the lost land use intensity. This would require a new application and new public hearings.

There are a number of good reasons to continue to pursue enhanced transit service to the site. First, transit makes better use of existing infrastructure and preserves capacity on Swannanoa River Road. (It should be noted that Swannanoa River Road will play an extremely important role in the future transportation network of the City as it is the only continuous east-west corridor in the City between I-40 and I-240.) Second, if a trolley system proves popular, it will build general public support for transit. Third, the use of a transit system helps resolve a wider transportation issue involving getting shoppers to a number of major retail establishments and two multifamily projects. Fourth, transit seems to have the potential for reducing the "noon-time rush hour peak" as people from the surrounding area travel to the many restaurants or choose to spend their lunch hour shopping.

The two biggest potential problems with enhanced transit service are its cost and whether it will attract sufficient ridership. Trolley purchase is a major capital expense and operation costs are extensive. If there is success in obtaining federal assistance in overcoming the bulk of these costs, staff feels the remaining costs might be funded through a special taxing district of the properties served by the system or some other as yet undetermined financing method.

Suggested language for a condition reflecting the above discussion is provided below:

No changes shall be made in the level of development intensity (Exhibit A) that will or may increase traffic on Swannanoa River Road unless further traffic mitigation measures are implemented. In addition, the applicant shall support a general transit service hub at the site and participate in an effort to develop a specialized transit system for the site and surrounding area, including developer provision of a transit stop on the site, designing the interior of the site to accommodate transit vehicles, allowing transit vehicles to traverse the site, developer participation in a plan to create a specialized transit program, and developer commitment to any agreed upon funding mechanism, such as a special taxing district, necessary to maintain this system that may be implemented in the future. Finally, in order to ensure the viability of the River Ridge Shopping Center connection, the applicant shall escrow not less than $50,000 to be used for improvements on the River Ridge site to upgrade the interior access "road" that will connect to the public street being constructed by the developer as part of the Phase II urban village project; the implementation of this upgrade project will require approval by the River Ridge Shopping Center owner and by the City of Asheville.

In addition, a small adjustment to the condition regarding the urban village is necessary and this change is noted in the list of conditions provided at the conclusion of this report.

Easement Condition

At the public hearing, the applicant contended that this condition might not be legally enforceable. A letter from the owner of the property that this easement crosses was also submitted making the same point. To address this matter, staff recommends this condition be modified as follows:

Unless legally precluded by the wording of the easement, the access easement on the south side of the Swannanoa River running from the developer's property to Fairview Road shall be transferred to the City of Asheville for the purpose(s) of extending the Swannanoa River greenway and/or construction of the Riverside Parkway. The City shall have the ability to transfer this easement to the State of North Carolina or some other entity or entities for one or both of these purposes.

Lease or Ownership Transfer Condition

This condition essentially requires that the Wal-Mart Corporation do everything in its power to ensure that the existing properties on Tunnel Road not remain vacant after it moves to the Sayles location. The Wal-Mart Corporation has some history of keeping vacated stores vacant in an effort to minimize competition. Staff believes the City of Asheville has a clear public interest in discouraging this business practice. First, there is strong commercial demand for properties similarly situated to the existing Wal-Mart store. Additionally, there is no reason why the City tax base should be eroded in such a manner. While the applicant has previously

26

contended that he has no control over the actions of a tenant regarding other property owned by the tenant, at the July 16 meeting it was indicated that the applicant would obtain a letter from the Wal-Mart Corporation accepting this condition in principle. Consequently, staff recommends the City Council retain this condition.

Contamination Concerns

At the public hearing, there were a number of concerns expressed regarding environmental contamination of the site. This contamination is under the purview and regulation of the NC Department of Environment and Natural Resources (DENR). Staff has been in contact with DENR regarding environmental concerns about the Sayles site. Based on this contact, in order to ensure that this concern is addressed as part of the conditional use permit for this project, we suggest you add the following condition.

The applicant shall enter into an Administrative Agreement for State Directed Remedial Action with the Department of Environment and Natural Resources (NCDENR). The applicant shall submit and implement, after NCDENR approval, a remedial action plan for addressing on-site contamination consistent with the agreement and NCDENR policies and procedures. In addition development plans shall be designed and/or revised to accommodate future remedial action at the site.

Urban Village Timing Concerns

Several members of the public commented that the urban village (Phase II) might not be constructed. As indicated at the public hearing, the applicant has committed to what effectively amounts to a simultaneous construction schedule for Phase I and Phase II. While this is part of the applicant's submittal package and could be enforced as such, staff suggests that City Council add the following condition to clarify the intent:

The construction schedule for Phase I and Phase II shall be in general compliance with the schedule submitted by the applicant and included herein as Exhibit C.

Natural Features Alteration

A number of public comments were received regarding the extent to which the site would be modified, thereby affecting the natural features on the property. The applicable standard for approval reads as follows: **That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant**. The chief alterations of the site are: creation of some fairly extensive floodway expansion areas in the front of the site outside the river resource yard, the installation of fill material to raise the elevation of the parking areas and building pads outside the 100 year floodplain, and significant grading of a hill located on the east and south sides of the site. Staff feels the retention of some 13 acres of riverfront area for a park, along with the interior landscaping and other project design features represent "reasonable compatibility" in terms of meeting this condition. However, the appearance of the floodway expansion areas may require additional mitigation that could be addressed in the following condition:

Fencing of the floodway expansion areas and stormwater retention ponds shall be accomplished by using wrought iron or other similar decorative fencing. The applicant shall install landscaping consistent with a plan to be developed by working with staff in order to address the appearance issues associated with such extensive fencing.

Final recommended conditions for Council consideration (NOTE: Revised or added conditions are italicized).

1. All conditions identified by the Technical Review Committee shall be met.
2. *No changes shall be made in the level of development intensity (Exhibit A) that will or may increase traffic on Swannanoa River Road unless further traffic mitigation measures are implemented. In addition, the applicant agrees to support a general transit service hub at the site and to participate in an effort to develop a specialized transit system for the site and surrounding area, including developer provision of a transit stop on the site, designing the interior of the site to accommodate transit vehicles, allowing transit vehicles to traverse the site, developer participation in a plan to create a specialized transit program, and developer commitment to any agreed upon funding mechanism, such as a special taxing district, necessary to maintain this system that may be implemented in the future. Finally, in order to ensure the viability of the River Ridge Shopping Center connection, the applicant shall escrow not less than $50,000 to be used for improvements on the River Ridge site to upgrade the interior access "road" that will connect to the public street being constructed by the developer as part of the Phase II urban village project; the implementation of this upgrade project will require approval by the River Ridge Shopping Center owner and by the City of Asheville.*
3. The applicant shall install or fund the recommended improvements indicated in the TIA, except those specifically not desired by the City Engineering Department. In addition, the applicant shall be responsible for the full cost of linking the new signal at Stevens Street with the other signals in the immediate vicinity in such manner as required by City staff. The applicant shall escrow not less than $65,000 for a traffic calming study and its implementation, with any unused funds to be returned to the applicant upon completion of the traffic-calming project.
4. The applicant shall work with the Asheville Transit Services Director to locate and construct a transit center on the site to serve as a transit node. The transit center shall be constructed at the developer's expense and shall be architecturally compatible with the development design.
5. The applicant shall work with the City Parks and Recreation Department to convey the park area and greenway to the City of Asheville; such conveyance may require the applicant to create and fund a maintenance plan for this property.
6. A signage package that complies with the City's sign code shall be submitted for review and approval prior to formal approval of this project.
7. *The design of the urban village shall be modified in accordance with the standards for such developments as enumerated in the Urban Village zoning district; the applicant shall be able to construct the proposed number of residential units and the proposed square footage of the office ~~and retail~~ space; additionally, the design of the urban village shall include a public street connection to River Ridge Shopping Center.*
8. Within 90 days of the issuance of a certificate of occupancy for the Wal-Mart building, the Wal-Mart Corporation (or any individual, partnership or corporate entity acting on behalf of the Wal-Mart Corporation) shall terminate any leasehold of the existing Tunnel Road Wal-Mart building and property or, in the event the building and/or property is owned by the Wal-Mart Corporation, said corporation (or any individual, partnership or corporate entity acting on behalf of the Wal-Mart Corporation) shall place the building and/or property for sale or lease for commercial or other purposes allowed under the applicable zoning at fair market prices. The purpose of this condition is to ensure that the Tunnel Road building and/or property is not kept in a vacant state for an extended period of time.
9. *Unless legally precluded by the wording of the easement, the access easement on the south side of the Swannanoa River running from the developer's property to Fairview Road shall be transferred to the City of Asheville for the purpose(s) of extending the Swannanoa River greenway and/or construction of the Riverside Parkway. The City shall have the ability to transfer this easement to the State of North Carolina or some other entity or entities for one or both of these purposes.*

10. *The applicant shall enter into an Administrative Agreement for State Directed Remedial Action with the Department of Environment and Natural Resources (NCDENR). The applicant shall submit and implement, after NCDENR approval, a remedial action plan for addressing on-site contamination consistent with the agreement and NCDENR policies and procedures. In addition development plans shall be designed and/or revised to accommodate future remedial action at the site.*
11. *The construction schedule for Phase I and Phase II shall be in general compliance with the schedule submitted by the applicant and included herein as Exhibit C.*
12. *Fencing of the floodway expansion areas and stormwater retention ponds shall be accomplished by using wrought iron or other similar decorative fencing. The applicant shall install landscaping consistent with a plan to be developed by working with staff in order to address the appearance issues associated with such extensive fencing.*

In addition to the above conditions, should City Council choose to approve this request, staff recommends that Council direct staff to undertake the following tasks:

1. Perform a zoning study for the River District to ascertain the geographical extent of future large-scale retail structures in the district.
2. Work toward making the Riverside Parkway the City's top priority on the Metropolitan Planning Organization Transportation Improvement Program.
3. Work with the applicant and a team of property owners from the surrounding area to determine the feasibility and desirability of developing a specialized transit system for the development site and surrounding area."

Mr. Shuford said that at the last meeting on this matter, there was a direction by Council to have staff meet with the developer and see if there were possible ways of reducing the traffic impact on Swannanoa River Road. A target was set at that meeting of reducing the impact so that not less than 10% of the capacity of that road (a Level D capacity) would still be available for future development. City staff provided extensive information to the developer, primarily in the area of transit. When City staff met with the developer, they were expecting a lot of information and discussion about transit, but they proposed a different tact. What the developer is now proposing is to retain the Wal-Mart Supercenter at its original proposal, as well as the shopping center portion. They will also keep one of the out-parcels as a high turnover sit-down restaurant. Changes include removing one of the out-parcels that was scheduled to be a high turnover sit-down restaurant and removing the hotel (which was included in the Traffic Impact Analysis "TIA"). Specialty retail has now been revised to general office use. In addition they originally proposed 100 dwelling units for the residential condo/townhouse and now they are proposing 125 dwelling units (City Exhibit 14).

Mr. Gaye Sprague, the City's traffic consultant, said that the developer's consultant did go through the calculations necessary to come up with the projected 24-hour volume on Swannanoa River Road that relate to the reductions in use. We have reviewed those calculations and the assumptions made and concur that they can get down to the 10% below Level D that we requested.

Mayor Worley said that the public hearing on this matter was held on June 25, 2002, and continued until June 26, 2002, at which time said public hearing closed. At this time, he re-opened the public hearing for the purpose of receiving new information and having any comments on the new information. Mayor Worley then reviewed the order of the hearing itself and the standard time limitations.

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

After hearing no questions about the procedure, Mayor Worley re-opened the public hearing at 5:15 p.m.

Ms. Becky White, Transportation Planner for Sain Resources, said that the development team was charged with producing a traffic mitigation plan that would satisfy the City's requirement that 10% of the capacity on Swannanoa River Road be left for other area development. Three alternatives were suggested for further study – a transit system, widening of Swannanoa River Road, and an interchange at I-240. Since that time, Sain Resources retained an independent consultant to prepare a transit feasibility study. The result of that study indicates that the 10% capacity reservation could not be met with transit, as it does not save enough vehicle trips. The estimate was a savings of approximately 170 vehicle trips and in order to meet the 10% capacity reservation, they needed to save approximately 1,000 trips on the most heavily affected segment on Swannanoa River Road. A concept plan for widening Swannanoa River Road was prepared and it was confirmed from that concept plan that the right-of-way acquisition would not be feasible for the developers as private landowners. An interchange at I-240 was determined to be too uncertain to allow the developers to proceed with construction of the shopping center. The most straightforward method for meeting the capacity reservation requirement was to reduce the intensity of the development. By making the changes outlined by Mr. Shuford, the developer was able to reduce the trip generating characteristics of the shopping center to a level that met the 10% capacity reservation. In addition to the reduction in intensity of the development, a commitment was made to move construction of a connector roadway to the River Ridge Shopping Center to the first Phase of the project and a portion of the development's trips were assigned to this connector road. These modifications to the plan were sufficient to meet the City's capacity requirement and the details of the calculations were documented in a memo dated July 16, 2002 (Exhibit A which is attached to City Exhibit 13).

Ms. Betty Lawrence, attorney representing the Beverly Hills Neighborhood Association, the Oakley Community Association and Community Supported Development, said that her clients are confused over the specifics of this plan at this point. While many changes are noted in City Exhibit 13, no changes have been made in the site plan, the grading plan and the cross sections. They were told that the developers changed the cross sections and grading on this project, but they don't know how much. The only plat in front of Council is the one that was submitted with the application. It is not the same thing that Council is supposed to approve, according to the staff report. It is crucial that what Council is approving is clear. It is not and therefore this calls for either denial of the application based on insufficient information or on the continuance of this proceeding. We make that preliminary request. She said that there are violations of the ordinance and that those violations be considered. One new violation is that there is a requirement that the plans that were submitted to the Technical Review Committee (TRC) need to be revised in a way that the TRC asked for within 60 days or they are deemed denied. Sixty days have passed and they haven't been revised. She also called Council's attention to provisions in the Urban Village District regulations. A master plan is required for an urban village zoning application. She said that urban village district projects are required to submit a master plan with the zoning application for the entire parcel that indicates the general street network, the land use configuration within that network, the ultimate proposed development density and the proposed structure heights for the urban village. In addition, for initiation of this zoning classification, properties may fall under more than one ownership so long as there exists covenants or other legally binding agreements that address cross access, cross parking and other similar issues affecting joint operation of the project. It is true that the land being requested to be rezoned is all under one ownership at this time; however, the access to the land is under different ownership at this time. There are at least three different owners involved. As she understands the new traffic mitigation plan, it would put more of an emphasis on the access road coming from the River Ridge Shopping Center that is not owned by the applicant and there is no agreement for that access through that private land. The Stevens Street entrance has the I-240 underpass and the Southern Railway overpass to deal with. None of these have legally binding agreements that address cross access. This emphasizes one of our major points which is that staff is saying that what comes before Council for a conditional use review only has to do with use and that conceptual plans are all that is needed. That is not all that is needed. Conceptual plans are not part of the Unified Development Ordinance (UDO). The UDO has very specific requirements for what the plans for a conditional use permit must contain. One Court case that has dealt with this in detail has said that cities can provide by ordinance for a preliminary conditional use permit and if they do, then you can just get by with a sketch of the project. But if you provide for a conditional use permit that needs final plans and that needs the conditions that have been detailed for Council, then Council cannot go against their own rule to permit them to go forward and approve an application, which does not meet the City's requirements. We believe that is what has happened here. Regarding the urban village, the developer should have the final plans so Council and the public has the right to know what is being proposed. A provision of the UDO says "revisions to the approved urban village district master plans may be approved by the City Council or by the Planning and Development Director depending on the type of revisions being requested. City Council shall review any revisions to a master plan that changes the proposed mix of uses by increasing or reducing any use category by 25% or more." As Council can clearly see, the urban village request has gone from 100 residential units to 125 residential units. This may be read to say this is only after a master plan has been approved that it has to have these changes in order to include new information and trigger new review, but we say that that same logic means that that is a significant change in the urban village request and that today we should be able to comment on those changes in the proposed urban village as well as the changes in the traffic mitigation. In the urban village requirement, it reads, "in reviewing master plan revisions, the City Council shall follow the same public hearing process used to approve the initial master plan." She feels this means that there should be a public hearing today on the urban village changes as well. She asked that Council either deny or delay for further information. (Neighborhood Exhibit 9).

The following individuals spoke against the issuance of the conditional use permit based on the new information presented at this meeting. If concerns were expressed by prior speakers or if the comments are not relevant to the decision before Council, they will not be repeated or included. Other comments/concerns include, but are not limited to: developer is not adhering to Urban Village District regulations in that a Wal-Mart Supercenter was not the intent of safe and convenient access to shopping and other essential services; it is not possible to build a road under the existing I-240 bridges to meet the City's minimum design guidelines; traffic counts were averaged and do not represent true traffic patterns; how can the City enforce traffic laws and regulations on the private road that is to be built; the developer has met the 10% below Level of Service D by only 25 vehicular trips per day; the TRC imposed numerous conditions and those conditions along with environmental issues associated with groundwater contamination must be publicly addressed but this information has not been shared with the public; there will still be a lot of cut-through traffic even with the access road being built; traffic will be 24 hours since the Wal-Mart store stays open for 24 hours; area is too concentrated for another large development; need sustainable development; can't ride a bike on Swannanoa River Road due to traffic; there is no margin for safety since 10% below Level of Service D is only an assumption; and due process as well as state and local ordinances require notice of the public hearing and none was given:

Mr. Jeff Kelley (Audience Exhibit 23)
Mr. Ned Guttman, Asheville resident (Audience Exhibit 24)
Mr. Mike Moody, East Asheville resident
Mr. Andrew Brown
Ms. Corinne Kurzmann, Sayles Road resident
Ms. Hazel Fobes, North Asheville resident

Mr. William Butcher
Ms. Jane Blodgett, Fairview Road resident
Mr. Grant Millin, East Asheville resident
Ms. Sharon Martin, Asheville resident
Ms. Lola LaFey
Professor David Clark
Mr. Joe Adams, Asheville resident
Ms. Beth Jezek, East Asheville resident

The following individuals spoke in favor of the issuance of the conditional use permit based on the new information presented at this meeting. If concerns were expressed by prior speakers or if the comments are not relevant to the decision before Council, they will not be repeated or included. Other comments/concerns include, but are not limited to: development of the area will bring income to the City, and the developers will clean up the environment and City taxpayers will not have that burden:

Ms. Helen Morrison
Mr. Fred English, Haw Creek resident

Mayor Worley noted that the project must be built in accordance with City standards, and that includes construction of the roads.

Ms. Lawrence said Council has heard how tiny the margin of error is and that we don't really have good counts on Swannanoa River Road. One aspect is the average daily counts. If you look at what would be more than average in Asheville, at least 1/3 of the year traffic would be too high to meet the 90% of that standard. City staff has previously said that the road through River Ridge Shopping Center would be 2% of the traffic and now it's 5% of the traffic. We don't know what caused that change. She pointed out that the way the proposal is to issue the permit leaves too much to the delegation of City staff. Five of the 12 staff conditions have changed and they were permitted to comment on only one of those five. She said if Council doesn't either turn this down or continue it, that they add the following three conditions. (1) "All federal, state, utility and private permits, easements and approvals be obtained or guaranteed to be obtained prior to the issuance of any City permit." Not simply a building permit, but any of the permits that would involve moving the ground around. (2) "That remediation of the toxic plume shall be completed to the satisfaction of the Dept. of Environment and Natural Resources prior to disturbing any soil within 400 feet of the predicted dispersion of any toxic substance that does not meet DENR Hazardous Substance Concentration Standards." And, since we see this project being scaled back and we have reason to believe that it will be scaled back up in stages and that may happen in ways that don't require public notice, they ask that (3) "Public notice be given for any permit application and requests for modifying the conditional use permit."

Mr. David Matney, attorney representing the developer, said that when the meeting ended in June, Council said there was too much traffic and they needed to do something about it. There was no way to do anything around it, so we did something to the project. We removed one building (restaurant) and will grade it flat. That means no cars. No new buildings are proposed in the Urban Village. We have taken the existing buildings – converting the ones that were retail on the first floor to office and the ones that were retail on the second floor of the building to residential. The access road through River Ridge Shopping Center has been there since the beginning. Regarding that access road and its traffic count, we showed zero to start with because we weren't going to build it until the end. Now we will build it at the beginning. The hotel has been removed since before the first public hearing, but the numbers for the hotel were included in the TIA. We have now deleted those numbers. We have a 10% capacity reduction on a Level of Service D road. A road is not full until it is a Level of Service F and therefore we have a margin of safety. He respectfully asked that City Council approve the conditional use permit.

Prior to Mayor Worley closing the public hearing, Ms. Lawrence cautioned Council that there is a case that states that once the public hearing is closed, anything that happens after that in terms of questions that are asked of either staff, the applicant or the traffic engineers are not competent evidence.

City Attorney Oast was familiar with the case cited by Ms. Lawrence and felt it may be appropriate to close the public comment period and proceed with Council deliberations.

Mr. Matney felt that Council would be within its rights to ask any questions for clarification, particularly since there have been volumes of paper submitted.

Mayor Worley closed the public comment period at 8:18 p.m.

With regard to Condition No. 5, Councilman Dunn asked how the City could require the developer to buy land, convey it to the City and then fund maintenance of it. Mr. Shuford explained that the applicant offered to give the property along the river to the City for a park. Initially the City did not feel they wanted it because of some concerns about a variety of issues. The Director of Parks and Recreation then decided it would work and the conveyance and maintenance issues are there to cover issues. Some issues include precisely what land is given and whether it involves some feature that is necessary for the developer to have this site function, such as a stormwater pond or the floodway expansion area. We certainly would not want to take those on unless the applicant was willing to maintain it.

Mr. Shuford said the additional approvals required for the Sayles Project (City Exhibit 15) include formal site plan review and approval, zoning permit approval, erosion control permit, grading permit, stormwater management permit, Federal Emergency Management Agency (FEMA) review and approval, NC Dept. of Environment and Natural Resources (DENR) review and approval, Army Corps of Engineers permit, building permits, driveway permits, life/safety code review and approval, encroachment permits, permits and approvals associated with the new roads, and certificates of compliance. He said that many steps are still appealable if the public or the developer wants to appeal them. This is basically the first step to move forward into this range of other reviews. He said that basically the developer is committed to meet the TRC conditions and will have to go back with a formal site plan that shows that he does that. If there is a desire on the part of the applicant to come back with some additional development intensity, it will have to come back to City Council. This is a project that has been reviewed in it's entirety with a TIA and if there are changes that are going to affect that in terms of development intensity, we are required to go through this process again. That includes notice and public hearing. This is certainly not the end of public input nor the end of the review of the technical aspects of this project.

Councilman Mumpower asked if the City is procedurally violating any of our floodplain ordinances through this process. City Engineer Cathy Ball responded that there are some things, such as the Asheville Standard Specifications and Details Manual, that the City Engineer has the right to waive certain requirements. The floodplain ordinance is different. It is a part of the UDO and we are delegated by FEMA to carry out the requirements and permit projects within the floodplain area. We do not have the ability to waive those requirements. Therefore, the project must comply with those requirements in order for it to move forward. There is a no-rise certificate and that says the water level will not rise. That has to be provided by and stamped by a Professional Engineer in North Carolina in order for us to issue a permit for them to be able to do the work. We are not violating any requirement of the floodplain ordinance.

Mr. Joe Adams, Asheville resident
Ms. Beth Jezek, East Asheville resident

The following individuals spoke in favor of the issuance of the conditional use permit based on the new information presented at this meeting. If concerns were expressed by prior speakers or if the comments are not relevant to the decision before Council, they will not be repeated or included. Other comments/concerns include, but are not limited to: development of the area will bring income to the City, and the developers will clean up the environment and City taxpayers will not have that burden:

Ms. Helen Morrison
Mr. Fred English, Haw Creek resident

Mayor Worley noted that the project must be built in accordance with City standards, and that includes construction of the roads.

Ms. Lawrence said Council has heard how tiny the margin of error is and that we don't really have good counts on Swannanoa River Road. One aspect is the average daily counts. If you look at what would be more than average in Asheville, at least 1/3 of the year traffic would be too high to meet the 90% of that standard. City staff has previously said that the road through River Ridge Shopping Center would be 2% of the traffic and now it's 5% of the traffic. We don't know what caused that change. She pointed out that the way the proposal is to issue the permit leaves too much to the delegation of City staff. Five of the 12 staff conditions have changed and they were permitted to comment on only one of those five. She said if Council doesn't either turn this down or continue it, that they add the following three conditions. (1) "All federal, state, utility and private permits, easements and approvals be obtained or guaranteed to be obtained prior to the issuance of any City permit." Not simply a building permit, but any of the permits that would involve moving the ground around. (2) "That remediation of the toxic plume shall be completed to the satisfaction of the Dept. of Environment and Natural Resources prior to disturbing any soil within 400 feet of the predicted dispersion of any toxic substance that does not meet DENR Hazardous Substance Concentration Standards." And, since we see this project being scaled back and we have reason to believe that it will be scaled back up in stages and that may happen in ways that don't require public notice, they ask that (3) "Public notice be given for any permit application and requests for modifying the conditional use permit."

Mr. David Matney, attorney representing the developer, said that when the meeting ended in June, Council said there was too much traffic and they needed to do something about it. There was no way to do anything around it, so we did something to the project. We removed one building (restaurant) and will grade it flat. That means no cars. No new buildings are proposed in the Urban Village. We have taken the existing buildings – converting the ones that were retail on the first floor to office and the ones that were retail on the second floor of the building to residential. The access road through River Ridge Shopping Center has been there since the beginning. Regarding that access road and its traffic count, we showed zero to start with because we weren't going to build it until the end. Now we will build it at the beginning. The hotel has been removed since before the first public hearing, but the numbers for the hotel were included in the TIA. We have now deleted those numbers. We have a 10% capacity reduction on a Level of Service D road. A road is not full until it is a Level of Service F and therefore we

32

have a margin of safety. He respectfully asked that City Council approve the conditional use permit.

Prior to Mayor Worley closing the public hearing, Ms. Lawrence cautioned Council that there is a case that states that once the public hearing is closed, anything that happens after that in terms of questions that are asked of either staff, the applicant or the traffic engineers are not competent evidence.

City Attorney Oast was familiar with the case cited by Ms. Lawrence and felt it may be appropriate to close the public comment period and proceed with Council deliberations.

Mr. Matney felt that Council would be within its rights to ask any questions for clarification, particularly since there have been volumes of paper submitted.

Mayor Worley closed the public comment period at 6:18 p.m.

With regard to Condition No. 5, Councilman Dunn asked how the City could require the developer to buy land, convey it to the City and then fund maintenance of it. Mr. Shuford explained that the applicant offered to give the property along the river to the City for a park. Initially the City did not feel they wanted it because of some concerns about a variety of issues. The Director of Parks and Recreation then decided it would work and the conveyance and maintenance issues are there to cover issues. Some issues include precisely what land is given and whether it involves some feature that is necessary for the developer to have this site function, such as a stormwater pond or the floodway expansion area. We certainly would not want to take those on unless the applicant was willing to maintain it.

Mr. Shuford said the additional approvals required for the Sayles Project (City Exhibit 15) include formal site plan review and approval, zoning permit approval, erosion control permit, grading permit, stormwater management permit, Federal Emergency Management Agency (FEMA) review and approval, NC Dept. of Environment and Natural Resources (DENR) review and approval, Army Corps of Engineers permit, building permits, driveway permits, life/safety code review and approval, encroachment permits, permits and approvals associated with the new roads, and certificates of compliance. He said that many steps are still appealable if the public or the developer wants to appeal them. This is basically the first step to move forward into this range of other reviews. He said that basically the developer is committed to meet the TRC conditions and will have to go back with a formal site plan that shows that he does that. If there is a desire on the part of the applicant to come back with some additional development intensity, it will have to come back to City Council. This is a project that has been reviewed in it's entirety with a TIA and if there are changes that are going to affect that in terms of development intensity, we are required to go through this process again. That includes notice and public hearing. This is certainly not the end of public input nor the end of the review of the technical aspects of this project.

Councilman Mumpower asked if the City is procedurally violating any of our floodplain ordinances through this process. City Engineer Cathy Ball responded that there are some things, such as the Asheville Standard Specifications and Details Manual, that the City Engineer has the right to waive certain requirements. The floodplain ordinance is different. It is a part of the UDO and we are delegated by FEMA to carry out the requirements and permit projects within the floodplain area. We do not have the ability to waive those requirements. Therefore, the project must comply with those requirements in order for it to move forward. There is a no-rise certificate and that says the water level will not rise. That has to be provided by and stamped by a Professional Engineer in North Carolina in order for us to issue a permit for them to be able to do the work. We are not violating any requirement of the floodplain ordinance.

Upon inquiry of Councilman Mumpower, Mr. Matney said that when the plant closed, this became a Superfund site to remove the drums of chemicals that were left. When the drums were removed, it was no longer a Superfund site. There is a groundwater plume (under the restaurant that has now been removed) that will be dealt with by a remedial plan to meet state requirements. If the groundwater plume is not taken care of, the property can't be developed.

Upon inquiry of Vice-Mayor Bellamy, Mr. Shuford said that as a result of public comment at the TRC Committee, the River District Design Review Committee and the Planning & Zoning Commission, changes have been made to the architectural design, site layout, etc.

Councilman Peterson said that our ordinance requires that a master plan be submitted for the urban village rezoning. Mr. Shuford explained the master plan and said that there are some conditions regarding technical adjustments that need to be made in terms of how that urban village design occurs, in order to comply with our Urban Village District. If those result in some sort of substantial change, we will bring that back to Council. There is a fair likelihood that Council will see the Urban Village back with regard to its master plan because of its need to emphasize that connection through to the River Ridge Shopping Center. The fact that this is a project that is considered in unity and its traffic impacts are cumulative, that any change to the development intensity, whether it be in the urban village part or the Phase I part, is going to trigger a need for it to come back to City Council.

Councilman Peterson asked if the property where the hotel was going to be built can be developed since our ordinance requires that any plan that is going to be developed in phases that something be shown of what is going to go in each phase. Mr. Shuford said that in order for them to develop that property, they would have to come back to City Council because that would be outside of the two phases they have submitted.

Regarding the access road through River Ridge Shopping Center, Councilman Peterson said that it looks like our ordinance requires that before an urban village district is approved, there has to be a binding agreement for development of that access road. Mr. Shuford said that they don't have anything formal in terms of that commitment, but their TIA and plans show that they will have that connection. City Attorney Oast said that the requirement for the legally binding agreement addresses issues of cross access, cross parking and other issues for the joint operation of the projects within the boundary of the rezoning. Under the conditions suggested by staff, Phase I has to be developed in conjunction with Phase II. Phase I can't be built at all if the access through the River Ridge Shopping Center doesn't exist. Even though the owner's permission for the access through River Ridge is not part of the urban village rezoning, it is part of the conditional use permit. The project cannot be built unless the access exists.

Councilman Peterson was concerned that the developer would start grading and building and then determine that they can't build the Stevens Street extension. He questioned at what time in the process would they actually have to have an agreement. Mr. Shuford reviewed the general timing schedule submitted by the applicant prior to the public hearing in June for Phase 2 (City Exhibit 16) and said that road assurances have to be in place before anything starts to happen.

Mayor Worley said that before a spade of dirt is turned, the engineering has to be done to show that the streets can be built to City standards and that any agreements that are required in order to eventually construct the streets have to be obtained and finalized. Any approvals by NC DOT for signalization, design, etc. have to be in place. In other words, everything that they would have to construct would have to be permitted or an agreement signed so that there are no legal impediments to their eventual construction before we would allow them to turn a single spade of dirt for any aspect of the project. Mr. Shuford qualified the Mayor's statement in that there is going to be some pollution remediation that clearly can be permitted in advance of the other

34

aspects. They will have to have a fully engineered and have an approved plan before they get any building permits.

Upon inquiry of Councilman Peterson, Ms. Sprague said that the developer took a current count of the traffic and she feels confident that the count that was done on the average day in average conditions is a good count to base the study on.

Vice-Mayor Bellamy said that the residents of Beechwood Road asked that their road be closed at its intersection with Swannanoa River Road and one of staff's recommendations was to widen Beechwood Road as you approach Swannanoa River Road to provide a separate right-turn lane onto Swannanoa River Road. Ms. Sprague said that the recommendation by staff at the TRC was deleted because they did not want to do anything that would have the perception of increasing the traffic. She said that Beechwood Road would be a part of the traffic calming study in the neighborhood, working with the neighborhood.

Regarding timing of the traffic calming study, City Engineer Ball said that once the plan has received approval for the conditional use permit, staff would begin working with the neighborhood to develop a plan in order to make the project successful. Before they would be able to get a Certificate of Occupancy, City staff would have had to either spend the money on the traffic calming or get a bond so that the City could spend it whenever we got ready. If for some reason the process was delayed because of working with the neighborhood in trying to get consensus on what kinds of traffic calming measures to put in, it is possible we would require the developer to put up a bond in the amount of 150% of the cost so that it can be done. Ms. Ball said that the City would not require the 40% initial signatures, however, before there was a plan that was ready to be put on the ground, we would want to get 60% of the signatures. If the neighborhood doesn't agree that is the right thing to do, then it probably won't be successful. If we didn't get the 60%, we would continue to refine the plan until we could get buy-in from the group as a whole.

Councilman Peterson asked if City staff has looked at how feasible the Stevens Street extension is, especially with regard the I-240 road span. Ms. Ball said that the plans the City received were conceptual in nature. It has come to her attention that the concern is over the span being enough to accommodate the City's requirements. She stated that the road must meet the City's requirements, or the project stops. The developer has to show City staff plans that it will meet those requirements before they issue a grading permit for any part of the project. (City Exhibit 17)

Upon inquiry of Councilman Mumpower, City Attorney Oast said that the master plan is not required to be as detailed as the site plan and it's within the contemplation of the ordinance that it will change. It would be unusual for it not to change.

At 7:07 p.m., Mayor Worley announced a short break.

Upon inquiry of Vice-Mayor Bellamy, Mr. Matney explained that the plume is under about ¾ of an acre (area where the restaurant was planned but now removed). If you look at the parts per billion they sampled, it is equivalent to about 8 teaspoons. This has a concentration of 25 parts per billion, and the OSHA permitted amount of this substance in the air in a dry cleaner is 25 parts per million. It is a very small amount. Since it is in an area where the restaurant will not be built, remediation will be on-going. Our engineers say that we may move it slightly (due to the bridge construction), but the amount of movement will stay in that general area. We will be monitoring and working out a plan that DENR has to approve. The plume is in an area that they will not be building on at the present time, and maybe never.

Vice-Mayor Bellamy asked what type of fencing would there be around the floodway expansion area and the stormwater retention ponds. Mr. Matney said that the can only put fencing where FEMA allows them to put fencing. Fencing in a lot of these areas will be a flood barrier. We would hope the condition would require the developer to put fencing in where it is permitted or required by FEMA and that if it's visible from the surrounding roads or shopping center, that it would be decorative fencing. Mr. Shuford also responded that whenever you have a stormwater area that is 4 feet or deeper, it is required to be fenced.

Vice-Mayor Bellamy asked if some of the parking spaces could be eliminated to leave more green space. Ms. Shuford said that the developers are not at the minimum number of parking spaces, so from the standpoint of reducing the amount of parking spaces, that is certainly something staff would support. However he didn't know whether the developers would be able to do that because of their contractual requirements with different tenants.

Upon inquiry of Vice-Mayor Bellamy, City Engineer Ball said that how the bridge will come down is one of the details that has not been provided to City staff. She did say the City is delegated by the State to provide a permit to them. In order for us to issue that permit, they have to show that they are not going to cause erosion problems to the stream. That ordinance is pretty strict. They have to mitigate any sediment or run-off that goes into the stream. At this time, the actual details of how that is going to happen are not known.

Upon inquiry of Vice-Mayor Bellamy, Ms. Sprague explained three items City staff asked the developer to eliminate from their recommendations in their TIA to mitigate traffic: the widening of Beechwood Road, a modification to South Tunnel Road signal, and the dual left coming out of the property.

When Vice-Mayor Bellamy asked why there was no recommendation for a bike lane on the new road, Ms. Sprague said that bike lanes have not been addressed and she was not prepared to make a recommendation at this time.

Councilwoman Jones expressed her concern over the remedial action plan for addressing on-site contamination. She questioned whether the implementation of that plan should be complete or if it was enough to just have a plan in place.

Mayor Worley said that this is new information and therefore, re-opened the public hearing at 7:45 p.m.

Mr. John Childress, Vice-President of Horne Environmental, said that "implement" in this case means to start the process of remediation. They are evaluating several remediation strategies and they will have to be approved by the DENR. To implement the plan with an aggressive strategy would require approximately 6-18 months to clean up the groundwater plume to DENR standards. Following that, they are required to monitor for approximately two years to make sure that the standards are met and continue to be met. From start to finish would take approximately 2 to 3-1/2 years.

Upon inquiry of Councilman Ellis, Mr. Childress said that he has been involved in this type of remediation several times and at this level, it would be considered minor dry-cleaning contamination cleanup. In fact, it probably wouldn't even require clean-up under the standards. It would require monitoring only in most cases with concentrations at this level. Federal drinking water standards are 5 parts per billion and this site has an average range of 15-20 parts per billion, with the highest concentration at 31 parts per billion. The state standards are .7 parts per billion, which is about 10 times less than drinking water standards. This site would more than qualify as drinking water once it is cleaned up.

-

36

Councilman Mumpower stressed that they have to meet state and federal guidelines with regard to the groundwater plume and that the City is not equipped to make those decisions at the local level.

Councilwoman Jones wanted more assurance that the plan is moving forward and that the remediation would be complete, given the unknowns in state government.

Mayor Worley asked what assurances are given by either the developer or the state that the process would in fact be completed. Mr. Childress said that once they enter into an agreement with the State, they are required to complete the process and meet those standards.

Vice-Mayor Bellamy suggested adding the words "and completed" to Condition No. 10 in terms of the remedial action plan being implemented.

Councilman Ellis asked what would be the damage to public health if the groundwater plume could not be remediated. Mr. Childress said there is no danger to the public health at this time. To have exposure you have to be in contact with that material and since it is underground, there is no reasonable expectation that anyone is going to be exposed. Even if it were left alone to naturally drop off in concentration until it was undetectable, which would happen, there would be no real public threat that he could see.

Councilman Peterson questioned Mr. Childress' comment that with this level of concentration, an approved remedial action plan could just require containment and monitoring and not that the contaminates be removed. Mr. Childress explained that that was an option and DENR may approve that, but that is not what the developer is proposing. It was his understanding that the developer is proposing an active treatment system to remove the contaminates and monitor the site until it is determined that to be true.

Councilman Peterson felt that if it's the developer's intent to have a remedial action plan to remove the contaminates and monitor the site, then the Condition No. 10 should be amended to state that and not just to approve a remedial action plan.

When Councilwoman Jones asked for vehicle trip comparisons, Ms. White presented her with the addendum to the TIA (Applicant's Exhibit 12).

The following individuals spoke in favor of the issuance of the conditional use permit based on the new information presented at this meeting. Other comments/concerns include, but are not limited to: there is a need to clean up this area; and technology to detect parts per million, billion, and trillion is moving ahead much faster than the ability to deal with and remove these products from our environment:

Mr. Fred English, resident in Haw Creek
Mr. Jim Jenkins, former Gerber Products Plant Manager

The following individuals spoke against the issuance of the conditional use permit based on the new information presented at this meeting. Other comments/concerns include, but are not limited to: we need to set ourselves about state standards, would like to see the environmental status of the entire area, there is contact between the water that contains the chemicals, the water surrounding the stream and the stream; if the Sayles building is removed, the area will be exposed to the rain and the chemicals will be flushed into the stream; Clean Water Fund of NC's experience in dealing with state and federal contaminated sites is that only implementation of a DENR approved remediation plan will not be sufficient to meet with City's goals of a safe and exemplary development project; it is necessary to have the groundwater remediation well underway before construction begins anywhere in the vicinity of the contaminated area and demonstrated to be completely capturing the plume of contamination; the site plans for any development in this area should include a clear overlay of the characterized plume before consideration of any final approval; oversight of construction and post-construction stormwater management will put a significant new burden on the City's local sedimentation program; fee structure for permitting should be adequate to fully recover the additional costs to the City and there must be a clear stipulation that local program's should be fully accountable for enforcing the City's stormwater and sediment and erosion regulations rather than providing compliance assistance or working with a developer who is in violation; increased risk is willing to be taken by discounting the amount of pollution we already have; standards need to be set that go beyond the state and federal requirements; we need to look at the pollutants from the parking lots; and two Planning & Zoning Commission members voted against the project regarding the traffic and the groundwater plume:

Ms. Corinne Kurzmann, resident on Sayles Road
Mr. Grant Millin, resident in Oteen
Mr. John Sticpewich
Mr. David Herbert, speaking on behalf of representing the Clean Water Fund of North Carolina
Ms. Elizabeth Allen (Note by City Clerk: This witness was not sworn in.)
Mr. Jeff Kelley
Ms. Hazel Fobes, resident in North Asheville

Ms. Lawrence suggested the following condition: "Complete diagrams overlaying the characterized plume showing depth of monitoring wells with planned construction of all buildings, parking lots, ditches and any other features that could interfere with the hydrology of the site or prevent an exposure risk to the public." Regarding the remediation plan, she said a letter received on June 24, 2002, from the Dept. of Environment and Natural Resources said that they are going to require a remediation plan "to be received by their office within 30 days of receipt of this letter." She asked if Council would allow testimony over what is going to be submitted since June 24 is one day away.

Mr. Matney responded to Ms. Lawrence by saying that DENR has revised the date for the remediation plan until August 30 and not June 25. Mr. Matney said that if this project is not developed, all the pollution will be moving slowly toward the river. If you have a commitment and agreement by the developer that they are going to what the state approves then we will be better off than we are now. He stressed that the developer is committed to doing a plan that the state approves and as soon as it gets started every step beyond that is a help to the environment and to the public. He felt Condition No. 10 as proposed by staff was sufficient.

Councilman Peterson wanted to make sure that the developer's plan that they submit to DENR is to remove the contaminates and not just contain them, cover them up and monitor the site. Mr. Matney said that he understands the word "remediation" is that you are doing something about it to make it less of an impact on the environment. He explained that Mr. Childress said that the state would approve a containment plan due to the level of what is there, but that is not what the developer is proposing. The developer is not asking for a containment plan, but asking for a remediation plan. It is the developer's intent to remediate the site by lessening the concentration to state standards. It is their desire to start the remediation before construction on the building but considering that monitoring may take two years they don't want to have to wait until the monitoring is over to be able to start. Councilman Peterson asked that that language be incorporated into Condition No. 10 so that the public is assured that there is going to be a clean-up and not just containment and a cap.

At 8:33 p.m., Mayor Worley closed the public comment period.

38

Upon inquiry of Councilman Dunn regarding Condition No. 8, Mr. Shuford presented Council with City Exhibit 18 which was a copy of an e-mail from Chris Gregory, Real Estate Manager from Wal-Mart Stores Inc., to Michael Patterson which stated "This email is to inform you that Wal-Mart has every intention to market our store on Tunnel Road and to either sell or lease it as quickly as possible. We have had considerable interest and look forward to marketing it. Please let me know if you have any other questions."

With regard to Condition No. 9, City Attorney Oast said that representatives of the developer suggested a slight change in wording to delete the words in the first sentence "by the wording of the easement".

Upon inquiry of Councilman Dunn regarding Condition No. 12, Mr. Matney said that they have to do fences in certain places but they cannot in other places due to impeding the river. If the fences are visible in places that they are required, they will be decorative.

Upon inquiry of Councilwoman Jones regarding Condition No. 10, Mr. Matney suggested Condition No. 10 be amended to include the following at the end of the first sentence "which requires reduction of the pollutant concentration to state groundwater remediation standards." He said that he had a problem with the word "completion" because it's really not completed until after the two year monitor period. He didn't think it was fair for the rest of the property to sit still for the 18 month period to remediate while they work on ¾ of an acre. He said they would like to be building at the same time on the other areas (like building the road) at the same time the remediation is occurring. Again, they are committing to a remediation plan, not just cap it and let it sit.

Councilman Peterson was concerned that once the current building is removed, water could leak into the groundwater and then further spread that site.

Mayor Worley asked if the developers would be willing to commit to a bond to assure completion of the remedial action. Mr. Matney said the problem would be establishing the amount of the bond but that his clients would want an agreement and not a bond.

Councilman Mumpower asked what the City's recourse would be if the developer said they would remediate the site (not just contain it) and then didn't do it. City Attorney Oast said that they would be in violation of the conditional use permit and the City would initiate revocation proceedings to revoke the permit, which could close the whole project down. Also, any one of the remedies under our Code are things we could implement – fines, seek an injunction, etc.

Councilman Mumpower moved to adopt Ordinance No. 2939 to issue the conditional use permit to allow for construction of 379,000 square feet of retail space for Phase 1 of the development, subject to the following conditions (which had input from all of Council):

1. All conditions identified by the Technical Review Committee shall be met.
2. No changes shall be made in the level of development intensity (Exhibit A) that will or may increase traffic on Swannanoa River Road unless further traffic mitigation measures are implemented. In addition, the applicant agrees to support a general transit service hub at the site and to participate in an effort to develop a specialized transit system for the site and surrounding area, including developer provision of a transit stop on the site, designing the interior of the site to accommodate transit vehicles, allowing transit vehicles to traverse the site, developer participation in a plan to create a specialized transit program, and developer commitment to any agreed upon funding mechanism, such as a special taxing district, necessary to maintain this system that may be implemented in the future. Finally, in order to ensure the viability of the River Ridge Shopping Center connection, the applicant shall escrow not less than $50,000 to be used for

improvements on the River Ridge site to upgrade the interior access "road" that will connect to the public street being constructed by the developer as part of the Phase II urban village project; the implementation of this upgrade project will require approval by the River Ridge Shopping Center owner and by the City of Asheville.

3. The applicant shall install or fund the recommended improvements indicated in the TIA, except those specifically not desired by the City Engineering Department. In addition, the applicant shall be responsible for the full cost of linking the new signal at Stevens Street with the other signals in the immediate vicinity in such manner as required by City staff. The applicant shall escrow not less than $65,000 for a traffic calming study and its implementation, with any unused funds to be returned to the applicant upon completion of the traffic-calming project.
4. The applicant shall work with the Asheville Transit Services Director to locate and construct a transit center on the site to serve as a transit node. The transit center shall be constructed at the developer's expense and shall be architecturally compatible with the development design.
5. The applicant shall work with the City Parks and Recreation Department to develop a plan acceptable to the City to convey the park area and greenway to the City of Asheville.
6. A signage package that complies with the City's sign code shall be submitted for review and approval prior to formal approval of this project.
7. The design of the urban village shall be modified in accordance with the standards for such developments as enumerated in the Urban Village zoning district; the applicant shall be able to construct the proposed number of residential units and the proposed square footage of the office space; additionally, the design of the urban village shall include a public street connection to River Ridge Shopping Center.
8. Within 90 days of the issuance of a certificate of occupancy for the Wal-Mart building, the Wal-Mart Corporation (or any individual, partnership or corporate entity acting on behalf of the Wal-Mart Corporation) shall terminate any leasehold of the existing Tunnel Road Wal-Mart building and property or, in the event the building and/or property is owned by the Wal-Mart Corporation, said corporation (or any individual, partnership or corporate entity acting on behalf of the Wal-Mart Corporation) shall place the building and/or property for sale or lease for commercial or other purposes allowed under the applicable zoning at fair market prices. The purpose of this condition is to ensure that the Tunnel Road building and/or property is not kept in a vacant state for an extended period of time.
9. Unless legally precluded, the access easement on the south side of the Swannanoa River running from the developer's property to Fairview Road shall be transferred to the City of Asheville for the purpose(s) of extending the Swannanoa River greenway and/or construction of the Riverside Parkway. The City shall have the ability to transfer this easement to the State of North Carolina or some other entity or entities for one or both of these purposes.
10. The applicant shall enter into an Administrative Agreement for State Directed Remedial Action with the Department of Environment and Natural Resources (NCDENR) which requires that the contaminant concentration will be reduced to State Groundwater Remediation Standards, and which shall require that there be no disturbance of the area over or near the plume as shall be required by NCDENR in the Administrative Agreement. The applicant shall submit and implement, after NCDENR approval, a remedial action plan for addressing on-site contamination consistent with the agreement and NCDENR policies and procedures. In addition development plans shall be designed and/or revised to accommodate future remedial action at the site.
11. The construction schedule for Phase I and Phase II shall be in general compliance with the schedule submitted by the applicant and included herein as Exhibit C.
12. All fencing visible from off the site or from parking or other public areas on the site shall be accomplished by using wrought iron or other similar decorative fencing. The applicant shall install landscaping consistent with a plan to be developed by working with staff in order to address the appearance issues associated with any extensive areas of fencing.

13. The public roads constructed as part of this project shall be designed and constructed to meet the applicable City of Asheville standards for such roads. At a minimum, each road cross sections shall contain two travel lanes and sidewalk. Road rights-of-way shall be appropriate for the road type based upon anticipated traffic volumes and shall be subject to approval by the City Engineer. Road designs shall be approved by the City Engineer prior to the issuance of any grading or building permits for any phase of the project, except as may be necessary for pollution remediation, and road construction shall be completed pursuant to those plans prior to the issuance of a Certificate of Occupancy for any building.

City Attorney Oast said that he understood Council's desire to have all necessary agreements, easements and permits in place for the road construction and he would incorporate that wording of Condition No. 13.

Vice-Mayor Bellamy asked City staff and the developer to look at the possibility of minimizing the 1839 parking spaces. Mr. Shuford explained that the developer is close to the maximum number of spaces, but he didn't know how many spaces would be reduced from removing the restaurant. Vice-Mayor Bellamy felt the developer might save money by not having to pour so much asphalt if they added more open and green space, which will also help with stormwater run-off. Councilwoman Jones agreed not only for helping with stormwater run-off but also with issues of air quality as a result of the number of cars.

Mr. Matney said that the parking spaces would be reduced because the restaurant is removed. However, he said that they have to have that number of parking spaces for their tenants. Currently, there is 21 acres of impervious acreage. When the project is complete, there will be approximately 29 acres of impervious acreage. Even though they are adding approximately eight more acres of impervious acreage, they are spreading it out over a much larger area.

Upon inquiry of Mayor Worley, Mr. Shuford said the developer is exceeding our stormwater requirements. He also pointed out that the developer is doing water quality treatment that is not required to be done at the current time.

With regard to reducing the number of parking spaces, Mr. Shuford said we are trying to get a transit component at this site and if you are going to be a participant in the shoppers loop you will probably park at the Wal-Mart site because that is where the grocery store is. It may make more sense to save the parking spaces at that location and look for ways to reduce in other areas.

As a result of the discussion to try to reduce parking spaces, it was the consensus of City Council to direct staff to undertake the following tasks: (1) Perform a zoning study for the River District to ascertain the geographical extent of future large-scale retail structures in the district; (2) Work toward making the Riverside Parkway the City's top priority on the Metropolitan Planning Organization Transportation Improvement Program; (3) Work with the applicant and a team of property owners from the surrounding area to determine the feasibility and desirability of developing a specialized transit system for the development site and surrounding area; and (4) Explore the option of reducing the amount of parking.

The motion made by Councilman Mumpower to adopt Ordinance No. 2939 to issue the conditional use permit to allow for construction of 379,000 square feet of retail space for Phase 1 of the development, subject to the above 13 conditions, was seconded by Vice-Mayor Bellamy and carried on a 6-1 vote, with Councilman Peterson voting "no."

City Attorney Oast said that he would bring the language of the Order back to Council on August 13, 2002, noting that no permits will be issued until Council adopts the Order.

ORDINANCE BOOK NO. 20 – PAGE 8

Councilman Mumpower moved to adopt Ordinance No. 2939 to rezone a portion of property located at 437 Swannanoa River Road, formerly Sayles Biltmore Bleacheries, from Commercial Industrial District to Urban Village District for Phase 2 of the development. This motion was seconded by Vice-Mayor Bellamy and carried on a 6-1 vote, with Councilman Peterson voting "no."

ORDINANCE BOOK NO. 20 – PAGE 20

V. NEW BUSINESS:

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of July 4-11, 2002: Annette Hammond (Police), BellSouth (Water), BellSouth (Water) and Martha Rice (Sanitation).

The following claims were received during July 12-18, 2002: Lance Mulvihill (Water), Susan Russell (Sanitation) and BellSouth (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

B. LAWSUIT

The City filed a lawsuit on July 12, 2002, against David N. Wright. The nature of the procedure is a complaint, injunction, order of abatement and collection of debt for removal of storage trailers located on Waynesville Avenue in the City of Asheville. This matter will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

COMMENTS REGARDING THE CONDITIONAL USE PERMIT FOR A WAL-MART SUPERCENTER

Ms. Corinne Kurzmann, Mr. Roger Gold and Ms. Hazel Fobes were dissatisfied with Council's decision regarding the Super Wal-Mart.

Mr. Fred English and Mr. Scott Osborne were pleased with Council's decision regarding the Super Wal-Mart.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 10:03 p.m.

Magdalen Burleson
CITY CLERK

Charles R Worley
MAYOR

Tuesday – July 30, 2002
East Asheville Community Center
906 Tunnel Road

7:05 p.m. – Community Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and Deputy City Clerk Phyllis Corns

Absent: Councilwoman Diana Hollis Jones

The following topics were raised by residents and addressed by City Council and City staff: trees along Crockett Avenue need trimming as they block visibility for drivers; the grounds of the apartment complex on Melton Drive need to be maintained, including picking up trash and debris; emptying more frequently the large dumpster near the Willow Creek complex; to improve traffic flow in the Haw Creek area, a new entrance into the area was recommended via the Chunns Cove Road area; East Hawthorne and Marlboro Drive need repaving; traffic concerns on Crockett Avenue in light of the recently approved Riverbend Marketplace development; synchronize traffic lights on South Tunnel Road; ongoing problems on Avon and Arco Roads with heavy traffic that includes tractor-trailers, motorcycles and speeding; litter problems and the need for "no littering" signs on Avon and Arco Road; missed collection of household trash and tossed trash cans on Beverly Road; Chris Pelly, President of the Haw Creek Community Association reviewed recent accomplishments and projects in the community including the newly created park, the Haw Creek Village development, and plans for improved pedestrian safety via sidewalks; requested support for future opportunities to preserve open spaces in Haw Creek; need for sidewalks and improved safety on Wood Avenue, including keeping cars at 40 Wood Avenue from parking on the street; need to bring more family-oriented entertainment to the area; encouraged development of the water front area; questions regarding annexation, the frequency of annexation and criteria used; concerns about adequate public comment being taken by Council during the Wal-Mart public hearings; need for affordable housing in the region and efforts made by the Chamber of Commerce and the City; questions were asked about the progress of the Water Authority contract renegotiations and non-betterment costs; additional concerns were expressed about pedestrian safety in the Haw Creek community and plans for sidewalks; a question was asked concerning the viability of opening the Bee Tree watershed area for recreation purposes; area water sources were discussed, as well as the long-range possibility of utilizing the French Broad River as a drinking water source; and the future of the Civic Center and potential revenue sources was discussed.

Mayor Worley adjourned the meeting at 8:15 p.m.

Magdalen Burleson
CITY CLERK

Charles R Worley
MAYOR

Tuesday – August 6, 2002 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

Mayor Worley proclaimed Sunday, August 11, 2002, as "Women's Equality Day" in the City of Asheville.

CONSENT:

Contract and Budget Amendment with the NC Dept. of Transportation for Reimbursement of a Technology Grant

Summary: The consideration of (1) a budget amendment incorporating N. C. Dept. of Transportation (NCDOT) funding for purchase of two computers with associated equipment and one telephone system compatible with the City system to be purchased by the Transit Services Department and (2) and accompanying resolution authorizing the Mayor to enter into an agreement with NCDOT.

The NCDOT requires an agreement between the City and the NCDOT for reimbursement of up to $37,800.00 for the purchase of two (2) computers and one (1) telephone system. The state will reimburse the City up to 90% ($37,800) of the total expended amount of $42,000. The local matching funds have been programmed in the Transit Services Departmental budget. Additionally, execution of this agreement will require an amendment to the City budget.

City staff recommends adoption of the resolution and the proposed budget amendment.

Contract for Traffic Calming

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with APAC, Inc., for installation of traffic calming measures on City of Asheville streets in the amount of $87,680.76.

In the 2000-01 budget, City Council appropriated $100,000 for traffic calming projects throughout the City. Of this $100,000 approximately $97,000 remains for the purpose of installing traffic calming and all the signs and marking associated with the traffic calming measures. The following projects were selected:

1. Florida Avenue/Dorchester Avenue (West Asheville)
2. Caribou Road/ Booker Avenue (South Asheville)
3. Gracelyn Road and Ottari Road (North Asheville)
4. South French Broad Avenue (Central Asheville)
5. Wyoming Road (Central Asheville)
6. Wood Avenue (East Asheville)

Staff was unable to get the needed signatures for Wood Avenue. Staff worked with the residents extensively to obtain these signatures but was unsuccessful.

Over the past year and a half we have worked with the residents of the other streets to develop traffic calming plans. Given that the project was estimated to cost less than $100,000, the City solicited bids from four contractors, which included, APAC, Inc , Asphalt Unlimited, Tarheel Paving, and Lonesome Mountain Paving for the work. Two bids were received with the lowest bidder being APAC at $87,680.76. The estimate performed by the Engineering staff was $66,203.94.

City staff requests that City Council approve a resolution authorizing the City Manager to enter into an agreement with APAC, Inc., for traffic calming in the amount of $87,680.76.

City Engineer Cathy Ball answered various questions from Council, some being, but are not limited to: are there other traffic calming projects being undertaken; is there any kind of breakdown on how much it costs the City to perform a traffic calming study; and, if there is a safety problem, does the City go through the traffic calming study or just take action.

Budget Amendment to Water 29 Fund (Water Bond Capital Improvements Fund)

Summary: This consideration of a budget amendment to the 29 Fund (Water Bond Capital Improvements Fund) to reflect reprogramming of funds to provide for an increase in NCDOT projects, an increase in Master Plan Improvements, and an increase in Annexation Projects.

Funds will be reprogrammed to increase funding for NCDOT Betterment, increase funding for new Annexation projects, and increase Master Plan Improvements. Most of these changes were approved as part of the FY 2002-2003 Water Fund Budget's Capital Improvements Program. Staff is proposing an $874,847 increase in NCDOT Non-Betterment projects. This is needed to provide additional funding for under budgeted projects and to set up funding for the first of three annual payments for Pisgah Highway Phase II and Sweeten Creek Phase II. Staff is also proposing a $13,030 increase in NCDOT Betterment (Brevard Road I-240 to I-40) and an increase of $275,000 for the Sand Hill Road Master Plan Project. These increases are needed because of under budgeting. Finally, an increase of $175,000 is needed for the new 2002 and 2003 Annexation Projects. All of the increases summarized above will be offset by deleting $832,370 in Building Safety Improvements and decreasing Critical Needs Improvements Phase II by $505,507.

Staff recommends approval of the amendment to the 29 Fund to reflect the changes identified above.

Budget Amendment to Water 35 Fund – Water Major Capital Improvements

Summary: The consideration of a budget amendment to the 35 Fund (Water Major Capital Improvements Fund) (1) to establish funding for a $115,000 Environmental Protection Agency (EPA) Grant for a Water Security Assessment; (2) to reduce Contributions From Other Funds – Future by $718,511 to reflect that the funding for Pisgah Highway Phase II and Sweeten Creek NCDOT projects will be provided in the 29 Fund; and (3) to reprogram funds to increase funding for FY 02/03 Distribution System Improvements, provide for a Contingency to fund FY 03/04 Distribution System Improvements, and to increase funding in several other projects that were under budgeted.

The Capital Project Ordinance will be amended as follows:

- It will be increased to reflect a $115,000 grant awarded to the Regional Water Authority (RWA) by the EPA on July 1, 2002. This grant will provide the funding necessary to provide a vulnerability assessment and related security improvements at the water treatment plants and distribution system facilities. The objective of this grant program is to reduce the vulnerabilities that large drinking water utilities present to a terrorist attack.

- Future NCDOT projects will be decreased by $718,511 because these projects will be funded with 2001 revenue bond proceeds in the 29 Fund. This includes the Pisgah Highway Phase II and Sweeten Creek Phase II NCDOT projects approved as part of the FY 2002-2003 Water Fund Budget's Capital Improvements Program.
- Funds will be reprogrammed to increase funding for FY 02/03 Distribution System Improvements, to provide for a Contingency to fund FY 03/04 Distribution System Improvements, and to increase funding in several other projects that were under-budgeted. These changes were approved as part of the FY 2002-2003 Water Fund Budget's Capital Improvements Program. Staff is proposing a reduction of $116,811 for Critical Needs Contracts Phase I, a reduction of $55,011 for FY 99/00 Distribution System Improvements, a reduction of $9,660 for Bee Tree Dam Renovations, a reduction of $14,252 for Annexation Blackberry Lane, a deletion of $83,863 for FY 98/99 Distribution System Improvements, a deletion of $1,150,000 for FY 01/02 Distribution System Improvements, an increase of $1,000,000 for FY 02/03 Distribution System Improvements, and an increase of $429,597 for Contingency for FY 03/04 Distribution System Improvements.

Staff recommends approval of the amendment to the 35 Fund to reflect the changes identified above.

School Crossing Guards Contract

Summary: The consideration of a resolution authorizing the City Manager to renew a contract with Bentley Security for school crossing guards.

The City of Asheville currently contracts with Bentley Retirements Inc., d/b/a Bentley Security to provide school crossing guards for students who attend Asheville City Schools. The total contract price is $80,233.20 and has not increased from the previous contract period.

Asheville City Schools require the services of school crossing guards at 23 locations to insure the safety of students who must cross the street on their way to school. The work performed requires the presence of the crossing guards for approximately 2 hours each school day (180 days per year). The proposed contract period of (2) years remains unchanged. The minority business office has reviewed the list of available service providers and recommends the City of Asheville renew the contract with the current service provider.

City staff recommends City Council authorize the City Manager to renew a contract with Bentley Security in the amount of $80,233.20.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

ASHEVILLE-BUNCOMBE VISION DIALOGUES

Mr. Joe McGuire invited City Council to participate in the 2002 VISION Community Dialogues and explained that the goal of Asheville-Buncombe VISION Inc. is (1) to encourage discussion among diverse residents in order to promote understanding of how local issues affect different segments of our community and (2) to encourage citizens to collaborate on efforts that benefit the whole community. This year's topic, "For Community Health", will focus on how we can respond to the health needs of our county.

REPORT FROM CITIZEN STUDY COMMITTEE ON CAMPAIGN FINANCE REFORM

Ms. Wanda Adams, Chair of the Citizen Study Committee on Campaign Finance Reform, introduced present Committee members Lou Bissette, Rod Whiteside, Max Haner and Marie Colton. She said that unfortunately this subject was very complicated and it took them four meetings to arrive at this point. Regardless of the reasons, their meetings were not fully attended by all of the committee members. This is not a unanimous recommendation, however, it was approved by a majority of the seven-committee members that were appointed by the City Council. She then presented City Council with the final report containing recommendations by the Campaign Finance Changes Study Committee. She also submitted to Council all of the relevant research material.

Perceived Campaign Problems in Municipal Elections:

The amount of money needed to run a winning campaign is beyond the reach of the average citizen. It is very difficult to raise $20,000 to $100,000 without personal wealth, well-connected friends or incurring a debt that is almost impossible to retire.

The amount of money spent on winning campaigns has exceeded what appears to be reasonable. It appears unnerving that individuals have to spend upwards of $50,000 to get elected to a position that pays less than $15,000 a year.

The number of less-than-serious candidates crowds the field and makes it more difficult for committed candidates (who don't have access to tens of thousands of dollars) to rise to the top.

The amount of money candidates spend isn't always disclosed prior to the election.

The City should make an attempt to provide incentives and/or expense reimbursements in an effort to reduce campaign costs. It is the recommendation of the Committee that the City establish a non-profit corporation to facilitate the election process. The corporation should focus on establishing policies/guidelines, locating funding sources and pursuing legislation, if necessary.

Possible campaign finance changes for the non-profit corporation's consideration or for City Council's consideration include, but are not limited to, the following:

(1) The City should make its print facilities available to candidates.

(2) The City should partially finance local campaigns with a public fund.

(3) Residents who are concerned about the escalating costs of local campaigns could contribute to a public fund to be accessed by candidates. The contributions would be made through a voluntary or mandatory donation included in monthly water bill.

(4) Send mailings with information submitted by all candidates.

(The recommendations listed above are designed to help lessen the financial burden of campaigning.)

(5) The City should increase the filing fee to $100 for candidates.

(The fifth recommendation is designed to help weed-out the less-than-serious candidates who may not find it appealing to pay a $100 filing fee if they aren't planning to actively campaign for office.)

(6) The City should establish spending limits for candidates. The limit should be in the range of $15,000 to $30,00 for council candidates and $25,000 to $40,000 for mayoral candidates.

(The sixth recommendation is designed to set a more realistic goal for campaign spending.)

(7) Use of the Public Access Channel for candidate forums.

(8) Allow a non-profit group to sponsor a candidate forum on the Government Channel.

(9) Work with local media, especially television news, to give more and better coverage of forums, etc.

(The three previous recommendations are designed to give all candidates equal exposure to the electorate.)

(10) Petition the State legislature to correct the loophole in the law that is clearly a drafting error with the legislation requiring campaign reports for municipal elections. The law should read that campaigns are required to file a report a week or 10 days before the Primary election and a second report a week or 10 days before the General election. By mistake, the law says file a report before the Primary – or – before the General.

(11) Obtain a local act authorizing any ordinance that affects elections or campaigns.

Councilman Mumpower asked if the Committee had enough time to develop their final report since Council only allotted them 120 days. Ms. Adams felt that they did have enough time in that the issue is so complex they could work on it for two years and still have disagreements, other avenues to search, etc. and chances are they would still come up with the basic recommendation which is to establish a non-profit corporation to facilitate the election process.

Mr. Lou Bissette said that the Committee dealt with some very difficult issues and that government has to be very careful on the restrictions and the amount of tampering they do regarding the election process. He wanted to express the following minority view comments on behalf of himself and Kent Wolff (also member of the Committee): (1) he felt there number of constitutional issues that relate to report that need to be considered; (2) agreed with recommendations 5, 7, 8, 9 and 10; (3) unsure about the purpose of the non-profit corporation since we have a State Board of Elections to oversee the election process; (4) concern about using public funds to finance campaigns; (5) concern over using City print shop facilities available to candidates; (6) concern about mandatory donations in the monthly water bills; and (7) concern over spending limits. He felt that when you start limiting what candidates can do to get elected, you actually protect the incumbents. He explained that incumbents have name recognition and someone trying to get elected has to spend more money to get their name out and to get elected.

Upon inquiry of Councilman Mumpower, City Attorney Oast said that City Council instructed him to give minimal assistance to the Committee. He did not spend a lot of time investigating the constitutionality of some of the recommendations. He said that one purpose of the report is to seek Council direction on where to go from here. Depending on that direction,

48

then his involvement would be more significant. He would be happy to do whatever research City Council directed him to do.

Councilman Dunn did not want to use public funds in anyway and felt that some of the recommendations were a little unrealistic.

Councilwoman Jones felt that some of the recommendations were good first steps to start restoring public trust. She was concerned about the people who aren't going to the polls because they feel the system is tainted and they just don't want to participate. She felt the recommendations by the Committee are good places to begin.

Councilman Mumpower suggested that instead of wrestling over specific content of the report, that a healthy way in which to move forward might be to refer the report back to the City Council Subcommittee on Campaign Finance Changes (Councilman Peterson, Vice-Mayor Bellamy and Councilman Mumpower) to review the recommendations and report back to City Council with their recommendations. Or, he suggested the City Attorney review the report for constitutional issues first.

Mr. Rod Whiteside reiterated Ms. Adams comments in that the recommendations are a product of the committee members who were at the meeting. He asked Council to review the recommendations and if necessary, give them further direction.

Upon inquiry of Councilman Mumpower, Ms. Adams said that if Council chooses to give the Committee more direction, with a timeframe in mind, she felt the Committee would be amenable to continue their work on this issue.

Mr. Max Haner concurred in the Committee's recommendation in that the City should establish a non-profit corporation.

When Councilman Dunn asked if the Committee researched other issues regarding the election process, Councilman Peterson said that the Council's consensus was that this Committee only be asked to work on campaign finance reform.

Councilman Peterson said that the report contains a lot of good ideas and gives Council some good direction. He felt now was the time for City Council to decide what direction they wish to take. If there is support of Council, then Council can ask the Committee if they will continue to serve and develop details on how some of the recommendations can be achieved. If there is not Council support, then we don't need to ask the Committee to waste time. He felt it might be appropriate for the Council Subcommittee to review this report and give their recommendation to Council at a worksession in about 2-4 weeks. He felt the goals are (1) to restore confidence in the system; and (2) help inform the voters.

Ms. Marie Colton felt that this is a very difficult subject, which contains varying opinions. She agreed with the basic recommendation to establish a non-profit corporation.

Mayor Worley felt the root for the high cost of spending was the cost of media. As things progress with technology, there may be innovative ways to get the message out without spending money on media.

It was the consensus of City Council to refer the report to the City Council Subcommittee to review and report back to Council with their recommendations in 2-4 weeks. Once City Council has the Subcommittee's report, then direction, if appropriate, can be given to the Citizen Study Committee to assist Council and/or ask the City Attorney to research specific items.

49

All of Council thanked the Committee members for their diligent and hard work on this very difficult issue.

AMENDMENT TO 2002 CONSOLIDATED COMMUNITY DEVELOPMENT BLOCK GRANT & HOME ACTION PLAN

Community Development Director Charlotte Caplan said that this is the consideration of amendments to the 2002 Consolidated Community Development Block Grant (CDBG) and HOME Action Plan.

Council originally approved the 2002 Action Plan for CDBG and HOME funding on April 23, 2002. Since then, some additional CDBG funds have become available from program income or programs completed under budget, and a request has been received for a significant change to a HOME-assisted program. The following changes are now recommended:

A. CDBG AMENDMENTS

Unallocated CDBG funds currently total $249,018 as follows:

Funds returned from NHS Montford Gateway Loan Guarantee (project completed)	$ 44,045
Additional program income anticipated from sale of Biltmore Avenue property	70,000
Contingency	86,575
Program income recd. in 2001-02 and not yet allocated	48,398
Total available	$249,018

The recommended allocations are:

1. Woodfin Apartments **New CDBG allocation: $89,250**
The Housing Authority of the City of Asheville has re-submitted its request for CDBG assistance for acquisition and renovation of the 19-unit Woodfin Apartment, located in downtown Asheville, reducing the amount requested from $250,932 to $89,250. The Housing & Community Development (HCD) Committee recommends this grant on the grounds that the need for the project remains very high and that the amount requested is now within the funds available.

2. Code Enforcement Demolitions **New CDBG allocation: $41,370**
The general fund appropriation for demolitions was eliminated from the 2003 City Budget. The removal of certain vacant, dilapidated structures that are a blight on surrounding property is both CDBG-eligible and desirable for the achievement of Consolidated Plan goals. The HCD Committee recommends an allocation of $41,370, which is sufficient to demolish about eight structures.

3. Hillcrest Enrichment Program **Increase CDBG allocation by: $5,000**
Funding constraints led to a reduction in the grant allocated for this Housing Authority youth program from $50,000 in 2001-02 to $45,000 in 2002-03. The HCD Committee now recommends restoring the grant to its former level.

4. CDBG Administration **Increase CDBG allocation by: $29,065**
As part of the 2003 interim City Budget, Council has approved the transfer of one filled position within the Planning & Development Department from general funding to CDBG/HOME funding. The transferred staff person will work exclusively on CDBG- and HOME-eligible administrative and planning work. Staff estimates that the cost will be $48,441 this year, to be funded 60% from CDBG and 40% from HOME (see below).

5. Contingency $84,333

Funds will be retained for urgent needs, unforeseen cost overruns, or shortfalls in anticipated program income during the year. If not needed, these funds will be available for the 2003-04 funding cycle.

B. HOME AMENDMENTS

1. HOME Administration

The cost to the HOME program of the transferred staff position will be $19,376. The Asheville Regional Housing Consortium Board recommends that this be covered by reducing Member Government Administration and increasing City of Asheville HOME Program Administration by the same amount. The total amount allocated for HOME administration will remain unchanged at 10% of the HOME budget.

2. Change of Location for Henderson County Habitat Affordable Housing Project

Henderson County Habitat for Humanity was awarded $50,000 in 2002 HOME funds, through Henderson County, to purchase land for 10 new single-family homes at the Village of King Creek on Spartanburg Highway in Hendersonville. The agency has now asked to use these funds instead to purchase land on Stepp Road in the Clear Creek district of Henderson County. Habitat will go ahead with the Village at King Creek project using a different source of funds. A separate public hearing on this item was held in Hendersonville on July 24, 2002, and both the Henderson County Board of Commissioners and the Asheville Regional Housing Consortium Board recommend approval.

Staff recommends approval of the amended Action Plan.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda for a public hearing.

MISCELLANEOUS

Upon inquiry of Councilwoman Jones, City Manager Westbrook said that he is working on a mentoring policy of how the City can be actively involved in an educational initiative of City employees being mentors to our school children.

Upon inquiry of Councilwoman Jones, City Manager Westbrook said that he is in the process of preparing information for City Council approval on orientating potential city council candidates.

CLOSED SESSION

At 4:47 p.m., Councilman Mumpower moved to go into closed session for the following reasons: (1) to discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations – G.S. 154-381.11 (a) (4); and (2) to establish or to instruct the City's staff concerning the position to be taken by or on behalf of the public body in negotiating the price of other material terms of a contract for the acquisition of real property – G.S. 143-318.11 (a) (5). This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

At 5:23 p.m., Councilwoman Jones moved to come out of closed session. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 5:23 p.m.

Magdalena Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – August 13, 2002 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Councilman James E. Ellis

INVOCATION

Vice-Mayor Bellamy gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING AUGUST 17, 2002, AS "TOGETHER WE READ ... THE FRENCH BROAD DAY"

Mayor Worley read the proclamation proclaiming August 17, 2002, as "Together We Read ... The French Broad Day" in the City of Asheville. He presented the proclamation to Mr. Rob Neufeld who briefed City Council on some activities taking place during the day.

B. PRESENTATION BY ASHEVILLE VELODROME GROUP

Mr. Chris Kamm thanked City Council for the beautiful French Broad River Park. The diverse facilities are a real asset to not only cyclists, but the community as a whole.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JULY 23, 2002; COMMUNITY MEETING HELD ON JULY 30, 2002; AND THE WORKSESSION HELD ON AUGUST 6, 2002

B. ORDINANCE NO. 2941 - BUDGET AMENDMENT FOR REIMBURSEMENT BY THE N.C. DEPT. OF TRANSPORTATION OF A TECHNOLOGY GRANT

Summary: The consideration of (1) a budget amendment incorporating N. C. Dept. of Transportation (NCDOT) funding for purchase of two computers with associated equipment and one telephone system compatible with the City system to be purchased by the Transit Services Department and (2) and accompanying resolution authorizing the Mayor to enter into an agreement with NCDOT.

The NCDOT requires an agreement between the City and the NCDOT for reimbursement of up to $37,800.00 for the purchase of two (2) computers and one (1) telephone system. The state will reimburse the City up to 90% ($37,800) of the total expended amount of $42,000. The local matching funds have been programmed in the Transit Services Departmental budget. Additionally, execution of this agreement will require an amendment to the City budget.

City staff recommends adoption of the resolution and the proposed budget amendment.

ORDINANCE BOOK NO. 20 – PAGE 22

C. **RESOLUTION NO. 02-126 - RESOLUTION AUTHORIZING THE CITY TO ENTER INTO A CONTRACT WITH THE N.C. DEPT. OF TRANSPORTATION FOR REIMBURSEMENT OF A TECHNOLOGY GRANT**

See Consent Agenda Item "C" above.

RESOLUTION BOOK NO. 27 – PAGE 216

D. **RESOLUTION NO. 02-127 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH APAC INC. TO INSTALL TRAFFIC CALMING DEVICES ON VARIOUS CITY STREETS**

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with APAC, Inc., for installation of traffic calming measures on City of Asheville streets in the amount of $87,680.76.

In the 2000-01 budget, City Council appropriated $100,000 for traffic calming projects throughout the City. Of this $100,000 approximately $97,000 remains for the purpose of installing traffic calming and all the signs and marking associated with the traffic calming measures. The following projects were selected:

1. Florida Avenue/Dorchester Avenue (West Asheville)
2. Caribou Road/ Booker Avenue (South Asheville)
3. Gracelyn Road and Ottari Road (North Asheville)
4. South French Broad Avenue (Central Asheville)
5. Wyoming Road (Central Asheville)
6. Wood Avenue (East Asheville)

Staff was unable to get the needed signatures for Wood Avenue. Staff worked with the residents extensively to obtain these signatures but was unsuccessful.

Over the past year and a half we have worked with the residents of the other streets to develop traffic calming plans. Given that the project was estimated to cost less than $100,000, the City solicited bids from four contractors, which included, APAC, Inc., Asphalt Unlimited, Tarheel Paving, and Lonesome Mountain Paving for the work. Two bids were received with the lowest bidder being APAC at $87,680.76. The estimate performed by the Engineering staff was $66,203.94.

City staff requests that City Council approve a resolution authorizing the City Manager to enter into an agreement with APAC, Inc., for traffic calming in the amount of $87,680.76.

City Engineer Cathy Ball answered various questions from Council, some being, but are not limited to: are there other traffic calming projects being undertaken; is there any kind of breakdown on how much it costs the City to perform a traffic calming study; and, if there is a safety problem, does the City go through the traffic calming study or just take action.

RESOLUTION BOOK NO. 27 – PAGE 217

E. **ORDINANCE NO. 2942 - ORDINANCE AMENDING THE WATER BOND CAPITAL IMPROVEMENTS FUND (29 FUND)**

Summary: This consideration of a budget amendment to the 29 Fund (Water Bond Capital Improvements Fund) to reflect reprogramming of funds to provide for an increase in

NCDOT projects, an increase in Master Plan Improvements, and an increase in Annexation Projects.

Funds will be reprogrammed to increase funding for NCDOT Betterment, increase funding for new Annexation projects, and increase Master Plan Improvements. Most of these changes were approved as part of the FY 2002-2003 Water Fund Budget's Capital Improvements Program. Staff is proposing an $874,847 increase in NCDOT Non-Betterment projects. This is needed to provide additional funding for under budgeted projects and to set up funding for the first of three annual payments for Pisgah Highway Phase II and Sweeten Creek Phase II. Staff is also proposing a $13,030 increase in NCDOT Betterment (Brevard Road I-240 to I-40) and an increase of $275,000 for the Sand Hill Road Master Plan Project. These increases are needed because of under budgeting. Finally, an increase of $175,000 is needed for the new 2002 and 2003 Annexation Projects. All of the increases summarized above will be offset by deleting $832,370 in Building Safety Improvements and decreasing Critical Needs Improvements Phase II by $505,507.

Staff recommends approval of the amendment to the 29 Fund to reflect the changes identified above.

ORDINANCE BOOK NO. 20 – PAGE 24

F. RESOLUTION NO. 02-128 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH BENTLEY SECURITY INC. FOR SCHOOL CROSSING GUARDS

Summary: The consideration of a resolution authorizing the City Manager to renew a contract with Bentley Security for school crossing guards.

The City of Asheville currently contracts with Bentley Retirements Inc., d/b/a Bentley Security to provide school crossing guards for students who attend Asheville City Schools. The total contract price is $80,233.20 and has not increased from the previous contract period.

Asheville City Schools require the services of school crossing guards at 23 locations to insure the safety of students who must cross the street on their way to school. The work performed requires the presence of the crossing guards for approximately 2 hours each school day (180 days per year). The proposed contract period of (2) years remains unchanged. The minority business office has reviewed the list of available service providers and recommends the City of Asheville renew the contract with the current service provider.

City staff recommends City Council authorize the City Manager to renew a contract with Bentley Security in the amount of $80,233.20.

RESOLUTION BOOK NO. 27 – PAGE 222

G. ORDINANCE NO. 2943 - ORDINANCE AMENDING THE WATER MAJOR CAPITAL IMPROVEMENTS FUND (35 FUND)

Summary: The consideration of a budget amendment to the 35 Fund (Water Major Capital Improvements Fund) (1) to establish funding for a $115,000 Environmental Protection Agency (EPA) Grant for a Water Security Assessment; (2) to reduce Contributions From Other Funds – Future by $718,511 to reflect that the funding for Pisgah Highway Phase II and Sweeten Creek NCDOT projects will be provided in the 29 Fund; and (3) to reprogram funds to increase funding for FY 02/03 Distribution System Improvements, provide for a Contingency to fund FY

03/04 Distribution System Improvements, and to increase funding in several other projects that were under budgeted.

The Capital Project Ordinance will be amended as follows:

- It will be increased to reflect a $115,000 grant awarded to the Regional Water Authority (RWA) by the EPA on July 1, 2002. This grant will provide the funding necessary to provide a vulnerability assessment and related security improvements at the water treatment plants and distribution system facilities. The objective of this grant program is to reduce the vulnerabilities that large drinking water utilities present to a terrorist attack.
- Future NCDOT projects will be decreased by $718,511 because these projects will be funded with 2001 revenue bond proceeds in the 29 Fund. This includes the Pisgah Highway Phase II and Sweeten Creek Phase II NCDOT projects approved as part of the FY 2002-2003 Water Fund Budget's Capital Improvements Program.
- Funds will be reprogrammed to increase funding for FY 02/03 Distribution System Improvements, to provide for a Contingency to fund FY 03/04 Distribution System Improvements, and to increase funding in several other projects that were under-budgeted. These changes were approved as part of the FY 2002-2003 Water Fund Budget's Capital Improvements Program. Staff is proposing a reduction of $116,811 for Critical Needs Contracts Phase I, a reduction of $55,011 for FY 99/00 Distribution System Improvements, a reduction of $9,660 for Bee Tree Dam Renovations, a reduction of $14,252 for Annexation Blackberry Lane, a deletion of $83,863 for FY 98/99 Distribution System Improvements, a deletion of $1,150,000 for FY 01/02 Distribution System Improvements, an increase of $1,000,000 for FY 02/03 Distribution System Improvements, and an increase of $429,597 for Contingency for FY 03/04 Distribution System Improvements.

Staff recommends approval of the amendment to the 35 Fund to reflect the changes identified above.

ORDINANCE BOOK NO. 20 - PAGE 28

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilman Peterson moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF 200 BROOKLYN ROAD/APPLEDORN CONDOMINIUMS FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL USE, AND ISSUANCE OF A CONDITIONAL USE PERMIT TO ALLOW FOR A PROPOSED 168 UNIT CONDOMINIUM

ORDINANCE NO. 2944 - ORDINANCE TO CONSIDER THE CONDITIONAL USE ZONING OF 200 BROOKLYN ROAD/APPLEDORN CONDOMINIUMS FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL USE

ORDINANCE NO. 2945 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT TO ALLOW FOR A PROPOSED 168 UNIT CONDOMINIUM AT 200 BROOKLYN ROAD/APPLEDORN CONDOMINIUMS

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:17 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Planning & Development Direct Scott Shuford said that this is a very significant project. It will essentially double the density of the underlying zoning. It's important to realize that in-fill projects like this require that type of higher density, generally, to make them affordable. That is probably the very reason why this applicant can make this project an affordable project without the infusion of any public money. It's also equally important to understand that the impacts of this project need to be addressed. In this particular case, staff feels that traffic impacts are the primary concerns. The Shiloh neighborhood is in need of traffic calming and intersection improvements. We are proposing a condition that will enable the traffic impacts of the development to be mitigated and that mitigation will occur through a plan that will be developed in concert with the neighborhood with the developer funding. These improvements will eventually benefit both the residents of the neighborhood and the residents of the Appledorn Condominiums. We have a strong record of support for the Shiloh neighborhood and in the past we have (1) made recommendations to Council for denial of a commercial parking lot on Shiloh Road; (2) we opposed an adaptive re-use office project on Caribou Road; (3) we have worked with the neighborhood to resolve a concern about some zoning along Sweeten Creek Road that involved a commercial industrial site; and (4) we're going to be recommending that a small area plan be developed for the neighborhood in the near future. Our support needs to be taken in that context. A valid protest petition has been filed. He showed (City Exhibit 1) how the protest petition was valid due to the signature of residents in Wilson Creek Subdivision. He then noted that Wilson Creek Subdivision, which is also an affordable housing development, received opposition when it was approved. Council will hear specific concerns about traffic, water and sewer, infrastructure, electric utility service, stormwater management and similar issues, but we believe these technical concerns are addressed either in our underlying code requirements or in the specific conditions staff is proposing as part of the recommendation. City staff is recommending approval of this project because (1) they feel the negative impacts can be mitigated; (2) neighborhood traffic conditions will actually be improved; and (3) this project provides significant and substantial promotion of our goal of providing affordable housing in the city.

City Attorney Oast explained that a valid protest petition has been filed with respect to the rezoning portion of this request. The law requires that in the case of a valid protest petition, the rezoning can only pass by favorable vote of ¾ of the entire Council. Since Councilman Ellis is absent does not affect the number of votes required to pass. Therefore, in this case, it will require all six Council members to vote in favor of the rezoning in order for it to pass.

Mr. Alan Glines, Urban Designer, submitted into the record City Exhibit 2 (Affidavit of Publication), City Exhibit 3 (Certification of Mailing of Notice to Property Owners); and City Exhibit 4 (Staff Report).

Mr. Glines said that this is the consideration of a request to rezone property located on 200 Brooklyn Road from RS-8 Residential Single-Family High Density District to RM-16 Residential Multi-Family High Density District/Conditional Use and of a motion to issue a Conditional Use Permit for a proposed 168 unit condominium.

Mr. Glines said that on May 31, 2002, Rod Hubbard submitted an application for conditional use zoning from RS-8 to RM-16 for an 11.43 acre tract in the Shiloh neighborhood (City Exhibit 5). The property is addressed as 200 Brooklyn Road and is north of West Chapel Road. The plan includes constructing 168 residential condominiums, which will be priced within City affordable housing guidelines.

The surrounding area is zoned RS-8 including this parcel. The RS-8 single-family residential district allows up to 8 single-family units an acre. Under the current zoning, up to 91 single-family units could be constructed on the site given the acreage. Likely though, some number less than that could be built since some of the land would be given over for infrastructure improvements like roads, utility easements etc. With the current rezoning request the applicant is seeking approval of 168 units with a density yield of 14.7 units per acre.

The development consists of seven, three story buildings each housing 24 condominiums (168 units total). Currently the site is undeveloped except for a few small structures that supported the nursery business that operated on the property. The site (City Exhibit 6) also contains an internal parcel that is home to the Faith Tabernacle Christian Church. Under the proposed plan, the church will share an entrance driveway with the development on Brooklyn Road.

A traffic impact analysis was required of the applicant. Under the proposed plan, 984 vehicle trips are estimated to be generated per day with the peak hour generating 91 trips in the evening. The Technical Review Committee (TRC) of the City requested a traffic impact analysis (TIA) be completed even though the peak hour does not meet our threshold of 100 trips. The issues of the narrow roads in the area and additional traffic needed to be reviewed and may be mitigated by incorporating traffic calming measures and intersection improvements. Staff is proposing that the developer contribute some funds toward neighborhood traffic improvements to mitigate the anticipated impact of this amount of new traffic.

The project will be required to provide almost 2 acres of open space. On the plans submitted, ample open space is reserved for use by residents. Staff feels that, in addition, a children's playground should be provided as part of the development to meet the recreational needs of the condominium residents.

The TRC reviewed this project at their June 17, 2002, meeting and recommended that the project be forwarded to the Planning and Zoning Commission and City Council with a recommendation of approval with conditions.

At its July 10, 2002, meeting, the Planning and Zoning Commission recommended approval of the request by a 7-0 vote, subject to the following conditions. Planning and Development staff concurs with this recommendation.

1. Final landscape plans will be fully reviewed for shrub and tree counts (buffer plantings and parking lot plantings included), which should include existing plant material that will be credited towards the planting requirements.
2. Setback dimensions for the buildings for side and rear property lines need to be a minimum of 40 feet. In addition, a "C" buffer which (25' wide as per Article 11 of the Code) is needed on all property lines except the property line with Brooklyn Road.
3. The existing vegetative buffers along the perimeter of the parcel should also be preserved and will help to minimize the impact of the development on adjoining properties; there shall be no grading in any setback areas, except at vehicle access points.
4. The developer shall provide an internal sidewalk system and connections to Brooklyn Road and Caribou Road; this system shall include crosswalk striping where it crosses internal driveways.
5. To mitigate negative traffic impacts from the development, the developer shall provide up to $500 per unit for neighborhood traffic calming and intersection improvements to implement plans to be developed by the City in working with the neighborhood; these monies shall be escrowed by the developer prior to the issuance of the initial building permit for any of the condominium buildings and any remainder shall be refunded to the developer at either the completion of the traffic calming and intersection improvement project or three years from the date of escrow, whichever occurs first.
6. The plans must be revised to provide a detail of the intersection of the condominium project with Brooklyn Road, including a 20-foot turning radii.
7. The developer shall provide street lighting.
8. The developer shall work with staff to determine in a reduced number of parking spaces can be accommodated.
9. Open spaces need to be suitable for recreation - particularly for children. Recreation and play areas shall be expanded to include a playground for children.
10. Each unit shall be occupied by the owner or owners thereof, and may not be rented or leased by the owner except as necessary to accommodate transitory situations. "Transitory situations" means a set of circumstances or conditions that are temporary in duration, usually for 18 months or less. By way of illustration and not limitation, such transitory situations may include temporary work assignments, divorce or separation, sickness, or extended travel. This condition shall not be construed to prohibit interfamilial rental arrangements, or a tenancy resulting from court order in a domestic matter. In the case of units acquired through foreclosure or other involuntary or distress-induced conveyance, the period of occupancy by a non-owner shall not exceed 18 months.
11. All units in this project shall have an initial purchase price that meets the City of Asheville housing affordability guidelines.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2 (c)). Staff's preliminary review, absent the benefit of public input, indicates that all seven standards are met provided certain impacts are mitigated through site design modifications and off site road improvements.

1) That the proposed use or development of the land will not materially endanger the public health or safety.

The development is within standards of development practice set forth by the City of Asheville.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

The 11.43 acre site is gently rolling from Brooklyn Road to the back of the property. The site has significant existing natural vegetation. The buildings have been sited to preserve many of the significant trees. Preserving the existing vegetation around the periphery, along with the natural topography of the site, will serve to buffer neighboring properties.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

The properties are proposed to be condominium units offered for sale. These residential units represent homeownership opportunities for members of the community and are not expected to injure property values of adjoining or abutting properties. The developer has indicated a willingness to accept an ownership condition that will preclude this development from becoming a rental project.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

The surrounding properties are made up of single-family units occupying one-quarter acre and larger lots. This development, which places 24 condominium units per building in seven buildings, appears to have greater scale, bulk and coverage than the surrounding neighborhood. However, by preserving and adding to the natural vegetation along the edges of the property the developer will mitigate any adverse impacts on surrounding properties, making this development be in harmony with the surrounding neighborhood.

5) That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

This proposed development supports the smart growth policies of affordable in-fill housing and adaptive reuse of a former commercial property. The developer has indicated a willingness to accept a condition limiting the initial purchase price for the units within the development.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

This proposed development is located near transportation facilities and other utilities appear adequate. The project area is centrally located near major road facilities, interstate connections and near the bus transit line that serves Shiloh. In addition, the Asheville Transit System may be able to modify the Route 8 bus service to go by this property. Preliminary review by other utility providers has not revealed any problems for serving the development.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The proposed development will substantially increase the number of cars operating on Brooklyn Road. While the road is not above its ability to handle the additional traffic, the roads in Shiloh are typically quite narrow in width with limited sight distances. Traffic calming measures and intersection improvements are necessary to mitigate the impact of this development from a traffic standpoint. Staff recommends a condition be placed on the development that provides up to $500 per unit for making those improvements that are determined by the City, in working with the neighborhood, to mitigate traffic safety and operational impacts of the development.

Upon inquiry of Councilman Peterson, Mr. Glines explained the setback requirements along the property and the landscape buffering that will be required. He noted that the site was formerly a nursery and there is a lot of significant plant material that will be stored and reused as part of this buffering.

Councilman Peterson asked if City staff has already identified the particular intersections for improvements. Mr. Shuford said that staff is planning to work with the neighborhood to determine exactly what are the most problematic intersections, as well as where traffic calming problems already exist.

Mr. Rod Hubbard, representing C&R Project Development, LLC, explained how the property has been in his wife's family for a number of years and how he restored the Kress Building in downtown Asheville. He showed pictures of the property (Applicant Exhibits 1, 2 and 3), which showed the height of the trees being 80-120 feet high. His intention is not to remove any of the trees because the property has a natural buffer. When he purchased the land, he promised the Appledorns that he would not cut down any major trees and if he was to develop it, was to leave all of the boundary trees and all of the major vegetation. He said they have had a tree survey done on the entire property and he guaranteed City Council that not one major tree will be removed from the property unless it was diseased. Since the community is important, especially with a development of this size, he met with Mrs. Baynes and a delegation of Shiloh residents at the Shiloh Community Center to explain his development. He also invited Mrs. Baynes and others to join him on the property so he could show them how the buildings would be set. Unfortunately, due to vacations and scheduling conflicts, that was not possible. Using City Exhibit 6, he showed how the Faith Tabernacle Church is in the middle of the development. He met with the Church on numerous occasions and explained his development. He responded to their concerns. He said this is an affordable housing development – not a low-income project. He plans to be able to produce one, two and three bedroom condominiums, starting off at $69,900. All 168 units will be priced under $100,000. The one bedrooms will be approximately 800 square feet and each unit will have its own independent balcony. There are 3.5 acres of open space. There will be walkways, trails and two designated play areas for the children. It will be a safe community. The buildings will be located in a way that doesn't affect the tree line buffer and doesn't affect the vegetation and trees. He is guaranteeing to City Council the specimen trees will remain on the property. He guaranteed that there would be no plastic sidings on the buildings. The dressed exterior will be rock, brick or stone with iron for the balconies and that the exterior will be aesthetically pleasing. The TRC said that everything could accommodate the additional 168 units. The Planning and Zoning Commission voted unanimously to approve the project. Since traffic was an issue, they had a TIA performed. Even though the study says we need to bring in some traffic calming issues, there were no major significant problems in the area. He explained how he tried to answer the concerns of the neighborhood. He said that the density is needed to be able to sell affordable housing units. One reason he is proposing this development is to help the community with affordable housing. All of the units will be owner-occupied. He will have condominium documents drawn that says people cannot purchase the units to rent. He had a market research study performed which stated, "Asheville has by some measures the least affordable housing in North Carolina. Asheville ranks lowest in the state and 144th out of 184 cities nationwide for home ownership affordability ...." He believed his development is the right thing for the community. Using Applicant Exhibit 4, he showed a map showing where the people who signed the protest petition lived. Most of the signatures were from residents of Wilson Creek Subdivision, which is a Habitat for Humanity affordable housing development. Those people were given an opportunity to purchase their own home and he felt the same chance should be given to 168 other families. He urged Council to vote in favor of his development.

Upon inquiry of Councilman Mumpower, Mr. Hubbard said that he did have a concern about the $84,000 ($500 per unit) required for traffic calming. He explained that he trying to keep the units affordable starting at $69,900 and he doesn't want to have to sell it for $71,400. He did agree though that he did needs to contribute in some way to traffic calming, but he felt $84,000 might be a little too much.

The following individuals spoke in favor of rezoning the property for various reasons, some being, but are not limited to: area residents are afraid of change; development of the property into condominiums will allow young people to be able to purchase a home; City needs affordable housing; home ownership is needed in the City; the Faith Tabernacle Christian Center and the surrounding area will benefit from this development; playground will allow the children in the area to not have to play in the street; this upscale development will enhance property values of the area; if people on Brooklyn Road parked in their driveways and not on the street there would be enough room for two school buses to pass; and this development is a real step forward to meeting the affordable housing needs of the community:

Mr. Tracy Jefferson, resident on West Chapel Circle
Mr. William Wynn, member of Faith Tabernacle Christian Center
Mr. Maurice Baumgardner, speaking on behalf of the Board of Elders for the Faith
  Tabernacle Christian Center
Rev. William Robertson, Pastor of Faith Tabernacle Christian Center
Mr. Ulysses Mills, resident on West Chapel Road
Ms. Georgia Jefferson
Mr. Walter Plaue, speaking on behalf of the Carolina Real Estate Investors Association
Mr. Jesse Goode, Asheville resident
Ms. Judy Chaet, representing the Affordable Housing Coalition
Ms. Pat Appledorn
Ms. Christopher Appledorn
Mr. Christopher George Smith, Shiloh resident

The following individuals spoke in opposition of rezoning the property for various reasons, some being, but are not limited to: intersection at Wyatt Street and Brooklyn Road is currently a problem; there is too much traffic in the area; density is too high for the area; development will increase drug activity; crime rate will increase; buildings will not be compatible to the surrounding properties; current problem of exiting onto Brooklyn Road; need for an additional entrance and/or exit not on Brooklyn Road; project drastically change from the initial proposal; condominiums will have a negative impact on the single-family homes in the neighborhood; current infrastructure will not support additional families; no plans for water run-off; no one will want to pay $69,900 for a bedroom the size of a matchbox; owner will come to Council in the future and ask that they be allowed to not have the condos owner-occupied; single-family homes need to be built in the area; streets are too narrow in Shiloh to allow additional traffic; if Brooklyn Road is widened due to this development, then land will be taken and property values will not decrease; blind spot at the intersection of West Chapel and Brooklyn Road; no sidewalks for the children to walk on in Shiloh; a lot of times Habitat for Humanity doesn't have the families to put in the houses they want to build; buffer is sparse on the Wilson Creek Subdivision side; development will be noisy; and children will use Wilson Creek Subdivision as a cut-through:

Ms. Anita White Carter, resident on Wyatt Street
Ms. Johnnie Walker, President of the Shiloh Community Association
Ms. Sophie Dixon, Shiloh resident
Ms. Norma Baynes, speaking on behalf of the Shiloh Community Association (Neighborhood Exhibit 1)
Ms. Georgia Allen, Taft Avenue resident
Mr. Charles Williams, Shiloh resident
Mr. Frederick Payne, Brooklyn Road resident
Ms. Freida Nash, Shiloh resident
Ms. Jean Brown, Wilson Creek Subdivision resident
Ms. Martha Gardenheight, Wyatt Street resident

Mr. Chris Eller, Project Engineer at Civil Design Concepts, said that a tree survey was performed and they have preserved most of the large trees on the site. There will be a 40-foot buffer minimum, but currently there is a 100-foot buffer on the front of the property. The intent is to make this development an affordable for-sale type residential housing restricted to owner-occupied units and in order to do this larger buildings had to be designed. We were still able to provide walking trails and amenity areas surrounding the buildings for all of the neighborhoring community as well as this development to enjoy. Utility allocations have been obtained. A TIA was performed which was not required by City standards. The conclusions read "The existing street system can adequately accommodate the traffic projected to be generated by the new subdivision without making any physical improvements to the roadways. However, it is recommended that development of the proposed subdivision be able to proceed as planned. Consideration should be given to surrounding street networks to improve existing clearance and site distance deficiencies. Such considerations could include pavement markings, restricted street-side parking, and the removal of vegetation and other visual obstacles." We feel those can easily be accommodated with much less than $500 per unit. We feel confident this will be a benefit to the community and we hope to work with the City's Transit Department to provide multi-modes of transportation to the development.

When Vice-Mayor Bellamy asked about stormwater control, Mr. Eller said that currently all stormwater flows to the rear into a ravine. The ravine carries the water into Wilson Creek. We will be providing stormwater detention with an impoundment of sorts, either above or underground, controlling and regulating the release of all stormwater to pre-development conditions.

Upon inquiry of Vice-Mayor Bellamy, Mr. Eller said sidewalks will be running along the front of the property on Brooklyn Road and there is a series of sidewalks inter-connecting all of the buildings internally in the development. He said that they will need to work with the City to try to preserve as much of the vegetation as possible, so if there are large trees that have to be accommodated, they may have to ask for a fee in lieu of.

Upon inquiry of Vice-Mayor Bellamy, City Engineer Cathy Ball said that the TIA performed by a professional traffic engineer concluded that the roadway could handle the traffic. Handling the traffic means handling the volume of traffic that would be generated by the development. Basically the capacity of the roads would not be exceeded with the new development. When City staff looked at the project they felt there could be some improvements made by making improvements to the intersections, not particularly to the road width but to the intersections. That is the point where they requested additional funding. Specific intersections have not been identified yet. In the TIA, four different intersections were studied, including the one into the site, and they did not find they reduced from Level of Service A. All of the intersections after the development would remain a Level of Service A, except for one and it went to a Level of Service B. The average width of the roads are about 18-20 feet and if we were to build them today, we would build them wider if they were going to be collector streets. However, the streets will allow a bus and a car to pass but they have to slow down. The other request staff made was funding to be used for traffic calming. A bid was just approved to do traffic calming on Caribou Road which runs parallel with Brooklyn Road. We would like to do some additional traffic calming on Brooklyn Road, as well as on Shiloh and West Chapel with the money we have requested from the developer.

Vice-Mayor Bellamy questioned the one entrance on Brooklyn Road. Mr. Eller said that Brooklyn Road is 24 feet wide in front of the site. He said they did look at other access points and they did have a right-of-way through another section. However, in order to not impact more surrounding property owners and in order to not impact other driveways or remove trees, they settled on the one entrance on Brooklyn Road.

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 7:36 p.m.

Councilman Dunn felt that with a strict condominium association documents, they will be able to make sure that the condominiums remain owner-occupied.

Councilman Mumpower said that as he weighed out the facts and the testimony, he felt that the developer has met the seven criteria established by the UDO. His experience to date with the UDO is that it has been a helpful tool for balancing good development and taking care of neighborhoods at the same time. He would support a motion in favor of approving the proposal, however, he felt that $500 per unit for the developer to pay for traffic calming was excessive.

Vice-Mayor Bellamy said that it was never easy to face people that you know in the community to make a decision that affects not only today but tomorrow. City Council can only take into consideration the seven conditions that need to be met, noting that we all have ideas on what our community needs. The TRC is a committee comprised of people who are paid to make technical decisions. The Planning & Zoning Commission is comprised of people that City Council appoint to represent Council's ideas. Based on seven conditions, she would have to support the development. She feels this is the best development for this piece of property. Even though the TIA keeps the intersections at Level of Service A, City staff has requested funding for additional traffic calming measures to meet the needs of the community. Public input continues with traffic calming measures. She feels confident that the TRC has addressed the infrastructure requirements. City staff will work with the developers on the sidewalks and the additional playground will only benefit the community.

Councilwoman Jones believed that this development would enhance Shiloh. She felt the good benefits far outweigh the negative effects. There are people out there that do not have a voice and we need to remember those people as well. She did have some concerns but she feels they have been taken care of. Affordable housing is our number one concern. The City cannot stamp out affordable housing by itself, but needs private development like this to work on the problem.

Upon inquiry of Councilman Dunn, Mr. Hubbard said that there would be a condominium association formed after the project is built.

Councilman Peterson felt the traffic mitigation fee of $84,000 is fairly reasonable. If the City was just looking at speed humps, that would be too much. But, if the City is going to realign or make some improvements to the intersections, then we start getting into substantial costs. He too felt this was a hard decision for Council. If single-family houses were to be built, the maximum density would likely be larger houses, 3-4 bedrooms, probably upscale, probably have 2-3 car families and would probably generate as much traffic as a lower income multi-family. Compared to what the developer could do without the rezoning with what he could do with the

64

rezoning, the impact will not be that substantially different. With the funds the developer will escrow for traffic mitigation, it will go a long way of mitigating traffic. The development on this property will not have the kind of harm that other types of development might have and they meet the seven standards. Therefore, he would vote in favor of the project.

Mayor Worley agreed with Vice-Mayor Bellamy and Councilwoman Jones. He felt that change in inevitable and since we can't stop growth, this is a desirable way to accommodate that change.

Councilman Mumpower moved to adopt Ordinance No. 2944 to rezone property located on 200 Brooklyn Road from RS-8 Residential Single-Family High Density District to RM-16 Residential Multi-Family High Density District/Conditional Use. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 32

Discussion surrounded the amount to have the developer escrow for traffic mitigation.

Mr. Shuford said that City staff doesn't know what the actual numbers will be for traffic mitigation until we find out from the neighborhood what they feel is appropriate and the City does some engineering studies of our own to find out which intersections need improvements. Ms. Ball also stated that intersection improvements are quite expensive, especially if additional right-of-way is required.

Councilman Mumpower suggested a compromise of $200 per unit, which would total $33,600. He felt the traffic could be mitigated at a lower cost. He felt we may be doing some overkill in traffic mitigation compared to some of our previous efforts. He felt that $85,000 is a lot of traffic mitigation compared to what we have done in other places.

Mr. Shuford said that City Council will ultimately approve a bid for this and perhaps a better way to satisfy both issues is to bring back the plan showing the intersection improvements and the traffic calming improvements and ultimately the amount of money the developer would have to escrow.

Councilwoman Jones felt the compromise is that if the City doesn't use the entire $84,000, they will refund it back.

Councilman Dunn felt that we are asking developers to pay for something that property tax should be used for.

Vice-Mayor Bellamy felt Mr. Shuford's idea for staff to bring back the plan showing the improvements was a good idea with no set dollar amount.

Mayor Worley felt that the developer should have to share in some of the expense to mitigate traffic in the area and suggested $250 per unit, totaling $42,000.

Councilman Mumpower moved to adopt Ordinance No. 2945 to issue the conditional use permit for a proposed 168 unit condominium, subject to the following conditions:

1. Final landscape plans will be fully reviewed for shrub and tree counts (buffer plantings and parking lot plantings included), which should include existing plant material that will be credited towards the planting requirements.

2. Setback dimensions for the buildings for side and rear property lines need to be a minimum of 40 feet. In addition, a "C" buffer which (25' wide as per Article 11 of the Code) is needed on all property lines except the property line with Brooklyn Road.
3. The existing vegetative buffers along the perimeter of the parcel should also be preserved and will help to minimize the impact of the development on adjoining properties; there shall be no grading in any buffer areas, except at vehicle access points.
4. The developer shall provide an internal sidewalk system and connections to Brooklyn Road and Caribou Road; this system shall include crosswalk striping where it crosses internal driveways.
5. To mitigate negative traffic impacts from the development, the developer shall provide up to $250 per unit for neighborhood traffic calming and intersection improvements to implement plans to be developed by the City in working with the neighborhood; these monies shall be escrowed by the developer prior to the issuance of the initial building permit for any of the condominium buildings and any remainder shall be refunded to the developer at either the completion of the traffic calming and intersection improvement project or three years from the date of escrow, whichever occurs first.
6. The plans must be revised to provide a detail of the intersection of the condominium project with Brooklyn Road, including a 20-foot turning radii.
7. The developer shall provide street lighting.
8. The developer shall work with staff to determine in a reduced number of parking spaces can be accommodated.
9. Open spaces need to be suitable for recreation - particularly for children. Recreation and play areas shall be expanded to include a playground for children.
10. Each unit shall be occupied by the owner or owners thereof, and may not be rented or leased by the owner except as necessary to accommodate transitory situations. "Transitory situations" means a set of circumstances or conditions that are temporary in duration, usually for 18 months or less. By way of illustration and not limitation, such transitory situations may include temporary work assignments, divorce or separation, sickness, or extended travel. This condition shall not be construed to prohibit interfamilial rental arrangements, or a tenancy resulting from court order in a domestic matter. In the case of units acquired through foreclosure or other involuntary or distress-induced conveyance, the period of occupancy by a non-owner shall not exceed 18 months.
11. All units in this project shall have an initial purchase price that meets the City of Asheville housing affordability guidelines.

This motion was seconded by Councilman Dunn.

Councilman Peterson felt that if there was some significant change that needs to be made to one of the intersections, it might not get done because the developer will only be required to pay half the amount City staff has suggested. The City taxpayers shouldn't have to pay for improvements that will result from this development.

Vice-Mayor Bellamy wanted to allow City staff to come back with a plan with specifics in it and then Council will have a better direction of what it wants to do to mitigate the traffic and how much money will be needed for those improvements.

Mr. Shuford suggested Condition No. 12 be reworded to something like "To mitigate negative traffic impacts from the development, the developer shall fund neighborhood traffic calming intersection improvements to implement plans to be developed by the City in working with the neighborhood. These plans shall be approved by City Council after reviewing the proposed mitigation measure and determining whether they are appropriate for addressing the issue. These monies shall be escrowed by the developer prior to the issuance of the initial building permit for any of the condominium buildings and any remainder shall be refunded to the

66

developer at either the completion of the traffic calming and intersection improvement project or three years from the date of escrow, whichever occurs first."

Councilman Mumpower said that he would amend his motion as suggested by Mr. Shuford, with the understanding that the plan will come back to City Council. In the meantime, City Council can discuss the issue amongst themselves.

Mayor Worley said that if the $500 per unit stays as the condition, which is escrowed. If Council makes it clear that the plans and estimates for cost, etc. are to be presented back to and approved by City Council then Council has the ability to deal with total costs and to accept or reject parts of the plans. He felt that City staff clearly has Councils intent to do this in the safest and best manner for the neighborhood, but also the most economical. That still leaves Council with control over those amounts and the ultimate cost per unit.

At Councilman Mumpower's request, City Attorney suggested the following Condition No. 5: "To mitigate negative traffic impacts from the development, the developer shall provide up to $500 per unit for neighborhood traffic calming intersection improvements to implement plans to be developed by the City and approved by City Council in working with the neighborhood. These monies shall be escrowed by the developer prior to the issuance of the initial building permit for any of the condominium buildings and any remainder shall be refunded to the developer at either the completion of the traffic calming and intersection improvement project or three years from the date of escrow, whichever occurs first."

Councilman Mumpower moved to amend his original motion to approve the conditional use permit with the eleven conditions outlined above and with Condition No. 5 being revised as read by City Attorney Oast. Councilman Dunn did not accept the amendment. Therefore, the original motion made by Councilman Mumpower died for a lack of a second.

Vice-Mayor Bellamy moved to amend the motion to approve the conditional use permit with the eleven conditions outlined above and with Condition No. 5 being revised as read by City Attorney Oast. This motion was seconded by Councilman Peterson and carried unanimously.

The original motion, as amended, carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 34

At 8:31 p.m., Mayor Worley announced a short break.

B. PUBLIC HEARING TO REZONE TWO LOTS ON ARDMION PARK ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT

City Attorney Oast said that a valid protest has been filed which will require a ¾ majority vote by Council to approve the project. The petitioner has requested that the public hearing be continued until September 10, 2002, in order to allow him additional time within which to prepare for the City Council meeting.

Vice-Mayor Bellamy moved to continue this public hearing until September 10, 2002. This motion was seconded by Councilwoman Jones and carried unanimously.

C. PUBLIC HEARING TO REZONE TWO LOTS AT 1896 HENDERSONVILLE ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT TO HIGHWAY BUSINESS DISTRICT

ORDINANCE NO. 2946 - ORDINANCE TO REZONE TWO LOTS AT 1896 HENDERSONVILLE ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT TO HIGHWAY BUSINESS DISTRICT

Mayor Worley opened the public hearing at 8:58 p.m.

Chief Planner Gerald Green said that this is the consideration of an ordinance to rezone two lots at 1896 Hendersonville Road from Commercial Industrial District to Highway Business District. This public hearing was advertised on August 2 and 9, 2002.

At their July 10, 2002, meeting the Asheville Planning and Zoning Commission recommended rezoning from Commercial Industrial District to Highway Business District property located at 1896 Hendersonville Road (PIN No. 9655.13-24-2854 and 4984). The 2.77-acre parcel is located near the intersection of Hendersonville Road and Mills Gap Road. Currently the site is undeveloped. Surrounding zoning is Highway Business and Commercial Industrial. This property is one of the last parcels fronting on Hendersonville Road zoned Commercial Industrial. Changing land use patterns along the Hendersonville Road corridor have resulted in commercial development and office uses dominating along the corridor. The requested rezoning would permit the property to be developed in a pattern similar to that of the other properties along the corridor. Highway Business zoning would permit more efficient development of the property by permitting parking and related uses in the setback. Adequate infrastructure is in place to serve development permitted in the Highway Business district.

The Planning and Zoning Commission unanimously recommended approval of the request to rezone two lots at 1896 Hendersonville Road from Commercial Industrial District to Highway Business District. Staff concurs with this recommendation.

Mayor Worley closed the public hearing at 9:00 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Dunn moved for the adoption of Ordinance No. 2946. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 40

D. PUBLIC HEARING TO CONSIDER A REQUEST TO APPROVE A MODIFICATION FROM THE SUBDIVISION STANDARD THAT ALL RESIDENTIAL LOTS ABUT A PUBLICLY MAINTAINED STREET ON PROPERTY AT 24 HAW CREEK CIRCLE, ASHEVILLE NC

Mayor Worley opened the public hearing at 9:01 p.m.

Urban Planner Carter Pettibone said that this is the consideration of a request to grant a modification of the Subdivision Regulations of the Unified Development Ordinance (UDO) to allow the creation of a lot that does not front upon a public street. This public hearing was advertised on August 2 and 9, 2002.

The City has received a request from Karl Lail and Donald Sheppard to subdivide a parcel (PIN No. 9659.08-87-9831) located at 24 Haw Creek Circle into two lots. The parcel is 1.2-acres in size, zoned RS-4 Residential Single Family Medium Density District and currently has two homes located on it. The property owner occupies the home located farther from the street and rents out the other. The property has approximately 20 feet of frontage on Haw Creek

Circle and contains one driveway that provides access to both homes. Since it is not possible to obtain the minimum frontage for each lot as specified in the Subdivision Ordinance, a modification is required in order to subdivide the property with one lot not having street frontage.

The petitioners wish to subdivide the lot in order for each home to have its own lot and for the property owner (Sheppard) to sell the front lot and home to the other applicant (Lail). No additional homes are proposed and each resulting lot would be able to meet the UDO requirements of the RS-4 District for minimum lot size and setbacks.

Since one of the resulting lots would not have street frontage, access to the rear lot would need to be maintained through the creation of an access easement across the front lot. The establishment of this easement was a condition placed on the recommendations of staff, the Technical Review Committee (TRC) and the Planning and Zoning Commission.

The TRC and Planning and Zoning Commission each voted unanimously to recommend approval with the above-mentioned condition. The Planning and Development staff also recommends approval of the subdivision modification with the condition.

Mayor Worley closed the public hearing at 9:04 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved to approve a modification from the subdivision standard that all residential lots abut a publicly maintained street on property at 24 Haw Creek Circle in Asheville, N.C., subject to an access easement across the front lot. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

E. PUBLIC HEARING TO REZONE A PARKING LOT LOCATED BEHIND 818 HAYWOOD ROAD FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO COMMERCIAL BUSINESS II DISTRICT

ORDINANCE NO. 2947 - ORDINANCE TO REZONE A PARKING LOT LOCATED BEHIND 818 HAYWOOD ROAD FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO COMMERCIAL BUSINESS II DISTRICT

Mayor Worley opened the public hearing at 9:06 p.m.

Urban Planner Carter Pettibone said that this is the consideration of an ordinance to rezone 818 Haywood Road from RM-8 Residential Multi-Family Medium Density District to Community Business II District. This public hearing was advertised on August 2 and 9, 2002.

The applicants, Raife and Steve Davis, have requested the rezoning of a 0.13-acre parcel (PIN No. 9638.13-04-9818) located at 818 Haywood Road to allow for the reuse of an existing commercial building on the site. The purpose of the CB II District is to provide areas for medium-to-high-density business and service uses serving several residential neighborhoods.

The existing land uses in the area include single-family residences to the south and west, multi-family residences to the east and offices and parking to the north. The site is located behind a lot that has frontage on Haywood Road, which is a major thoroughfare with sufficient capacity to handle uses allowed in the CB II District.

The building on the site is a former single-family home that was converted to an office and moved back from its original location closer to Haywood Road in 1992. At the time of this change, the property was zoned Commercial Service (CS), which allowed offices and other commercial uses. The property owners, who also own the property in front of the one in question, developed the properties in accordance to the CS standards, but placed the building in a location that straddled the properties' common line. At the time of the City-wide zoning change in 1997, the dividing line between CB II and RM-8 was drawn essentially one property deep along Haywood Road. The building and its parking were located on two lots, but only the lot adjacent to Haywood Road was zoned CB II. This resulted in the zoning line actually running through the building. It is the Planning staff's opinion that both lots should have been zoned CB II at that time.

In consideration of the above, the adjoining zoning and land uses in the area to the north and east of the site, and the project site's proximity to the Haywood Road thoroughfare, the proposed zoning change appears to be consistent with the intent and purpose of the Unified Development Ordinance. The proposed rezoning is also in keeping with the intent of the Haywood Road Corridor Plan, which was approved in 1999 and serves as a guide for future development along Haywood Road in the West Asheville neighborhood. This parcel is one of the properties included in the Haywood Road Corridor Study Area and rezoning it to CB II would help accomplish the Plan's goal of enhancing the existing balanced mix of uses on Haywood Road through commercial, institutional, open space, and small parks.

The Planning and Zoning Commission voted unanimously to recommend approval of the rezoning of the property located at the 818 Haywood Road from RS-8 to CB II. The Planning and Development staff also recommends approval.

Pastor Alton Scott was curious about what the long-term plans are for that particular piece of property.

Mayor Worley closed the public hearing at 9:13 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 2947. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 42

F. PUBLIC HEARING TO AMEND THE 2002 CONSOLIDATED COMMUNITY DEVLEOPMENT BLOCK GRANT & HOME ACTION PLAN

RESOLUTION NO. 02-129 - RESOLUTION AMENDING THE 2002 CONSOLIDATED COMMUNITY DEVLEOPMENT BLOCK GRANT & HOME ACTION PLAN

ORDINANCE NO. 2948 - BUDGET AMENDMENT TO GIVE EFFECT TO AMENDMENTS TO THE CITY'S CONSOLIDATED COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME ACTION PLAN FOR 2002-03

At Vice-Mayor Bellamy's request, Councilwoman Jones moved to excuse Vice-Mayor Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Dunn and carried unanimously.

Mayor Worley opened the public hearing at 9:14 p.m.

Community Development Director Charlotte Caplan said that this is the consideration of amendments to the 2002 Consolidated Community Development Block Grant (CDBG) and HOME Action Plan. This public hearing was advertised on August 2 and August 9, 2002.

Council originally approved the 2002 Action Plan for CDBG and HOME funding on April 23, 2002. Since then, some additional CDBG funds have become available from program income or programs completed under budget, and a request has been received for a significant change to a HOME-assisted program. The following changes are now recommended:

A. CDBG AMENDMENTS

Unallocated CDBG funds currently total $249,018 as follows:

Funds returned from NHS Montford Gateway Loan Guarantee (project completed)	$ 44,045
Additional program income anticipated from sale of Biltmore Avenue property	70,000
Contingency	86,575
Program income recd. in 2001-02 and not yet allocated	48,398
Total available	**$249,018**

The recommended allocations are:

1. Woodfin Apartments **New CDBG allocation: $89,250**
The Housing Authority of the City of Asheville has re-submitted its request for CDBG assistance for acquisition and renovation of the 19-unit Woodfin Apartment, located in downtown Asheville, reducing the amount requested from $250,932 to $89,250. The Housing & Community Development (HCD) Committee recommends this grant on the grounds that the need for the project remains very high and that the amount requested is now within the funds available.

2. Code Enforcement Demolitions **New CDBG allocation: $41,370**
The general fund appropriation for demolitions was eliminated from the 2003 City Budget. The removal of certain vacant, dilapidated structures that are a blight on surrounding property is both CDBG-eligible and desirable for the achievement of Consolidated Plan goals. The HCD Committee recommends an allocation of $41,370, which is sufficient to demolish about eight structures.

3. Hillcrest Enrichment Program **Increase CDBG allocation by: $5,000**
Funding constraints led to a reduction in the grant allocated for this Housing Authority youth program from $50,000 in 2001-02 to $45,000 in 2002-03. The HCD Committee now recommends restoring the grant to its former level.

4. CDBG Administration **Increase CDBG allocation by: $29,065**
As part of the 2003 interim City Budget, Council has approved the transfer of one filled position within the Planning & Development Department from general funding to CDBG/HOME funding. The transferred staff person will work exclusively on CDBG- and HOME-eligible administrative and planning work. Staff estimates that the cost will be $48,441 this year, to be funded 60% from CDBG and 40% from HOME (see below).

5. Contingency **$84,333**
Funds will be retained for urgent needs, unforeseen cost overruns, or shortfalls in anticipated program income during the year. If not needed, these funds will be available for the 2003-04 funding cycle.

71

B. HOME AMENDMENTS

1. HOME Administration

The cost to the HOME program of the transferred staff position will be $19,376. The Asheville Regional Housing Consortium Board recommends that this be covered by reducing Member Government Administration and increasing City of Asheville HOME Program Administration by the same amount. The total amount allocated for HOME administration will remain unchanged at 10% of the HOME budget.

2. Change of Location for Henderson County Habitat Affordable Housing Project

Henderson County Habitat for Humanity was awarded $50,000 in 2002 HOME funds, through Henderson County, to purchase land for 10 new single-family homes at the Village of King Creek on Spartanburg Highway in Hendersonville. The agency has now asked to use these funds instead to purchase land on Stepp Road in the Clear Creek district of Henderson County. Habitat will go ahead with the Village at King Creek project using a different source of funds. A separate public hearing on this item was held in Hendersonville on July 24, 2002, and both the Henderson County Board of Commissioners and the Asheville Regional Housing Consortium Board recommend approval.

Staff recommends approval of the amended Action Plan.

Mayor Worley closed the public hearing at 9:18 p.m.

Mayor Worley said that members of Council have previously received copies of the resolution and budget amendment and they would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 02-129. This motion was seconded by Councilman Dunn and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 223

Councilwoman Jones moved for the adoption of Ordinance No. 2948. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 44

IV. UNFINISHED BUSINESS:

A. ORDINANCE NO. 2939 – ORDER GRANTING A CONDITIONAL USE PERMIT TO ALLOW FOR CONSTRUCTION OF A LEVEL III PROJECT AT 437 SWANNANOA RIVER ROAD

City Attorney Oast said that this is the consideration of an ordinance granting a conditional use permit to Horne Properties, Inc. for the Riverbend Marketplace Project.

The ordinance is granting a conditional use permit to Horne Properties, Inc. for the Riverbend Marketplace Project to be located on Swannanoa River Road, formerly known as the Sayles Biltmore Bleacheries site. Public hearings were held on June 25 and 26, and July 23, 2002, to hear the proposal of the developer and receive public comment on the Project. Council voted to grant the permit, and directed staff to prepare an order with findings and conclusions.

If City Council approves the order granting a conditional use permit to Horne Properties, Inc. for the Riverbend Marketplace Project, adoption of the ordinance is recommended.

72

City Attorney Oast said that he has submitted to City Council a memo with changes to the draft conditional use permit. In addition, he outlined other minor changes. He said that the only condition he drafted without City Council voting on the actual wording was Condition No. 14. Said condition reads "All necessary agreements, easements and permits shall be in place prior to the construction of any development phase or part thereof, including those necessary for the construction of the roads and other infrastructure serving the Project."

Regarding Condition No. 14, Councilman Peterson recalled that at the public hearing, one person said that the contamination plume wasn't moving because the existing building and parking lot was there preventing water from coming into the ground and washing it away. It seems that if the site is cleared then you would have that water seeping into the ground and possibly spreading that contamination. He asked if that has that been taken into account.

City Attorney Oast said that the way Condition 14 was worded, it does not preclude demolition from taking place before all these permits are in place.

Councilman Peterson felt there was a bit of potential contradiction in Condition No. 10, about having the applicant enter into an agreement with the N.C. Dept. of Environment and Natural Resources (DENR) before work is done, and then Condition No. 14 saying that they could do that work without entering into that agreement.

City Attorney Oast said that before any ground disturbing activity could take place on the site, including demolition, they would have to have entered into the agreement that is provided for in Condition No. 10. What Condition No. 14 is referring to are things like the agreements for constructing the road through River Ridge Shopping Center, the approval from Norfolk Southern Railway, etc. He felt the environmental aspect provided for in Condition No. 10 would require that any demolition activity be approved by the State before it could occur.

City Engineer Cathy Ball said that she felt it may be possible to change it so that we state that they can't do demolition unless it's necessary in order to alleviate some of the environmental problems that are going on. She understood Councilman Peterson's concern that doing anything could potentially cause some problems, unless they provided the City with an engineer's report specifically stating that the demolition would not harm the plume at all.

Mayor Worley suggested amending Condition No. 14 to add at the very end "and any activity on the site, including demolition, shall be consistent with the Administrative Agreement entered into under Condition No. 10 above."

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 2939 as amended by the memo with changes, the additional changes outlined by City Attorney Oast, and the addition to Condition No. 14. This motion was seconded by Councilman Dunn and carried on a 5-1 vote with Councilman Peterson voting "no."

ORDINANCE BOOK NO. 20 – PAGE 8

V. NEW BUSINESS:

A. RESOLUTION NO. 02-130 - RESOLUTION APPOINTING A MEMBER TO THE PUBLIC ART BOARD

Vice-Mayor Bellamy said that this is the consideration of appointing a member to the Public Art Board.

Mr. Tucker Cooke has resigned as a member on the Public Art Board, thus leaving an unexpired vacancy until December 31, 2003.

On August 13, 2002, City Council interviewed Lois Mills, Barbara Cary, Louise Glickman and Joel Helms.

Barbara Cary received five votes; Lois Mills received one vote, and Joel Helms received no votes. Therefore, Barbara Cary was appointed as a member to the Public Art Board to fill the unexpired term of Mr. Cooke, term to expire December 31, 2003, or until her successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 224

VI. OTHER BUSINESS:

A. CLAIMS

The City received the following claims during the period of July 19, 2002, through August 1, 2002: Patricia Glazener (Transit Services), Annette Pulley (Parks and Recreation) and Joyce Facemyer (Transit Services).

The City received the following claims during the period of August 2-8, 2002: Harold Littlejohn (Transit Services), Mike O'Conner (Streets), Police Tow (Police) and Bele Chere '02 (Sanitation).

These claims have been referred to Asheville Claims Corporation for investigation.

B. LAWSUIT

The City was served with the following lawsuit on July 23, 2002: James Edward Imes v. City of Asheville, CCL Management, Inc. and Asheville City Coach Lines Inc. The nature of the proceeding is a Complaint for wrongful discharge in violation of public policy – jury demanded. This matter will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Vice-Mayor Bellamy recognized Dr. Nilous Avery who has retired. She invited the public to one of the several events honoring Dr. Avery. He and his wife Christine have worked hard for our community.

Councilwoman Jones stressed the need for mentors and tutors for our school children.

Vice-Mayor Bellamy welcomed the new Executive Director of the YMI Cultural Center Rita Martin.

Councilman Dunn praised the Henderson County All-Stars for proceeding to the Babe Ruth World Series.

Vice-Mayor Bellamy congratulated City Manager Westbrook in receiving the ICMA Accredited Manager Award.

74

Mr. Fred English felt the City was contributing too much to the Chamber of Commerce because they are not bringing in industry to our area.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:42 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – August 20, 2002 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Councilman Jams E. Ellis

CONSENT:

Agreement with UNC-A for Limited Law Enforcement Jurisdiction on Property Owned by UNC-A

Summary: This consideration of a resolution authorizing the City Manager to enter into an agreement with UNC-Asheville in order to allow it's Public Safety Department the ability to enforce the law at certain locations within the City of Asheville, pursuant to N.C. Gen. Stat. sec. 15A-401.

The UNC-Asheville's Public Safety Department has requested that the City enter into a joint agreement with the UNC-A in order to allow the UNC-A public safety officers the ability enforce the law on property owned by UNC-A but located within the City of Asheville. Currently, the UNC-A public safety officers do not have law enforcement powers on these UNC-A properties.

> The properties are: Hyannis Drive, Corporative Campus Ministry House; 62 Macon Avenue, the Chancellor's Residence; Sevier Street Apartments #35 (Units A through J), #40 and #44 which are part of the University Housing; 95 Vivian Avenue -- Pegasus Press Printing; The W.T. Weaver Boulevard Greenway Walking Path and surrounding area that constitutes the Greenway located near UNCA; and 138 Sevier Street - The Baptist Student Union.

By entering into this joint agreement, the Asheville Police Department will not be the primary agency for calls at these locations within the City but still maintain jurisdiction over the properties. Furthermore, this agreement does not effect the mutual aid agreement between the two agencies. In addition, by executing this agreement, the W.T. Weaver Boulevard Greenway Walking Path will get extra police coverage from the UNCA public safety officers.

City staff recommends approval of the resolution authorizing the City Manager to enter into a joint agreement with UNC-Asheville.

Budget Amendment re: Fair Housing Assistance Program Grant

Summary: The consideration of a budget amendment, in the amount of $63,000, to recognize a Fair Housing grant.

The City of Asheville has been awarded a grant of $63,000 from the U.S. Department of HUD for the City's Fair Housing Assistance Program (FHAP) for the year ending September 30, 2002.

The City has received an annual FHAP grant for several years and subgrants the entire amount to the Asheville-Buncombe Community Relations Council, which undertakes fair housing education and enforcement in Asheville and Buncombe County.

76

Staff recommends approval of budget amendment.

Authority to Advertise Notice to Exchange City-owned at corner of Mountain and Clemmons Streets for Property at Tuskeegee Street

Summary: The consideration of a resolution authorizing the City Clerk to publish a notice regarding the exchange of Disposal Parcel 173 located on Mountain Street for real property located on Tuskeegee Street.

The City and Groundstar Development, Inc. have negotiated an exchange of Disposal Parcel 173 on Mountain Street for Groundstar's property on Tuskeegee Street. Disposal Parcel 173 (PIN No. 9649.19-60-8939) is a residential lot owned by the City on Mountain Street comprising 8,276 square feet and designated to be sold for redevelopment as part of the East End/Valley Street Community Improvement Program. About half the lot is steeply sloped and about half is gently sloped. There is a concrete ditch across the middle of the property centered in a 20' drainage easement. According to the Public Works Director, the 20' drainage easement on the City's property on Mountain Street is unnecessary and can be abandoned.

The City's property is located one block from property on Tuskeegee Street, owned by Groundstar (PIN No. 9649.19-60-4246). Groundstar purchased the lot on Tuskeegee Street to build a single-family affordable house for sale. After purchasing the lot, purchasing zoning and building permits and incurring site preparation expenses, Groundstar discovered that the lot is not buildable because of a drainage structure on the property on Tuskeegee. The City's Public Works Director recommends acquiring Groundstar's property because the drainage structure is essential to providing storm drainage on Tuskeegee Street. An exchange of property has been negotiated which will satisfy Groundstar's need for a buildable lot and the City's need to continue to provide storm drainage on Tuskeegee Street.

Approval of the resolution will initiate the exchange of the properties through the process provided in N. C. G. S. 160A-271.

Planning & Development staff recommends adoption of the resolution.

Authority to Advertise Offer to Purchase City-Owned Property on Oteen Church Road

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids for 1.58 acres of land off Oteen Church Road.

A bid from James R. and Irma S. Lewis, in the amount of $24,000.00, has been received for the purchase of land adjacent to their property at 1150 Oteen Church Road. The bid is not less than the appraised value of $24,000.00.

The property is zoned RS-2 and comprises of approximately 1.58 acre of land. The property has a triangular shape and is level at the street and gently sloping to about 6' above street level. The bid proposal includes a life estate in the driveway to Oteen Church Road with the City retaining an easement for ingress and egress. When the life estate expires, the City will own the driveway, and an easement for ingress and egress will accrue to the property at 1150 Oteen Church

Road. There is no current or contemplated use for the property by the City. The Lewis' plan to assemble the property with the property they own at 1150 Oteen Church Road as a buffer to the park.

Approval of the resolution will initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Planning staff recommends adoption of the resolution.

Acceptance of Streets for City Maintenance

Summary: The consideration of a resolution accepting Royal Pines Drive (SR 3162), Blake Drive (SR 3176), Sycamore Drive (SR 3171), Sycamore Drive (SR 3165), Peachtree Street (SR 3174), Cedar Lane (SR 3159), Sycamore Terrace (SR 3175), Linden Street (SR 3172), Linden Street (SR 3205), and Upper Sondley Drive for public maintenance.

As part of the annexation process, staff identifies streets in proposed annexation areas that should be maintained by the City after annexation. As part of the 2002 annexation process, ten streets were identified to be maintained by the City following annexation.

- Upper Sondley Drive is currently a private road. The length of the road is approximately 0.7 miles. Upper Sondley Drive begins and ends at Sondley Drive. The right-of-way for this street has previously been dedicated.

- Royal Pines Drive is currently a N. C. Dept. of Transportation (NCDOT) maintained roadway approximately .34 miles in length and is also known as State Route 3162. It begins at Hendersonville Rd and ends at the Sweeten Creek Rd.

- Blake Drive is currently an NCDOT maintained roadway approximately 0 25 miles in length and is also known as State Route 3176. The section proposed for acceptance begins at Royal Pines Drive and ends at the Sycamore Drive Only a portion of this road was in the City prior to this annexation. Following annexation, all of the roadway will be in the city limits. Staff is requesting that the City maintain the entire length of Blake Drive.

- Sycamore Drive is currently an NCDOT maintained roadway approximately 33 miles in length and is also known as State Route 3171. It begins at Hendersonville Road and ends at Royal Pines Drive.

- Sycamore Drive is .12 miles in length and is currently an NCDOT maintained roadway. It is also known as State Route 3165. Sycamore Drive (SR 3165) veers off Sycamore Drive (SR 3171) and ends at Sweeten Creek Road.

- Peachtree Street is currently an NCDOT maintained roadway approximately .19 miles in length known as State Route 3174. It begins at Sycamore Drive and ends at Cedar Lane.

- Cedar Lane is currently an NCDOT maintained roadway approximately .19 miles in length and is also known as State Route 3159. It begins at Linden Street and ends at Sweeten Creek Road.

- Sycamore Terrace is currently an NCDOT maintained roadway approximately .14 miles in length known as State Route 3175. It begins at Sycamore Drive and ends at Peachtree Street.

79

- Linden Street is currently a NCDOT maintained roadway approximately .15 miles in length and is also know as State Route 3205. It begins at Royal Pines Drive and ends at Sycamore Terrace.

- Another segment of Linden Street is also a NCDOT maintained roadway approximately .07 miles in length and is known as State Route 3172. It begins at Sycamore Terrace and Dead Ends at the southern section of the roadway.

Staff recommends that City Council adopt a resolution accepting Royal Pines Drive (SR 3162), Blake Drive (SR 3176), Sycamore Drive (SR 3171), Sycamore Drive (SR 3165), Peachtree Street (SR 3174), Cedar Lane (SR 3159), Sycamore Terrace (SR 3175), Linden Street (SR 3172), Linden Street (SR 3205), and Upper Sondley Drive.

Provisions for Possession and Consumption of Malt Beverages and/or Unfortified Wine at Lexington Avenue Arts and Fun Festival, 6th Annual Brewgrass Festival and Asheville Area Arts Council's Walk into History Event

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Lexington Avenue Arts and Fun Festival, the Asheville Area Arts Council's Walk into History and the Annual Brewgrass Festival.

The below listed groups have requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their events and allow for consumption at these events.

- The Lexington Avenue Arts and Fun Festival is a first year event. Its goal is to develop greater awareness for non-traditional art forms and to encourage people to shop and visit the stores opening on North Lexington.

- The Asheville Area Arts Council's Walk into History is an event designed to showcase the Urban Trail and to bring Asheville's history alive with characters and performances at many of the stations.

- For several years, the Annual Brewgrass Festival has served as a unique celebration of the art of brewing beer in the spirit of Oktoberfest with a Smokey Mountain twist. The 6th Annual Brewgrass Festival has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

The Asheville Parks and Recreation Department is submitting these resolutions on behalf of the Asheville Area Arts Council, Brewgrass, and the Lexington Avenue Arts and Fun Festival.

Agreement with NC DOT for Improvements related to Construction Widening of Brevard Road

Summary: The consideration of a resolution authorizing the Mayor to sign a municipal agreement with the N. C. Dept. of Transportation (NCDOT) for improvements related to the construction widening of Brevard Road (NC-191), from just north of the Blue Ridge Parkway to Sardis Road (NC-112), in Buncombe County.

The NCDOT has prepared plans depicting the construction widening of Brevard Road from a two lane to a 4/5 lane road, within the limits outlined above. This proposed work is located almost in its entirety outside the City limits of Asheville and it is scheduled to be let this fall. As a result of this construction, an existing 6-inch water line will be replaced with a new 24-inch water line that will be installed within a utility easement adjacent to the edge of the road. Funds to cover the cost of water line replacement will be appropriated from the Water Enterprise Fund. No other municipal infrastructure is proposed to be constructed.

NCDOT has requested the City to execute this agreement as the first step for the final preparation of a utility agreement between NCDOT and the Regional Water Authority of Asheville, Buncombe and Henderson, for the costs associated with the replacement and upgrade of the existing water line.

This project is also identified as NCDOT No. U-3403 C in Buncombe County.

Staff recommends that City Council authorize the Mayor to sign the Municipal Agreement for Improvements related to the construction widening of Brevard Road (NC-191), from just north of the Blue Ridge Parkway to Sardis Road (NC-112), in Buncombe County.

Economic Development Incentive

Summary: The consideration of a motion setting a public hearing on September 10, 2002, authorizing the City to enter into an agreement with Electrolux Home Products for an economic development incentive in the form of an easement onto city-owned property for construction of a retention pond.

Electrolux Home Products operates a regional distribution hub in a facility it leases located at 1310 Fanning Bridge Road in Asheville. The company is proposing an expansion of their distribution capacity by improving the efficiency of their site for increased truck & trailer movements. To accomplish this, an existing stormwater retention pond must be relocated.

The location and size of the new pond requires that a portion of it be located on city-owned property adjacent to the Electrolux site. To assist the company, the city is offering an easement onto its land for the location of the new retention pond. All other costs and liabilities associated with the construction and maintenance of the pond are the responsibility of the company. The pond is being designed to accommodate any future development on the remaining portion of the city property.

With the ability to increase the efficiency of this site, Electrolux has decided to keep the Asheville facility operational. The Asheville operation occupies a 500,000 square foot building and employs 128 people at an average hourly wage of $12.28.

City staff recommends City Council set the public hearing on September 10, 2002.

Critical Needs Phase III Water Distribution System Improvements, Contract 3

Summary: This is a review of the Regional Water Authority's bid award for Contract 3 of the Critical Needs Phase III Water Distribution System Improvements.

Sealed bids were received and opened on Wednesday, May 21, 2002 for the Authority's Critical Needs Phase III Contract 3. Two (2) bids were received for Contract 3 with Precision Contracting, Inc., submitting the low bid of $764,834.00. Contract 3 includes the installation of approximately 12,600 linear feet of 8-inch, 6-inch and 4-inch ductile iron waterlines with all related appurtenances. A complete list of bidders follows.

Critical Needs Phase III – Contract 3
Engineer's Estimate: $794,845.00

COMPANY	BID
Precision Contracting, Inc., Asheville, N.C.	$ 764,834.00
Buckeye Construction Company, Canton, N.C.	$ 777,409.75

This Contract is the first of three (3) that will comprise the Authority's Critical Needs Phase III program and are funded by the $ 3 million high unit cost grant. These projects are focused at locations where our existing infrastructure is old, leaking and inadequate to maintain high levels of customer service.

These bids were reviewed by the Office of Minority Affairs and were considered responsive to the Minority Business requirements. W.K. Dickson, the project engineers for Contract 3 have recommended award of this contract to the low bidder, Precision Contracting, Inc.

Contract 3 has a liquidated damages clause of $ 250.00 per day for failure to complete the project in the time allocated.

The Regional Water Authority awarded this contract to the low bidder shown above at their June 18, 2002, meeting.

This report is provided to City Council for information only.

Sand Hill Road Water System Improvements

Summary: This is a review of the Regional Water Authority's bid award for Sand Hill Road Water System Improvement Project.

Bids were received for the Sand Hill Road Water System Improvements project on May 9, 2002. Only (2) bids were received and the project was re-advertised for bid opening on May 22, 2002. Two (2) bids were received on May 22nd with Steppe Construction Company submitting a low bid of $298,750.00. Buckeye Construction Company was the other bidder submitting a bid of $452,146.00. The project includes the installation of approximately 2,700 linear feet of 18-inch, 16-inch and 12-inch waterline. The project also includes (2) major creek crossings and (1) railroad bore.

Sand Hill Road Water System Improvements
Engineer's Estimate: $398,295.00

COMPANY	BID
Steppe Construction Company, Mill Spring, N.C.	$ 298,750.00
Buckeye Construction Company, Canton, N.C.	$ 452,146.00

The water system improvements resulting from this project are crucial to the daily operation of our water system. These improvements will bolster our water supply in the west and southwest sections of our water system and will provide a back-up supply for the entire Brevard Road / Biltmore Square Mall area.

Following the bid opening on May 23, 2002, the engineer received a letter from Steppe Construction requesting that he be allowed to withdraw his bid. In the letter, Mr. Steppe indicates that he made several errors totaling $90,000 in his bid and because of these errors wanted to withdraw his bid.

Brenda Mills, the Director of the Office of Minority Affairs, attended the bid opening. Ms. Mills obtained copies of sections of the bid that pertain to Minority Business. During her review of Steppe's bid, Ms Mills discovered that Steppe Construction had not included a Minority Business form 1A in their bid package. Other documentation regarding the solicitation of minority businesses was included but this form was missing. Ms. Mills contacted Steppe Construction on May 22nd and asked that they submit the missing form by Friday May 24th. Steppe did not follow up with the submission of this form and Ms. Mills deemed Steppe's bid non-responsive in her letter dated May 28, 2002. Staff of the Water Resources Department talked to Mr. Steppe on May 23 and Mr. Steppe indicated that he did not have any intention of submitting the missing form. Buckeye Construction Company's bid was deemed responsive to the requirements of the Minority Business Plan.

The Regional Water Authority approved Mr. Steppe's request to withdraw his bid and awarded this contract to the next low bidder shown above at their July 16, 2002, meeting.

This report is provided to City Council for information only.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

BUNCOMBE COUNTY SOLID WASTE MANAGEMENT PLAN

Mr. Ron Townley, Land-of-Sky Regional Council's Solid Waste Manager, briefed City Council on the draft Buncombe County Solid Waste Management Plan and said that the draft plan is available for public input. The input period will be held open until September 20, 2002, and all comments should be given to City Solid Waste Manager Richard Grant.

COMMUNITY CORRIDORS VISION FOR BROADWAY CORRIDOR

Mayor Worley announced this matter would not be on the agenda at this meeting.

UDO AMENDMENT REVIEW

City Attorney Oast said that this Unified Development Ordinance amendment is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearing, which is scheduled for August 27, 2002. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Create Neighborhood Corridor Zoning District

Urban Designer Alan Glines said that this is the consideration of an ordinance amending the Unified Development Ordinance (UDO) to create a new mixed use in-fill corridor zoning classification called Neighborhood Corridor District.

Frequently in community meetings and planning forums and most recently, the forums for the City Plan 2025 comprehensive plan process, citizens have identified the need for:

- access to appropriately scaled mixed use neighborhood services located close to home;
- improved pedestrian facilities, projects that relate to the street and attractive streetscapes;
- more affordable housing throughout the community and a greater variety of housing choices; and
- broader transportation options.

Since much of our economic development potential is wedded to redevelopment of the existing commercial corridors in the City, staff has developed a zoning district that seeks to redevelop and rejuvenate the medium sized corridors and support the neighborhoods surrounding them. The proposed Neighborhood Corridor District is an opportunity to incorporate the City Council adopted Smart Growth and sustainable development goals that have been identified by the community during the last decade.

The Neighborhood Corridor District will encourage pedestrian activity by creating safe and inviting streetscapes with comfortable walking amenities. Traffic flow will be improved by limiting curb-cuts and requiring cross access between parcels. The proposed district will encourage mixed-use in-fill development in locations where the infrastructure services already exist to support it. A benefit of this district will be to encourage neighborhood services in proximity to where people live so they can walk and not have to drive for every errand. The higher density residential allowance proposed in the corridor will support the City's need for a variety of housing options, and price ranges to serve the diverse Asheville community. The Neighborhood Corridor District will also make public transit a viable option by increasing density (i.e., the number of potential riders) on corridors that are or can be served by the bus system. To address the concerns of the residential property owners adjacent to the corridors, developers are required to buffer the neighborhoods with thickly planted landscape buffers between uses in the corridor district and neighboring residential areas.

Some of the long term benefits from developing any corridor in this pattern will be to build a livable community, strengthen the area's tax base, reduce driving trips on roadways, support mass transit, improve air quality and reduce sprawl.

Mr. Glines then went into the different standards for the proposed new district.

The Neighborhood Corridor District, as initially proposed, sets a maximum of 24 residential units per acre. Higher densities can make new residential construction viable at in-fill locations and increase the potential for affordable housing. Recently several developers have requested that City Council consider a maximum of 32 residential units per acre for the Neighborhood Corridor District. This request was received after Planning and Zoning Commission review of the proposed district and has not been considered by the Commission. Staff is supportive of this request and asks for Council's favorable consideration.

The Planning and Zoning Commission supported the creation of the Neighborhood Corridor District 5-0 (two members were absent). Staff also supports the adoption of this district. In addition, City staff recommends City Council set the maximum of 32 residential units per acre for the Neighborhood Corridor District.

Councilman Dunn felt like some of the requirements are too restrictive and he is not in favor of more regulations.

After discussing some of the standards, it was the consensus of City Council for City staff to seek more input from the community, review the comments by Council regarding the standards, and continue the amendment until the October 1, 2002, worksession with the public hearing being continued until October 8, 2002. The matter of applying the district to properties will be tabled.

BOARDS AND COMMISSIONS

It was the consensus of City Council to appoint Tim Flora (North representative), Ann Flynn (Central representative) and John Robinson (East representative) to the Citizens/Police Advisory Committee.

83

It was the consensus of City Council to appoint David Tuch and Susan Jackson to the Greenway Commission.

It was the consensus of City Council to have the City Clerk arrange interviews on the Planning & Zoning Commission.

It was the consensus of Council to postpone action on the Public Access Channel Commission vacancies until the first of next year.

It was the consensus of Council to reappoint Chris Cavanaugh to the Buncombe County Tourism Development Authority.

BUDGET WORKSESSION

City Council held a budget worksession to discuss the interim budget. The final budget will be adopted on Thursday, August 29, 2002, at 5:00 p.m. in the Council Chamber, located on the Second Floor of the City Hall Building, Asheville, North Carolina.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:20 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – August 27, 2002 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Councilman James E. Ellis

INVOCATION

Councilman Dunn gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING AUGUST 27, 2002, AS "BOB PRESSLEY DAY" IN THE CITY OF ASHEVILLE

Mayor Worley announced that Mr. Pressley will not be able to attend this meeting and they would reschedule his proclamation.

B. RECOGNITION OF EMERGENCY ASSISTANCE FROM OUR NEXT GENERATION YOUTH GROUP

On behalf of City Council and the citizens of Asheville, Mayor Worley thanked Eugene Cutshaw, Josh Dalton, David Douglas and Markus Smith who helped the Asheville Fire and Rescue Department recently at a house fire on Carrier Street in West Asheville.

Fire Chief Greg Grayson explained that a group of young gentlemen from our Next Generation Youth Group assisted our firefighters in a very bad situation. Workers were refinishing a basement floor in a home when a lamp dropped onto the floor igniting flammable vapors from chemicals being used. The workers in the house were severely burned when the fire flashed across the entire basement.

Across the street from where the fire occurred, the youth were working to remodel a house. Four gentlemen provided assistance to the victims before our arrival and continued to assist us to the best of their ability until the fire was under control and the patients were treated and transported.

Mayor Worley presented Mr. Cutshaw, Mr. Dalton and Mr. Smith with a certificate and a Fire Rescue lapel pin. Mr. Douglas was not at the meeting, however, his certificate and pin would be delivered to him.

II. CONSENT:

Vice-Mayor Bellamy asked that Consent Agenda Items L, M and N be removed from the Consent Agenda to be voted on separately.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON AUGUST 13, 2002, AND THE WORKSESSION HELD ON AUGUST 20, 2002

B. RESOLUTION NO. 02-131 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH UNC-A FOR LIMITED LAW ENFORCEMENT ON PROPERTY OWNED BY UNC-ASHEVILLE

Summary: This consideration of a resolution authorizing the City Manager to enter into an agreement with UNC-Asheville in order to allow it's Public Safety Department the ability to enforce the law at certain locations within the City of Asheville, pursuant to N.C. Gen. Stat. sec. 15A-401.

The UNC-Asheville's Public Safety Department has requested that the City enter into a joint agreement with the UNC-A in order to allow the UNC-A public safety officers the ability enforce the law on property owned by UNC-A but located within the City of Asheville. Currently, the UNC-A public safety officers do not have law enforcement powers on these UNC-A properties.

> The properties are: Hyannis Drive, Corporative Campus Ministry House; 62 Macon Avenue, the Chancellor's Residence; Sevier Street Apartments #35 (Units A through J), #40 and #44 which are part of the University Housing; 95 Vivian Avenue – Pegasus Press Printing; The W.T. Weaver Boulevard Greenway Walking Path and surrounding area that constitutes the Greenway located near UNCA; and 138 Sevier Street - The Baptist Student Union.

By entering into this joint agreement, the Asheville Police Department will not be the primary agency for calls at these locations within the City but still maintain jurisdiction over the properties. Furthermore, this agreement does not effect the mutual aid agreement between the two agencies. In addition, by executing this agreement, the W.T. Weaver Boulevard Greenway Walking Path will get extra police coverage from the UNCA public safety officers.

City staff recommends approval of the resolution authorizing the City Manager to enter into a joint agreement with UNC-Asheville.

RESOLUTION BOOK NO. 27 – PAGE 225

C. ORDINANCE NO. 2949 - BUDGET AMENDMENT TO RECEIVE FUNDS FROM THE FAIR HOUSING ASSISTANCE PROGRAM GRANT

Summary: The consideration of a budget amendment, in the amount of $63,000, to recognize a Fair Housing grant.

The City of Asheville has been awarded a grant of $63,000 from the U.S. Department of HUD for the City's Fair Housing Assistance Program (FHAP) for the year ending September 30, 2002.

The City has received an annual FHAP grant for several years and subgrants the entire amount to the Asheville-Buncombe Community Relations Council, which undertakes fair housing education and enforcement in Asheville and Buncombe County.

Staff recommends approval of budget amendment.

ORDINANCE BOOK NO. 20 – PAGE 48

D. RESOLUTION NO. 02-132 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE A NOTICE TO EXCHANCE CITY-OWNED PROPERTY AT THE CORNER OF MOUNTAIN AND CLEMMONS STREET FOR PROPERTY AT TUSKEEGEE STREET

86

Summary: The consideration of a resolution authorizing the City Clerk to publish a notice regarding the exchange of Disposal Parcel 173 located on Mountain Street for real property located on Tuskeegee Street.

The City and Groundstar Development, Inc. have negotiated an exchange of Disposal Parcel 173 on Mountain Street for Groundstar's property on Tuskeegee Street. Disposal Parcel 173 (PIN No. 9649.19-60-8939) is a residential lot owned by the City on Mountain Street comprising 8,276 square feet and designated to be sold for redevelopment as part of the East End/Valley Street Community Improvement Program. About half the lot is steeply sloped and about half is gently sloped. There is a concrete ditch across the middle of the property centered in a 20' drainage easement. According to the Public Works Director, the 20' drainage easement on the City's property on Mountain Street is unnecessary and can be abandoned.

The City's property is located one block from property on Tuskeegee Street, owned by Groundstar (PIN No. 9649.19-60-4246). Groundstar purchased the lot on Tuskeegee Street to build a single-family affordable house for sale. After purchasing the lot, purchasing zoning and building permits and incurring site preparation expenses, Groundstar discovered that the lot is not buildable because of a drainage structure on the property on Tuskeegee. The City's Public Works Director recommends acquiring Groundstar's property because the drainage structure is essential to providing storm drainage on Tuskeegee Street. An exchange of property has been negotiated which will satisfy Groundstar's need for a buildable lot and the City's need to continue to provide storm drainage on Tuskeegee Street.

Approval of the resolution will initiate the exchange of the properties through the process provided in N. C. G. S. 160A-271.

Planning & Development staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE 226

E. RESOLUTION NO. 02-133 - RESOLUTION AUTHORIZNG THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE CITY-OWNED PROPERTY ON OTEEN CHURCH ROAD

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids for 1.58 acres of land off Oteen Church Road.

A bid from James R. and Irma S. Lewis, in the amount of $24,000.00, has been received for the purchase of land adjacent to their property at 1150 Oteen Church Road. The bid is not less than the appraised value of $24,000.00.

The property is zoned RS-2 and comprises of approximately 1.58 acre of land. The property has a triangular shape and is level at the street and gently sloping to about 6' above street level. The bid proposal includes a life estate in the driveway to Oteen Church Road with the City retaining an easement for ingress and egress. When the life estate expires, the City will own the driveway, and an easement for ingress and egress will accrue to the property at 1150 Oteen Church Road. There is no current or contemplated use for the property by the City. The

Lewis' plan to assemble the property with the property they own at 1150 Oteen Church Road as a buffer to the park.

Approval of the resolution will initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Planning staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE 227

F. RESOLUTION NO. 02-134 - RESOLUTION ACCEPTING ROYAL PINES DRIVE, BLAKE DRIVE, TWO PORTIONS OF SYCAMORE DRIVE, PEACHTREE STREET, CEDAR LANE, SYCAMORE TERRACE, TWO PORTIONS OF LINDEN STREET AND UPPER SONDLEY DRIVE FOR CITY MAINTENANCE

Summary: The consideration of a resolution accepting Royal Pines Drive (SR 3162), Blake Drive (SR 3176), Sycamore Drive (SR 3171), Sycamore Drive (SR 3165), Peachtree Street (SR 3174), Cedar Lane (SR 3159), Sycamore Terrace (SR 3175), Linden Street (SR 3172), Linden Street (SR 3205), and Upper Sondley Drive for public maintenance.

As part of the annexation process, staff identifies streets in proposed annexation areas that should be maintained by the City after annexation. As part of the 2002 annexation process, ten streets were identified to be maintained by the City following annexation.

- Upper Sondley Drive is currently a private road. The length of the road is approximately 0.7 miles. Upper Sondley Drive begins and ends at Sondley Drive. The right-of-way for this street has previously been dedicated.

- Royal Pines Drive is currently a N. C. Dept. of Transportation (NCDOT) maintained roadway approximately .34 miles in length and is also known as State Route 3162. It begins at Hendersonville Rd and ends at the Sweeten Creek Rd.

- Blake Drive is currently an NCDOT maintained roadway approximately 0.25 miles in length and is also known as State Route 3176. The section proposed for acceptance begins at Royal Pines Drive and ends at the Sycamore Drive. Only a portion of this road was in the City prior to this annexation. Following annexation, all of the roadway will be in the city limits. Staff is requesting that the City maintain the entire length of Blake Drive.

- Sycamore Drive is currently an NCDOT maintained roadway approximately .33 miles in length and is also known as State Route 3171. It begins at Hendersonville Road and ends at Royal Pines Drive.

- Sycamore Drive is .12 miles in length and is currently an NCDOT maintained roadway. It is also known as State Route 3165. Sycamore Drive (SR 3165) veers off Sycamore Drive (SR 3171) and ends at Sweeten Creek Road.

- Peachtree Street is currently an NCDOT maintained roadway approximately .19 miles in length known as State Route 3174. It begins at Sycamore Drive and ends at Cedar Lane.

88

- Cedar Lane is currently an NCDOT maintained roadway approximately .19 miles in length and is also known as State Route 3159. It begins at Linden Street and ends at Sweeten Creek Road.

- Sycamore Terrace is currently an NCDOT maintained roadway approximately .14 miles in length known as State Route 3175. It begins at Sycamore Drive and ends at Peachtree Street.

- Linden Street is currently a NCDOT maintained roadway approximately .15 miles in length and is also know as State Route 3205. It begins at Royal Pines Drive and ends at Sycamore Terrace.

- Another segment of Linden Street is also a NCDOT maintained roadway approximately .07 miles in length and is known as State Route 3172. It begins at Sycamore Terrace and Dead Ends at the southern section of the roadway.

Staff recommends that City Council adopt a resolution accepting Royal Pines Drive (SR 3162), Blake Drive (SR 3176), Sycamore Drive (SR 3171), Sycamore Drive (SR 3165), Peachtree Street (SR 3174), Cedar Lane (SR 3159), Sycamore Terrace (SR 3175), Linden Street (SR 3172), Linden Street (SR 3205), and Upper Sondley Drive.

RESOLUTION BOOK NO. 27 – PAGE 228

G. RESOLUTION NO. 02-135 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT OF TRANSPORTATION FOR IMPROVEMENTS RELATED TO THE CONSTRUCTION WIDENING OF BREVARD ROAD FROM NORTH OF THE BLUE RIDGE PARKWAY TO SARDIS ROAD

Summary: The consideration of a resolution authorizing the Mayor to sign a municipal agreement with the N. C. Dept. of Transportation (NCDOT) for improvements related to the construction widening of Brevard Road (NC-191), from just north of the Blue Ridge Parkway to Sardis Road (NC-112), in Buncombe County.

The NCDOT has prepared plans depicting the construction widening of Brevard Road from a two lane to a 4/5 lane road, within the limits outlined above. This proposed work is located almost in its entirety outside the City limits of Asheville and it is scheduled to be let this fall. As a result of this construction, an existing 6-inch water line will be replaced with a new 24-inch water line that will be installed within a utility easement adjacent to the edge of the road. Funds to cover the cost of water line replacement will be appropriated from the Water Enterprise Fund. No other municipal infrastructure is proposed to be constructed.

NCDOT has requested the City to execute this agreement as the first step for the final preparation of a utility agreement between NCDOT and the Regional Water Authority of Asheville, Buncombe and Henderson, for the costs associated with the replacement and upgrade of the existing water line.

This project is also identified as NCDOT No. U-3403 C in Buncombe County.

Staff recommends that City Council authorize the Mayor to sign the Municipal Agreement for improvements related to the construction widening of Brevard Road (NC-191), from just north of the Blue Ridge Parkway to Sardis Road (NC-112), in Buncombe County.

RESOLUTION BOOK NO. 27 – PAGE 230

H. MOTION SETTING A PUBLIC HEARING ON SEPTEMBER 10, 2002, TO CONSIDER AUTHORIZING THE CITY TO ENTER INTO AN AGREEMENT WITH ELECTROLUX HOME PRODUCTS FOR AN ECONOMIC DEVELOPMENT INCENTIVE IN THE FORM OF AN EASEMENT ONTO CITY-OWNED PROPERTY FOR CONSTRUCTION OF RETENTION POND

I. RESOLUTION NO. 02-136 - RESOLUTION APPOINTING MEMBERS TO THE CITIZENS/POLICE ADVISORY COMMITTEE

Summary: The terms of John Ingersoll (North representative), Jimmy Hungerford (West representative), Lonnie Blair (East representative) and Betty Budd (South representative), as members on the Citizens/Police Advisory Committee, expired on June 30, 2002. In addition, there currently exists a vacancy for a Central representative.

On June 18, 2002, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Mr. Hungerford (West representative) and Ms. Budd (South representative) to each serve an additional three-year term respectively, terms to expire June 30, 2005. Both appointments are until their successors have been appointed.

On August 20, 2002, City Council instructed the City Clerk to prepare the proper paperwork to appoint Tim Flora (North representative), John C. Robinson (East representative) and Ann Flynn (Central representative) to each serve a three-year term respectively, terms to expire June 30, 2005. All appointments are until their successors have been appointed.

RESOLUTION BOOK NO. 27 – PAGE 231

J. RESOLUTION NO. 02-137- RESOLUTION APPOINTING MEMBERS TO THE GREENWAY COMMISSION

Summary: Mr. Michael Kern and Ms. Elizabeth Budd have resigned as members of the Greenway Commission, thus leaving two unexpired terms – December 31, 2002, and December 31, 2003.

On August 20, 2002, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork (1) to appoint Mr. David Tuch to serve the unexpired term of Mr. Kern and then a full three year term, term to expire December 31, 2005; and (2) to appoint Ms. Susan Jackson to serve the unexpired term of Ms. Budd, term to expire December 31, 2003. Both appointments are until their successors have been appointed.

RESOLUTION BOOK NO. 27 – PAGE 232

K. RESOLUTION NO. 02-138 - RESOLUTION APPOINTING A MEMBER TO THE BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY

Summary: The term of Chris Cavanaugh, as a member on the Tourism Development Authority, expires on August 30, 2002.

On August 20, 2002, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint Mr. Cavanaugh to serve an additional three year term, term to expire August 30, 2005, or until his successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 233

L. RESOLUTION AUTHORIZING THE POSSESSION AND CONSUMPTION OF MALT BEVERAGE AND UNFORTIFIED WINE AT THE LEXINGTON AVENUE ARTS AND FUN FESTIVAL ON SUNDAY, SEPTEMBER 1, 2002

This item was removed from the Consent Agenda to be voted on separately.

M. RESOLUTION AUTHORIZING THE POSSESSION AND CONSUMPTION OF MALT BEVERAGE AND UNFORTIFIED WINE AT THE ANNUAL BREWGRASS FESTIVAL ON SATURDAY, SEPTEMBER 14, 2002

This item was removed from the Consent Agenda to be voted on separately.

N. RESOLUTION AUTHORIZING THE POSSESSION AND CONSUMPTION OF MALT BEVERAGE AND UNFORTIFIED WINE AT THE ASHEVILLE AREA ARTS COUNCIL'S WALK INTO HISTORY EVENT ON SATURDAY, SEPTEMBER 28, 2002

This item was removed from the Consent Agenda to be voted on separately.

RESOLUTION BOOK NO. 27 – PAGE

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilman Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Peterson and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA

RESOLUTION NO. 02-139 - RESOLUTION AUTHORIZING THE POSSESSION AND CONSUMPTION OF MALT BEVERAGE AND UNFORTIFIED WINE AT THE LEXINGTON AVENUE ARTS AND FUN FESTIVAL ON SUNDAY, SEPTEMBER 1, 2002

RESOLUTION NO. 02-140 - RESOLUTION AUTHORIZING THE POSSESSION AND CONSUMPTION OF MALT BEVERAGE AND UNFORTIFIED WINE AT THE ANNUAL BREWGRASS FESTIVAL ON SATURDAY, SEPTEMBER 14, 2002

RESOLUTION NO. 02-141 - RESOLUTION AUTHORIZING THE POSSESSION AND CONSUMPTION OF MALT BEVERAGE AND UNFORTIFIED WINE AT THE ASHEVILLE AREA ARTS COUNCIL'S WALK INTO HISTORY EVENT ON SATURDAY, SEPTEMBER 28, 2002

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Lexington Avenue Arts and Fun Festival, the Asheville Area Arts Council's Walk into History and the Annual Brewgrass Festival.

The below listed groups have requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their events and allow for consumption at these events.

- The Lexington Avenue Arts and Fun Festival is a first year event. Its goal is to develop greater awareness for non-traditional art forms and to encourage people to shop and visit the stores opening on North Lexington.

- The Asheville Area Arts Council's Walk into History is an event designed to showcase the Urban Trail and to bring Asheville's history alive with characters and performances at many of the stations.

- For several years, the Annual Brewgrass Festival has served as a unique celebration of the art of brewing beer in the spirit of Oktoberfest with a Smokey Mountain twist. The 6th Annual Brewgrass Festival has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

The Asheville Parks and Recreation Department is submitting these resolutions on behalf of the Asheville Area Arts Council, Brewgrass, and the Lexington Avenue Arts and Fun Festival.

Councilman Peterson moved for the adoption of Resolution Nos. 02-139, 02-140 and 02-141. This motion was seconded by Councilman Dunn and carried on a 5-1 vote, with Vice-Mayor Bellamy voting "no."

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO AMEND CHAPTER 7 OF THE CODE OF ORDINANCES TO ESTABLISH A NEW NEIGHBORHOOD CORRIDOR DISTRICT

Per the discussion at the August 20, 2002, City Council worksession, Vice-Mayor Bellamy moved to continue the public hearing until October 8, 2002, with this matter coming before City Council at their worksession on October 1, 2002. This motion was seconded by Councilman Dunn and carried unanimously.

B. PUBLIC HEARING TO CONSIDER REZONING PROPERTIES IDENTIFIED ON THE BROADWAY CORRIDOR

Per the discussion at the August 20, 2002, City Council worksession, Vice-Mayor Bellamy moved to table this rezoning request. This motion was seconded by Councilman Dunn and carried unanimously.

C. PUBLIC HEARING TO CONSIDER ADOPTION OF A SMALL AREA PLAN KNOWN AS THE BROADWAY CORRIDOR PLAN AS AN ADDENDUM TO THE ASHEVILLE CITY PLAN 2010

RESOLUTION NO. 02-142 - RESOLUTION ADOPTING A SMALL AREA PLAN KNOWN AS THE BROADWAY CORRIDOR PLAN AS AN ADDENDUM TO THE ASHEVILLE CITY PLAN 2010

Mayor Worley opened the public hearing at 5:17 p.m.

Chief Planner Gerald Green said that this is the consideration of a resolution adopting the Broadway Corridor Plan, which establishes goals and objectives for the redevelopment of the Broadway corridor from Woodfin/Hiawassee Streets to the US 19/23 intersection. This public hearing was advertised on August 16 and 23, 2002.

Following the improvement of Broadway from US 19/23 to Chestnut Street, concern was expressed regarding the type of development that might occur along the corridor. In response to this concern, City Council rezoned most of the properties along the north end of the corridor from R-3 and CS to RS-8 and RM-8 to forestall inappropriate development. As part of the rezoning, Council directed staff to develop a corridor plan for the section of Broadway from Downtown to tne US 19/23 intersection. Due to other priorities and limited staff, the planning effort did not begin until 1999. For the same reasons, the effort took longer than anticipated. The planning process involved the following basic steps:

- Formation of an advisory committee composed of neighborhood representatives, property owners, business owners, institutional representatives, and liaisons from City commissions and boards;
- Formation of a staff advisory committee to assure input from all affected City departments;
- Compilation of background information about Broadway;
- Community meetings to identify goals and objectives;
- Development of the draft corridor plan; and
- Presentation of the draft corridor plan to the public for review and comment.

The Broadway Corridor Plan provides a guide for the future development and redevelopment of the corridor, recognizing the need to protect adjacent neighborhoods and the development limitations imposed by topography and small lot size. Among the principles that guided the preparation of the corridor plan are:

- The need to promote the development of the Broadway (Reed Creek) Greenway;
- The need to improve the link between UNCA and Downtown;
- The need to improve the connections among the neighborhoods abutting Broadway, between the neighborhoods and Downtown, and between the neighborhoods and UNCA;
- The need to provide for multi-modal transportation;
- The promotion of neighborhood-friendly, pedestrian oriented development that serves the adjacent neighborhoods as well as passing motorists by providing a mix of uses including residential; and
- The need to recognize Broadway as an entrance to Downtown.

The draft Broadway Corridor Plan identifies action steps designed to guide the development and redevelopment of properties along the corridor in a manner consistent with the principles listed above. Action steps, identifying the time frame for implementation and the actors involved, address land use, future zoning, traffic circulation, Parks and Recreation activities, and economic development. By taking these steps, we can help assure a development/ redevelopment pattern along Broadway that adheres to the plan's guiding principles, provides opportunities for new and redeveloped businesses, provides opportunities for affordable housing, enhances adjacent neighborhoods, and promotes the Smart Growth principles adopted by City Council.

The Planning and Zoning Commission unanimously (5-0) recommended approval of the Broadway Corridor Plan. Staff also recommends adoption of the corridor plan.

Mr. Green then recognized the Advisory Committee members. The Broadway Corridor Action Plan major issues include transportation, parking, parks/greenway, land use, streetscape, safety/crime and general issues.

Transportation issues consisted of flow of traffic from Broadway to Lexington, impact of Broadway traffic on adjacent neighborhoods (cut-through traffic), intersection if I-240 and Broadway, transition from Lexington Avenue to Broadway at the I-240 interchange, redesign of I-

240 interchanges (need input from the NC Dept. of Transportation), left turns onto Broadway from neighborhood streets are difficult, traffic speed, plan for traffic signals, explore design features to reduce traffic speed, and pedestrian issues. Pedestrian issues include safe pedestrian crossings along Broadway, pedestrian crossing at Weaver Boulevard, sidewalk conditions and connections.

Parking issues include the desire for on-street parking on Broadway from Chestnut south, opportunities for shared off-street parking, and cooperative efforts between City and landowners to address parking.

Parks and Greenway issues include the status of Broadway greenway/funding for greenway construction, review of greenway connection from Chestnut to downtown, potential for small parks and green spaces in corridor and status of connection with Weaver greenway.

Land use issues include land uses which link UNC-Asheville, downtown, businesses, and neighborhoods; compatibility with existing land uses; development should be in harmony with existing development and proposed development; land use review must look at entire corridor; vacant land between downtown and Chestnut Street key to future of corridor; pedestrian scale vs. automobile scale; mixed use development; business opportunities; and identify appropriate zoning of properties on edge of corridor.

Streetscape issues include the reinforcement linkage between areas, create pleasant environment for all users, enhance business environment and entranceway (neighborhood and downtown) corridor.

Safety/crime issues include speeding, vagrants, prostitution, graffiti and trash.

Mr. Green outlined the land use issues: concerns about the quality of new development, both residential and non-residential; need for neighborhood retail services to support the area's residential neighborhoods; concerns about used car lots, small strip retail and commercial franchises; protection and preservation of surrounding neighborhoods, such as Hillside/Mt. Clare and Montford; and reuse of vacant buildings between Chestnut Street and I-240. Land use opportunities include: properties available for new development throughout the corridor, vacant residential and commercial buildings throughout the corridor, mixed use development as a transition between commercial downtown and residential neighborhoods, second-story residences promote security and safety in evening hours, and adjacent residential neighborhoods provide substantial customer base.

Traffic and pedestrian circulation issues include: limited pedestrian amenities (crosswalks, sidewalks, lighting, medians); limited ADA standard sidewalks; poor sidewalk maintenance; poor vehicular traffic flow at Broadway/Merrimon/I-240 and Five Points intersections; width of lanes do not provide for safe U-turn opportunities; lack of transit service; and lack of designated bike lanes. Opportunities include: potential for transit service to link with Broadway, corridor is a major connector between downtown and UNC-Asheville, greenway from downtown to the French Broad River, potential for enhanced pedestrian/bicycle use, and serve as gateway to downtown.

Park and recreation issues include: safety hazards for pedestrians using inadequate sidewalk system, North Asheville residents in need of parks and recreation areas, and City of Asheville in need of a continuous greenway system. Opportunities include: finished greenway will be a model project for other greenways; will be one of the first sections of the "emerald necklace" encircling downtown; and increase adjacent property values, tourist revenues, and cost savings for public services.

Upon inquiry of Councilman Dunn, Mr. Green said that this plan lays out actions and activities as a general guidance tool only. Mr. Green said that there are no plans at this time for any type of development on the City-owned properties.

When Councilman Mumpower asked about the traffic circle at Chestnut Street, Mr. Green said that a great deal of study is still needed and again, this is only a general plan.

Upon inquiry of Councilman Dunn, Mr. Green explained what is meant by a greenway, noting that it is not limited to natural areas. He pointed out that the Urban Trail is a greenway and it's all concrete.

Councilman Mumpower asked if there have been any concerns raised over the Plan. Mr. Green said that greenway development has raised concern. He said that there seems to be the perception that the entire side of the street, and in some cases both sides of Broadway, from Five Points north should remain undeveloped because that is the greenway. That is misconstruing the point of the greenway and also the fact that the decision was made by prior Council's that the east side of the corridor from Five Points north would not be a part of the greenway – but that it would be developed according to the Plan that would be approved at some future date.

Mr. Green responded to concerns from Councilman Peterson regarding existing residential property. Mr. Green said it was made clear during the process that the residential properties back one or two lots off of Broadway should not be mixed uses. He said this is a general plan and staff did not go in and define on the general land use plan at this scale each individual property. The text of the plan and the direction provided to staff by the Advisory Committee was that commercial access onto residential streets should not be permitted and that any future zoning should be limited to those properties that abut Broadway and do not go back into the neighborhood.

Mr. Theo Hartman, resident on Woodrow Avenue, hoped that the wooded area near Highland Park and UNC-Asheville would remain the same.

A resident on Catawba Street proposed two different zonings – one south of Five Points and then one north of Five Points. She felt to make it all mixed use would be micro-sprawl.

Mr. David Hill, representing Community Corridors LLC, said that there have been a series of weekly meetings with neighborhood groups, City staff, and the Concerned Residents of Broadway Neighborhoods to review the three City Council actions proposed regarding Broadway. As their first joint action of working together, Ms. Veronica Gunter, representing Concerned Residents of Broadway Neighborhoods, said that (1) as residents and development interest, they support the adoption of a small area plan for Broadway. Individuals will express opinions on details within the Plan and they support hearing all opinions. They feel that redevelopment of existing commercial areas from Five Points south is needed along the Broadway Corridor, positively shaped by staff work and Council action and the timely input of their group and the public. They support the adopted Greenway Plan for Reed Creek, which runs parallel to Broadway, and the Reed Creek Greenway's possible extension south of Chestnut. They are currently in discussion about the past, present and future character of Broadway north of Five Points; (2) like City staff, they want Broadway's issues addressed in a timely fashion. They have a schedule of weekly meetings with representatives of each group and City staff and Council members – meetings which have already begun and they will work to resolve differences in our visions for Broadway as they relate to pending Council actions; and (3) They encourage active review and participation by all City Council, either through attendance at the meetings or via one-on-one input with City staff or their group.

Mr. Bob Lawrence, business owner on Broadway, said that it concerns him that the Plan includes traffic circles. If felt that if a traffic circle is on East Chestnut and Broadway or Broadway and Monroe, emergency vehicles will not be able to get through. He did not want Broadway to turn into a Merrimon Avenue or a Patton Avenue.

Mr. Tom Byers, Executive Assistant to the Chancellor at UNC-Asheville, spoke in support of the Small Area Plan and said that the Plan is consistent with the hopes of the University.

Ms. Betty Lawrence, representing the Broadway Improvement Project, said that Broadway was a major transportation corridor in the 19th Century but has not been since then. South of Chestnut going into downtown has been a business corridor, but North of Chestnut, the land use has been predominately residential. She felt the zoning needs to be appropriate for each area. They don't believe that there is a traffic problem at Five Points. She felt it the Plan should be more explicit that we want to encourage transit on this Corridor. As far as the greenway, there has been talk about having a medicinal herb garden to show that part of the heritage in Penick Park and there is a lot of potential for an inter-rural trail in that Park. Broadway is not an existing commercial corridor, as can be seen by the Montford neighborhood and the Hillside/Mt. Clare neighborhood. There is a lot of investment in the old buildings in the neighborhoods and wonderful potential for affordable housing. She felt that since there is vacant, retail and office space in downtown that there is no rush into making too much more. We need to concentrate our efforts between I-240 north to Chestnut Street so that we can all work together to get this new and important mixed-use development to work. As far as the lanes between Chestnut Street and I-240, they would prefer one of the travel lanes be deleted.

Mr. Scott Osborne felt that Broadway is a good gateway into the City.

Mr. Jerry Sternberg, partner in Highland Park LLC, said that they have a concern with any effort to narrow any part of Broadway. In addition, they were opposed to forcing property owners to build buildings fronting on Broadway with the parking in back and windows in those buildings. They feel drive-throughs should be allowed to be built in the new zoning district. They also have an issue with a greenway going through Highland Park. He understood that this Plan is a conceptual blueprint of things they would like to do in this Corridor and if that is the case, many things are still on the table. Therefore, he asked that the Plan be amended to permit a grocery store, with a large footprint of approximately 45-50,000 square feet, to serve this area or a hotel with approximately 6-8 stories, in the northernmost section of the Broadway Corridor, which primarily starts at Catawba Street and includes the properties of UNC-Asheville and Highland Park.

Mayor Worley closed the public hearing at 6:29 p.m.

Mr. Green responded to Mr. Sternberg in that UNC-Asheville and Highland Park are zoned Institutional now and there is no proposal to change that zoning. Institutional does permit hotels up to 6-8 stories, but no grocery stores. He has heard comments and there are references in the Plan about the need for a grocery store in that area and that issue can be addressed when the zoning for the Broadway Corridor is discussed.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Jones, and other members of Council, expressed gratitude to the Concerned Residents of Broadway Neighborhood and Community Corridors LLC. She felt it was exemplary what has been accomplished and it took a lot of openness, time, energy and patience for them to make a commitment to the true community.

Councilman Mumpower moved for the adoption of Resolution No. 02-142. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 238

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

VI. OTHER BUSINESS:

Claims

The following claims were received by the City of Asheville during the period of August 9-22, 2002: William Baker (Streets), Robert Carnahan (Water), Karen Harris (Streets), Jerry Perkins (Streets), Kathy Whatley (Streets) and Jay Shelton (Streets).

These claims have been referred to Asheville Claims Corporation for investigation.

Lawsuit

The City was served with a Verified Petition for Review and Appeal on June 27, 2002, by Stephen and Michelle Arnold, etc. The nature of the proceeding is to declare the annexation ordinance for the Huntington Chase Annexation Area to be null and void, or, in the alternative, remand the ordinance for amendment of the boundaries. City Attorney Bob Oast will handle this matter, with the involvement of Bill Slawter.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Upon inquiry of Councilman Mumpower about downtown issues, City Manager Westbrook said that some issues would be forthcoming to Council in the near future.

Vice-Mayor Bellamy thanked everyone involved in the successful Goombay Festival.

Ms. Lola LaFey, resident on London Road, thanked City Council for taking the time out to honor Our Next Generation Youth Build.

Mr. Mickey Mahaffey stressed that any proposals regarding the water agreement renegotiations should require full discussion of Council with public comment.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 6:47 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Thursday – August 29, 2002 - 5:00 p.m.
Council Chamber – 2nd Floor – City Hall

Special Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Mayor Worley gave the invocation.

NEW BUSINESS

A. ORDINANCE NO. 2950 - ORDINANCE ADOPTING THE ANNUAL BUDGET FOR FISCAL YEAR 2003-04 FOR THE FOLLOWING FUNDS: GENERAL FUND, GENERAL CAPITAL RESERVE FUND, TRANSIT SERVICES FUND, CIVIC CENTER FUND, STREET & SIDEWALK FUND, PRINT SHOP FUND, CENTRAL STORES FUND, FLEET MANAGEMENT FUND, RISK MANAGEMENT FUND, HOUSING TRUST REVOLVING FUND, CIVIC CENTER CAPITAL FUND, TRANSIT CAPITAL FUND, SEWER CAPITAL PROJECTS FUND, AND GENERAL CAPITAL PROJECTS FUND

Councilman Peterson moved to adopt an ordinance adopting the annual General Fund budget for Fiscal Year 2003-04 at $62,998,431, the total net budget at $87,729,323, and setting the tax rate at $0.53 per $100 valuation with the following service priorities being funded and any additional revenue ($76,692) going into Fund Balance: (1) streets and sidewalks - $600,000; (2) Community Relations Council - $30,000; (3) Enka Fire Department contract - $27,000; (4) Burton Street Recreation Center - $50,000; (5) police overtime for Biker Bash - $26,659; (6) outside agency funding - $58,000; (7) traffic calming - $50,000; (8) Housing Trust Fund (now at $400,000) - $100,000; (9) Walton Street playground - $50,000; (10) building maintenance funding - $50,000; and (11) police vehicles - $41,850. This totals $1,083,509. This motion was seconded by Councilman Ellis.

Vice-Mayor Bellamy said that last week City staff presented City Council the following five service priorities totaling $1,033,659: (1) Community Relations Council - $30,000; (2) Enka Fire Department contract - $27,000; (3) Burton Street Recreation Center - $50,000; (4) police overtime for Biker Bash - $26,659; and (5) streets and sidewalks - $900,000. If the $900,000 for streets and sidewalks were eliminated, City Council would just need to find $133,659 and not have to raise taxes.

City Manager Westbrook said that City staff presented those issues as a result of what they thought the City Council wanted to see funded and what City staff thought needed to be funded, but that they would require additional money. One was $900,000 for streets and sidewalks. It was his understanding that the now 11 service priorities are a result of City Council working amongst themselves.

Vice-Mayor Bellamy asked how many of the 11 items are new services to the community. City Manager Westbrook said that none are new services. He said these were things that were reduced during the Phase I reductions in the budget or where a Council member wanted to place additional emphasis with an existing program above and beyond what staff had initially recommended.

Councilman Peterson said that the current tax rate is $0.56 per $100 valuation. His motion is for the tax rate to be lowered to $0.53 per $100 valuation. For the budget to remain revenue neutral, the tax rate would need to be $0.51 per $100 valuation.

Vice-Mayor Bellamy was concerned that the 11 service priorities are not any new services and based on the four priorities City staff presented last week (minus the $900,000 for streets and sidewalks because they were already deleted in the Phase I reductions), she felt the additional $133,659 could be found in the budget. She pointed out that City Council has already cut $2,625,000.

Councilwoman Jones pointed out that if the City did not raise taxes by 2-cents, an additional $90,000 would need to be added to Vice-Mayor Bellamy's $133,659 because of the sales tax loss due to Buncombe County's tax rate.

Vice-Mayor Bellamy's concern was that the City was finally on track by the audit report showing that our Fund Balance gained revenue. Then the State had budget problems and passed them onto cities. It was difficult for her to support a tax increase and not get anything for it. If the City is going to increase what we are supposed to be doing anyway, she would understand that, but since we are doing the status quo, it is very difficult for our citizens to understand the increase. She pointed out that when we increase our tax rate it just doesn't stop on real estate, but it's applied also to motor vehicles, mobile homes, business assets, etc.

Councilman Peterson disagreed with Vice-Mayor Bellamy when she felt that citizens were not getting anything for the additional 2 cents. He explained how each of the 11 service priorities would help citizens and that they have been priorities discussed by City Council at their annual retreat. He felt that if Council don't take responsible action now and if we lose more State funding, we have the potential of laying off firefighters, police officers, closing community centers, etc.

Councilwoman Jones said that she had heard over and over again the need for streets and sidewalks (the nuts and bolts of public infrastructure) and City Council didn't fund them last year. So, based on last year, this is a new investment and the citizen's number one priority. She felt Council has done a good job in being accountable and Council can be proud. She believed we have to take care of what our parents and grandparents invested in, in terms of our buildings, streets, etc. These 11 service priorities are items that resulted from the City Council annual retreat. We don't know what is coming from the State and that is another part of being responsible, but at least we have prepared for it. It may be that these 11 service priorities may not be funded if the State takes additional monies, but a lot of time has been spent on this budget and she feels it makes good sense for the community.

Councilman Peterson said that City Council needs to invest in infrastructure and take care of what is here so that people want to come to Asheville. Businesses will not want to come to Asheville is the roads are falling apart, or if they can't find affordable housing for their workers, or if our community centers are falling apart. If we look like a dump, they are not coming here. This is an investment. Regarding the building maintenance fund, if we don't spend a little now, we will be spending 5-10 times more in the future. Everyone complains about how bad the water system is – it's because the leaders in the past didn't spend the money to take care of what they had. The only reason he is supporting the additional increase is because we had to cut $3 Million out of last year's budget. If we had spent $600,000, that ended up getting cut, on the streets and sidewalks, then he felt we could manage to tighten our belt. But we tightened our belt last year and had to defer that one year. His concern is that if we go with the minimum tax rate and the State ends up keeping the utility franchise fee, or they take Powell Bill monies, we will end up laying off police officers, firefighters, etc. He personally felt it was likely to happen that the State will make those cuts. Regarding the 11 service priorities, City staff has agreed that they are not

99

going to rush out and spend the month. We are hoping that we can do these things, but if the Governor takes more monies, we could potentially lose $1 Million. We are putting some money aside if more hard times come. We had hard times last year and we cut. We're having hard times this year and it's foolish if we don't put something away and be prepared. If we have to, all of the 11 service priorities may be cut, but if we don't have this, we will be in dire straights.

Councilman Dunn said that when he looked at past budgets, prior councils, in some ways, spent a lot of money and he didn't think our problems are all from the State withholding monies. Now that the State has taken monies, they expect us to go to the city taxpayers to make up for some representatives we have in Raleigh. He agrees that we have to fix things because the longer you wait, the worse things get, but he doesn't think it's fair to put this on the Asheville taxpayers. Not only are average residents affected, but developers and people who own hotels and large businesses. Their taxes will go through the ceiling. He doesn't understand why the City has to rush in and raise taxes this year since we don't know what is going to happen with the State's budget.

Councilman Ellis supported the 11 service priorities and stressed that Council has talked about the need to set aside money for streets and sidewalks and how we need to support the Police Department. This budget will do that.

Councilman Mumpower felt there are legitimate arguments on both sides. Some criteria he will use for his vote includes: a focus on basic services, provide a level of service that reflects the community's wishes, focus on providing services to people that they can't provide for themselves, ensure that our government does not outgrow our economy or the economic realities of our citizens, and we should listen to our voters. He doesn't think it's reasonable that we are asking our citizens to compensate for a State budget crisis. We are spending at the level of last year and year before and last year was tight but not as tight as this year. This is not a good year and he is hesitant of us spending at a level similar to a good year. He especially is concerned when he looks ahead to next year. To him we are stepping forward with some expenditures that could be tightened up – there are choices we can make. He personally would like to see us make some of those harder choices and hold the line this year. He has talked to some of our local delegation and they think that we are going to get our revenues or at least a signification portion of them and he was inclined to believe them. He agrees that you have to take care of what you have but he would rather see us hold the line like other people in our community have to do.

Mayor Worley said that he would support the budget motion. He agreed that it is unreasonable to ask our citizens to compensate for the State's budget problems, but we can't stick our heads in the sand and not deal with the issues that has caused us. He deeply regrets the State has had those problems and they have had to take such an impact on cities, but the reality is that that impact has occurred and it has indeed affected us. He felt that if we ever have to have a tax increase, and he has voted against them in the past, now is the time to do it. His reasons include the effect the State budget has had on us and its continuing uncertainty. There is a strong feeling that this budget is so tied up in the legislature, and all of the various interplay and political ramifications, that we may not get our reimbursements. That is a risk he is not willing to take in setting our budget for this year. We were impacted by the State's budget crisis last year and that resulted in some pretty substantial reductions - mostly in capital and streets and sidewalks. It would be foolish for us to continue those kinds of impacts two years in a row. We can weather that storm one year but when you add the same kind of cuts a second year in a row, you are creating longer-term problems that actually increase our overall exposure down the road. He is very concerned about the continuing problems the State budget is having and the potential impact on next year's budget. We are not immune from more money being taken from us in this fiscal year by the State. Even if we got our reimbursements, if the State budget crisis continues, there are other funds that are very susceptible to be pulled from us. We need to take care of ourselves right now. What do we get for the increase? We get $600,000 added back to the streets and sidewalks. That is significant when you look at what we lost last year. Last year we did not do scheduled paving. This is less than what we really need for this year, but it is a pretty substantial add-back to help us continue with street and sidewalk paving. If you don't address these things on a regular, consistent basis, you spend a lot more money for streets and sidewalks as they get worse and worse. I think it's important for us to continue addressing it on a reasonable, consistent basis. We have a strong feeling for affordable housing in the City and we will continue that emphasis. We get maintenance on other City buildings and properties and if you don't do it, you compound the problem. We make sure that the Burton Street Recreational Center stays open and we get a Community Relations Council that will continue to help work to solve the various problems that we have within our community. All of those are important. He felt this is an appropriate amount to increase and he would support the motion.

Councilman Dunn felt that the City should look at some other areas before we take the step to increase taxes. He cited some examples of spending, e.g. festivals coordinating division - $120,000; athlete division in Parks and Recreation - $630,000; and a resource position of $72,000. In addition the Water Authority is spending $116,000 of taxpayer's money for water education.

For those who are concerned with the revenue picture for the coming year and who are inclined to vote for a tax increase, Councilman Mumpower asked if Councilman Peterson would consider a modification to his motion. Said modification would be to put this money in our Fund Balance until we see whether the revenue picture will improve or if we receive additional revenues from the State.

Councilman Peterson didn't think a modification would be necessary because there is an understanding with City staff, given the situation that happened last year and the situation that may happen this year, they are very aware that we may lose additional funds and that these items are not going to be spent right away. If we get more monies withheld from the State, these 11 service priorities would be the list to first go to for cuts. In addition, we are putting $76,692 in our Fund Balance in case we do lose additional funds or in case the economy doesn't do as well.

Councilwoman Jones noted that there is $5,000 in the Contingency Fund committed to the actuarial study for firefighters.

Councilman Dunn felt that the role of City government is to provide basic services – things that people can't do for themselves. We cannot be something for everybody and we are losing the focus on the real important quality, basic government services.

The motion made by Councilman Peterson and seconded by Councilman Ellis carried on a 4-3 vote, with Mayor Worley, Councilman Ellis, Councilwoman Jones and Councilman Peterson voting "yes" and Vice-Mayor Bellamy, Councilman Dunn and Councilman Mumpower voting "no."

Upon inquiry of Councilman Mumpower, Mayor Worley said that any funds received from the State beyond what is currently anticipated would automatically go to Fund Balance.

ORDINANCE BOOK NO. 20 – PAGE 50

B. ORDINANCE NO. 2951 - ORDINANCE AMENDING ARTICLE II OF CHAPTER 13 (ALARM SYSTEMS) OF THE CITY OF ASHEVILLE

Deputy Police Chief Ross Robinson said that false burglary and robbery alarms in Asheville represent a significant drain on police department resources. The intent of the current ordinance adopted in 1995 was to reduce the number of false alarms through the imposition of penalties for excessive false alarm activations. However, today, the number of false alarms remains high. The incidence of false alarms has not decreased. During the past year the Police Department has responded to over 9,112 false alarm calls. Staff research indicates there are several features of the current ordinance, which stand as barriers to false alarm reduction. The proposed ordinance will address these problems as follows:

1. In the current ordinance, the way in which excessive false alarms are defined is too forgiving. The current ordinance defines excessive false alarms as more than three within one month. The proposed ordinance defines excessive false alarms as three or more in any twelve-month period.

2. The current ordinance provides for a $10 civil penalty for each excessive false alarm. The proposed ordinance provides for a graduated scale; 3-5 at $50 each, 6 and 7 at $100 each, 8 and 9 at $250 each, and 10 and above at $500 each.

3. The proposed ordinance eliminates the previous permit fee of $25.00. If the alarm holder does not secure the proper permit as specified by the ordinance, an increased civil penalty will be assessed beginning at $200 when the second false alarm occurs.

4. To be effective, strict monitoring and vigorous enforcement will be required. It is proposed to outsource alarm monitoring and billing services with costs of the outsource covered by the collectibles.

It is also proposed the effective date of the ordinance be six months after adoption to allow time to arrange for outsourcing and public education on the new provisions of the ordinance.

Councilman Mumpower supported the ordinance, however, we are talking about people who are trying to protect themselves from crime. We are making them criminals; at least to the extent that we are laying a real heavy hand with the amount of fee we are charging people. We went from one extreme to another extreme.

Councilman Peterson moved for the adoption of Ordinance No. 2951, to be effective six months from the date of adoption. This motion was seconded by Councilman Ellis and carried on a 6-1 vote with Councilman Mumpower voting "no".

ORDINANCE BOOK NO. 20 – PAGE 55

C. ORDINANCE NO. 2952 - BUDGET AMENDMENT TO RECEIVE GRANT MONEY FROM THE DEPT. OF HOUSING & URBAN DEVELOPMENT AND ALLOCATE IT TO THE HOUSING ASSISTANCE CORPORATION

D. ORDINANCE NO. 2953 - BUDGET AMENDMENT TO CONSOLIDATE ACCOUNTING FOR SECTION 108 LOAN-RELATED ACTIVITY IN A SINGLE FUND

Budget Director Ben Durant said that this is the consideration of two budget amendments, one in the amount of $50,106, to receive grant money from the Department of Housing & Urban Development and allocate it to the Housing Assistance Corporation; and the other to consolidate accounting for Section 108 Loan-related activity in a single fund.

The City's HOME fund recently received an additional $50,106 from the Department of Housing & Urban Development. The Asheville Regional Housing Consortium's Board of Directors voted to allocate the funds to the Housing Assistance Corporation to construct a transitional housing unit for low-income migrant farm workers during farm season. During non-farming season, the house will be used for emergency/transitional housing for non-migrant families.

At the present the City of Asheville accounting for Section 108-Loan-related activity is split between two funds: the Community Development Fund and the Section 108 Rehabilitation Fund. City Accounting staff and the City's independent auditors recommend that all financial activity related to Section 108 Loans be consolidated in a single fund in order to simplify budgeting and accounting and to more clearly present Section 108 Loan-related financial data.

The proposed budget amendment consolidates all revenues and expenditures related to the Section 108 Loans in the Section 108 Rehabilitation Fund, with no net increase or decrease to existing programs.

City staff recommends City Council adopt the budget amendments accepting $50,106 from HUD and allocating the money to the Housing Assistance Corporation; and transferring Section 108 Loan-related revenues and expenditures from the Community Development Fund to the Section 108 Rehabilitation Fund.

Mayor Worley said that members of Council have been previously furnished with copies of the ordinances and they would not be read.

Councilman Ellis moved for the adoption of Ordinance No. 2952. This motion was seconded by Councilman Peterson and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 60

Councilman Peterson moved for the adoption of Ordinance No. 2953. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 62

INFORMAL DISCUSSION AND PUBLIC COMMENT:

Councilman Dunn gave a brief year-end report of the Economic Development Commission.

Mr. Fred English and Mr. Bill Stamey each spoke in opposition of City Council raising taxes.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 6:12 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – September 3, 2002 - 3:00 p.m.

Worksession

Present:	Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson
Absent:	None

CONSENT:

Public Auction

Summary: The consideration of a resolution authorizing the Purchasing Director to dispose of City-owned personal property by public auction on Saturday, October 5, 2002.

The resolution authorizes the City's Purchasing Division to hold a public auction to dispose of motor vehicles, off-road equipment, and other miscellaneous property declared as surplus by various City departments. The auction to be held Saturday, October 5, 2002, at 10:00 a.m. in the Public Works Complex, 161 S. Charlotte Street, Asheville, N.C.

City staff requests City Council approve the resolution authorizing the Purchasing Director to hold a public auction on October 5, 2002, at 10:00 a.m. at the Public Works Complex, 161 S. Charlotte Street, Asheville, N.C.

Upon inquiry of Councilman Dunn, Finance Director Bill Schaefer explained how the Fleet Management Division makes the determination if vehicles are economically feasible to keep.

Renewal of Radio Maintenance Agreement

Summary: The consideration of a resolution authorizing the City Manager to execute a service agreement renewal with Motorola Communications and Electronics, Inc. to provide maintenance of the City's radio communication system for another year at a cost of $9,795.10 per month.

Motorola Communications and Electronics, Inc. has provided maintenance services for the City's radio communications system since installation of the system in 1992. Effective with the service agreement covering the period of September 1994 through August 1995, the maintenance cost per unit of equipment has remained fixed. The service agreements are renewed annually. The maintenance cost per unit of equipment for the renewal period of September 1, 2002, through August 31, 2003, remains fixed at the original cost per unit.

This renewal agreement reflects a monthly decrease of $1,758.80. This is due to the fact that some radio equipment will include labor only as part of the maintenance agreement. The agreement covers additional equipment purchased by the City that has come out of warranty during the past year. The monthly cost of this service is $9,795.10.

Funds have been appropriated in the Finance Department, Information Services Division, in Account No. 110-1005-415-3001 C44108 to cover the monthly cost of this agreement.

City staff recommends City Council adopt the resolution which authorizes the City Manager to execute a renewal of the service agreement with Motorola Communications and Electronics, Inc. to provide maintenance to the City's radio communication system.

Mountain Mobility of Buncombe County Grant

Summary: The consideration of (1) a budget amendment, in the amount of $50,000, to receive additional funding by Mountain Mobility of Buncombe County to provide two additional bus trips provided by the Asheville Transit to Black Mountain; and (2) a resolution authorizing the City to enter into an agreement with Mountain Mobility of Buncombe County to provide said service.

Mountain Mobility has received federal funds for the provision of additional service for persons seeking to commute to work using public transportation. Mountain Mobility seeks to enter into an agreement with Asheville Transit to use these monies to fund two additional trips to Black Mountain at times conducive to employment commuting. Mountain Mobility will subsequently provide feeder routes with its vans to feed these and currently existing Black Mountain trips run by Asheville Transit.

City staff recommends City Council approve the budget amendment to receive additional funding from Mountain Mobility, and grant City Manager authority to enter into an agreement for same.

FAA Grant Agreement

Summary: The consideration of a resolution approving a grant from the Federal Aviation Administration in an amount not to exceed $604,709.

The Federal Aviation Administration (FAA) has offered a grant agreement to the Asheville Regional Airport. This grant, in an amount not to exceed $604,709, is for the project consisting of: installing runway lighting for Runway 34 (Category II Touchdown Zone Lighting); rehabilitate taxiway lighting, and construct perimeter security/service road, Phase II.

Staff recommends adoption of the resolution authorizing the Mayor to execute the grant agreement for Project No. 3-37-0005-27.

Setting Public Hearing to Close Portion of Old Haywood Road

Summary: The consideration of a resolution setting a public hearing on October 8, 2002, to close a portion of Old Haywood Road from Park Avenue to Roberts Street.

According to N. C. Gen. Stat. sec. 160-299, a City has the authority to permanently close a street or alley without regard to whether it has actually been opened.

On September 23, 1997, a public hearing on the question of closing a portion of Old Haywood Road between Park Avenue and Roberts Street was held at the regular meeting of City Council. A decision was deferred on "closing" until staff could further advise Council on the ability of using this portion of Old Haywood Road in the Greenway Master Plan.

The Planning Department has completed the Greenway Master Plan and determined that this portion of Old Haywood Road from Park Avenue to Roberts Street would not serve as a good link in an anticipated greenway connecting the downtown with the river. The Planning Department has also not identified a viable public use for this property as requested on September 23, 1997. Based on those findings the closing proceedings were reinitiated at the request of Mr. Rice.

The Public Works Department staff has determined that the right-of-way known as Old Haywood Road, beginning at Park Avenue and ending at Roberts Street, as shown in the

Buncombe County Tax Maps bordered by PIN Nos. 9648-09-07-1425, 9648-09-07-0394, and 9638-12-97-9347 is not part of an adopted street plan and is not a City maintained right-of-way.

City staff recommends City Council adopt the resolution of intent to set a public hearing on October 8, 2002, to close a portion of Old Haywood Road from Park Avenue to Roberts Street.

Private Sewer Line Easement over City-owned Property on Choctaw Street

Summary: The consideration of a resolution authorizing the Mayor to convey an easement over a portion of City-owned property in the East Riverside Redevelopment Project Area on Choctaw Street for a private residential sewer line.

The City owns property (PIN No. 9648.10-25-8823) located between Tolula Lane and Choctaw Street and Town Branch approximately 400 feet west of McDowell Street. Due to its location, shape and topography, its current and anticipated use is for park green space with plans for an improved greenway path along Town Branch.

Tilman and Sabrina Jackson purchased a parcel of land from the City adjacent to the greenway parcel in May of 2002 and have since erected a single-family dwelling. Due to the location of water lines and sewer lines the Jacksons have requested an easement, which would provide the most direct and efficient route to the sewer main. The easement would be solely for the purpose of installing and maintaining the sewer line and would not restrict the City from constructing a greenway path or planting trees which is the proposed use of the City's property.

Approval of the resolution will authorize conveyance of the easement to Tilman and Sabrina Jackson for the purpose of a private residential sewer line.

The staff of the Community Development Division, Parks & Recreation Department and Water Resources Department recommend adoption of the resolution authorizing the easement.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

SUMMER YOUTH EMPLOYMENT PROGRAM 2002

Ms. Rebecca Janes, Project Coordinator from Community Solutions for Youth Employment, spoke to Council about the success of the summer youth program and submitted a copy of their final report.

Mr. Butch Kisiah, Superintendent of Recreation, explained that the Summer Youth Employment Program was unable to be funded by the City for the first time in many years due to the budget shortfall caused by the State of North Carolina. A non-profit agency, Community Solutions for Youth Employment (CSYE), stepped forward and funded the program through a cooperative agreement with the Parks and Recreation Department. The amount provided by the CSYE was $37,400. Because of the demand for summer youth employment positions, the CYSE gained additional financial support from the Asheville Housing Authority, in the amount of $8,928 to pay for additional youth positions. These additional funds require a budget amendment so they can be utilized and to move funds from unused line items to the line item for part-time seasonal salaries.

City staff recommends City Council adopt the budget amendment for the Summer Youth Employment Program 2002.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

AMENDMENTS TO THE ANIMAL CONTROL ORDINANCE

Police Chief Will Annarino said that this is the consideration of an ordinance amending the Animal Control ordinance.

The Asheville Police Department is seeking to improve public safety and the humane treatment of animals by reviewing and updating the animal control ordinance.

The animal control ordinance was last revised on October 27, 1999. In an effort to meet public expectations and insure the most up to date ordinance possible, the Asheville Police Department began a review of the ordinance in early 2002. The ordinance was also modified to establish the City of Asheville's relationship with the animal shelter, which was previously defined by Buncombe County ordinance.

Consistent with City Policy, the Asheville Police Department sought input from organizations such as the Coalition of Asheville Neighborhoods, and the Haw Creek Neighborhood Association and the Kenilworth Neighborhood Association. A public meeting was held and comments were received on August 19, 2002.

The ordinance will be enforced solely by civil citations. If there is a serious violation, the Police Department can criminally charge the violators through state law in terms of dangerous dogs and cruelty to animals.

Police Chief Annarino stated that the community has made it know that they want strict enforcement of this ordinance. Roughly 10% of owners have their dogs registered now, which is unacceptable. He said they would enforce the ordinance in a fair and consistent manner.

Chief Annarino pointed out some amendments as follows:

- All persons keeping an animal in the City for 30 days or longer or to all owners whose animal has a set of permanent K-9 teeth are required to obtain an annual license tag for such dog.
- Change in language making it easier to classify barking dogs as a nuisance and have the nuisance definition be in line with the noise ordinance.
- Change wording for the maximum number of animals within a household from "more than six" to "seven or more." However, the maximum number without a permit in the City remains at six.
- Add a section making it unlawful for a person to tether an animal to public property.
- Change in penalty section whereby a violation of any section of the animal control ordinance will be a civil violation where the animal control officer may impose a civil penalty (i.e. $50).
- Owner of an animal must keep the animal on his or her premises or if off premises the animal must be on a leash in the hand of the owner. This does not apply to cats, service animals with the proper documentation and dogs in specified dog parks.
- Addition of language allowing the animal control officer to require a dog owner to obtain liability insurance after a violation of the ordinance.

- If the owner fails to comply with an order from an animal control officer, then each day that the owner violates the order, the owner may be fined $50 per day. Each day in violation constitutes a separate violation.
- The City will attempt to give notice to the owner that his/her animal was impounded. If the owner is unknown, persons much check the designated shelter. The owner has 72 hours to claim his/her animal and the clock begins to run when the animal control officer brings the animal to the shelter. However, according to the Humane Society's policy, if the name of the owner is known, the Humane Society will hold the animal for 10 days. If the owner does not claim his/her animal in 72 hours, the Humane Society can either put the animal up for adoption or destroy it.
- In instances where the animal must be kept at the shelter for more than the 72-hour period, the owner may pay a bond in order to prevent the animal from being put down or put up for adoption.
- Enforcement of the amended ordinance will begin on October 1, 2002.

Discussion was held and questions were responded to by Police Chief Annarino and Assistant City Attorney Curt Euler with regard to the amendments.

Upon inquiry of Councilwoman Jones, Police Chief Annarino said that there would be a good education component for this amended ordinance. He agreed that since not all pet owners are homeowners who will receive a notice to license their dogs in their water bills, a way to reach renters would be investigated.

Councilman Mumpower suggested reviewing the language in Section 3-29 (c) in that it may contain some typographical errors.

City staff recommends the adoption of the ordinance to amend the animal control ordinance.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

UPDATE ON THE CIVIC CENTER

Mayor Worley updated City Council on his conversation with Crawford Murphy, who is heading up a group working on the possibility of the performing arts center on the parking lot of the Renaissance Hotel. Mr. Murphy has talked with the Renaissance Hotel and they have expressed their willingness to cooperate and they would negotiate further after they see a pro forma and feasibility study. He expects to be able to present that to them with the next 60-90 days. In a couple of months they will be holding a formal meeting involving all potential players, including the City, arts community, key users, and key people in community. He is forming his leadership group to help push this forward and they should be in place within the next 30-60 days. There has been interest from a master developer who will coordinate the development process and bring other splinter developers. In addition, they have talked to a cost management firm about working with them on the project as well.

Mr. Scott Osborn presented City Council with two issues of the Dual Jewel Project showing the concept of the Asheville Sports Campus and Village at the SunSpree Golf Course and Resort located just off I-240. He reported that they would be discussing different avenues for financing and how the public and the private sector can get involved. Mayor Worley said that City Council would be anxious to hear the next update.

Councilman Mumpower stressed that City Council is anxious to hear from anyone who has a concept that is doable and can be supported.

Civic Center Director David Pisha gave City Council a brief update on the list of summer projects they have and are hoping to accomplish.

OTHER BUSINESS

After discussion, it was the consensus of City Council to have the City Attorney prepare a resolution to be placed on Council's next formal agenda that raises our concerns to our state legislators and asks them to come to a conclusion regarding reimbursements and other sources of revenue. Mayor Worley encouraged all of Council to make contact with our state legislators, and others, by e-mail, letter, telephone or even a personal visit.

CLOSED SESSION

At 4:50 p.m., Councilman Mumpower moved to go into closed session for the following reasons. (1) To establish or to instruct the City's staff concerning the position to be taken by or on behalf of the public body in negotiating the price or other material terms of a contract for the acquisition of real estate – G. S. 143-318.11(a) (5); and (2) To consult with an attorney employed by the City in order to preserve the attorney-client privilege between the City and its attorney. The parties to the lawsuit about which the Council expects to receive advice are: Morris Communications, Inc. d/b/a Fairway Outdoor Communications; Maple Cove, Inc.; Carl and Janis Ricker; Asheville Board of Adjustment; and City of Asheville - G.S. 143-318.11(a) (3). This motion was seconded by Councilman Ellis and carried unanimously.

At 6:40 p.m., Councilman Ellis moved to come out of closed session. This motion was seconded by Councilwoman Jones and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 6:40 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – September 10, 2002 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Councilman Ellis gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING SEPTEMBER 11, 2002, AS "ALWAYS REMEMBER 9-11 DAY"

Mayor Worley read the proclamation proclaiming September 11, 2002, as "Always Remember 9-11 Day" in the City of Asheville. He presented the proclamation to Assistant Fire Chief Robert Griffin, who accepted the proclamation on behalf of the entire Asheville Fire Department and the entire Asheville Police Department.

B. PROCLAMATION PROCLAIMING SEPTEMBER 11, 2002, AS "SPIRIT OF AMERICA – DAY OF CARING & REMEMBRANCE"

Mayor Worley read the proclamation proclaiming September 11, 2002, as "Spirit of America – Day of Caring & Remembrance" in the City of Asheville. He presented the proclamation to Mr. David Bailey from United Way. Mr. Bailey briefed City Council on some activities taking place during that day, noting that there are 1,500 Asheville and Buncombe County volunteers who will work on 140 projects.

C. PROCLAMATION PROCLAIMING THE WEEK OF SEPTEMBER 16-20, 2002, AS "MINORITY ENTERPRISE DEVELOPMENT WEEK"

Vice-Mayor Bellamy read the proclamation proclaiming September 16-20, 2002, as "Minority Enterprise Development Week" in the City of Asheville. She presented the proclamation to Mr. Marvin Vierra, who briefed City Council on some activities taking place during the week.

D. RESOLUTION NO. 02-143 - RESOLUTION REGARDING SECURE LOCAL REVENUE TO THE NORTH CAROLINA HOUSE OF REPRESENTATIVES

RESOLUTION NO. 02-144 - RESOLUTION REGARDING SECURE LOCAL REVENUE TO THE NORTH CAROLINA SENATE

RESOLUTION NO. 02-145 - RESOLUTION REGARDING SECURE LOCAL REVENUE TO GOVERNOR OF NORTH CAROLINA

At City Council's direction, City Attorney Oast said that he has drafted resolutions requesting our North Carolina House of Representatives, the North Carolina Senate and Governor Easley to act with all deliberate speed to secure local revenue by accelerating the effective date of the local option sales tax authorization, requiring the distribution of State-collected revenues, or other appropriate measures.

This draft resolution requests the General Assembly and Governor to act to secure local revenues, either by providing for a local sales tax or requiring the distribution of State-collected revenues that have been withheld. The N.C. League of Municipalities has requested that cities take some action to encourage the General Assembly to resolve their current budgetary disagreement in a way that provides a secure source of local revenue.

Councilman Ellis moved for the adoption of Resolution Nos. 02-143, 02-144, and 02-145. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 239, 240, 241

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON AUGUST 27, 2002; THE REGULAR MEETING HELD ON AUGUST 29, 2002; AND THE WORKSESSION HELD ON SEPTEMBER 3, 2002

B. RESOLUTION NO. 02-146 - RESOLUTION AUTHORIZING THE CITY TO EXCHANGE CITY-OWNED PROPERTY AT THE CORNER OF MOUNTAIN STREET AND CLEMMONS STREET FOR PROPERTY AT TUSKEEGEE STREET

Summary: The consideration of a resolution authorizing the Mayor to convey property on Mountain Street in exchange for real property located on Tuskeegee Street.

The City and Groundstar Development, Inc. have negotiated an exchange of Disposal Parcel 173 on Mountain Street for Groundstar's property on Tuskeegee Street. Disposal Parcel 173 (PIN No. 9649.19-60-8939) is a residential lot owned by the City on Mountain Street comprising 8,276 square feet and designated to be sold for redevelopment as part of the East End/Valley Street Community Improvement Program.

The City's property is located one block from property on Tuskeegee Street, owned by Groundstar (PIN No. 9649.19-60-4246). Groundstar purchased the lot on Tuskeegee Street to build a house for sale, but then discovered that the lot is not buildable because of an essential drainage structure on the property on Tuskeegee. An exchange of property will satisfy Groundstar's need for a buildable lot and the City's need to continue to provide storm drainage on Tuskeegee Street.

Pursuant to City Council Resolution No. 02-132, notice was duly published in the Asheville Citizen-Times on August 30, 2002.

Approval of the resolution will authorize the exchange of the properties as provided in N. C. Gen. Stat. sec. 160A-271.

Planning & Development staff recommends adoption of the resolution authorizing the Mayor to convey property on Mountain Street in exchange for real property located on Tuskeegee Street.

RESOLUTION BOOK NO. 27 – PAGE 242

C. RESOLUTION NO. 02-147 - RESOLUTION AUTHORIZING THE CITY TO APPROVE THE SALE OF CITY-OWNED PROPERTY ON OTEEN CHURCH ROAD TO JAMES R. AND IRMA S. LEWIS

Summary: The consideration of a resolution authorizing the Mayor to convey 1.58 acres of land off Oteen Church Road to Jim and Irma Lewis.

On August 27, 2002, the City Council directed the City Clerk to advertise for upset bids on property off Oteen Church Road. The advertisement ran in the Asheville Citizen-Times on August 30, 2002, as provided in N. C. Gen. Stat. sec. 160A-269. No response was received. Therefore, the offer to purchase from Jim and Irma Lewis in the amount of $24,000 was not upset and the sale to Jim and Irma Lewis should be approved.

Planning staff recommends adoption of the resolution authorizing the sale of the property off Oteen Church Road to Jim and Irma Lewis in the amount of $24,000.

RESOLUTION BOOK NO. 27 – PAGE 243

D. RESOLUTION NO. 02-148 - RESOLUTION AUTHORIZING THE PURCHASING DIRECTOR TO DISPOSE OF CITY-OWNED PERSONAL PROPERTY BY PUBLIC AUCTION ON SATURDAY, OCTOBER 5, 2002

Summary: The consideration of a resolution authorizing the Purchasing Director to dispose of City-owned personal property by public auction on Saturday, October 5, 2002.

The resolution authorizes the City's Purchasing Division to hold a public auction to dispose of motor vehicles, off-road equipment, and other miscellaneous property declared as surplus by various City departments. The auction to be held Saturday, October 5, 2002, at 10:00 a.m. in the Public Works Complex, 161 S. Charlotte Street, Asheville, N.C.

City staff requests City Council approve the resolution authorizing the Purchasing Director to hold a public auction on October 5, 2002, at 10:00 a.m. at the Public Works Complex, 161 S. Charlotte Street, Asheville, N.C.

RESOLUTION BOOK NO. 27 – PAGE 244

E. RESOLUTION NO. 02-149 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A SERVICE AGREEMENT RENEWAL WITH MOTOROLA COMMUNICATIONS AND ELECTRONICS INC.

Summary: The consideration of a resolution authorizing the City Manager to execute a service agreement renewal with Motorola Communications and Electronics, Inc. to provide maintenance of the City's radio communication system for another year at a cost of $9,795.10 per month.

Motorola Communications and Electronics, Inc. has provided maintenance services for the City's radio communications system since installation of the system in 1992. Effective with the service agreement covering the period of September 1994 through August 1995, the maintenance cost per unit of equipment has remained fixed. The service agreements are renewed annually. The maintenance cost per unit of equipment for the renewal period of September 1, 2002, through August 31, 2003, remains fixed at the original cost per unit.

This renewal agreement reflects a monthly decrease of $1,758.80. This is due to the fact that some radio equipment will include labor only as part of the maintenance agreement. The agreement covers additional equipment purchased by the City that has come out of warranty during the past year. The monthly cost of this service is $9,795.10.

Funds have been appropriated in the Finance Department, Information Services Division, in Account No. 110-1005-415-3001 C44108 to cover the monthly cost of this agreement.

City staff recommends City Council adopt the resolution which authorizes the City Manager to execute a renewal of the service agreement with Motorola Communications and Electronics, Inc. to provide maintenance to the City's radio communication system.

RESOLUTION BOOK NO. 27 – PAGE 245

F. ORDINANCE NO. 2954 - BUDGETAMENDMENT TO ALLOW FOR THE EXPENDITURE OF ADDITIONAL FUNDS PROVIDED BY THE HOUSING AUTHORITY FOR THE SUMMER YOUTH EMPLOYMENT PROGRAM 2002

Summary: The Summer Youth Employment Program was unable to be funded by the City for the first time in many years due to the budget shortfall caused by the State of North Carolina. A non-profit agency, Community Solutions for Youth Employment (CSYE), stepped forward and funded the program through a cooperative agreement with the Parks and Recreation Department. The amount provided by the CSYE was $37,400. Because of the demand for summer youth employment positions, the CYSE gained additional financial support from the Asheville Housing Authority, in the amount of $8,928 to pay for additional youth positions. These additional funds require a budget amendment so they can be utilized and to move funds from unused line items to the line item for part-time seasonal salaries.

City staff recommends City Council adopt the budget amendment for the Summer Youth Employment Program 2002.

ORDINANCE BOOK NO. 20 – PAGE 64

G. ORDINANCE NO. 2955 - BUDGET AMENDMENT FROM MOUNTAIN MOBILITY OF BUNCOMBE COUNTY

Summary: The consideration of (1) a budget amendment, in the amount of $50,000, to receive additional funding by Mountain Mobility of Buncombe County to provide two additional bus trips provided by the Asheville Transit to Black Mountain; and (2) a resolution authorizing the City to enter into an agreement with Mountain Mobility of Buncombe County to provide said service.

Mountain Mobility has received federal funds for the provision of additional service for persons seeking to commute to work using public transportation. Mountain Mobility seeks to enter into an agreement with Asheville Transit to use these monies to fund two additional trips to Black Mountain at times conducive to employment commuting. Mountain Mobility will subsequently provide feeder routes with its vans to feed these and currently existing Black Mountain trips run by Asheville Transit.

City staff recommends City Council approve the budget amendment to receive additional funding from Mountain Mobility, and grant City Manager authority to enter into an agreement for same.

ORDINANCE BOOK NO. 20 – PAGE 66

H. RESOLUTION NO. 02-150 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AGREEMENT WITH BUNCOMBE COUNTY TO PROVIDE ADDITIONAL TRANSIT SERVICES TO THE TOWN OF BLACK MOUNTAIN

Summary: See Consent Agenda Item "G" above.

RESOLUTION BOOK NO. 27 – PAGE 246

I. RESOLUTION NO. 02-151 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO A GRANT AGREEMENT WITH THE FEDERAL AVIATION ADMINISTRATION

Summary: The consideration of a resolution approving a grant from the Federal Aviation Administration in an amount not to exceed $604,709.

The Federal Aviation Administration (FAA) has offered a grant agreement to the Asheville Regional Airport. This grant, in an amount not to exceed $604,709, is for the project consisting of: installing runway lighting for Runway 34 (Category II Touchdown Zone Lighting); rehabilitate taxiway lighting, and construct perimeter security/service road, Phase II.

Staff recommends adoption of the resolution authorizing the Mayor to execute the grant agreement for Project No. 3-37-0005-27.

RESOLUTION BOOK NO. 27 – PAGE 247

J. RESOLUTION NO. 02-152 - RESOLUTION SETTING A PUBLIC HEARING ON OCTOBER 8, 2002, TO CLOSE A PORTION OF OLD HAYWOOD ROAD BETWEEN PARK AVENUE AND ROBERTS STREET

RESOLUTION BOOK NO. 27 – PAGE 248

K. RESOLUTION NO. 02-153 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY AN EASEMENT OVER CITY-OWNED PROPERTY ON CHOCTAW STREET TO TILMAN AND SABRINA JACKSON

Summary: The consideration of a resolution authorizing the Mayor to convey an easement over a portion of City-owned property in the East Riverside Redevelopment Project Area on Choctaw Street for a private residential sewer line.

The City owns property (PIN No. 9648.10-25-8823) located between Tolula Lane and Choctaw Street and Town Branch approximately 400 feet west of McDowell Street. Due to its location, shape and topography, its current and anticipated use is for park green space with plans for an improved greenway path along Town Branch.

Tilman and Sabrina Jackson purchased a parcel of land from the City adjacent to the greenway parcel in May of 2002 and have since erected a single-family dwelling. Due to the location of water lines and sewer lines the Jacksons have requested an easement, which would provide the most direct and efficient route to the sewer main. The easement would be solely for the purpose of installing and maintaining the sewer line and would not restrict the City from constructing a greenway path or planting trees which is the proposed use of the City's property.

Approval of the resolution will authorize conveyance of the easement to Tilman and Sabrina Jackson for the purpose of a private residential sewer line.

The staff of the Community Development Division, Parks & Recreation Department and Water Resources Department recommend adoption of the resolution authorizing the easement.

RESOLUTION BOOK NO. 27 – PAGE 249

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilman Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO REZONE TWO LOTS ON ARDMION PARK ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT

Mayor Worley said that this public hearing was continued from the August 13, 2002, at which time the petitioner requested additional time within which to prepare for the City Council meeting.

On September 10, 2002, the petitioner made a written request for a two-week extension in order to arrange neighborhood meetings. Therefore, Councilman Peterson moved to continue the public hearing until September 24, 2002. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

B. PUBLIC HEARING TO CONSIDER AUTHORIZING THE CITY TO ENTER INTO AN EASEMENT FOR AN ECONOMIC DEVELOPMENT INCENTIVE

RESOLUTION NO. 02-155 - RESOLUTION AUTHORIZING EXECUTION AND ECONOMIC DEVELOPMENT AGREEMENT (MINKLES LLC)

Mayor Worley opened the public hearing at 5:30 p.m.

Economic Development Director Mac Williams said that this is the consideration of a resolution authorizing the City to enter into an agreement with Electrolux Home Products for an economic development incentive in the form of an easement onto city-owned property for construction of a retention pond. This public hearing was advertised on August 30, 2002.

Electrolux Home Products operates a regional distribution hub in a facility it leases located at 1310 Fanning Bridge Road in Asheville. The company is proposing an expansion of their distribution capacity by improving the efficiency of their site for increased truck & trailer movements. To accomplish this, an existing stormwater retention pond must be relocated.

The location and size of the new pond requires that a portion of it be located on city-owned property adjacent to the Electrolux site. To assist the company, the city is offering an easement onto its land for the location of the new retention pond. All other costs and liabilities associated with the construction and maintenance of the pond are the responsibility of the company. The pond is being designed to accommodate any future development on the remaining portion of the city property.

With the ability to increase the efficiency of this site, Electrolux has decided to keep the Asheville facility operational. The Asheville operation occupies a 500,000 square foot building and employs 128 people at an average hourly wage of $12.28.

Mayor Worley closed the public hearing at 5:34 p.m.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Ellis moved for the adoption of Resolution No. 02-155. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 251

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. ORDINANCE NO. 2956 - ORDINANCE AMENDING CHAPTER 3 OF THE CODE OF ORDINANCE REGARDING ANIMAL CONTROL

Police Chief Will Annarino said that this is the consideration of an ordinance amending the Animal Control ordinance.

The Asheville Police Department is seeking to improve public safety and the humane treatment of animals by reviewing and updating the animal control ordinance.

The animal control ordinance was last revised on October 27, 1999. In an effort to meet public expectations and insure the most up to date ordinance possible, the Asheville Police Department began a review of the ordinance in early 2002. The ordinance was also modified to establish the City of Asheville's relationship with the animal shelter, which was previously defined by Buncombe County ordinance.

Consistent with City Policy, the Asheville Police Department sought input from organizations such as the Coalition of Asheville Neighborhoods, and the Haw Creek Neighborhood Association and the Kenilworth Neighborhood Association. A public meeting was held and comments were received on August 19, 2002.

The ordinance will be enforced solely by civil citations. If there is a serious violation, the Police Department can criminally charge the violators through state law in terms of dangerous dogs and cruelty to animals.

Chief Annarino pointed out some amendments as follows:

- All persons keeping an animal in the City for 30 days or longer or to all owners whose animal has a set of permanent K-9 teeth are required to obtain an annual license tag for such dog.
- Change in language making it easier to classify barking dogs as a nuisance and have the nuisance definition be in line with the noise ordinance.

- Change wording for the maximum number of animals within a household from "more than six" to "seven or more." However, the maximum number without a permit in the City remains at six.
- Add a section making it unlawful for a person to tether an animal to public property.
- Change in penalty section whereby a violation of any section of the animal control ordinance will be a civil violation where the animal control officer may impose a civil penalty (i.e. $50).
- Owner of an animal must keep the animal on his or her premises or if off premises the animal must be on a leash in the hand of the owner. This does not apply to cats, service animals with the proper documentation and dogs in specified dog parks.
- Addition of language allowing the animal control officer to require a dog owner to obtain liability insurance after a violation of the ordinance.
- If the owner fails to comply with an order from an animal control officer, then each day that the owner violates the order, the owner may be fined $50 per day. Each day in violation constitutes a separate violation.
- The City will attempt to give notice to the owner that his/her animal was impounded. If the owner is unknown, persons much check the designated shelter. The owner has 72 hours to claim his/her animal and the clock begins to run when the animal control officer brings the animal to the shelter. However, according to the Humane Society's policy, if the name of the owner is known, the Humane Society will hold the animal for 10 days. If the owner does not claim his/her animal in 72 hours, the Humane Society can either put the animal up for adoption or destroy it.
- In instances where the animal must be kept at the shelter for more than the 72-hour period, the owner may pay a bond in order to prevent the animal from being put down or put up for adoption.
- Enforcement of the amended ordinance will begin on October 1, 2002.

As a result of discussion at Council's September 3 worksession, Chief Annarino pointed out some further amendments:

- Section 3-12 (h) - It shall be unlawful for any person injuring or killing a domestic animal by striking it with an automobile or other vehicle to fail to contact and cooperate with the local authorities.
- Section 3-29 (c) – Clarification of what happens if the dog is impounded and how the animal can be retrieved.
- Section 3-30 (a) – The animal control officer shall have the authority to summarily seize the animal from the premises when they determine that the animal is receiving insufficient care or treatment or that the animal in the surrounding circumstances is dangerous to the health, safety or welfare of the general public.

Assistant City Attorney Curt Euler explained the difference between a civil vs. criminal penalty regarding this ordinance.

Upon inquiry of Vice-Mayor Bellamy, Mr. Euler explained that if a dog is deemed dangerous or potentially dangerous, the victim of an animal bite can file criminal charges against the dog owner and it would be up to the courts to determine restitution.

Animal Control Supervisor Brenda Covey responded to various questions from Council regarding when a dog can be seized, the reasoning why a dog would be quarantined in the home vs. being taken to the animal shelter, the steps that would be taken when the animal control officer goes on a call for a dog bite, and what is involved in a bite investigation.

Councilman Peterson felt that having a public nuisance declared should not only be for "adjoining" property owners but for "surrounding" property owners. Mayor Worley explained that it doesn't require that the adjoining property owner make a compliant - a complaint could come from six houses away. The standard is that if it's too loud for the surrounding property owners, it's going to be much louder for the adjoining property owner. It's the standard, not who makes the complaint.

Councilman Peterson explained why he felt a public nuisance should be declared not when the keeping of an animal is "frequently" at large, but "occasionally" at large.

Councilman Mumpower felt that the amended language in Section 3-12 (h) was a little heavy-handed and suggested that persons be asked to make a reasonable and immediate effort to contact the animal's owner and/or animal control.

Mr. Fred English, Haw Creek resident, felt that the ordinance is not strict enough and must be enforced.

Ms. Mary Folds, West Asheville resident, was concerned about the sanitation in the City, but more importantly pointed out violations occurring in her back yard with dogs and problems she has encountered with the dogs and their owner. She expressed her frustration with the animal control officers not enforcing the ordinance.

Mr. Clark Walter, Chairman of the Libertarian Party of Buncombe County, said the proposed ordinance delegates to the Police Department the enforcement of animal control regulations and they suggest the powers granted to the animal control officers are in some cases excessive and too vaguely defined. Sections 3-8 (c) should not be applied to animals that do not leave the home. In Section 3-9 (a) (4), they suggest that the owner be required to keep the dog muzzled and leashed at all times when off of the owner's property. The owner should be held responsible and the choice of insurance should be left to the owner. In Section 3-12 (c), owners should be permitted to tie leashed dogs to public property with an approved muzzle. Warning should be given and entered into the computer. He explained how the fees for dog tags are grossly inadequate to cover the total costs for the enforcement program.

A resident who has been recently attacked by a dog stressed that any violation of this ordinance should be a criminal offense.

Ms. Shirley Campfield said that if the City is going to have an ordinance, then the ordinance must be strictly enforced and when violations occur, tickets should be given.

Mr. Bob Brummond, Haw Creek resident, said that the Haw Creek Animal Concerns Committee feels that City Council should establish an animal control advisory committee to address animal control matters on an on-going basis. In addition, they felt that if an officer sees a person walking a dog on a leash, that the officer should stop and ask the person if they have a way to clean up after the dog. If they do not, then it shows that they have no intention of abiding by the law to clean up after their pet, and they should be given a citation.

Mr. Tom Glanville, North Asheville resident, pointed out that owning a dog is a responsibility and the ordinance should be written with that in mind. In addition, he felt some language should be in the ordinance for false accusations.

Mr. Thomas Penland, Haw Creek resident, stressed that the ordinance needs enforcement.

Mr. Bob Swan, Haywood Street resident, supported the ordinance. He suggested a police officer approach a person walking a dog and asking them how they will handle cleaning up after their animals. If they don't have anything, then the officer can hand them a bag. That way, people will more than likely be prepared next time.

Ms. Bernie Wolf said understood that the ordinance is to protect the safety of citizens and pets, but doesn't think taking away the dog tethering is consistent with pet safety. Asheville shouldn't be advertised as "pet friendly" if it does not offer alternatives to attaching a dog's leash to something while making a quick purchase. She suggested a way to deal with this type situation and passed out pictures. She said Telluride, Colorado, has installed leash racks (puppy parking) convenient to shopping and eating establishments. She urged Council to seek another alternative other than banning tethering.

Councilman Peterson asked why owners could not be cited for not carrying bags to clean up after their pets. He felt it was a way to send a message that we are serious about enforcement. Mr. Euler said that the matter was considered and it was the consensus that it would be hard to fine someone $50 for not having clean-up material in his or her pocket. In addition, there are a limited number of animal control officers and they have to prioritize what they will enforce. Chief Annarino said that he would have a serious concern of issuing a citation before an actual offense occurs.

Upon inquiry of Vice-Mayor Bellamy, Chief Annarino outlined how they plan on educating the public on these changes. Some ways include brochures, door hangers, availability of offices at community and association meetings, information on the government channel, etc.

When Vice-Mayor Bellamy asked about an animal control advisory committee, City Attorney Oast said that to the extent the enforcement is in the Police Department, there would probably be a liaison from the Police Department.

Councilwoman Jones asked if the Police Department would be open to something similar to a "puppy park." Chief Annarino said that something in the future might work. Perhaps a non-profit group or someone wanting to lead an independent effort (separate and apart from the Police Department) could establish something similar to that and then the ordinance could be revisited.

Mayor Worley noted that the ordinance does not prohibit the tethering of animals to private property, but only to public property.

Councilwoman Jones suggested that Pritchard Park have a box installed where bags are available, as they are in Montford Park, for owners to use to clean up after their dogs.

Vice-Mayor Bellamy felt that another dog park closer to downtown might be good idea because a lot of people do use the one we currently have.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Vice-Mayor Bellamy moved to adopt Ordinance No. 2956, with the following two amendments: (1) Section 3-12 (h) read "Any person injuring or killing a domestic animal by striking it with an automobile or other vehicle shall make reasonable and immediate efforts to notify the owner of said animal, if ownership information is available. If the owner cannot be contacted and the animal is still alive, reasonable measures must be taken to notify appropriate local agencies;" and (2) Section 3-9 (a) (3) read "The keeping of any animal which occasionally is at large. This motion was seconded by Councilman Mumpower and carried unanimously.

At Councilman Peterson's request and Council's consensus, City Manager Westbrook said that he would bring information before Council on establishing an animal control advisory committee. He did note that the ordinance should be in effect for a period of time before any committee is formed.

ORDINANCE BOOK NO. 20 – PAGE 68

B. RESOLUTION NO. 02-156 - RESOLUTION APPOINTING MEMBERS TO THE PLANNING & ZONING COMMISSION

Vice-Mayor Bellamy said that the terms of Selina Sullivan, Hedy Fischer and Max Haner, as members on the Planning and Zoning Commission, expired on August 14, 2002.

Mr. Haner has served two full successive terms and is not eligible for reappointment.

On September 3, 2002, City Council interviewed Hedy Fischer, Selina Sullivan, Richard Griffin, Barbara Fishburne and Kenneth Kidd.

On September 10, 2002, City Council interviewed Gail Moody, Jane Mathews and Nathaniel Cannady.

Hedy Fischer received 7 votes; Selina Sullivan received 6 votes; Richard Griffin received no votes; Barbara Fishburne received no votes; Kenneth Kidd received no votes; Gail Moody received 1 vote; Jane Mathews received 2 votes and Nathaniel Cannady received 5 votes.

Therefore, Selina Sullivan was reappointed to serve a three year term, term to expire August 14, 2005; Hedy Fischer was reappointed to serve an additional three year, term to expire August 14, 2005; and Nathaniel Cannady was appointed to serve a three year term, term to expire August 14, 2005. All terms are until their successors have been appointed.

RESOLUTION BOOK NO. 27 – PAGE 252

VI. OTHER BUSINESS:

Claims

The following claims were received by the City of Asheville during the period of August 23-29, 2002: Lori Brewer (Streets), Pat Doran (Streets), Bobbie Bishop (Police), BellSouth (Water), Bob Blanchard (Water) and Karen Moseley (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mayor Worley said that the City Manager would be providing Council with an update on the conditional use permit for the Super Wal-Mart in the near future.

Mr. Fred English stressed that signs that are put out need to be removed after the event. If the sign is not removed within 24 hours after the event, it should be taken down, returned to the address on the sign and that person issued a citation for $50.

Ms. Martha Fullington, Chair of the Historic Resources Commission of Asheville and Buncombe County (HRC), said that the City of Asheville was designated as a Destination of Distinction by the National Trust for Historic Preservation. Representatives from the National

Trust for Historic Preservation in Washington, D.C., and Charleston, S.C., would like to present the City with the award on September 24, 2002, along with a brief discussion of what this means to the City of Asheville's preservation community and to the economic benefits of our City and County. She also reported about what the HRC does for the community.

Mr. Frank Thomson, Vice-Chair of the Historic Resources Commission of Asheville and Buncombe County, explained how proud Asheville should be in receiving the prestigious award from the National Trust for Historic Preservation.

Mr. Neal Booker spoke about the need for affordable housing in Asheville and how he has been working on that for the past three years. Two problems he has run into is that incentives for developers are not known and he felt the City should publicize those incentives more. In addition, another problem encountered is getting homeowners financing. He felt the key to have more affordable housing is education – for the developer and for homeowners.

Mr. Alan Ditmore, Leicester resident, said that even though there are arguments of how the expansion of the City's extraterritorial jurisdiction benefits the environment, he explained how expansion is a detriment to the environment as well.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:37 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – September 24, 2002 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Councilwoman Jones gave the invocation.

I. PROCLAMATIONS:

A. RESOLUTION NO. 02-154 – RESOLUTION OF APPRECIATION TO ROBERT E. SHEPHERD

Mayor Worley read and presented a resolution of appreciation to Robert E. Shepherd who is retiring as Executive Director of the Land-of-Sky Regional Council.

RESOLUTION BOOK NO. 27 – PAGE 250

B. PRESENTATION OF THE MERIT AWARD

Mr. Craig Van Dussen, Branch Manager of WK Dickson in the Asheville Office, and Mr. Edward Czyscon, Branch Manager of WK Dickson in the Atlanta Office, President of Georgia American Society of Landscape Architects, and representative for the American Society of Landscape Architects, presented to Mayor Worley, Chair of the Recreation Board Frank Fishburne and Parks and Recreation Director Irby Brinson, the Merit Award they received for their design of the French Broad River Park Phase IV Master Plan.

C. PRESENTATION OF THE DESTINATION OF DISTINCTION AWARD BY THE NATIONAL TRUST FOR HISTORIC PRESERVATION

Mr. John Hildreth, representative from the National Trust for Historic Preservation, presented the City with the Destination of Distinction Award by the National Trust for Historic Preservation and briefed Council on what this designation means to the City of Asheville's preservation community and to the economic benefits of our City and County.

Ms. Martha Fullington, Chair of the Historic Resources Commission of Asheville and Buncombe County (HRC), along with members of the community, briefed Council on the positive impact historic preservation has had in Asheville. They explained how historic preservation increases property values, how it increases tax revenues, how it creates jobs, how it relates to smart growth and how it maintains our sense of place.

A brief discussion occurred regarding the possible reorganization of the HRC. Ms. Fullington explained why the HRC should not be reduced from its current 14 members to 7 members and said that they are discussing this with the Director of Planning and Development. Chief Planner Gerald Green explained that a focus group has been formed which will meet to discuss how to improve the efficiency of the Historic Resources Division.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON SEPTEMBER 10, 2002

B. RESOLUTION NO. 02-157 - RESOLUTION FIXING DATE OF A PUBLIC HEARING ON OCTOBER 8, 2002, ON THE QUESTION OF VOLUNTARY ANNXATION OF PROPERTY LOCATED NORTH OF LONG SHOALS ROAD AND IDENTIFIED AS OAKBROOK, SECTION 3 AT BILTMORE PARK

Chief Planner Gerald Green responded to a concern from Councilman Dunn who asked if the City was being fair to require developers who develop property within the City to mitigate traffic if there aren't any similar requirements to parties who are outside the City who request annexation.

RESOLUTION BOOK NO. 27 – PAGE 253

C. RESOLUTION NO. 02-158 - RESOLUTION AUTHORIZNG THE CITY MANAGER TO EXECUTE A CONTRACT WITH APAC CAROLINA INC. FOR CONTRACTED PAVING 2002-03

Summary: The consideration of a resolution authorizing the City Manager to execute a contract with APAC Carolina Inc. for the project known as "Contracted Paving 2002-2003".

The City annually budgets for paving city streets that are in need of repair as listed on the Institute for Transportation, Research and Education (ITRE) report. City Engineering and Public Works staff reviewed several streets that were listed on the ITRE report and chose eight streets to be resurfaced based upon their condition and the staff members opinion of probable cost to resurface.

The Engineering Department has developed construction documents and specifications for resurfacing Maney Avenue, Linden Avenue, Julia Street, Heritage Drive, Lionel Place, Guinevere Court, Galahad Drive and Compton Drive.

Money for this project will come from the $600,000 allocated to the Public Works Department's operating budget for service priorities for Streets and Sidewalks.

The project was advertised for three weeks. The Engineering Department received very competitive bids on Friday, August 30, 2002. Three bids were received and opened. One bid was from APAC Carolina Inc. in the amount of $215,714.35, the second bid came from Tarheel Paving Company in the amount of $229,049.06 and the third bid came from Precision Contracting in the amount of $306,390.00.

The construction time for this phase of the project is identified as 90 calendar days in the contract documents. All bids were reviewed by the Office of Minority Affairs for compliance with the City's minority business goals. The bid by APAC Carolina Inc. was found to be in full compliance and was deemed as a responsive bid.

Due to the very favorable unit prices received, City staff recommends that City Council adopt a resolution authorizing the City Manager tc execute a contract with APAC Carolina Inc. in the amount of $215,714.35 for the project known as Contracted Paving 2002-2003.

RESOLUTION BOOK NO. 27 – PAGE 256

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilman Peterson moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING RELATIVE TO REZONING PROPERTY AT 738 TUNNEL ROAD FROM RM-6 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO HIGHWAY BUSINESS DISTRICT

ORDINANCE NO. 2957 - ORDINANCE TO REZONE PROPERTY AT 738 TUNNEL ROAD FROM RM-6 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO HIGHWAY BUSINESS DISTRICT

Mayor Worley opened the public hearing at 6:09 p.m.

Chief Planner Gerald Green said that this is the consideration of an ordinance to rezone property located at 738 Tunnel Road from RM-6 Residential Multi-Family Low Density District to Highway Business District. This public hearing was advertised on September 13 and 20, 2002.

The applicant, Norman Lizzaraldi, is requesting rezoning of approximately half of the 0.65 acre (PIN No. 9658.11-77-0013) split zoned property to Highway Business District. The southern portion of the property (abutting Tunnel Road) is currently zoned Highway Business. The requested rezoning would permit the northern portion of the lot to be used for offices or other commercial uses supported by the automobile traffic on Tunnel Road. Access to the portion of the property to be rezoned is via Mountain View Road off Tunnel Road.

Two buildings are located on the property. Both are currently used as offices; the one on the residentially zoned portion of the property has a residential appearance but has been used as an office building for approximately 9 years. The requested rezoning would permit the office use of this building to be made conforming. The portion of the property to be rezoned is abutted by residential property, both single family and multi-family, on the north and west. Commercial uses abut the property on the east and south. This portion of the property is buffered from the abutting residential properties with existing vegetation and by changes in topography. Any future redevelopment of the property would require compliance with all applicable development standards, including buffering, lighting, and off-street parking. Given the size of the property, any redevelopment of the site would be limited.

The Planning and Zoning Commission voted 6-0 to recommend approval of the rezoning of the property located at 738 Tunnel Road from RM-6 to HB.

Mayor Worley closed the public hearing at 6:15 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 2957. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 87

B. PUBLIC HEARING RELATIVE TO REZONING PROPERTY AT 400 CARIBOU ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 2958 - ORDINANCE TO REZONE PROPERTY AT 400 CARIBOU ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

Mayor Worley opened the public hearing at 6:17 p.m.

Urban Planner Carter Pettibone said that this is the consideration of an ordinance to rezone property located at 400 Caribou Road from RS-8 Residential Single-Family High Density District to RM-16 Residential Multi-Family High Density District. This public hearing was advertised on September 13 and 20, 2002.

The applicant, Robert Tucker, is requesting rezoning of the 0.69-acre parcel (PIN No. 9657.13-13-6778) in order to redevelop the property for uses permitted in the RM-16 District. The purpose of the RM-16 District is to permit a full range of high-density multi-family housing types along with limited institutional, public and commercial uses appropriate in high-density residential areas.

Two existing buildings are located on the property. One is an abandoned mobile home on the eastern portion of the site while the other is a former nursing home that contains nearly 5,000 square feet of space. The property is bordered by three rights-of-way, only two of which actually have streets built in them (Caribou Road and Booker Avenue). The site's main frontage is on Caribou Road, however, the parcel is a through-lot with frontage on Booker Avenue as well. Caribou Road functions as a major north-south collector street running parallel to Hendersonville Road providing access to a number of neighborhoods in the area.

This property is located within the City limits in an area that is predominantly residential. The properties immediately adjacent and across Caribou and Booker are zoned RS-8 as is the majority of the surrounding neighborhood save for a group of vacant properties zoned Neighborhood Business District located a few blocks southwest of the property at the intersection of Shiloh Road and Kent Street. The property is also located in a mobile home overlay district. The existing land uses in the area include single-family detached homes as well as mobile homes.

The applicant had recently requested to rezone this property to Neighborhood Business District, but withdrew his request at the City Council's public hearing on May 28, 2002, due to significant neighborhood opposition. During the review period of that rezoning process, City staff had originally recommended that the applicant withdraw and refile the rezoning as a request for RM-16, since staff thought this District would be a more appropriate one due to the likely traffic impact generated if the property was rezoned to Neighborhood Business District and used primarily for office use. The applicant also met with representatives of the neighborhood prior to filing the current rezoning request to discuss the possibility of RM-16 zoning for the property.

City staff feels RM-16 is an appropriate district for this property since it would remain zoned residentially, but the existing building on the site could be retained and used for an economically viable small-scale institutional use, like a child or adult day care center or assisted living care facility, or as multi-family residential units. In addition, the traffic generated by uses permitted in the RM-16 would likely be considerably less than uses in a business district. As such, staff recommends approval of the request.

The Planning and Zoning Commission voted 6-0 to recommend approval of the rezoning of the property located at 400 Caribou Road from RS-8 to RM-16. Planning staff recommends approval of the request as well.

Upon inquiry of Vice-Mayor Bellamy, City Attorney Oast explained why he did not feel that rezoning this property would constitute spot zoning.

Mayor Worley closed the public hearing at 6:27 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Peterson moved for the adoption of Ordinance No. 2958. This motion was seconded by Councilman Ellis and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 89

C. PUBLIC HEARING RELATIVE TO REZONING PROPERTY AT 169 STARNES COVE ROAD FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO NEIGHBORHOOD BUSINESS DISTRICT

ORDINANCE NO. 2959 - ORDINANCE TO REZONE PROPERTY AT 169 STARNES COVE ROAD FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO NEIGHBORHOOD BUSINESS DISTRICT

Mayor Worley opened the public hearing at 6:28 p.m.

Mr. Alan Glines, Urban Designer, said that this is the consideration of rezoning property located at 169 Starnes Cove Road from RS-4 Residential Single Family Medium Density District to Neighborhood Business District. This public hearing was advertised on September 13 and 20, 2002.

The request is for the rezoning of a .76-acre tract (PIN No. 9618.19-72-3414) in the City's extraterritorial jurisdiction (ETJ) from RS-4 to Neighborhood Business District. Harold and Susan Hoglen who reside at 55 Old Starnes Cove Road own the property.

The properties to the north, east and south are zoned RS-4 (Residential Single Family 4 units per acre). The properties to the west are outside of the City's ETJ area. The parcel is located at the intersection of Pisgah View Road and Starnes Cove Road. An existing building on the property has operated for a number of years as a general store for the community. The parcel also contains a residence near the back of the lot. The parcel just across from the subject property on Pisgah View Road is also used commercially (this parcel is outside the ETJ area).

The Neighborhood Business zone is designed to allow low intensity business centers which are accessible to pedestrians from the surrounding residential neighborhoods. The intent is to provide for daily convenience and personal service needs while minimizing conflicts with the surrounding residential uses. Structures may be constructed or enlarged to a 3,000 square foot footprint. Multiple story structures may be built with a total gross square footage of 6,000 square feet if the upper stories contain residential units.

The site is easily accessed with frontage on both Starnes Cove Road and Pisgah View Road.

The Planning & Zoning Commission voted 6-0 to recommend approval of the rezoning of the property located at 169 Starnes Cove Road from RS-4 to Neighborhood Business District. City staff recommends approval of the rezoning request as well.

Ms. Hoglen said that she had met with neighbors and has worked out an agreement regarding the concerns of the neighbors regarding alcohol sales. An agreement was reached that there would be no single beers sold on the premises, nor would there be any on-site drinking.

City Attorney Oast reminded Council that rezoning this property to Neighborhood Business District means it can be used for any purpose under that zoning classification. Even if this were a conditional use, City Council could not impose conditions regarding sales of alcohol. That is controlled by the ABC Board. Whatever agreements the applicant has with the neighbors are between them.

Mayor Worley closed the public hearing at 6:36 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 2959. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 91

D. PUBLIC HEARING TO REZONE TWO LOTS ON ARDMION PARK ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT

Mayor Worley said that this public hearing was continued from the August 13, 2002, at which time the petitioner requested additional time within which to prepare for the City Council meeting. On September 10, 2002, the petitioner requested an additional two-week extension in order to arrange neighborhood meetings.

On September 23, 2002, the City received a letter from the petitioner Mr. Dean Pistor "requesting to be removed from the agenda … rezoning in Ardmion Park. On the 18th, I met with neighbors and discussed concerns they may have for the development of multi-family housing and we have reached an agreement to request a conditional use RM-16 zoning for that project." Mr. Pistor said that he would be in touch with the Planning Department regarding further action.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

VI. OTHER BUSINESS:

Claims

The following claims were received by the City of Asheville during the period of September 1-19, 2002: Susan Carter (Water), Wayne Hensley (Water), Marlene Worley (Streets), Douglas Campbell Jr. (Streets), Heather Ross (Transit Services), Roger Hall (Police), BellSouth (Water) and John Darity (Streets).

These claims have been referred to Asheville Claims Corporation for investigation.

Lawsuit

The City was served with a Petition for Writ of Certiorari and Complaint for Declaratory Judgment on September 16, 2002 from Beverly Hills Area Homeowners Association, et al. The nature of the proceeding is to declare the rezoning ordinance in the Riverbend Marketplace matter as improperly adopted and invalid, that UDO Section 7-5-9 (a) (4) is invalid, revocation of conditional use permit and nullify ordinance granting conditional use permit. This matter will be handled in-house, but the attorneys for the applicant will intervene and do most of the work.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Comments by Fred English

Mr. Fred English, Haw Creek resident, commented about the raising of taxes when his services are not improving.

Water Efficiency Program

Ms. Hazel Fobes, Chair of Citizens for Safe Drinking Water and Air, said "steps are underway which could drastically reduce the scope and impact, or even abolish, the program of education of children and citizens groups on the importance of water conservation. One position being heard is that we do not need conservation; rather that we need to produce more water in order to generate income. Under consideration is the elimination of two posts in the Conservation Division of the Water Resources Department. The two women in those posts, among other duties, make dramatic presentations in schools and field trips and also workshops to civic, business and other groups here (and in the world) to eliminate wasteful use of water which with air is essential to life on the plant. The facts for your attention are first, that the Water Authority approved a program and budget for the year 2002-2003 which includes funds for these two posts and for an active public education program on water conservation. Any radical change in that provision, in our view, requires a full consultation with and hearing by the Board of the Water Authority – not policy-making by the Water Resources Department. The City Council and County Commissioners approved that program and budget and should be informed of any radical change in its implementation." School teachers and concerned citizens want water conservation to be covered in their discussions and the Water Authority should undertake a full discussion of this matter without delay and report to the Council and Commissioners. She passed out information regarding the Water Conservation Division.

City Manager Westbrook felt that there is some information being circulated that is not fact. He would like to meet each member of Council and explain to them, from the staff's prospective, what will be presented to the Water Authority. He said it is a re-engineering idea and since it has not in a form yet to even go to the Water Authority, we are premature in talking about it in that respect. He wanted City Council to have the correct information before they talk to the Water Authority.

Councilwoman Jones was in complete support of good water conservation and education.

Councilman Dunn suggested the Water Authority review the tap-on fee. Perhaps if the fees were not so high, the City could get more water users on line.

Mr. Gary Semlak, former Water Authority Vice-Chair, spoke in support of the water efficiency program and felt it was a long-term effort that should not be altered in any way.

128

Ms. Nelda Holder, President of the League of Women Voters of Asheville-Buncombe County, said that they have heard directly from the two women in question that they were being offered dismissal or a night-time security job at a much lower responsibility and something that would certainly not utilize their training and professionalism. That does not coincide with the statement that the City wants to allocate their resources better. The conservation program is an award-winning program that speaks well for the City and the women who are running the program. Conservation is certainly not a program that the City should cut whether we are in a period of heavy rain or serious drought. She was concerned about the abruptness of the announcement to the two women and the fact that this is a public program and a policy issue. The handling of the matter did not allow for these women to speak to their own issue. If it were a monetary problem they should have been allowed time to look for grants and other ways to manage the program. If it's not a monetary program and truly a policy program, then she encouraged Council to ask their Water Authority representatives to speak in favor of maintaining the program.

Mr. Gwain Mainwaring, the first Captain Hydro, went into classrooms to educate children about water conservation and water issues. During the time he spoke with the children, he was able to talk about a lot more than just water conservation, e.g. water cycle and where water comes from. He felt that the program is very important.

Ms. Leni Sitnick said that in recognizing the budget dilemma she hoped that as this is discussed, that you don't look to generate revenues by dissolving, even in part, any part of the water efficiency program. Stopping the leaks and making sure everyone pays their fair share for water is the way to generate revenue. This program has received numerous awards and other states are emulating this program. When kids go on field trips, they are there in part having fun. When kids are in the classroom, they have their learning and thinking caps on. It's a different mode. The City and the Water Authority should not allow any part of this program to be diminished.

Interim Water Resources Director David Hanks updated City Council on our current water levels and explained the percentage of unaccounted water and what the City is doing to locate that water loss.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:25 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – October 1, 2002 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

City Council Community Meeting on October 29, 2002, at the Public Works Facility located at 161 S. Charlotte Street at 7:00 p.m.

Contract with the Asheville Citizen-Times

Summary: The consideration of a resolution authorizing the City Manager to sign a weekly frequency advertising contract with the Asheville Citizen-Times.

Each year City staff and the staff of the Asheville Citizen-Times reviews retail advertising that the City has placed during the year to determine what rates the City will qualify for the following year. This year, the City qualifies for a weekly frequency rate of 16 to 31 column inches per week.

The open rate for advertising in the Asheville Citizen-Times is $47.96 per column inch daily and $64.67 per column inch on Sunday. This contract will allow the City to advertise for $30.45 per column inch daily and $41.43 per column inch on Sunday. Based on the amount of advertising placed in 2002, the City will save $59,534 by signing the weekly frequency contract.

This contract is valid for all City departments that advertise with the Asheville Citizen-Times, including the Asheville Civic Center.

Staff recommends approval of the resolution authorizing the City Manager to sign a weekly frequency advertising contract with the Asheville Citizen-Times.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

UPDATE ON UDO AMENDMENT REVIEW

City Attorney Oast said that this Unified Development Ordinance amendment is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearing, which has been re-scheduled to October 8, 2002. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Create Neighborhood Corridor Zoning District

Chief Planner Gerald Green said that this ordinance revision was reviewed by City Council at it's August 20, 2002, worksession and as a result of comments made at that worksession, the amendment is being brought back again for review. He said that this is the consideration of an ordinance amending the Unified Development Ordinance (UDO) to create a new mixed use in-fill corridor zoning classification, the Neighborhood Corridor District, which incorporates City Council direction for Smart Growth and sustainable development initiatives as well as input from the community.

Since the first presentation of the Neighborhood Corridor zoning district to City Council on August 20, 2002, staff has met with the Coalition of Asheville Neighborhoods, Economic Development Task Force, and the self-named Broadway Coalition (development interests and neighborhood residents). A number of meetings have been held with the Broadway Coalition group and several changes have been made to the proposed district. Most of the discussion and changes have centered on uses permitted along the corridor, the scale of the potential structures and some requirements for mixed-use projects. The items that staff feels could be changed are noted here:

(1) Permitted Uses:

Remove	Bars and nightclubs
Add	Pubs that by definition serve food (will require a revision to the definition section of the ordinance).
Remove	Parking decks
Ensure	That parking structures can be built as a part of an allowed project in the district in the parking standards section of this district.

(2) Scale and Height:

A series of incentives have been created to encourage projects to meet the community goals of affordable housing, a variety of residential units, and some balance of office and retail uses. These incentives also allow some of the neighborhood concerns about height and building scale to be addressed. The following illustrates this incentive program:

• Base Density permitted in NCD = 24 units/ acre	Bonus to 32 units / acre
• Building footprint maximum in NCD = 12,000 S. F.	
• Building square foot maximum in NCD = 24,000 S.F.	Bonus to 48,000 S.F.
• Base building maximum height in NCD = 3 stories	Bonus to 4 stories

Incentive Table

Incentives	Mixed Use	Residential
Density > 24 units / acre	Minimum 20% square footage in building retail or office	In combination with, 25 % of units provided are affordable units OR 25% of the units are < or = to 700 S.F. each and 10 % of the residential units are affordable.
Building square footage > 24,000 S.F.	Minimum 25% of building s.f. is retail OR minimum 20 % s.f. is retail and 15 % s.f. is office	In combination with a minimum of 25 % of building s.f. are residential units
Height > than 3 stories		Minimum of 25 % of building s.f. are residential units

(3) Design Standards:

To ensure that new projects are in keeping with the scale and bulk of the surrounding neighborhoods a few additional design and operational issues have been included in the language for the district that takes their inspiration from the Charlotte Street Overlay District: Where new building facades will be wider than 45 feet the façade surface shall be subdivided into portions not exceeding this distance by varying setbacks, roof forms, or other architectural elements.

We also propose to change the wording in the NCD to require that upper level windows make up at least 25% of the wall surface to allow a fuller range of uses to utilize the upper floors of buildings. The previous ordinance proposed that upper level windows make up 40% of the wall surface.

The Board of Adjustment will be authorized to consider requests to waive some basic design standards for all buildings (articulation and fenestration).

In presenting these changes to City Council, staff does not intend to suggest that all parties are in total agreement with every item in the revised provisions of this district. Some members of the community still have concerns about the height of the structures permitted, some about the size of the footprint of the structures. What staff has tried to do is reach a compromise that will alleviate the bulk of the concerns that they have heard. Staff feels that the incentive table will do just that and create a healthy mixed use community along our medium sized corridors where this district is applied.

City staff recommends City Council provide direction with regard to any changes desired for this district prior to the public hearing.

Discussion occurred regarding the proposed changes and suggestions were made regarding affordable housing and sidewalk standards.

It was the consensus of City Council to continue the public hearing, which is scheduled on October 8, 2002, until either October 22, 2002, or November 12, 2002, so that the Planning Department can continue to meet with groups to review the proposed ordinance. The continuation date will be determined by the Mayor and noted prior to the meeting of October 8, 2002.

Councilman Jones asked that Planning staff begin developing a list of pros and cons to amend the Unified Ordinance to require developers to meet with neighbors and not just strongly encourage them to meet with the neighbors. Councilman Mumpower felt a better way than creating another level of regulation might be to look for creative ways or incentives for that communication to occur. This matter will be placed on an upcoming worksession agenda.

CAROLINA AVENUE RIGHT-OF-WAY CLOSING

City Attorney Oast said that this matter is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearing, which has been scheduled for November 12, 2002. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Public Works Director Mark Combs said that this is the consideration of a resolution of intent to close the right-of-way known as Carolina Avenue from Mount Clare Avenue to its dead-end and setting a public hearing on November 12, 2002.

According to N. C. Gen. Stat. sec. 160-299, a City has the authority to permanently close a street or alley without regard to whether it has actually been opened.

To proceed with this process, Walter Christian, Montview Drive resident, on behalf of the Montview Drive Neighborhood, has requested to close the right-of-way known as Carolina Avenue from Mount Clare Avenue to the dead end.

Public Works Department staff has determined that the right-of-way known as Carolina Avenue, beginning at Mount Clare Avenue, and ending at the dead end, is not part of an adopted street plan and is not a City maintained right-of -way. Lots bordering Carolina Avenue are PIN Nos. 9649-09-26-1492, 1531, 0596, 0650, 0605, 1149 and 9649-09-16-8599, 8801, 9792, 9778, 9846, 9966 and 9649-09-27-0013, 0047, 0171, 0217 and 9649-09-17-8176.

The Engineering and Planning and Development Departments recommend that the right-of-way not be closed for the following key reasons:

- The right-of-way provides potential future access to developable property. Staff estimates that the existing right-of-way would facilitate the development of up to 14 lots;

- The Carolina Avenue right-of-way is important for the long-term transportation connectivity off Mount Clare. A current obstacle to the neighborhood is its lack of ready access to the local and state street network. Closing Carolina Avenue would potentially compound this problem in the future; and

- The right-of-way is essential for continuing the potential in-fill of single-family residential development. Closing the right-of-way may encourage multi-family or office development since there are owners who would not be likely to develop a single-family subdivision without better access.

City staff recommends that City Council adopt the resolution setting a public hearing for November 12, 2002, to close Carolina Avenue from Mount Clare Avenue to the dead end.

Councilman Peterson said that the adjoining property owners to the right-of-way have a concern of people walking and congregating in their backyards.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

UPDATE ON CIVIC CENTER

Mayor Worley updated City Council on a meeting he had with Mr. Crawford Murphy and Ms. Lillian Fisher regarding the performing arts facility on the grounds of the Renaissance. Mr. Murphy said that more detailed information will be available by Council's next informal update on November 5 and they requested to be allowed to make a presentation before Council at that time.

Councilman Mumpower felt it would be appropriate to allow a representative of The Dual Jewel Project to make a brief presentation to Council at the November 5 worksession as well because City Council is interested in hearing about organized efforts and proposals.

Mr. Scott Osborne, representative of The Dual Jewel Project, presented City Council with a printed update of the conception and development of the projects to date along with a power point disc.

Mayor Worley said that City Council has the Heery report and there are other things going on in the community. He understood it was Council's decision to give the remainder of this year for those projects to develop to a feasible stage and demonstrate their feasibility because that would impact how Council might make a decision on going forward with the Civic Center. In January of 2003, he understood that Council will look at overall picture, what the feasibility or likelihood of success of other projects would be, and then Council would weight that information and make their decision about moving forward. After a decision is made, the task will then be to go out and build support for the decision.

Discussion occurred regarding Councilman Dunn's comment about what the City's alternative is if City Council cannot reach a consensus, or there is no funding stream or no reliable groups to step forward to help with funding.

All of Council agreed that there are a variety of options including just maintaining the existing facility.

City Manager Westbrook said that approximately 4-5 years ago, a consultant estimated $10 Million just to bring the facility up to Code.

Councilman Peterson felt that the first step might be to find out what is the minimum that has to be done and then build from there. Even if Council agrees to move forward on a particular plan, we may not get funding or public support for the plan.

Upon inquiry of Councilman Peterson, City Manager Westbrook explained why the City would probably do Certificates of Participation for the funding mechanism instead of General Obligation Bonds or Revenue Bonds.

It was the consensus of City Council to have a 10-15 minute each formal presentation by a representative for the performing arts facility and a representative for The Dual Jewel Project at the November 5, 2002, worksession.

BOARDS AND COMMISSIONS

It was the consensus of City Council to readvertise for vacancies on the Civic Center Commission and the Downtown Commission.

It was the consensus of City Council to have the City Clerk prepare the proper paperwork to reappoint Gene Bell as Chair to the Civil Service Board.

It was the consensus of City Council to have the City Clerk prepare the proper paperwork to appoint Jack Saye to the Greenway Commission.

It was the consensus of City Council to appoint a City Council member to the Regional Water Authority.

MISCELLANEOUS

A brief discussion was held on the following items: dumpster trash; why the City has an appointed Water Authority and School Board; and the possibility of Buncombe County joining in the lawsuit against the State regarding reimbursements.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 5:17 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – October 8, 2002 - 5:00 p.m.

Regular Meeting

Present:	Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson
Absent:	None

INVOCATION

Councilman Mumpower gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING OCTOBER 10, 2002, AS "PUT THE BRAKES ON FATALITIES DAY" IN THE CITY OF ASHEVILLE

Councilman Mumpower read the proclamation proclaiming October 10, 2002, as "Put the Brakes on Fatalities Day" in the City of Asheville. He presented the proclamation to President-Elect Marc Worth of the PENC Western Carolina Chapter and Mr. Robert Welch, Past President of the Western Carolina Chapter of PENC, who briefed City Council on some activities taking place during the day.

B. PROCLAMATION PROCLAIMING OCTOBER 18, 2002, AS "CLEAN WATER ACT DAY" IN THE CITY OF ASHEVILLE

Councilman Peterson read the proclamation proclaiming October 18, 2002, as "Clean Water Act Day" in the City of Asheville. He presented the proclamation to Ms. Mollie Rose, who briefed City Council on some activities taking place during the day.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON SEPTEMBER 24, 2002, AND THE WORKSESSION HELD ON OCTOBER 2, 2002

B. RESOLUTION NO. 02-159 - RESOLUTION MODIFYING THE CITY COUNCIL MEETING SCHEDULE FOR A COMMUNITY MEETING ON OCTOBER 29, 2002, BEGINNING AT 7:00 P.M. IN THE WILLIAM F. WOLCOTT JR. BUILDING LOCATED AT 161 SOUTH CHARLOTTE STREET, ASHEVILLE, N.C.

RESOLUTION BOOK NO. 27 – PAGE 257

C. RESOLUTION NO. 02-160 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH THE ASHEVILLE CITIZEN-TIMES FOR RETAIL ADVERTISING

Summary: The consideration of a resolution authorizing the City Manager to sign a weekly frequency advertising contract with the Asheville Citizen-Times.

Each year City staff and the staff of the Asheville Citizen-Times reviews retail advertising that the City has placed during the year to determine what rates the City will qualify for the following year. This year, the City qualifies for a weekly frequency rate of 16 to 31 column inches per week.

The open rate for advertising in the Asheville Citizen-Times is $47.96 per column inch daily and $64.67 per column inch on Sunday. This contract will allow the City to advertise for $30.45 per column inch daily and $41.43 per column inch on Sunday. Based on the amount of advertising placed in 2002, the City will save $59,534 by signing the weekly frequency contract.

This contract is valid for all City departments that advertise with the Asheville Citizen-Times, including the Asheville Civic Center.

Staff recommends approval of the resolution authorizing the City Manager to sign a weekly frequency advertising contract with the Asheville Citizen-Times.

RESOLUTION BOOK NO. 27 – PAGE 258

D. RESOLUTION NO. 02-161 - RESOLUTION OF INTENT TO CLOSE A RIGHT-OF-WAY KNOWN AS CAROLINA AVENUE FROM MOUNT CLARE AVENUE TO ITS DEADEND AND SETTING A PUBLIC HEARING ON NOVEMBER 12, 2002

RESOLUTION BOOK NO. 27 – PAGE 259

E. RESOLUTION NO. 02-162 - RESOLUTION APPOINTING A CHAIR TO THE CIVIL SERVICE BOARD

Summary: Annually the City Council must appoint a Chair to the Civil Service Board.

On October 1, 2002, it was the consensus of City Council to reappoint Gene Bell as Chairman of the Civil Service Board.

RESOLUTION BOOK NO. 27 – PAGE 260

F. RESOLUTION NO. 02-163 - RESOLUTION APPOINTING A MEMBER TO THE GREENWAY COMMISSION

Summary: There currently exists a vacancy on the Greenway Commission.

On October 1, 2002, it was the consensus of City Council to appoint Mr. Jack Saye as a member of the Greenway Commission to serve the unexpired term of Elizabeth Budd, term to expire December 31, 2003, or until her successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 261

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilman Peterson moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO AMEND CHAPTER 7 OF THE CODE OF ORDINANCES TO ESTABLISH A NEW NEIGHBORHOOD CORRIDOR DISTRICT

Councilwoman Jones moved to continue this public hearing until November 12, 2002. This motion was seconded by Councilman Ellis and carried unanimously.

B. PUBLIC HEARING TO CONSIDER THE CLOSING OF A PORTION OF OLD HAYWOOD ROAD BETWEEN PARK AVENUE AND ROBERTS STREET

RESOLUTION NO. 02-164 - RESOLUTION TO CLOSE A PORTION OF OLD HAYWOOD ROAD BETWEEN PARK AVENUE AND ROBERTS STREET

Mayor Worley opened the public hearing at 5:12 p.m.

Public Works Director Mark Combs said that this is consideration of a resolution to close a portion of Old Haywood Road from Park Avenue to Roberts Street. This public hearing was advertised on September 13, September 20, September 27 and October 4, 2002.

According to N. C. Gen. Stat. sec. 160-299, a City has the authority to permanently close a street or alley without regard to whether it has actually been opened.

On September 23, 1997, a public hearing on the question of closing a portion of Old Haywood Road between Park Avenue and Roberts Street was held at the regular meeting of City Council. A decision was deferred on "closing" until staff could further advise Council on the ability of using this portion of Old Haywood Road in the Greenway Master Plan.

The Planning Department has completed the Greenway Master Plan and determined that this portion of Old Haywood Road from Park Avenue to Roberts Street would not serve as a good link in an anticipated greenway connecting the downtown with the river. The Planning Department has also not identified a viable public use for this property as requested on September 23, 1997. Based on those findings the closing proceedings were reinitiated at the request of Mr. Rice.

The Public Works Department staff has determined that the right-of-way known as Old Haywood Road, beginning at Park Avenue and ending at Roberts Street, as shown in the Buncombe County Tax Maps bordered by PIN Nos. 9648-09-07-1425, 9648-09-07-0394, and 9638-12-97-9347 is not part of an adopted street plan and is not a City maintained right-of-way.

City staff recommends City Council adopt the resolution to close a portion of Old Haywood Road from Park Avenue to Roberts Street.

Vice-Mayor Bellamy said that there is a draft plan for the West End/Clingman Avenue Neighborhood (WECAN) greenway. She felt the neighborhood doesn't want to block any expansion, however, they would like to make sure the expansion enhances the neighborhood that the residents have to live in daily.

Economic Development Director Mac Williams said that in order to accommodate the business expansion of AvL Technologies, this portion of Old Haywood Road would need to be closed so the expansion could occur. Mr. Williams said that Mr. Mike Rice, property owner, has incubated his business in Asheville and the business is growing. He said the business manufactures satellite equipment and has good high paying jobs. If the business did expand, more jobs would follow.

Mr. Joe McGuire, attorney representing Mr. Mike Rice, said that the building is rented out to AvL Technologies and they need to expand. He said they currently have 12-15 employees and the proposed expansion would result in approximately 40 employees. Mr. Rice would like to add on an approximate $40,000 expansion and then add a new building, for AvL Technologies, for approximately $250,000. He passed out a brochure showing that AvL Technologies is a clean industry, is high tech and has high-paying jobs. The only way the company can expand is if this portion is closed. Unless the expansion is able to occur, the owner and president of AvL Technologies, Inc., will have to look elsewhere to relocate his business. The other section of Old Haywood Road was closed back in 1982 and he submitted Affidavits by those two property owners which state that they "have no plans to grant a public easement across the property that is located between Clingman Avenue and Park Avenue, which is the portion of the Old Haywood Road that was closed in 1985." He explained that Mr. Rice is in favor of a greenway, but this is not the best location. He explained the location for a much better location for a greenway. He urged Council to close this portion to allow this industry to expand, as it will improve the tax base, will improve the community because of the nature of the building that will be there, and will allow the greenway to be at its best location. Mr. McGuire also passed out some photographs of the building.

Ms. Gail McCarthy, business and property owner in the area and representative of the Asheville River District Artists (30 working artists and craftsmen in the Asheville River District), stated that this portion of Old Haywood Road is located in the heart of the Asheville River Arts District and their neighborhood has been growing and developing since 1994. She read quotes from the 1995 Economic Contribution Study of Craft on our region's economy, which showed how important crafts are to Western North Carolina. She shared statistics of how the River District Artists have brought visitors to our area. Artists and craftsmen have begun to own property in the area and they are very interested in what happens within the community. They have supported the efforts and participated in the WECAN Citizens Master Plan and have supported the efforts of RiverLink in the RiverLink Design charette. They feel that this closing is short-sighted in that the property holds more value if it can be integrated into a design process compatible with the WECAN Citizens Master Plan, the RiverLink Plan and the City's 2010 Plan. They asked that before the City does anything that influences development in the neighborhood, they would like to know what plans are being made and approved for the area. They understand that no plans have been filed with the City at this point for use of what is now public property. Since the closing of this portion involves giving away public property, as owners of this property they would like to be able to offer their opinion and suggestions for its future use.

Mr. Ronnie James, representing the North Carolina Department of Commerce in the western region as Manager of the Business and Industry Development Division, urged Council to close this portion of property so the business can expand. He said that in Buncombe County one manufacturing job generates another 1.1 job increasing personal income in Buncombe County by $69,000 – that's $37,000 directly and approximately $32,000 indirectly, adding over $16,000 in federal tax revenues and over $6,000 in local and state revenues. AvL Technologies is a very clean operation and they pay high wages and if Mr. Rice is unable to expand, unfortunately the business will have to relocate, possibly outside of Asheville or even Buncombe County.

Ms. Carol Hensley, Assistant Vice-President for Small Business and Entrepreneurship with the Asheville Area Chamber of Commerce, said that she was representing the Buncombe County Economic Development Commission which supports the close of this portion of Old Haywood Road. She explained why the expansion of the business is important to our community. She said that in Buncombe County existing business and industry create well over 80% of all new jobs.

Ms. Lou Heetderks, President of WECAN, said that they have had interest and concerns regarding the Old Haywood Closing since 1997 when the same parcel of public land came before

City Council then. At that time WECAN, and other interested parties, successfully convinced that City Council to keep this property and other publicly owned properties in both the WECAN district and the Riverfront under public domain until all the plans for this area were finalized. The City's consultant who prepared the Greenway Master Plan in a letter to her dated March 20, 1998, identifies this unused roadway "as a feasible route for an off-road greenway" and recommended "to maintain this old roadway right-of-way in public ownership because of it's greenway potential." Plans for this area include the West End/Clingman Avenue 2010 Plan, the WECAN Citizens Master Plan, RiverLink's Riverfront Development Plan, the City's Master Greenway Plan and there is also a site-specific greenway planning process being started this month using local greenway planners and local architects. This plan will address the urban forest that runs behind Clingman Avenue that will provide a link between Aston Park and the River. The WECAN Citizens Master Plan identifies the property at the corner of Roberts and Haywood Road, which includes the unused roadway, as a key and strategic site for development in this district. The type of development created at this corner will set the tone for the district and for future development. WECAN supports the type of clean, high wage, high tech industry that AvL Technologies brings to this district and to the City and they do not object to this business. Their concern is that the physical development of this property supports the principles and guidelines set forth in the numerous plans developed for this area. City Council should ensure that any development of this area complies with the various guidelines that have been developed in these plans. Meetings have been held with Mr. Rice in an effort to reach a compromise for something that will truly enhance the area, not only if AvL Technologies expands, but if the business moves out that what is left behind is something that supports the overall visions for the area and for the City as a whole.

Mr. Jim Oliver, President and Owner of AvL Technologies, explained that his company designs and manufactures mobile satellite antennas. He said that he does need to expand his business and would like to stay in the downtown area, however, that won't be possible unless his business is allowed to grow. He said that it is his intent to hire from the Asheville area. He said that since they don't manufacture any parts inside their building, they farm them out to 6-8 manufacturing companies in the Asheville area so those other businesses would be affected as well if he could not expand.

Mr. Jeff Hayes, employee at AvL Technologies, spoke in support of the Old Haywood Road closing.

A representative from Carolina Stone Works, property owner in the area, asked that Council postpone the closing until all plans are finished to see how that area will affect the arts community in the long-run.

Mr. Mike Rice, property owner, said that the Greenway Master Plan does not include this abandoned street. The drawing shows the greenway going down Clingman Avenue. He explained two better choices for the greenway. He urged Council to close this portion of Old Haywood Road in that it really is a win-win situation for the City and the business.

Mr. Brian McCarthy, Owner of High Water Clays, said that he supports high tech jobs and also supports the various plans for the area. His concern is that whatever buildings are developed there, especially any ones that are close to Old Haywood Road, are done in a fashion that they will enhance the area. The closing of this portion of Old Haywood Road may not have anything to do with what finally gets developed along Haywood Road, but it's important to the community that City Council keeps that in mind in any decision that they make.

Mr. Scott Dedman, Executive Director of Mountain Housing Opportunities (MHO), said that they have invested approximately $3 Million in the WECAN area including the construction of the new building at the corner of Clingman Avenue and Merritt Street. MHO strongly supports these kinds of jobs for Asheville. He has spent many hours meeting with Mr. Rice and the Operations Manager at AvL Technologies and had hoped to work out a clear compromise. He explained where he felt there were three potential routes for the greenway. He also questioned if the legal advertisement included the entire portion of property requested to be closed or only a smaller portion of the property. In summary, he explained that it's the future development of the frontage on Haywood Road that is of particular concern.

Mayor Worley closed the public hearing at 6:16 p.m.

Planning & Development Director Scott Shuford said that the greenway route doesn't seem to be the big issue in this closing. It seemed to him that more of the concern is addressed about the potential development of the area with buildings being kept with the character of the River District, the downtown and plans. What is important is that there be the potential to link greenways across the river through different opportunities and alternatives have been suggested. He doesn't see the closure before Council as being something that would preclude greenway access. Again, he seems to think the concern is how the development will occur at that key location, how the buildings look, and how they are sited on the property. He did not think that any procedural errors occurred as alluded to by Mr. Dedman.

Upon inquiry of Councilwoman Jones, Mr. Shuford said that the development will probably not come before City Council given the scale of it, however, it will have to be built in accordance with the zoning requirements.

Mayor Worley said that there is a substantial area of right-of-way between pavement of Haywood Road and Mr. Rice's property line that lies north of the section requesting to be closed. It seems to him that the largest concern is what actually takes place within that right-of-way which owned by the N.C. Dept. of Transportation (NC DOT). He felt that the City would have a lot of effect with the NC DOT in that particular area and could preserve that for use as part of a potential greenway master plan.

Mr. Shuford responded to questions from Councilwoman Jones regarding the zoning of that area and what type of standards are in that zoning classification.

Councilman Ellis appreciated the efforts of the River District Artists, the WECAN citizens and MHO to all work toward a compromise and they all support jobs and jobs people can walk to. He did not think the closing of this portion would be a detriment to the area.

Vice-Mayor Bellamy understood that the residents support the jobs, however, they have concerns about the design of the building being compatible with the residential neighborhood. Council hasn't discussed the close proximity of the houses to the industry. The residents support expansion, but they would like it done in a way that is compatible with the WECAN Citizen Master Plan. She hoped Mr. Rice would go back and talk back to the neighborhood about a compatible building that will fit into the residential neighborhood.

Councilman Mumpower explained how he felt there are three issues in this matter of timing, economic development and fairness. He felt that Council has committed itself to retain good industry and industrial space.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved to adopt Resolution No. 02-164 to close the portion of Old Haywood Road between Park Avenue and Roberts Street. This motion was seconded by Councilman Dunn.

Councilman Dunn agreed that it was important to make the building compatible and he felt sure that Mr. Rice would do the best he could to make the expansion of his industrial building compatible to the neighborhood.

Councilman Jones pointed out how easy it is sometimes to put plans at the bottom of the stack, but here's a great example of how important plans are for the City. She hoped that Mr. Rice will continue to talk with the neighbors because they have given a lot to their neighborhood and have enhanced it for everyone.

The motion made by Councilman Mumpower and seconded by Councilman Dunn carried unanimously.

At 6:40 p.m., Mayor Worley announced a short break.

RESOLUTION BOOK NO. 27 – PAGE 262

C. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF PROPERTY LOCATED NORTH OF LONG SHOALS ROAD AND IDENTIFIED AS OAKBROOK, SECTION 3 OF BILTMORE PARK

ORDINANCE NO. 2961 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE PROPERTY LOCATED NORTH OF LONG SHOALS ROAD AND IDENTIFIED AS OAKBROOK, SECTION 3 OF BILTMORE PARK

Mayor Worley opened the public hearing at 6:45 p.m.

Urban Planner Carter Pettibone said that this is the consideration of an ordinance to annex property located north of Long Shoals Road and identified as Oakbrook, Section 3 at Biltmore Park. The public hearing was advertised on September 27, 2002

Biltmore Farms Inc. and The Broadlands Company, LLC, have submitted an annexation petition for Oakbrook, Section 3 at Biltmore Park. This area is contiguous to the existing corporate limits, being bordered to the south by sections of Biltmore Park that have been previously annexed

The area proposed for annexation consists of 16.911 acres and is platted for 18 single-family residential lots, corresponding street rights-of-way, and a common area. The area will be accessed primarily by White Ash Drive and Red Cedar Lane. This area is within the extraterritorial jurisdiction and is currently zoned RS-2 Residential Single Family Low Density District.

Biltmore Farms Inc. is developing utilities and streets. City services will begin on the effective date of annexation. Biltmore Farms, Inc. has requested that the effective date of annexation be six months from the adoption of the ordinance, which would be April 8, 2003.

This would be the 25th section of the Biltmore Park development to be annexed.

City staff recommends City Council adopt an ordinance to annex property located north of Long Shoals Road and identified as Oakbrook Section 3.

Councilman Dunn asked why the City was not asking Biltmore Park to spend any money on traffic mitigation because a developer in Shiloh was required to spend $84,000 on traffic mitigation for his development, which was already in the City. Planning & Development Director

Scott Shuford explained that that the Shiloh development dealt with public safety with regard to the widths of the streets and some of the intersections needing improvements, as well as the speed of traffic. This particular development is a planned development that has continued to develop in phases. While the Master Plan has changed a little over time, the infrastructure that is being put in by the developer is adequate and safe at the time it is put in. The developer is building all the streets and after they are built they are brought into the City. If, for example, we had a multi-family project that was part of a master plan development, we wouldn't need to go back and say we've got to have exactions to deal with the public safety issues or traffic claming, because those issues would have been taken care of in the original planning. It's when we go to infill-type development that greatly increases the density above and beyond what is designed planned for the area that we need to start looking at those types of public service exactions.

Mayor Worley closed the public hearing at 6:53 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Ellis moved for the adoption of Ordinance No. 2961. This motion was seconded by Councilman Peterson and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 95

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 02-165 - RESOLUTION APPOINTING A MEMBER TO THE REGIONAL WATER AUTHORITY OF ASHEVILLE, BUNCOMBE AND HENDERSON

Vice-Mayor Bellamy said that the term of Ted Patton as a member on the Regional Water Authority expired on September 30, 2002.

On October 1, 2002, it was the consensus of City Council to appoint a Council member to said Authority.

Mayor Worley moved to appoint Councilman Peterson to serve a three year term, term to expire September 30, 2005, or until his successor has been appointed. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

Councilman Peterson said that all of Council appreciated Mr. Ted Patton's contribution and his technical expertise that he has brought to the table on the Water Authority. But that given some changes in the direction that Council may have about the Water Authority and the potential significant changes, there needs to be a little bit more direct involvement with City Council on the Water Authority. Mr. Patton's technical expertise has been a big contribution, but at this stage, City Council needs something slightly different.

RESOLUTION BOOK NO. 27 – PAGE 263

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of September 20-26, 2002: Melissa Doyle (Sanitation), Jimmy Deese (Streets), Tameca Mills (Streets), Shea D. Knupp (Water) and Marcus Ban-Lokeren (Sanitation).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Councilwoman Jones announced that the YMI is sponsoring "In the Footsteps of Pilgrims, Historic Travels of Faith" which explores the cultural and historical issues of travels of faith from the viewpoints of Judaism, Christianity, Islam, Hinduism and Buddhism. She invited Council and the public to take advantage of this opportunity, which will run from October 16 through November 29, 2002.

Councilman Ellis congratulated Councilwoman Jones, who is Executive Director of the YWCA, in making the new YWCA available to the entire community.

Mayor Worley also was pleased to announce that Vice-Mayor Terry Bellamy received the prestigious Grace Dorn and Sophie Dixon First Annual award at the NAACP banquet on October 5, 2002.

Mr. Mickey Mahaffey stated that Mr. Ted Patton was the least political member on the Water Authority and one of the most knowledgeable people on the Water Authority over the past three years. He hoped Councilman Peterson would keep as his primary initiative the issue that that there are more people in our area who are having a difficult time of affording to live here, and urged him to remember that when there is talk of raising water rates.

Ms. Hazel Fobes, representing Citizens for Safe Drinking Water and Air, stressed how we need regionalism and a true Regional Water Authority. She spoke highly of Mr. Ted Patton and stated that he knows more about the water system than anyone around here.

CLOSED SESSION

At 7:06 p.m., Councilwoman Jones moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City in order to preserve the attorney-client privilege between the City and its attorney. The parties to the lawsuit about which the Council expects to receive advice are: Morris Communications, Inc. d/b/a Fairway Outdoor Communications, Lamar OCI - South Corp., Maple Cove, Inc., Carl and Janis Ricker, Asheville Board of Adjustment, City of Asheville, James E. Martin, Jeffrey A. Martin, Susanne A. Zuerner, Donald E. Williams, Paul E. Fruits, B. Joy MacFadyen Bulluck, Buncombe County, and City of Asheville - the statutory authorization is contained in G.S. 143-318.11(a)(3); and (2) To prevent the disclosure of information that is privileged or confidential pursuant to the laws of the State or the United States, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that renders the information to be discussed privileged or confidential is N.C.G.S. 132-1.1. This motion was seconded by Councilman Ellis and carried unanimously.

At 8:20 p.m., Councilman Dunn moved to excuse Vice-Mayor Bellamy due to her health. This motion was seconded by Councilman Ellis and carried unanimously.

At 8:35 p.m., Councilwoman Jones moved to come out of closed session. This motion was seconded by Councilman Dunn and carried unanimously.

144

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:35 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – October 15, 2002 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Councilman Joseph C. Dunn

CONSENT:

Minority Business Plan Amendments

Summary: The consideration of a resolution to amend the Minority Business Plan in order to enhance and clarify provisions of the Plan.

In May of 1998, City Council adopted the Asheville-Buncombe Minority Business Plan. The Plan has been amended three times: (1) November 1998 to expand participation in the Mentor-Protégé Program; (2) December of 1999 to clarify the provisions of the Plan; and (3) in 2001 to expand certification to two years.

At their meeting on August 8, 2002, the Minority Business Commission recommended that the Plan be further amended to enhance and clarify provisions of the Plan. The most significant change is the reduction of the Minority Business Commission from 13 to 11 members. The Minority Business Alliance is no longer active and one of the three certified minority business owners has been deleted in order to keep the board balanced to an odd number. In addition, the grievance procedures for hearings has been revised and made more concise for use.

The resolution amends the Plan as recommended by the Minority Business Commission. The recommended revision to the Plan will also be presented to the Buncombe County Commission for their consideration and adoption.

City staff recommends City Council adopt the resolution amending the Minority Business Plan.

Budget Amendment for Governmental Accounting Standards Board Implementation

Summary: The consideration of a budget amendment to eliminate the use of internal service funds pursuant to Governmental Accounting Standards Board (GASB) regulations and amend the General Fund Budget accordingly.

The City of Asheville has several operations that are established to supply goods or services to other city departments or governmental units. These operations include Fleet Management, Graphic & Printing Services, Central Stores, and Group Health/Risk Management. Each of these four operations is currently set up as an ***Internal Service Fund***, a separate accounting entity established to budget and account for the activities of a department or division that supplies goods or services to another department or governmental unit.

The accounting and management procedures used by an internal service fund are similar to those of a private business; that is, the internal service fund predominantly charges other departments on a cost-reimbursement basis for the use of its goods and services. For instance, when Fleet Management repairs a police car, it charges the Police Department for the cost of parts and labor involved in the repair. The revenue that Fleet Management receives from charging the Police Department is used to pay the salaries of the mechanics and cover the cost of vehicle parts.

The use of internal service funds results in "double-budgeting" city expenditures, once in the Internal Service Fund and again in the City's General Fund. The Fleet Management Internal Service Fund, for example, has approximately $450,000 in its budget to cover the cost of maintaining police vehicles. The General Fund, through the Police Department, also has $450,000 in its budget to "pay back" Fleet Management for maintaining its vehicles. Thus, when adding the Police Department's vehicle maintenance budget to Fleet Management's budget for police vehicle maintenance, it appears that the City is spending $900,000 on maintenance of police vehicles, when in fact the actual cost to the organization is only $450,000.

To eliminate the appearance of double-budgeting and to respond to recent accounting changes advocated by the GASB, the Budget and Finance Directors recommend that the City discontinue using separate internal service funds to budget and account for the City's internal "business-like" operations. It is recommended that the internal service budgets for Fleet Management, Graphic/Printing Services, Central Stores, Group Health /Risk Management be reduced to zero and that the expenses for internal service functions be charged directly to department operating accounts in the general fund, where budgets already exist.

In addition to providing services to other City departments, several of the City's internal service funds provide limited services to external governmental agencies. The Fleet Management Internal Service Fund, for instance, sells gas to Memorial Mission Hospital, allowing Memorial Mission to benefit from the City's government rate. The budget to cover the cost of providing services to external agencies, however, is currently budgeted solely in the City's internal service funds. Thus, when the various internal service funds are reduced to zero, as recommended in this report, the cost of providing services to external agencies (i.e. Memorial Mission) will need to be moved to the general fund and the general fund budget increased accordingly. The increase in general fund expenditures will be offset by also moving revenues received from outside agencies (i.e. Memorial Mission) into the general fund, resulting in no net increase in general fund expenditures.

City staff recommends City Council adopt the budget amendment to eliminate the use of internal service funds pursuant to GASB regulations and increase general fund expenditures by $4,324,717 to reflect expenditures and revenues associated with internal service functions providing goods and services to outside agencies.

Offer of Purchase for Upset Bids for Land off Blake Mountain Circle

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids for 0.40 acres of land off Blake Mountain Circle.

A bid from Rhett A. Grotzinger, in the amount of $3,700.00, has been received for the purchase of land adjacent to his property at 307 Blakewood Court. The bid is not less than the appraised value of $3,700.00.

The property is zoned RS-2 and comprises approximately 0.40 acre of land. Thus the lot does not contain the required area for a standard lot in RS-2 zoning. The property has a trapezoid shape and is gently sloping to below street level. The parcel is wooded except for an abandoned circular water tank with a domed cover, which is partially below ground. The water tank is in the middle of the lot and covers about 1/3 of the land area. The appraisal by Richard Smith in the amount of

$3,700.00 takes into consideration the substandard size of the lot as well as the negative impact of the water tank on the land value.

There is no current or contemplated use for the property by the City. If the sale is approved the property will be sold as is and the City will retain an easement for water lines on the property. Mr. Grotzinger plans to assemble the property with the property he owns and whether the water tank is removed or not will be his decision and responsibility.

Approval of the resolution will initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Planning staff recommends adoption of the resolution.

Relinquishing an Easement in the Closed Alley between Riverview Drive and Euclid Boulevard

Summary: The consideration of a Resolution authorizing the Mayor to execute a non-warranty deed to relinquish the City's easement in the closed portion of the alley between Euclid Boulevard and Riverview Drive.

The City closed a portion of an unopened alley between Euclid Boulevard and Riverview Drive on June 27, 1995, reserving for itself an easement for the possible future installation and maintenance of public utilities. Subsequent to adoption of the Resolution, the petitioning property owner contacted the City and requested that the City, to the extent possible, relinquish its easement as the reservation of the easement defeated the purpose of closing the alley. Key City staff considered the request and did not oppose the request. The petitioning property owner was informed that City staff was prepared to recommend that the City relinquish its easement upon the receipt of certain information, which information was not received until July 22, 2002. Due to the lapse of time, key City staff was once again consulted and no objection was raised to the City relinquishing its easement. The closed portion of the alley whereby the City is relinquishing its easement is more specifically shown in Plat Book 7 at Page 72.

City staff recommends City Council adopt the resolution authorizing the Mayor to execute a non-warranty deed relinquishing the City's easement in the closed portion of the alley between Euclid Boulevard and Riverview Drive.

Agreement with the Asheville Humane Society

Summary: The consideration of a resolution authorizing the City Manager to sign an agreement with the Asheville Humane Society for animal shelter services within the corporate limits of the City.

On July 1, 2002, Buncombe County required the City to pay for animal shelter services with the Asheville Humane Society who has contracted to run the shelter. From July 1, 2002, through August 30, 2002, the City contracted with the Humane Society for shelter services based on funding approved in the City's interim budget. On September 1, 2002, the City approved the final budget for Fiscal Year 2002-2003, and in that budget approved $100,000 to pay for shelter services. The City and Humane Society need to enter into the same agreement for shelter services for the term of September 1, 2002, through June 30, 2003.

City staff recommends approval of the resolution authorizing the City Manager to sign an agreement with the Asheville Humane Society for animal shelter services for the term of September 1, 2002, through June 30, 2003.

Budget Amendment to Renovate the Building at Memorial Stadium

Summary: The consideration of an amendment to the City's general capital project fund, in the amount of $72,593, to cover the renovation of the storage building at Memorial Stadium.

In November of 2001, the storage building at Memorial Stadium was destroyed by fire. The estimated cost to renovate the storage building is $72,593.

After a year of negotiation with the City's insurance carrier, the Risk Management office, with the assistance of the Parks & Recreation Department, received an insurance settlement to help cover the cost of renovating the storage building. Insurance settlement revenue in the amount of $64,593, as well as funds in the amount of $8,000 that can be transferred from the City's building maintenance reserve are available to support the cost of the renovation project.

Staff is requesting the establishment of a capital project budget in the amount of $72,593 for renovation of the storage building at Memorial Storage. The project budget will be balanced with the insurance settlement proceeds and building maintenance reserve funds noted above.

The Parks & Recreation Department recommends City Council approve the amendment to the City's general capital project fund for the renovation of the storage building at Memorial Stadium.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

SOLITATION ORDINANCE

Police Chief Will Annarino said that this is the consideration of an amendment to the City's solicitation ordinance by (1) making it a class three misdemeanor to ask, beg or solicit funds for alms or contributions within certain areas within the City limits boundaries; and (2) making it a class three misdemeanor to urinate in public, sleep on public property and loiter with the intent to obstruct any public street, public highway, public sidewalk or other public place or building by impeding the free uninterrupted passage of vehicle traffic or pedestrians.

City staff has received numerous complaints from residents, visitors and merchants regarding the large amount of panhandling and soliciting occurring in Asheville. In addition, the Asheville Police Department has also witnessed a large increase in panhandling occurring in the City. City staff has determined that such activities are causing a public safety hazard by interfering with the free flow of pedestrian traffic on sidewalks; creating fear and anxiety for persons traveling downtown; and discouraging people from visiting Asheville's downtown and Biltmore Village. In an effort to insure the public safety of pedestrians in high traffic areas and to preserve a pleasant family friendly atmosphere in the downtown area and Biltmore Village, City staff recommends placing a limited ban on solicitation in specified areas based on the volume of pedestrian traffic as well as the impact the location has on tourism. Staff is proposing prohibiting solicitation in the following zones: ZONE 1 - Hilliard Avenue as the southern boundary south, French Broad Avenue as the western boundary, Cherry Street and Woodfin Avenue as the northern boundary and Woodfin and Valley Street as the western boundary and ZONE 2 – the entire Biltmore Village Historic District.

Staff is also proposing prohibiting solicitation throughout the City within a certain distance from bus stops, banks and automatic teller machines, entrances to buildings, and outdoor dining areas. The ordinance will also prohibit soliciting in the evening and prohibit a person from soliciting while under the influence of drugs or alcohol.

In an effort to reduce the amount of street nuisance type activities in Asheville, City staff is also recommending the ordinance prohibit relieving one's self on public, sleeping on public property and loitering that impedes pedestrian or vehicular traffic throughout the City.

Class 3 Misdemeanor – conviction on 1st offense results in a $50.00 fine. 2nd and subsequent convictions can result in fines up to $500.00.

City staff recommends approval of the ordinance.

Upon inquiry of Councilman Mumpower, Police Chief Annarino said that the boundaries could be expanded as conditions are justified.

Vice-Mayor Bellamy asked about how we can enforce our ordinances inside Aston Park, which is a County park. City Attorney Oast said that the City can enforce our ordinances for activities on County properties that are located inside the City. He said he would be happy to confirm that.

Vice-Mayor Bellamy stressed that the City needs to involve and assist other agencies to provide solicitation alternatives. City Manager Westbrook said that the Asheville Downtown Commission, the Asheville Downtown Association and the merchants will be monitoring the ordinance and investigating ways in which alternatives for solicitation might work. For example, a sign in a window that states you cannot solicit for funds, but if you would like to help, here are other ways – and maybe have a box placed there for funds.

When Councilman Mumpower asked for a monitoring report, City Manager Westbrook felt sure that the different downtown groups will be asking to come before Council with a report.

Councilwoman Jones felt that the City was criminalizing poverty in two instances in the proposed ordinance and explained her suggested following changes: (1) That under Section 11-16 (Sleeping on Public Property), that (a) read "It shall be unlawful for any person to sleep on any of the streets and sidewalks." She asked the rest of the sentence ("public places or upon the private property of another without the consent of the owner thereof") be deleted; and (2) That Section 11-15 (Public Urination) be deleted in its entirety. She understood that there are public health issues. However, she strongly felt that the City should have a simultaneous response to prohibiting this by providing public restrooms. She wasn't saying that we shouldn't prohibit public urination, but that we need to deal with a more comprehensive response for it. She stated that she would bring the funding issue of public restrooms up at City Council's annual retreat. In addition, she felt that we need to make a bigger commitment to get behind the shelters by redirecting some of our Community Development Block Grant funds and outside agency funds to work with them on solutions.

Mayor Worley stated that the City did have public restrooms downtown but they were vandalized and destroyed. He did note, however, that there are some public restrooms located downtown. In addition, he felt that there are shelters for those people who are currently sleeping on park benches, realizing also that some people cannot be in a shelter due to mental illness.

Police Chief Annarino said that the problem with people sleeping on park benches is so bad that merchants want to remove the benches.

Councilman Ellis, liaison to the Asheville Downtown Commission, said that the Commission is working aggressively at suggesting a special taxing district for the downtown area for security and restrooms.

Vice-Mayor Bellamy asked about the education component in the ordinance. Police Chief Annarino responded that the downtown merchants will be working on some plans and the police officers would be there to phase in the ordinance changes.

Vice-Mayor Bellamy felt that City Council should write to the Governor and our state legislators and ask them to require a housing plan for inmates being released from prison into our community. She also felt there needed to be a hard look at the intake system for public housing. In addition, City Council needs to hear about our mental health issues in the community, even though Buncombe County is responsible for that issue. At the suggestion of Councilman Mumpower, Vice-Mayor Bellamy and Councilwoman Jones agreed to draft a letter for Council's consideration.

Vice-Mayor Bellamy questioned the Class 3 misdemeanor fine of $50. Police Chief Annarino said that the Class 3 misdemeanor amount is established by state law, however, Assistant City Attorney Curt Euler said that the fine would be left up to the judge and that could range from $5 to $500.

Upon inquiry of Councilman Mumpower, Police Chief Annarino said that a new system will be on line in December and it will take approximately six months to a year to compile statistics on this complaint driven issue.

Councilwoman Jones said that she did support the loitering section and the public solicitation and begging section and asked the City Attorney how she could vote for two and possibly not for the other two sections (public urination and sleeping in public). After discussion, City Attorney Oast gave three alternatives and suggested that when the matter comes before Council for a formal vote, that Councilwoman Jones could make a motion to divide a complex motion and consider it by paragraph. It would then be up to City Council to support the motion or not.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on an upcoming formal City Council agenda.

MISSION STATEMENT

City Manager Westbrook said that City staff is requesting City Council approve the revised mission statement "The City of Asheville is committed to delivering an excellent quality of service to enhance your quality of life."

The City's current mission statement was adopted in 1995. The mission statement has served us well, but needs to be updated. After reviewing the mission statement at last year's staff retreat, the Management Team set up a team of City employees to bring forward a recommendation for change in the mission statement. The staff feels strongly that a mission statement should be simple enough that every City employee will be able to recite it when asked, "what is your job?" We believe the mission statement crafted by the team meets that standard, as well as capturing the essence of public service.

In addition to the mission statement, the Management Team also crafted core values. In previous years these were adopted by the Management Team on how we would work with the public and manage our various missions within the City. It is our intent to update the core values for all City employees. The core values represent sound standard practices and ideals that all City employees should follow.

Lastly, a motto was crafted as a simple way of stating our mission and how it affects all citizens.

Ms DeAnn Lyda, Ms. Sasha Vrtunski and Ms. Leslie Carreiro, showed how they developed the mission statement and its applicability to the way we think and work in the City of Asheville.

Staff recommends City Council adopt the mission statement as presented by the team and endorse it to all employees and citizens of Asheville.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

HOUSING TRUST FUND

Planning & Development Director Scott Shuford said that this is the consideration of a resolution to offer Housing Trust Fund loans for the construction of affordable housing.

In its final Fiscal Year 2003 City Budget, City Council approved a $500,000 appropriation for the City's Housing Trust Fund (HTF). Adding repayments from prior year loans, staff estimates that at least $580,000 will be available for lending this year.

The Housing and Community Development Committee has reviewed the process for offering HTF loans and has made some improvements, while keeping the guidelines broadly similar to those used last year.

In summary, the proposed loan guidelines (*and changes*) are as follows:

- Projects must be new construction, or rehabilitation of vacant property.
- Homes for sale must be priced at not more than $120,000; and sold to a person with household income below area median.
- Homes for rental must be affordable to households below 80% of are median income, and the first tenants must meet that income limit.
- Maximum loan amounts per unit are $40,000 for construction loans and $25,000 for long-term loans (*increased from $20,000 for both loan types*); the maximum loan to one applicant is $250,000 *(increased from $200,000)*.
- Loans must be repaid within 30 years – no grants, forgivable loans, or indefinitely deferred loans are allowed.
- Loans will be fully amortizing with 2% interest, except that for the most affordable projects loan repayments may be either principal-only with 0% interest, or interest-only with deferred principal (*not both 0% and deferred*).
- Applicants have the option to purchase land from a list of City-owned sites; there are ten suitable properties currently on this list.
- Minor changes have been made to the evaluation criteria.

The loan offering can be published immediately after Council's approval, with an application deadline on November 27. Applications will be reviewed and scored by a panel of City staff and outside professionals and their findings will be considered by the Housing and Community Development Committee in December. The Committee's recommendations for loans will ready for Council's final review and approval in January.

Mr. Shuford then gave Council a brief update of the Fiscal Year 2001 and 2002 Projects.

City staff recommends City Council approve the resolution to offer Housing Trust Fund loans for the production of affordable housing in Fiscal Year 2003.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

RESOLUTION NO. 02-166 - RESOLUTION SUPPORTING MAYOR OF ASHEVILLE'S NOMINATION FOR SECOND VICE PRESENT OF THE BOARD OF DIRECTORS OF THE NORTH CAROLINA LEAGUE OF MUNICIPALITIES

Councilman Ellis said that Mayor Charles R. Worley is currently Chairman of the Finance Administration and Intergovernmental Relations Committee and has had the pleasure of working with League staff and other elected and appointed officials throughout North Carolina for some period of time. It appears that the North Carolina League of Municipalities is approaching a new relationship with the State of North Carolina. As Charles R. Worley is the Mayor of the largest city west of Winston-Salem and north of Charlotte, the Asheville City Council and other leaders from this part of the state feel that Mayor Worley can bring a unique perspective to the Board which would be helpful and productive. Western North Carolina certainly has its challenges, as do other parts of the state, but the Asheville City Council believes that Mayor Worley can articulate Western North Carolina's needs and challenges to the Board of Directors and the general membership of the League. The Asheville City Council hereby endorses and supports Mayor Charles R. Worley's nomination for the position of Second Vice President of the Board of Directors of the North Carolina League of Municipalities.

Councilman Ellis moved to waive the rules and take formal action at this meeting since the North Carolina League of Municipalities Annual Conference is October 20-21, 2002. This motion was seconded by Councilman Mumpower and carried unanimously.

Councilman Ellis moved to adopt Resolution No. 02-166. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 264

BOARDS AND COMMISSIONS:

It was the consensus of City Council to arrange an interview for Mr. Sylvia Farrington for a vacancy on the Civic Center Commission and to verify that Mr. Dan Breneman was still interested in serving.

It was the consensus of City Council to have the City Clerk prepare the proper paperwork to appoint Andy Archie to the Downtown Commission.

It was the consensus of City Council to arrange interviews for Ms. Carol Ann Pothier and Mr. Leonard Jones for a vacancy on the Recreation Board.

UPDATE ON THE 2025 PLAN

Planning & Development Director Scott Shuford updated City Council on the 2025 Plan, which is an update to the City's comprehensive plan. The City Plan Advisory Committee, the group charged with overseeing public participation and input into the plan, has endorsed moving the plan forward to the public hearing phase. They will schedule the draft plan to be heard by the Planning & Zoning Commission at their October 24 worksession and again on November 6 at their formal meeting. After the Planning & Zoning Commission's review is complete, they will schedule it for a City Council worksession and formal meeting.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 4:42 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – October 22, 2002 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Councilman Peterson gave the invocation.

I. PROCLAMATIONS:

MOTION ADOPTING THE REVISED MISSION STATEMENT OF THE CITY OF ASHEVILLE

Ms. Sasha Vrtunski, Interim Director of City Development, said that this is the consideration of requesting City Council approve the revised mission statement "The City of Asheville is committed to delivering an excellent quality of service to enhance your quality of life."

The City's current mission statement was adopted in 1995. The mission statement has served us well, but needs to be updated. After reviewing the mission statement at last year's staff retreat, the Management Team set up a team of City employees to bring forward a recommendation for change in the mission statement. The staff feels strongly that a mission statement should be simple enough that every City employee will be able to recite it when asked, "what is your job?" We believe the mission statement crafted by the team meets that standard, as well as capturing the essence of public service.

In addition to the mission statement, the Management Team also crafted core values. In previous years these were adopted by the Management Team on how we would work with the public and manage our various missions within the City. It is our intent to update the core values for all City employees. The core values represent sound standard practices and ideals that all City employees should follow.

Lastly, a motto was crafted as a simple way of stating our mission and how it affects all citizens.

Staff recommends City Council adopt the mission statement and endorse it to all employees and citizens of Asheville.

Vice-Mayor Bellamy moved to adopt the revised mission statement. This motion was seconded by Councilwoman Jones and carried unanimously.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON OCTOBER 8, 2002, AND THE WORKSESSION HELD ON OCTOBER 15, 2002

B. RESOLUTION NO. 02-167 - RESOLUTION AMENDING THE ASHEVILLE-BUNCOMBE MINORITY BUSINESS PLAN

Summary: The consideration of a resolution to amend the Minority Business Plan in order to enhance and clarify provisions of the Plan.

In May of 1998, City Council adopted the Asheville-Buncombe Minority Business Plan. The Plan has been amended three times: (1) November 1998 to expand participation in the Mentor-Protégé Program; (2) December of 1999 to clarify the provisions of the Plan; and (3) in 2001 to expand certification to two years.

At their meeting on August 8, 2002, the Minority Business Commission recommended that the Plan be further amended to enhance and clarify provisions of the Plan. The most significant change is the reduction of the Minority Business Commission from 13 to 11 members. The Minority Business Alliance is no longer active and one of the three certified minority business owners has been deleted in order to keep the board balanced to an odd number. In addition, the grievance procedures for hearings has been revised and made more concise for use.

The resolution amends the Plan as recommended by the Minority Business Commission. The recommended revision to the Plan will also be presented to the Buncombe County Commission for their consideration and adoption.

City staff recommends City Council adopt the resolution amending the Minority Business Plan.

RESOLUTION BOOK NO. 27 – PAGE 265

C. ORDINANCE NO. 2962 - BUDGET AMENDMENT TO ELIMINATE THE USE OF INTERNAL SERVICE FUNDS PURSUANT TO GOVERNMENTAL ACCOUNTING STANDARDS BOARD REGULATIONS AND AMEND THE GENERAL FUND BUDGET ACCORDINGLY

Summary: The consideration of a budget amendment to eliminate the use of internal service funds pursuant to Governmental Accounting Standards Board (GASB) regulations and amend the General Fund Budget accordingly.

The City of Asheville has several operations that are established to supply goods or services to other city departments or governmental units. These operations include Fleet Management, Graphic & Printing Services, Central Stores, and Group Health/Risk Management. Each of these four operations is currently set up as an ***Internal Service Fund***, a separate accounting entity established to budget and account for the activities of a department or division that supplies goods or services to another department or governmental unit.

The accounting and management procedures used by an internal service fund are similar to those of a private business; that is, the internal service fund predominantly charges other departments on a cost-reimbursement basis for the use of its goods and services. For instance, when Fleet Management repairs a police car, it charges the Police Department for the cost of parts and labor involved in the repair. The revenue that Fleet Management receives from charging the Police Department is used to pay the salaries of the mechanics and cover the cost of vehicle parts.

The use of internal service funds results in "double-budgeting" city expenditures, once in the Internal Service Fund and again in the City's General Fund. The Fleet Management Internal Service Fund, for example, has approximately $450,000 in its budget to cover the cost of maintaining police vehicles. The General Fund, through the Police Department, also has $450,000 in its budget to "pay back" Fleet Management for maintaining its vehicles. Thus, when adding the Police Department's vehicle maintenance budget to Fleet Management's budget for police vehicle maintenance, it appears that the City is spending $900,000 on maintenance of police vehicles, when in fact the actual cost to the organization is only $450,000.

To eliminate the appearance of double-budgeting and to respond to recent accounting changes advocated by the GASB, the Budget and Finance Directors recommend that the City discontinue using separate internal service funds to budget and account for the City's internal "business-like" operations. It is recommended that the internal service budgets for Fleet Management, Graphic/Printing Services, Central Stores, Group Health /Risk Management be reduced to zero and that the expenses for internal service functions be charged directly to department operating accounts in the general fund, where budgets already exist.

In addition to providing services to other City departments, several of the City's internal service funds provide limited services to external governmental agencies. The Fleet Management Internal Service Fund, for instance, sells gas to Memorial Mission Hospital, allowing Memorial Mission to benefit from the City's government rate. The budget to cover the cost of providing services to external agencies, however, is currently budgeted solely in the City's internal service funds. Thus, when the various internal service funds are reduced to zero, as recommended in this report, the cost of providing services to external agencies (i.e. Memorial Mission) will need to be moved to the general fund and the general fund budget increased accordingly. The increase in general fund expenditures will be offset by also moving revenues received from outside agencies (i.e. Memorial Mission) into the general fund, resulting in no net increase in general fund expenditures.

City staff recommends City Council adopt the budget amendment to eliminate the use of internal service funds pursuant to GASB regulations and increase general fund expenditures by $4,324,717 to reflect expenditures and revenues associated with internal service functions providing goods and services to outside agencies.

City Manager Westbrook responded to an inquiry from Councilman Dunn about why the City sells gas to Mission Hospital and what would happen if other non-profits asked for that service.

ORDINANCE BOOK NO. 20 – PAGE 97

D. RESOLUTION NO. 02-168 - RESOLUTION DIRECTING THE CITY CLERK TO ADVERTISE AN OFFER OF PURCHASE FOR UPSET BIDS FOR LAND OFF OF BLAKE MOUNTAIN CIRCLE

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids for 0.40 acres of land off Blake Mountain Circle.

A bid from Rhett A. Grotzinger, in the amount of $3,700.00, has been received for the purchase of land adjacent to his property at 307 Blakewood Court. The bid is not less than the appraised value of $3,700.00.

The property is zoned RS-2 and comprises approximately 0.40 acre of land. Thus the lot does not contain the required area for a standard lot in RS-2 zoning. The property has a trapezoid shape and is gently sloping to below street level. The parcel is wooded except for an abandoned circular water tank with a domed cover, which is partially below ground. The water tank is in the middle of the lot and covers about 1/3 of the land area. The appraisal by Richard Smith in the amount of $3,700.00 takes into consideration the substandard size of the lot as well as the negative impact of the water tank on the land value.

There is no current or contemplated use for the property by the City. If the sale is approved the property will be sold as is and the City will retain an easement for water lines on the property. Mr. Grotzinger plans to assemble the property with the property he owns and whether the water tank is removed or not will be his decision and responsibility.

Approval of the resolution will initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Planning staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE 266

E. RESOLUTION NO. 02-169 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A NON-WARRANTY DEED TO RELINQUISH THE CITY'S EASEMENT IN THE CLOSED PORTION OF THE ALLEY BETWEEN RIVERVIEW DRIVE AND EUCLID BOULEVARD

Summary: The consideration of a Resolution authorizing the Mayor to execute a non-warranty deed to relinquish the City's easement in the closed portion of the alley between Euclid Boulevard and Riverview Drive.

The City closed a portion of an unopened alley between Euclid Boulevard and Riverview Drive on June 27, 1995, reserving for itself an easement for the possible future installation and maintenance of public utilities. Subsequent to adoption of the Resolution, the petitioning property owner contacted the City and requested that the City, to the extent possible, relinquish its easement as the reservation of the easement defeated the purpose of closing the alley. Key City staff considered the request and did not oppose the request. The petitioning property owner was informed that City staff was prepared to recommend that the City relinquish its easement upon the receipt of certain information, which information was not received until July 22, 2002. Due to the lapse of time, key City staff was once again consulted and no objection was raised to the City relinquishing its easement. The closed portion of the alley whereby the City is relinquishing its easement is more specifically shown in Plat Book 7 at Page 72.

City staff recommends City Council adopt the Resolution authorizing the Mayor to execute a non-warranty deed relinquishing the City's easement in the closed portion of the alley between Euclid Boulevard and Riverview Drive.

RESOLUTION BOOK NO. 27 – PAGE 267

F. RESOLUTION NO. 02-170 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AGREEMENT WITH THE ASHEVILLE HUMANE SOCIETY FOR ANIMAL CONTROL SERVICES WITHIN THE CORPORATE LIMITS OF THE CITY

Summary: The consideration of a resolution authorizing the City Manager to sign an agreement with the Asheville Humane Society for animal shelter services within the corporate limits of the City.

On July 1, 2002, Buncombe County required the City to pay for animal shelter services with the Asheville Humane Society who has contracted to run the shelter. From July 1, 2002, through August 30, 2002, the City contracted with the Humane Society for shelter services based on funding approved in the City's interim budget. On September 1, 2002, the City approved the final budget for Fiscal Year 2002-2003, and in that budget approved $100,000 to pay for shelter services. The City and Humane Society need to enter into the same agreement for shelter services for the term of September 1, 2002, through June 30, 2003.

City staff recommends approval of the resolution authorizing the City Manager to sign an agreement with the Asheville Humane Society for animal shelter services for the term of September 1, 2002, through June 30, 2003.

RESOLUTION BOOK NO. 27 – PAGE 268

G. ORDINANCE NO. 2963 - BUDGET AMENDMENT TO RENOVATE THE BUILDING AT MEMORIAL STADIUM

Summary: The consideration of an amendment to the City's general capital project fund, in the amount of $72,593, to cover the renovation of the storage building at Memorial Stadium.

In November of 2001, the storage building at Memorial Stadium was destroyed by fire. The estimated cost to renovate the storage building is $72,593.

After a year of negotiation with the City's insurance carrier, the Risk Management office, with the assistance of the Parks & Recreation Department, received an insurance settlement to help cover the cost of renovating the storage building. Insurance settlement revenue in the amount of $64,593, as well as funds in the amount of $8,000 that can be transferred from the City's building maintenance reserve are available to support the cost of the renovation project.

Staff is requesting the establishment of a capital project budget in the amount of $72,593 for renovation of the storage building at Memorial Storage. The project budget will be balanced with the insurance settlement proceeds and building maintenance reserve funds noted above.

The Parks & Recreation Department recommends City Council approve the amendment to the City's general capital project fund for the renovation of the storage building at Memorial Stadium.

ORDINANCE BOOK NO. 20 – PAGE 105

H. RESOLUTION NO. 02-171 - RESOLUTION OFFERING HOUSING TRUST FUND LOANS

Summary: The consideration of a resolution to offer Housing Trust Fund loans for the construction of affordable housing.

In its final Fiscal Year 2003 City Budget, City Council approved a $500,000 appropriation for the City's Housing Trust Fund (HTF). Adding repayments from prior year loans, staff estimates that at least $580,000 will be available for lending this year.

The Housing and Community Development Committee has reviewed the process for offering HTF loans and has made some improvements, while keeping the guidelines broadly similar to those used last year.

In summary, the proposed loan guidelines (*and changes*) are as follows:

- Projects must be new construction, or rehabilitation of vacant property.
- Homes for sale must be priced at not more than $120,000; and sold to a person with household income below area median.

- Homes for rental must be affordable to households below 80% of are median income, and the first tenants must meet that income limit.
- Maximum loan amounts per unit are $40,000 for construction loans and $25,000 for long-term loans (*increased from $20,000 for both loan types*); the maximum loan to one applicant is $250,000 *(increased from $200,000).*
- Loans must be repaid within 30 years – no grants, forgivable loans, or indefinitely deferred loans are allowed.
- Loans will be fully amortizing with 2% interest, except that for the most affordable projects loan repayments may be either principal-only with 0% interest, or interest-only with deferred principal (*not both 0% and deferred*).
- Applicants have the option to purchase land from a list of City-owned sites; there are ten suitable properties currently on this list.
- Minor changes have been made to the evaluation criteria.

The loan offering can be published immediately after Council's approval, with an application deadline on November 27. Applications will be reviewed and scored by a panel of City staff and outside professionals and their findings will be considered by the Housing and Community Development Committee in December. The Committee's recommendations for loans will ready for Council's final review and approval in January.

City staff recommends City Council approve the resolution to offer Housing Trust Fund loans for the production of affordable housing in Fiscal Year 2003.

RESOLUTION BOOK NO. 27 – PAGE 269

I. RESOLUTION NO. 02-172 - RESOLUTION APPOINTING A MEMBER TO THE DOWNTOWN COMMISSION

Summary: Mr. Alan Levy has resigned as a member of the Downtown Commission, thus leaving an unexpired term until December 31, 2003.

On October 15, 2002, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint Mr. Andy Archie to serve the unexpired term of Mr. Levy, term to expire December 31, 2003, or until his successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 270

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilman Ellis moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Peterson and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING FOR PROPERTY LOCATED AT THE INTERSECTION OF ARDMION PARK ROAD AND ALEXANDER DRIVE FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL USE, AND ISSUANCE OF A CONDITIONAL USE PERMIT TO ALLOW FOR CONSTRUCTION OF 12 DWELLING UNITS

Due to an error in legal advertisement, Vice-Mayor Bellamy moved to reschedule this public hearing until November 12, 2002. This motion was seconded by Councilman Ellis and carried unanimously.

B. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING FOR PROPERTY LOCATED AT 612 MERRIMON AVENUE FROM COMMUNITY BUSINESS I DISTRICT TO COMMUNITY BUSINESS II DISTRICT/ CONDITIONAL USE, AND ISSUANCE OF A CONDITIONAL USE PERMIT TO ALLOW FOR A NEW STRUCTURE AND SITE PLAN SUPPORTING A DRUG STORE

ORDINANCE NO. 2964 - ORDINANCE TO CONSIDER THE CONDITIONAL USE ZONING OF PROPERTY LOCATED AT 612 MERRIMON AVENUE FROM COMMUNITY BUSINESS I DISTRICT TO COMMUNITY BUSINESS II DISTRICT/CONDITIONAL USE

ORDINANCE NO. 2965 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT TO ALLOW FOR A NEW STRUCTURE AND SITE PLAN SUPPORTING A DRUG STORE

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:17 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Mr. Alan Glines, Urban Designer, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Glines said that this is the consideration of a request to rezone property located on 612 Merrimon Avenue from Community Business I District to Community Business II District/Conditional Use and of a motion to issue a Conditional Use Permit for a new structure and site plan supporting a drug store.

On August 30, 2002, the City received a request to rezone a 1.78 acre parcel in the north area of the City of Asheville from Community Business I District to Community Business II/Conditional Use (City Exhibit 3 – Location Map). The parcel is known as PIN No. 9649-06-39-6470 at 612 Merrimon Avenue. Currently the property is the site of an Autozone Auto Parts Store. The existing building is 10,622 s.f. The proposed building will be 10,880 s.f. The conditional use component for this proposal will be the site plan, which is submitted for review along with the rezoning request. This site plan outlines the organization of the lot, size of the building, where driveways will be located, pedestrian amenities, street trees and buffering (City Exhibit 3 – Landscape Plan).

CB I zoning (the current zoning) allows a wide range of medium density neighborhood related services. This district may serve as a workplace for many residents and is also expected to be pedestrian friendly. The building size maximum is 6,000 s.f. for single story buildings or 12,000 if the building is multi-story. Existing single story buildings are allowed to be expanded up to 12,000 s.f. CB I does not allow drive-through facilities and parking must be placed to the side or rear of the structure.

CB II zoning (the proposed zoning) allows medium to high density business and service uses serving several residential neighborhoods. A wide range of neighborhood services is allowed in this district. CB II districts should also be pedestrian friendly while providing safe vehicular access. In this district, buildings may be up to 45,000 s.f. and may be one or several stories tall. Drive-through facilities are allowed in this district. Parking is to be placed at the side or rear of the structure, the same as for CB I.

The Zimmer Development Company is seeking to rezone the property to CB II because they are unable to salvage the old Autozone building. The building size proposed by the applicant is not permitted in the CB I zoning district.

The current zoning in the area is CB I for the parcels along Merrimon Avenue on both sides of the street. The parcel to the west of this site is zoned RM-16 and is the site of the Pinnacle Ridge Apartments.

A Traffic Impact Analysis (TIA) was prepared for this project and was reviewed by the City Engineering Department. No issues of concern were identified by the TIA aside from existing issues with Merrimon Avenue. The plan limits access directly to the site from Merrimon, allowing only a right in – right out turning movement.

The site plan places the building to the front of the lot to enhance the pedestrian experience and increase visibility by drivers. The structure features a brick façade with windows to relate to the street and to passersby (City Exhibit 3 – Building Elevations). Placing the building forward on the lot also increases the sense of place for the area. With the additional site improvements such as street trees and connecting sidewalks, Merrimon Avenue will begin to develop an attractive streetscape. In keeping with the requirements under the existing zoning and the recommendation of the Planning and Zoning Commission, the proposed project will not provide a drive through facility. Drive-through facilities can greatly increase traffic flow, increasing the potential for congestion at this intersection and decreasing the level of pedestrian safety. A drawing of the structure provided by the developer to Council does portray a drive through facility but it is not relevant for the current proposal.

The proposed project will comply with a signage package that is in keeping with CB I zoning, and not the CB II signage package. This will help the project fit into the neighborhood in which it is located. In addition, the signage will be externally illuminated signage; i.e. gooseneck external lighting or the like instead of internally illuminated plastic signage.

In addition to these considerations, the Planning and Zoning Commission has recommended the conditions for approval.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2 (c)). Staff's preliminary review, absent the benefit of public input, indicates that all seven standards are met.

1) That the proposed use or development of the land will not materially endanger the public health or safety.

   The development is within standards of development practice set forth by the City of Asheville. In addition, public safety providers have reviewed the site plan as part of the TRC review.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   The proposed development is not substantially changing the existing topography of the site. In addition, more permeable areas will be provided by this site plan than are on the existing site. The existing buffer area that is adjacent to the Pinnacle Ridge Apartment complex will be protected and preserved.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

   Most adjacent properties are commercial enterprises; the development will be buffered from the adjacent residential development. The proposed development will not injure neighboring property values.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

   The proposed use is a commercial use and will continue a tradition of single structure buildings in this part of Merrimon Avenue. The proposed structure is only about 200 feet larger than the existing structure.

5) That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

   The proposed development will support the City's Smart Growth goals of redevelopment within the City area where services and infrastructure are already in place to adequately serve the development. The building will be placed towards the front on the Merrimon Avenue side of the property making it inviting for drivers and people walking. In addition the development is providing pedestrian connections to the project site and a pedestrian waiting space at the corner of Merrimon Avenue and Edgewood Road to facilitate crossing at the corner.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

The proposed development site is located along a central artery for the City of Asheville and is has adequate infrastructure services.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The project engineers produced a TIA for this project that was reviewed by the City Engineering Department. It was noted at the last public hearing during Planning and Zoning review that traffic issues are a concern of some residents along Merrimon. This is a system wide problem and not caused by this project. A project going on this site will increase the traffic on Merrimon to a limited extent. Some additional signage and pavement markings on Edgewood Road may improve the use of the entrance on Edgewood. The Merrimon access will be right in and right out only to limit conflict points onto Merrimon. A transit shelter will be provided at the site by the developer. These actions and improvements will address the traffic impacts identified in the TIA.

The Planning and Zoning Commission voted 6-0 at their October 2, 2002, meeting to recommend approval of the conditional use proposal and site plan with the following conditions. Staff also recommends approval with conditions.

1. The traffic situation shall be evaluated further in an effort to identify additional traffic congestion mitigation strategies.
2. Signage and/or road striping shall be done on Edgewood to limit the blocking of the driveway.
3. Signage for the development shall comply with CB I standards.
4. No drive-through facility shall be provided.
5. Ensure that curb cuts provide ADA accessibility.
6. Buffer and landscape requirements will be finalized when existing tree counts are completed.
7. Consider the use of stormwater improvement practices.
8. Building must have an automatic fire sprinkler system.

Mr. Glines responded to various questions/comments from Council, some being, but are not limited to: will there be additional trees than what is currently located on the site; will there be a left turn arrow on Merrimon Avenue to turn onto Edgewood; is this CVS Pharmacy design different than a traditional CVS Pharmacy design; what is the sign package difference from a Community Business I district vs. a Community Business II district; will there be any problems with site distance from the trees on Edgewood Road; are there any environmental concerns on the site; and is the developer planning to do anything different regarding stormwater control.

Councilman Mumpower asked about the elimination of the drive through facility. Mr. Glines understood that the developer deleted the drive through because he wanted a project that would be received by the community and in an effort to compromise and reflect the residential goals, they deleted it. He explained that drive throughs tend to have potential conflict points for pedestrians on three sides of the building. Advantages of a drive through include (1) if you're sick, you don't have to get out of the car; (2) if you have small children, you don't have to park and get everyone out; or (3) elderly people don't have to go into the store to get prescriptions.

Regarding existing traffic, Vice-Mayor Bellamy asked if the incline on Edgewood Road toward Merrimon Avenue was taken into consideration for any roadway improvements. Mr. Glines said that the area out of the proposed development onto Edgewood Road could be stripped on the pavement so people coming down Edgewood Road waiting at the Merrimon Avenue light would not block the driveway. Vice-Mayor Bellamy asked if the driveway on the other side of Edgewood Road leading into Edgewood Square shopping center try to be aligned with the driveway going into the CVS Pharmacy to help eliminate blocking of the driveways and the blind spot coming down Edgewood Road.

Upon inquiry of Councilman Dunn about the location of the building on the property and the windows, Mr. Glines explained that this type of layout is required in the UDO under the Community Business I and II zoning. That layout is buildings forward on the lot and parking to the side or rear. The layout is staff's suggestion, but UDO supported. In addition, Mr. Glines felt that the developer recognized the pedestrian potential for this project since it is so close to UNC-Asheville and neighborhoods. He did note that because of the topography of the site, the building is located in the most likely spot, as is the current building.

Mr. Larry McDevitt, attorney representing Zimmer Development Company and CVS Pharmacy, said that because they want to build a better building (with brick) that would be compatible with the community and meet still their needs, they determined that they could not build on the existing foundation. They talked to numerous people in the community about the project and found they objected to two things – rezoning to Community Business II and the drive through facility. Even though they could make more money at the store with a drive through, they analyzed it, listened to the community's objections and decided to show they were flexible and cooperative. In an effort to respond to the community, they decided to delete the drive through facility (Applicant Exhibit 1 – Revised Site Plan). This project has been going on for approximately two years (but since August 2002 for the formal submittal process) and they have had a lot of discussions with City staff in a give and take process. They have worked cooperatively with staff and feel they have addressed the major community concerns. He asked that the following exhibits be entered into the record: Applicant Exhibit 2 – Application; Applicant Exhibit 3 - Planning & Zoning Minutes of October 2, 2002; Applicant Exhibit 4 – TRC Conditions of September 16, 2002. Mr. McDevitt said that they feel that Condition No. 1 (The traffic situation shall be evaluated further in an effort to identify additional traffic congestion mitigation strategies) has already been done and he believed that they have an agreement with City staff about traffic mitigation. He said the TIA they submitted find that they comply with traffic requirements. Regarding Conditions 2-7, they agree to abide by and be bound by those conditions if this is approved. He urged Council to rezone the property in order to have a better building, one that is aesthetically more pleasing, one that serves the public interest, one that is more pedestrian friendly and a project that will actually assist in some of the traffic situations. Applicant Exhibit 5 – Aerial Photo of the Site. He noted that their development is compatible with other development in the area – a one level building that is commercial. He said they have added a number of amenities for pedestrians, some being a covered shelter for a bus stop and a rest area at the corner. Applicant Exhibit 6 – Photo of Another CVS Pharmacy. He felt this project was worthy of Council's total support and asked for Council's approval. Applicant Exhibit 7 – Traffic Impact Analysis.

Mr. Keith Thomson, resident on Bridle Path Road, felt that traffic studies by developers should be held to a higher standard. In this particular project, the TIA did not mention Edgewood Road except in the footnotes to mention that the intersection of Edgewood and Merrimon is at 104% of capacity as measured by the State Department of Transportation. He felt that intersection is already a problem and if the pharmacy is built, it will only add to that congestion. We need the developer to join us, as new neighbors, in helping to address the issues and not ignore them. They have been trying to get sidewalks and traffic calming measures in the Jackson Park/Woolsey neighborhood for over 8 years and when the Center for Creative Retirement opens up at UNC-Asheville, there will be a potential for more elderly drivers to come through the neighborhood. He said that another serious traffic flow problem is that every time a large semi-truck making a delivery comes off Edgewood onto the property, they get stuck and he hoped they have a plan to address that concern.

Mr. William Sabo, representing the Grace Neighborhood Association, explained why he felt this request is a product of a system that is designed for sound planning, but in reality it's a product of a process that gives the petitioner the upper hand. He said that even though the petitioner has been working with the City for two years, the neighborhood only found out about it a couple of weeks before the Planning & Zoning Commission meeting. He said the petitioner only contacted one individual and at a meeting of three neighborhood people, they were only given a rough overview of some of the conditions the City was imposing on the project. The neighborhood opposed the rezoning of the property because among other reasons, that would permit CVS to install a drive through window. They were told that rezoning was essential because they work with an off-the-shelf floor plan for the store. They were told it was not financially feasible to modify the plan. They encouraged the petitioner seek alternatives which would allow CVS to expand without rezoning. In summary, the next time the petitioner talked to the neighborhood was during the Planning & Zoning Commission meeting in which they said they dropped the drive through but would continue with the rezoning. He felt that CVS only created the illusion of working with the neighborhood. After review of the TIA, there at least four fundamental methodical errors. One was their failure to ignore the impact of traffic on the other side of Edgewood Road and the petitioner just challenged their ability to understand the report. CVS is asking the City to bend it's rules to their interest by rezoning the property, but the City needs to protect the citizens in these neighborhoods by enforcing the City's rules and regulations. Until there is a true consultation by all parties affected, no one can really say if this change is for the better. In order to preserve the rules and integrity of the system, he asked Council to refuse to rezone the property and begin to revisit and revise the process to ensure that true consultation of all interested parties takes place.

Ms. Katherine Fincher, resident on Wildwood, reiterated there was no traffic impact analysis where Kimberly comes down to Merrimon Avenue. Whether or not CVS Pharmacy is built or not, there needs to be left turn arrows heading north and south on Merrimon Avenue.

Ms. Laura Chase, representing the Norwood Park Neighborhood Association, said that they feel that City staff and the petitioner worked together without neighborhood involvement. She felt that zoning is here for a reason and it should be upheld. She felt that rezoning this property might set a precedent and others will request their property be rezoned to Community Business II thus creating more traffic on Merrimon Avenue. She felt that one of the reasons City staff is advocating a larger structure is that it's consistent with the proposed Neighborhood Corridor District and they are not familiar with the standards for that district.

Ms. Melanie Shelor, resident on Merrimon Avenue, spoke against the rezoning in that the intersection will not handle the capacity of vehicles generated by a CVS Pharmacy.

Mr. Dwayne Conner spoke in support of the rezoning. He felt they are going to develop a project that is pedestrian friendly and feels this is one of the best uses of this property.

Mr. Craig Justus, attorney representing Zimmer Development Company and CVS Pharmacy, stressed that conditional use zoning is a tool City Council has in their rules and that it allows City Council to control what is built on a piece of property. They have offered a lot of pedestrian improvements, e.g. moving the bus stop to a safer location on their property, moving the building closer to the street for an attractive streetscape. City staff directed them on what study in the TIA and after their review, they said the report was fine. The comment that the intersection at Edgewood Road and Merrimon Avenue is at 104% capacity is not accurate. Their traffic engineer will address that point. He pointed out that when they knew there was neighborhood opposition, they requested a meeting and there were two things the neighborhood was opposed to – a drive through facility and the rezoning. They needed to request rezoning because without it, they could not develop their project. So, they deleted the drive through, which was not an easy decision. They believe they have met the concerns expressed, feel that they have a good application and a good precedent will be set if Council approves this project.

Ms. Kelly Grady, traffic engineer with Kimley-Horn and Associates Inc., said that they use the highway capacity manual method for TIA's. The highway capacity manual method shows that the intersection of Edgewood Road and Merrimon Avenue would be a Level of Service A in the morning peak hours and a Level of Service B in the afternoon peak hours, based on a scale of A through F. The 104% capacity is related to a different software method and not the standardized highway capacity manual method, which is the accepted standard used. She reiterated that the intersection is not a failing intersection.

Upon inquiry of Councilman Ellis, City Engineer Cathy Ball said it appears the numbers are accurate based upon our review of the developer's TIA.

Vice-Mayor Bellamy strongly advocated a traffic calming mechanism on Edgewood Road that has nothing to do with intersections. She said that driving from UNC-Asheville to Merrimon Avenue on Edgewood Road is not safe. She said there is a blind spot and an incline coming down to Merrimon Avenue.

Upon inquiry of Mayor Worley, Ms. Grady explained how the data of 126 additional trips per day was arrived at in the TIA. She noted that there is a negligible difference in trip generation between with and without a drive through facility.

Upon inquiry of Councilman Mumpower about a problem with trucks accessing the property, Mr. Justus said that they propose to improve the parking lot grades so there is a better transition with adjoining streets. Mr. Jim Bell, with Kimley-Horn and Associates, Inc., said that when they redesign the site they would work with the grades to make sure that the problem will not exist. He said they could even limit the size of trucks that will deliver to the store.

Councilman Mumpower questioned why the drive through facility was deleted, especially when it shows there will only be a negligible difference in traffic. City Engineer Ball said that in reference to the information that is provided by Ms. Grady, there is a standardization and that is accepted practice. She is assuming if the numbers are negligible then there must be the assumption that people are going to come to the pharmacy regardless of whether or not it has a drive through. The thought behind putting in a drive through would be that it would be more convenient and therefore people would have a desire to go there. She said that it's hard from an engineering standpoint to say that a drive through facility generates more traffic, but that there is the perception is that there is more traffic as well as a potential for more pedestrian conflicts if there is a drive through.

Councilwoman Jones asked about traffic calming measures on Edgewood Road. City Engineer Ball said that the City is in the process of, due to another project, looking at some traffic calming measures on Edgewood Road, but it is not funded. In the early 1990's there were some traffic calming measures installed on Edgewood Road. Those consisted of rumble strips but they created a problem because of the noise and the neighborhood requested they be removed. They were removed and then traffic calming measures of stop signs were installed, which are not recommended traffic calming measures. The reason why City staff did not recommend traffic calming on Edgewood Road is that the study seemed sound and the study indicated that there is only an additional 50 vehicles a day added to Edgewood Road as a result of this development. A recommendation to require the developer to do traffic calming would have been excessive considering there would only be 50 additional vehicles per day on Edgewood Road.

Upon inquiry of Councilman Mumpower, Ms. Ball used Figure 4 from Applicant's Exhibit 7 to show there would be an additional 25 vehicles traveling on Edgewood Road from Merrimon Avenue to Kimberly Avenue.

Vice-Mayor Bellamy asked about sidewalks on Edgewood Road. City Engineer Ball said that there are only sidewalks to the apartments on the left on Edgewood Road from Merrimon Avenue. The City has also looked at the opportunity in working with UNC-Asheville and the neighborhood to put sidewalks in. It appears that without taking right-of-way, we would need to decrease the width of the pavement. That is an option, however, there are a lot of people who use on-street parking and you have to give up the option of using on-street parking if you put in the sidewalks without right-of-way.

When Councilwoman Jones asked how citizens could participate in discussions of the proposed Neighborhood Corridor District, Planning & Development Director Scott Shuford suggested they contact Chief Planner Gerald Green. Mr. Shuford did say that if that district is applied to another street in the City (other than the proposed Broadway Avenue), meetings would be held.

When Councilwoman Jones suggested the UDO be amended to make it mandatory that developers meet with neighborhoods, Councilman Mumpower felt there might be creative ways to meet this objective other than making it mandatory.

Upon inquiry of Councilman Mumpower, Mr. McDevitt said that even though a drive through would be a convenience to certain groups and doesn't have a significant impact on traffic, they will not ask City Council to approve the project with a drive through.

Councilman Dunn asked how many CVS pharmacies have drive throughs. Ms. Leigh Polzella, Construction Project Manager with CVS Realty Co., said that most freestanding locations have drive throughs and explained the convenience associated with them. Through the last two years on this project there has been a lot of give and take and they are trying to be community friendly and more accessible to their customers.

When Councilman Mumpower asked if City Council can modify what is before City Council, City Attorney Oast said that if he is talking about adding the drive through facility, it is a significant enough of a change to the site plan to require a new notice and public hearing process.

Councilman Ellis said that he would not be in favor of adding the drive through facility because the developers are not asking for it now and the neighborhood does not want it.

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 7:38 p.m.

Councilman Peterson said that he felt CVS has made a number of changes and he felt this rezoning would be better for the property and the City as a whole. He felt that considering what could be done on the property with the existing zoning, this proposal with conditions would be better for the neighbors. He was somewhat concerned that the developer negotiated with the City for 1-1/2 years without having direct input from the neighbors. We also need to be looking at what is happening on Merrimon Avenue as a whole because we are reaching a breaking point regarding traffic.

Mayor Worley felt that most comments were about the process, not the seven conditional use standards City Council must determine that the project meets. He felt the project would be better for the community.

Vice-Mayor Bellamy moved to adopt Ordinance No. 2964 to rezone property located on 612 Merrimon Avenue from Community Business I District to Community Business II District/Conditional Use. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 107

Mr. Shuford said that Condition No. 1 could be eliminated if Council chooses. Council could direct staff to look at Edgewood Road at every opportunity to calm traffic and cut down on cut-through on that roadway. He suggested Council delete that condition and give staff direction as a separate action. He felt that Condition No. 1 would place a burden on the developer that staff doesn't feel is necessary. We have a formal process for handling traffic calming and staff will look at Edgewood Road.

Councilman Peterson doesn't think we are looking at requiring the developer to put any off-site traffic calming measures, but asking staff to keep in mind this site plan if there are minor changes that need to be made to Edgewood Road, e.g., widening the driveway a little or stripping immediately adjacent to this property.

Vice-Mayor Bellamy does want off-site traffic calming measures on Edgewood Road. She felt that this development is a key player regarding traffic in the area.

City Engineer Ball explained how Condition No. 1 was placed on staff's recommendations. She said it came directly out of comments made at the Planning & Zoning Commission meeting in which there were some comments made by the neighborhoods about different issues and we were talking about some possible solutions. The intent was just not to close the door and to leave some options on the table to say if something comes out that seems like a good idea to do, then we should pursue that. She felt staff evaluated everything and she doesn't think there is anything else on site that we can do – it wasn't with the intent of doing major off-site mitigation. The City has been in discussions with the State about Merrimon Avenue for the past 5-6 years and evaluated three different possibilities of treating Merrimon Avenue – all of which weren't feasible. A tool that Council can use is obtaining special legislation to impose a traffic impact fee. In that case, different stores may not contribute to the whole problem, but you can collect money that will go toward fixing the whole problem. City Council may wish to pursue that option in the future to be fair about the impact that development pays on making improvements.

Councilman Ellis moved to adopt Ordinance No. 2965 to issue the conditional use permit for a new structure and site plan supporting a drug store, subject to the following conditions (which is staff's conditions deleting Condition No. 1): (1) Signage and/or road striping shall be done on Edgewood to limit the blocking of the driveway; (2) Signage for the development shall comply with CB I standards; (3) No drive-through facility shall be provided; (4) Ensure that curb cuts provide ADA accessibility; (5) Buffer and landscape requirements will be finalized when existing tree counts are completed; (6) Consider the use of stormwater improvement practices; and (7) Building must have an automatic fire sprinkler system. This motion was seconded by Councilman Mumpower.

Vice-Mayor Bellamy moved to amend the original motion to include an additional condition to direct City staff to consider the need for additional traffic calming measures on

Edgewood Road from Merrimon Avenue to Darcy and, if recommended, implement those at the developer's expense. This motion was seconded by Councilman Peterson.

Councilman Dunn wondered if Vice-Mayor Bellamy would amend her motion to read: "The traffic situation shall be evaluated further in an effort to identify additional traffic congestion mitigation strategies, at the City's expense." Vice-Mayor Bellamy did not agree to amend her motion.

Upon inquiry of Councilman Mumpower, City Engineer Ball said that there is a traffic problem on Edgewood Road. The past history over the past ten years indicates that people have been trying to work on issues there with traffic calming that has already occurred. However, in the review of the project, our request of the developer was in line with the additional impact that they were creating, based on the engineering data they provided.

Mayor Worley felt all of Council agreed that there needed to be traffic calming measures on Edgewood Road, but the question of who should pay for it – the developer or City taxpayers. Since the traffic study shows the development will bring negligible additional traffic to the area, he couldn't agree with making the developer pay for those measures.

The amendment to the motion made by Vice-Mayor Bellamy and seconded by Councilman Peterson failed on a 3-4 vote, with Vice-Mayor Bellamy, Councilwoman Jones and Councilman Peterson voting "yes" and Mayor Worley, Councilman Dunn, Councilman Ellis and Councilman Mumpower voting "no".

The original motion made by Councilman Ellis and seconded by Councilman Mumpower carried unanimously.

It was the consensus of City Council to make it a priority to have City staff to look at Edgewood Road from a safety standpoint and also from a traffic calming standpoint.

ORDINANCE BOOK NO. 20 – PAGE 109

At 8:10 p.m., Mayor Worley announced a short break.

C. PUBLIC HEARING RELATIVE TO A CONDITIONAL USE PERMIT REQUEST FOR PROPERTY LOCATED AT BILTMORE LAKE – ENKA IDENTIFIED AS THE GABLES AT BILTMORE LAKE

ORDINANCE NO. 2966 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT BILTMORE LAKE – ENKA IDENTIFIED AS THE GABLES AT BILTMORE LAKE

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 8:35 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Mr. Alan Glines, Urban Designer, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Glines said that this is a request to consider a conditional use permit for property located at Biltmore Lake – Enka identified as The Gables at Biltmore Lake for a proposed 258 unit residential development in the City's western extraterritorial jurisdiction.

On August 30, 2002, Biltmore Farms submitted an application for Level III site plan review for an age restricted residential community consisting of both single housing units and multifamily units (City Exhibit 3 – Location Map). The parcels include PIN Nos. 9616.01-18-6804 and a portion of 9616.01-07-9761 and total approximately 59 acres bordering Biltmore (Enka) Lake. The housing total is made up of 168 condominium units, 38 multiplex units, 24 villa units (duplex format) and 28 single family units for a total of 258 units (City Exhibit 3 – Site Plan). The development is accessed from Enka Lake Road by a central street with the residential streets coming from this central spine. Streets in the development will be private but will be built to City of Asheville standards. As proposed, the entrance at Enka Lake Road will be gated.

The surrounding area is zoned RM-16 Residential Multi-Family High Density District including this parcel. The adjacent Buncombe County school parcel is zoned Institutional. The RM-16 multi-family residential district allows up to 16 units an acre. Under the current zoning, up to 940 residential units could be constructed on the site given the acreage. With the current rezoning request the applicant is seeking approval of 258 units with a density yield of 4.4 units per acre.

In addition to the different housing types that will be a part of this proposal, the Gables project will also include a 19,000 square foot recreation center. For open space and recreation uses, the Unified Development Ordinance (UDO) requires nearly 3 acres of open space for the project. The proposed site plan far exceeds this minimum amount of open space.

The engineers for the project have submitted a letter describing the traffic impacts of the project. The original Traffic Impact Analysis (TIA) for the Biltmore Lake project included a projected 88 single family houses for this area of the development. Because this is a special population of active retirees in an age restricted community, it is felt that the traffic generated will be less than if the uses were being developed for the same number of typical single family units. The 88 single family units accounted for in this area of the development in the original TIA would actually have a greater impact than this number of 'retiree' units. The traffic impact analysis completed for this project noted the need for improvements on Sand Hill Road and connecting streets in the area. This includes the need for additional turning lanes in the roadway system and perhaps additional signalization. Widening for Sand Hill Road is in the N. C. Dept. of Transportation (DOT) schedule already but is still some time off. Biltmore Farms has been discussing the roadway issue with DOT staff to speed up the construction time frame. The final traffic plan is also being worked on at this time.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case

(UDO 7-16-2 (c)). Staff's preliminary review, absent the benefit of public input, indicates that all seven standards are met.

1) That the proposed use or development of the land will not materially endanger the public health or safety.

The development is within standards of development practice set forth by the City of Asheville. Public safety providers reviewed the project as part of the TRC review.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

The nearly 59-acre site is mostly wooded and slopes towards the lake. The developer is proposing to maintain a minimum 80' vegetated buffer between the proposed structures and the lake. This area will be undisturbed save for minimum impacts from the construction of walking paths and other park style amenities.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

The proposed development will not injure neighboring property values. Overall the Biltmore Lake project is expected to increase values of property in the area.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

The surrounding properties include a school property and other wooded property. This residential project will be well buffered to retain the wooded nature from both inside and outside of the project. The entire Biltmore Lake project will be a part of what defines the character of the surrounding area.

5) That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

The development will provide housing options for current and new residents.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

This area is being considered by the DOT for roadway improvements for Sand Hill Road. Other utilities will be adequately served in the area. Currently Buncombe County will provide protective services in this community. If the area is annexed by the City of Asheville, then the City will extend services here.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The roadway network in the Enka area has received increased traffic from Sardis Road, along Sand Hill Road to the area of Highway 19-23. The Biltmore Lake development will add to this traffic situation. Biltmore Farms has been in discussions with DOT to determine what improvements are required and to complete them in a timeframe consistent with the construction of the development phases.

172

The Planning and Zoning Commission voted 6-0 at their October 2, 2002, meeting to recommend approval of the conditional use proposal and site plan with the following conditions. Planning and Development staff concurs with this recommendation.

1. If the Gable project's main drive from Enka Lake Road is connected through to Case Cove Road at some time in the future, then the issue of making the street a public street be reviewed again.
2. All streets within the project shall be built to City of Asheville standards.
3. Final landscape plans will be fully reviewed for shrub and tree counts (buffer plantings, street trees and parking lot plantings included) which should include existing plant material that will be credited towards the planting requirements.
4. The developer shall work with City staff to insure that the urban type of development proposed for this project receives an urban level of public safety services.
5. Sidewalks are required for all new streets and along Enka Lake Road.
6. Cul-de-sac streets should be avoided and loop streets should be created where feasible.
7. Parking space needs will be reviewed with requirements from the UDO.
8. Water line extension plans will be reviewed by the City Engineering Department
9. Sewer extension plans will be reviewed by MSD.
10. Maintain a minimum 80' of undisturbed lakeside buffer area.

One additional condition that was not mentioned during prior reviews may be:

11. Biltmore Farms will continue to work with DOT to complete roadway improvements identified in the TIA in a manner timely to the completion of Biltmore Lake project phases.

Upon inquiry of Councilwoman Jones, Mr. Glines explained the pros and cons of a cul-de-sac. The advantage is that some people like to live at the very end of a street and a disadvantage is that a cul-de-sac destroys the connectivity to other streets.

Councilman Peterson was concerned that, even though Sand Hill Road and Enka Lake Road are state maintained roads, with only one road in and out of the development, in the future there may be a problem with traffic, especially with the schools in the area. Mr. Mark Teague, N. C. Dept. of Transportation (DOT) Division Traffic Engineering, responded that as far as access, there can be problems and technically DOT is just now beginning to work with the developer on this as well as the entire development. He didn't recall if any improvements were recommended but if you have that much traffic coming out, there's a chance that a turn lane may be recommended. He didn't think a traffic signal would be warranted, however, he has not seen the numbers.

Upon inquiry of Councilman Peterson, City Manager Westbrook said that it was his understanding that the developer will voluntary annex in the future in phases, as they did with the Biltmore Park developments. City Attorney Oast cautioned Council to not let that influence City Council's action in this matter.

Upon inquiry of Councilwoman Jones, Mr. Dan Baechtold, the City's Transportation Planner, said that there are a number of improvements recommended in Transportation Improvement Analysis (TIA) for this development. The developer and DOT are working together to come up with a schedule on how those would be phased and how the cost-sharing would work. There are other projects under consideration in the area that are more on the scale of projects that the State would do as part of the Transportation Improvement Program (TIP). Those would include any major road widenings of Sand Hill Road and Sardis Road, which there is a feasibility study in the TIP now to look at widening that whole section. There are some specific improvements that the developer would do as part of concurrency with the phases of the development and then some other longer term major improvements that DOT will consider. There is a smaller TIP project to replace the bridge over Hominy Creek and to widen a short segment of Sand Hill Road in the vicinity of this development and that is already scheduled and funded in the TIP.

Mr. Will Buie, engineer with William Lapsley and Associates, said that if the project is approved, Vantage Senior Care will purchase the property, which is owned by Biltmore Farms, and develop an age-restricted community. The reason why they are asking that the project be a gated community is because the people that the owners are marketing to are not necessarily from this area and living in a senior community, being gated and secured, is very important to them. We have had discussions with City staff about the main artery road and possibly making that a public street if it's ever extended in the future and we have no problem with leaving that in as a condition to project approval. At this time we have taken the staff's directive to look at looping the roads in the development and we do believe there are some opportunities to provide some loops and eliminate some cul-de-sacs. If the project is approved, we will go back to City staff for their final approval. Regarding traffic at a single entrance, they have looked at that. This is an age-restricted community and the traffic generation out of this development is very different. Even though there are 258 units, the actual traffic corresponds to approximately 88 single-family homes. We believe the traffic generated by this project will be significantly less than 258 typical single-family homes. We do intend to work with DOT for the entrance to the development and we already anticipate that we will be building turning lanes or making some improvements to that entrance.

Upon inquiry of Councilwoman Jones of what is a gated community, Mr. Buie explained that specifically there is supposed to be an entrance feature at the main entrance off of Enka Lake Road. That will be made up of landscaping and other improvements and it will also probably include a gatehouse. At this time they are not proposing to have closed gates. At some point in future the property owners association will take over all of the facilities. They may find that they would like to have someone man a gatehouse and to admit people as necessary. The developers feel that is an important aspect of this project.

Upon inquiry of Councilwoman Jones, Mr. Buie said that the range of units would be approximately $250,000 - $400,000.

City Attorney Oast reminded Council that there has been information about the group that has this property under contract and what their particular intentions are with respect to it. If Council approves this, the owners could turn around and sell it and it would not necessarily be for an age-restricted community. It would be for the development that is on the site plan. Again, they have made representations about their target residents but City Council is approving the use, not the population.

Upon inquiry of Councilman Mumpower, Mr. Glines said that a concern raised at the Planning & Zoning Commission meeting was primarily for the main artery to be a through street for connectivity.

Councilwoman Jones asked how many gated communities does Asheville currently have. Planning & Development Director Scott Shuford said that we have a limited under and that we discourage gated communities because of the connectivity issue and the exclusivity.

Councilwoman Jones understood that our community is growing and that the City is trying to accommodate the range of buyers who might live or come to our community, but she didn't quite feel like it was the right spirit of how we are operating in a community to support a gated community. She did understand, however, that this gives us more options for our current and future residents and give us more housing options for them to choose from and that is part of our comprehensive plan. Mr. Glines responded that there are portions of the Biltmore Lake project that will appeal to different housing needs and types in the community.

Ms. Sylvia Farrington, resident of Biltmore Commons, spoke in support of the development.

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 9:26 p.m.

Councilman Mumpower moved to adopt Ordinance No. 2966 to issue the conditional use permit for property located at Biltmore Lake – Enka identified as The Gables at Biltmore Lake for a proposed 258 unit residential development, subject to the following conditions (which is staff's conditions deleting Condition No. 6, not including Condition No. 11 and adding an entirely new condition): (1) If the Gable project's main drive from Enka Lake Road is connected through to Case Cove Road at some time in the future, then the issue of making the street a public street be reviewed again; (2) All streets within the project shall be built to City of Asheville standards; (3) Final landscape plans will be fully reviewed for shrub and tree counts (buffer plantings, street trees and parking lot plantings included) which should include existing plant material that will be credited towards the planting requirements; (4) The developer shall work with City staff to insure that the urban type of development proposed for this project receives an urban level of public safety services; (5) Sidewalks are required for all new streets and along Enka Lake Road; (6) Parking space needs will be reviewed with requirements from the UDO; (7) Water line extension plans will be reviewed by the City Engineering Department; (8) Sewer extension plans will be reviewed by MSD; (9) Maintain a minimum 80' of undisturbed lakeside buffer area; and (10) Any change in the permitted population which would have a substantial traffic impact increase greater than 10% shall require an amendment to the conditional use permit. This motion was seconded by Councilman Peterson.

After a brief discussion about the developer's willingness to do loop streets in the development, Councilman Ellis moved to amend the original motion to include two conditions (which are staff's Conditions 6 and 11): (1) Cul-de-sac streets should be avoided and loop streets should be created where feasible; and (2) Biltmore Farms will continue to work with DOT to complete roadway improvements identified in the TIA in a manner timely to the completion of Biltmore Lake project phases. This motion was seconded by Councilman Peterson and carried on a 6-1 vote, with Vice-Mayor Bellamy voting "no".

Vice-Mayor Bellamy explained that since the developer has already noted on the site plan where cul-de-sacs would become loops and the condition is too vague.

The original motion, as amended, made by Councilman Mumpower and seconded by Councilman Peterson carried unanimously.

Councilwoman Jones hoped that the developer makes the gate as friendly as possible and that it remains more open than closed. In terms of her hopes for future gated communities, she hoped that they are more the exception than the rule.

ORDINANCE BOOK NO. 20 – PAGE 115

D. PUBLIC HEARING TO CONSIDER A REQUEST FOR A MODIFICATION FROM THE SUBDIVISION STANDARDS TO ALLOW THE CREATION OF A LOT THAT DOES NOT ABUT A PUBLIC STREET ON PROPERTY LOCATED AT 5 BELL HAVEN ROAD

Mayor Worley opened the public hearing at 9:37 p.m.

Urban Planner Carter Pettibone said that this is the consideration of a request for a modification from the subdivision standards to allow the creation of a lot that does not abut a public street on property located at 5 Bell Haven Road. This public hearing was advertised on October 11 and 18, 2002.

The City has received a request from Tim and Jan Haynes to subdivide a parcel located at 5 Bell Haven Road (PIN No. 9668.05-19-0612) into two lots. The parcel is 2.47-acres in size and zoned RS-4 Residential Single Family Medium Density District. The property has very narrow frontage onto Bull Mountain Road, which is a public street. The lot also has a narrow strip of land running from Bull Mountain to the bulk of the lot that is located behind four other lots. There is a private street, Bell Haven Road, located within this narrow strip that provides access to the lot in question as well as seven other properties. Since it is not possible to obtain the minimum frontage for the new lot as specified in the Subdivision Ordinance, a modification is required in order to subdivide the property with one lot not having public street frontage.

The petitioners wish to subdivide the lot in order to build another home on its own lot with access to the private Bell Haven Road. Only one additional home is proposed and each of the resulting lots from the subdivision would be able to meet the UDO requirements of the RS-4 District for minimum lot size and setbacks.

The proposed subdivision modification was reviewed by the Technical Review Committee (TRC) at its September 16, 2002, meeting and they recommended approval with the following conditions:

1. The right-of-way for Bell Haven Road must be widened to a minimum of 25 feet and be able to accommodate any future work done by the Water Department in regards to maintenance of the existing water line.
2. Applicant will need to obtain an easement across another property to gain access to public sewer system.
3. The existing lot will need to retain some frontage onto Bull Mountain Road.
4. Any construction work within the water line right-of-way must be coordinated with the Water Resources Department

The TRC voted unanimously and Planning and Zoning Commission voted 6-0 to recommend approval with the above-mentioned conditions. The Planning and Development staff also recommends approval of the subdivision modification with the conditions.

When Councilman Peterson asked how the people will get garbage collection if they are on a private road, Mr. Pettibone said that there are garbage bins along the private street and the City does provide garbage pickup on a private street if it is maintained.

Mayor Worley closed the public hearing at 9:44 p.m.

Councilman Mumpower moved to allow a modification from the subdivision standards to allow the creation of a lot that does not abut a public street on property located at 5 Bell Haven Road subject to the following four conditions: (1) The right-of-way for Bell Haven Road must be widened to a minimum of 25 feet and be able to accommodate any future work done by the Water Department in regards to maintenance of the existing water line; (2) Applicant will need to obtain an easement across another property to gain access to public sewer system; (3) The existing lot will need to retain some frontage onto Bull Mountain Road; and (4) Any construction work within the water line right-of-way must be coordinated with the Water Resources Department. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

E. PUBLIC HEARING TO REZONE PROPERTY LOCATED ON EMMA ROAD FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO COMMUNITY BUSINESS I DISTRICT

ORDINANCE NO. 2967 - ORDINANCE TO REZONE PROPERTY LOCATED ON EMMA ROAD FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO COMMUNITY BUSINESS I DISTRICT

Mayor Worley opened the public hearing at 9:42 p.m.

Urban Planner Carter Pettibone said that this is consideration of an ordinance to rezone property located on Emma Road from RM-8 Residential Multi-Family Medium Density District to Community Business I District. This public hearing was advertised on October 11 and 18, 2002.

The applicant, Salvador's Bohemian Market, is requesting rezoning of the 1.06-acre parcel (PIN No. 9639.18-30-1917) in order to redevelop the property for uses permitted in the CB I District. The purpose of the CB I District is to provide for medium-density business and service uses serving several residential neighborhoods

The property is a very shallow one as it is wedged in between Emma Road to the north and the railroad right-of-way to the south. There are three existing buildings on the site, all of which are vacant and one of which will need to be torn down due to its dilapidated condition. The larger of the two that can be salvaged is around 6,000 square feet in area. The applicant has expressed her desire to use these remaining buildings as part of a small commercial development.

This property is located just outside the City Limits in the extraterritorial jurisdiction in an area that has a variety of uses and zoning. The properties immediately across Emma Road to the north and to the east of the property are zoned RM-8 and contain a mix of single-family and manufactured homes. Properties to the west at the intersection of Emma Road and North Louisiana Avenue are commercial and function as the center of the Emma community. Immediately south across the railroad is the Holiday Inn Sunspree Resort.

The site's frontage is on Emma Road, which would likely function as the site main access. The road is a fairly well traveled one, both for cars and pedestrians, and should be able to accommodate any traffic increase that would result from development on the site.

Staff feels CB I is an appropriate zoning category for the parcel for a number of reasons. The shallow shape and wide street frontage of the property due to the street and railroad and its location adjacent to the railroad do not lend the property to being suitable for residential uses. The proposed zoning also helps to provide a transition from the CB II and Resort zoning to the west and south to the residential uses of the RM-8 to the east and north. There is a CB I district between Emma Road and the railroad directly west of the CB II zoning at Emma and Louisiana and this property would fill in the intersection's other "flank" with similar zoning. CB I zoning would also provide the opportunity to preserve and improve the remaining buildings on the site for economically viable uses and help further strengthen the Emma community area.

The Planning and Zoning Commission voted 6-0 to recommend approval of the rezoning of the property located on Emma Road from RM-8 to CB I. City staff feels CB I zoning is appropriate for the parcel as well.

Ms. Leslie Stevens, owner of the Salvador's Bohemian Market, briefed City Council on the background of the property and urged City Council to rezone it. In addition, she requested

Council's assistance in slowing down the traffic on Emma Road and seeing what they can do to get sidewalks on Emma Road.

City Attorney Oast responded to her questions regarding sidewalks for new developments.

Mayor Worley closed the public hearing at 9:58 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Jones moved for the adoption of Ordinance No. 2967. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 122

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 02-173 - RESOLUTION APPOINTING MEMBERS TO THE CIVIC CENTER COMMISSION

Vice-Mayor Bellamy said that there currently exists two vacancies on the Civic Center Commission.

On October 22, 2002, City Council interviewed Ms. Sylvia Farrington. In addition, on October 22, 2002, City Council asked that the City Clerk verify that Mr. Dan Breneman was still interested in serving on the Commission. Mr. Breneman is interested.

Vice-Mayor Bellamy moved (1) to appoint Ms. Sylvia Farrington as a member of the Civic Center Commission to serve an unexpired term until June 30, 2005; and (2) to appoint Mr. Dan Breneman as a member of the Civic Center Commission to serve an unexpired term until June 30, 2004. Both terms are until their successors have been appointed. This motion was seconded by Mayor Worley and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 271

B. RESOLUTION NO. 02-174 - RESOLUTION APPOINTING A MEMBER TO THE RECREATION BOARD

Vice-Mayor Bellamy said that Mr. Thomas House has resigned as a member of the Recreation Board, thus leaving an unexpired term until December 31, 2003.

On October 15, 2002, City Council instructed the City Clerk to arrange for Carol Ann Pothier and Leonard Jones to be interviewed for a vacancy on the Recreation Board. Mr. Jones was unable to attend the interview, however, he was interested in serving.

Vice-Mayor Bellamy moved to appoint Carol Ann Pothier to serve the unexpired term of Mr. House, term to expire December 31, 2003, or until her successor has been appointed. This motion was seconded by Councilman Ellis and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 272

178

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of September 27-October 10, 2002: William Proffitt (Water), Sylvia Burke (Streets), Ken Cryderman (Water) and Travelodge (Water).

The following claims were received during the period of October 11-17, 2002: CP&L (Water), Katherine Lipe (Water), Carol Bryan (Water), Dawn Hirshom (Water), Tom Karl (Streets), All Aluminum Co. (Engineering) and Mrs. Nash (Sanitation).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 10:00 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – October 29, 2002
Public Works Facility
161 South Charlotte Street

7:00 p.m. – Community Meeting

Present:	Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson
Absent:	Councilman Brian L. Peterson

The following topics were raised by residents and addressed by City Council and City staff: the need for UNC-Asheville, neighborhoods and the City to work together on a plan for sidewalks and traffic calming on Edgewood Road; the need for block numbers on street signs; concerns about 4-story buildings being allowed in the proposed Neighborhood Corridor District if applied to Broadway Corridor; and concern about the need for traffic synchronization signals for the two lights on Tunnel Road at Parkway Forest.

Mayor Worley adjourned the meeting at 7:30 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – November 5, 2002 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Vice-Mayor Terry M. Bellamy

CONSENT:

Adoption of the Buncombe County Solid Waste Management Plan

Summary: The consideration of a resolution to approve the Buncombe County Solid Waste Management Plan.

The City of Asheville actively participated in the development of the Buncombe County Solid Waste Management Plan covering the period July 1, 2002, to June 30, 2012, as required by the North Carolina Department of Environment and Natural Resources.

N. C. Gen. Stat. sec. 130 A-309.09A (b) requires each unit of local government to develop a comprehensive 10 year solid waste management plan in cooperation of local governments. The draft report was presented to City Council August 24, 2002, and the public comment period has ended. The changes to the draft report include:

- Buncombe County cardboard recycling figures changed to reflect residential customers only.
- Asheville's recycling program cost correction ($3.00/mo to $2.55/mo)
- Formatting and grammatical edits.
- Comments from private citizens.

City staff recommends approval of the Buncombe County Solid Waste Management Plan.

Temporary Services Agreement with Forsyth Initiative for Residential Self-Help Treatment Inc.

Summary: The consideration of a resolution to approve the Temporary Services Agreement with the City of Asheville and Forsyth Initiative For Residential Self-Help Treatment Inc. (FIRST) for temporary workers.

The City of Asheville requires temporary workers throughout the budget year for seasonal workloads in the Public Works Department (Sanitation Division), Parks and Recreation Department and Civic Center. The contract is a collective contract for all City Departments.

FIRST is a non- profit organization providing counseling to individuals and provides individuals with opportunities to learn new skills through job placements with various organizations. The City of Asheville utilized FIRST staff last year with excellent results and has expanded the seasonal program with FIRST.

City staff recommends approval of the Temporary Services Agreement with the City of Asheville and Forsyth Initiative For Residential Self-Help Treatment Inc. for temporary workers.

Community Oriented Policing Services (COPS) in Schools Grant Award

Summary: The consideration of a resolution entering into an agreement with the U.S. Department of Justice, Office of Community Oriented Policing Services (COPS), to accept a COPS in Schools grant award and adoption of the accompanying budget amendment.

The Asheville Police Department was awarded a $110,912 grant for three years from the U.S. Department of Justice to hire one, full-time police officer through the COPS in Schools program. No match is required for this grant.

The Asheville Police Department has participated in the School Resource Officer program since the early 1990's. Since 1988, ten schools have had contact with a school-based police officer on a regular basis. The program has been very successful in our community. The COPS in Schools grant is a great opportunity for the City of Asheville Police Department to enhance our community policing efforts by adding one full-time officer to the department to work exclusively with one of our city schools. All salary and benefit expenses for the officer are covered through this program for the three-year grant period.

The City of Asheville entered into an agreement with the City of Asheville School System for this School Resource Officer in April 2002. The agreement outlines the duties of the School Resource Officer, which include consulting with school officials on methods to increase student safety, regularly checking on the school facilities when not in use, and initiating and/or assisting with investigations of thefts, fights, drug possession, etc.

City staff recommends the City accept the grant award by entering into an agreement with the United States Department of Justice, and by increasing the budget by $110,912.

Law Enforcement Block Grant for 2002

Summary: The consideration of a resolution entering into an agreement with the U.S. Department of Justice, Office of Justice Programs, to accept a Law Enforcement Block Grant and adoption of the accompanying budget amendment in the amount of $90,066.

The Asheville Police Department was awarded a $90,066 grant from the U.S. Department of Justice to fund programs designed to reduce crime and improve public safety. A local match of $10,007 is required, which is funded with drug tax refund proceeds.

The Asheville Police Department has received Law Enforcement Block Grants since 1997. Local Law Enforcement Block Grants can be used for a variety of general purposes. These include: hiring new law enforcement officers, paying overtime for current officers, procuring equipment to aid in law enforcement functions, enhance security measures at schools, and establish crime prevention programs. These grants are very helpful for the Asheville Police Department because there are few restrictions on how the funds are spent.

The Local Law Enforcement Block Grant has enabled the Asheville Police Department to hire several new law enforcement officers as well as purchase important small equipment items, including, photographic security equipment, bomb protection equipment, and an equipment transportation trailer.

City staff recommends the City accept the grant award by entering into an agreement with the United States Department of Justice, and by increasing the budget by $90,066.

Police Chief Will Annarino responded to various questions from Councilman Dunn regarding police department personnel and activities.

182

Police Chief Annarino also responded to Councilwoman Jones on how the grant money would be spent.

Budget Amendment for Fair Housing Assistance Program

Summary: The consideration of a budget amendment, in the amount of $40,700, to recognize a Fair Housing grant.

The City of Asheville has been awarded a grant of an additional $40,700 from the U.S. Department of Housing & Urban Development for the City's Fair Housing Assistance Program (FHAP).

Staff recommends approval of the budget amendment.

Financing the Purchase of Three Fire Engines

Summary: The consideration of a resolution authorizing the installment financing of three fire engines.

The City of Asheville Capital Improvement Plan 2001/02 to 2006/07 included authorization in Fiscal Year 01/02 for the installment purchase of two fire engines and the 2002/03 to 2007/08 Capital Improvement Plan included authorization in Fiscal Year 02/03 for a ladder truck.

The Finance Department sought proposals from 14 firms to finance the purchase of the above listed equipment. Proposals were received from nine firms, the best of which was submitted by Wachovia Bank, N.A. - - 3.06% for ten years.

The proposed resolution authorizes an installment purchase contract between the City of Asheville and Wachovia Bank, National Association for the purchase of the three fire engines and authorizes the City Manager, City Attorney, Finance Director and City Clerk to execute and deliver any and all necessary documents.

City staff recommends City Council adopt the resolution to authorize the installment purchase contract for three fire engines.

There was discussion by Council on if it was cost effective to send a fire truck out on 911 calls along with Emergency Medical Services and if the City can charge for that service.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

PUBLIC ACCESS CHANNEL COMMISSION UPDATE

Mr. David McConville of the IT Council's Media Arts Project (MAP) Working Group, presented to Council an introduction of the Media Arts Project of Western North Carolina. In order to address issues of developing and attracting sectors of the digital media industry, they recommend the creation of a multimedia "incubator" in the form of a media development center. Such a center would provide opportunities for people of all ages and backgrounds to access technological tools and develop much-needed skills for the future. The process of researching and planning this multimedia center has already begun with the creation of the MAP. The goals of MAP will be to provide media access and training; create and attract jobs within the multimedia industry; and to raise awareness of existing arts, community, and business organizations in WNC. He then reviewed the funding opportunities and next steps. In conclusion, he believed that a properly funded and structured media arts center will be a beneficial and exciting first step in establishing the Asheville area as a premiere region for multimedia development.

Ms. Beth Lazer, Chair of the Public Access Channel Commission, said that this is the consideration of endorsement of URTV as the Access Management Organization for the Public Access operation.

In March 2000 the Asheville City Council appointed the Public Access Channel Commission to facilitate the establishment and management of a public access channel in Asheville. Since that time, the Commission has formed a non-profit organization to manage the channel – URTV, developed a management and operations plan for the station, identified sources of funding, and enlisted community groups and individuals to produce programs for the channel.

An issue that has been of concern to the Commission is the funding of the Public Access Channel. When the City of Asheville renegotiated their cable franchise agreement, there was an understanding between the City and the Buncombe County that the City would negotiate funds for equipment and maintenance and the County would negotiate money for operations.

Buncombe County will vote on the final reading of their renegotiated contract with Charter Communications on November 5, 2002. This contract provides an initial $340,000 grant and an ongoing 20 cents per subscriber per month (approximately $79,000 annually) in funding for Public, Education, and Government (P.E.G) Access. An additional 23 cents per subscriber per month (approximately $91,000 annually) will also be collected after Charter recovers the initial grant from subscribers in about four years. The percentage of funds to be dedicated to Public Access Channel operations has yet to be determined.

The Commission recommends that the URTV founding board consist of the following: 6 current Public Access Commission members; 1 City-appointed Director; 1 County-appointed Director; 1 MAP representative; and 2 at-large members selected by the other Directors. They feel that this make-up will insulate the City and County from legal exposure.

Ms. Lazer explained the advantages to public access of the MAP collaboration: additional funding sources of foundations, economic development grants, corporate sponsors, National Endowment for the Arts, fees, private donations, etc.

Included in the contract is the provision that P.E.G. funds will be held by the County until the City and County enter into an inter-local agreement regarding oversight, funding, and management of the Public Access Channel and other aspects of the cable contract. It is also the intent of the County to hire a consultant to provide a plan to incorporate Public Access, and other technology, into a Media Arts Center. The Commission feels strongly that all organizations involved, the City, County, Commission, and Media Arts Project (MAP) group, participate in the development of plans for this center. The target markets for the Public Access Commission and the MAP group will be different, so careful consideration and planning will be imperative to making a cooperative effort work.

Future challenges include obtaining operating funds, finalizing the City/County public access agreement and differentiating public access and MAP.

The Commission requests that City Council endorse URTV as the Access Management Organization for the Public Access operation and that negotiations for the inter-local agreement between the City and County begin as soon as possible.

Discussion occurred regarding the make-up of the founding board.

It was the consensus of City Council to endorse URTV as the Access Management Organization for the Public Access operation and that negotiations for the inter-local agreement between the City and County begin as soon as possible. In addition, when the operating agreement is structured, the make-up of the board will be discussed.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

INFORMAL UPDATE ON CIVIC CENTER

Performing Arts Facility

Ms. Lillian Fisher, community representative concerned about what is happening with the Civic Center, and Mr. Crawford Murphy, architect, passed out to Council a proposal of a mixed-use performing arts development project. They showed City Council conceptual plans of Phase I improvements at the Civic Center, totaling $49,772,000 (all of which would be borne by the City), and Phase II improvements at the Civic Center, totaling $38,600,000.

Mr. Murphy then showed Council conceptual plans of a proposed Performing Arts Center (PAC) Complex for Asheville and the WNC region, which would be located in the parking lot of the Renaissance Hotel, with a joint City/County parking arrangement. He explained the goals and outcomes of the PAC, with a total project cost for the PAC of $66,378,900. Mr. Murphy said that the biggest cost of the PAC is the façade. Ms. Fischer said that the City's minimum contribution to the PAC would be to provide infrastructure and parking which would total approximately $20,000,000, with private monies being $30-50,000,000. It was noted that the owner of the Renaissance has not endorsed the project, however, they will be meeting with him on November 6, 2002.

When Ms. Fisher asked for Council's informal consensus to proceed with the project, Mayor Worley said that City Council made a decision months ago that at the first of the year they would discuss the direction within which they want to proceed. They are still interested in prospects of success on other projects that compliment what the City needs.

Mayor Worley thanked Ms. Fischer and Mr. Crawford and said that he would wait for further updates and in turn relay that information to City Council at their next monthly Civic Center update.

At 5:01 p.m., Mayor Worley announced a short break.

The Dual Jewel Project

Mr. Scott Osburn brought forward to Council a proposal of creating a totally separate Sports Recreation Hotel complex on approximately 38-42 acres in the Airport Road area. With the proximity to I-26 and increased expansion of Airport Road, this would provide the ideal draw from Buncombe and Henderson Counties while giving easy access to the WNC region and other neighboring states as well. The key to the complex will be to lure pro and amateur tournaments. The project would consist of a major new state of the art 6000-8000 capacity Multi-Sports Arena, multiple skyboxes, club seating, eateries, pro shops and full support facilities; a recreation complex featuring full size ice sheet and sports court surfaces; a 65-75 Suites Hotel, convention areas, pools, health club, and all amenities; and over 100,000 square feet of exclusive retail and office space. The total cost of the project for the sports arena and recreation complex is $25,000,000 with the City (and possibility Buncombe County) contribution not to exceed $18,000,000, which can be funded by revenue bonds.

With taking out the sports to a more suitable venue, Mr. Osburn said that their plan is to utilize the area where the Civic Center is currently located. That plan would include an IMAX 3d and Laser theatre, concession, eatery, and all supporting functions; a retail entertainment facility; a Boutique Hotel with 72 rooms; and a performing arts complex. The approximate cost would be $17,500,000.

Mr. Osburn presented Council with information regarding the renovation of the existing Civic Center. That would include renovating the arena and retooling it to a 6,100 capacity including four box skybox suites; converting the Thomas Wolfe Auditorium into a great hall exhibition space; having a 2,400 seat multi-purpose performing arts center and new rotunda designed as an entryway and small exhibition space; retooling the convention space to provide 40,000 square feet of space; site work; having CP&L move substation; land acquisition; developer fees; and FFE. That renovation will cost approximately $114,900,000.

Going into more detail, Mr. Osburn said that the Asheville Civic Redevelopment Corporation (ACRC)'s primary goal as a non-profit organization is to revitalize and restructure the purpose and usage of the existing Civic Center and turn it into a new arts center. They propose a comprehensive restructuring of the Civic Center and surrounding area by changing it from a part-time single use, to a full-time entertainment, creative arts, retail, positive and profitable part of downtown Asheville. The plan includes an IMAX theatre, multi-screen Cineplex, 800 seat theatre and 99 seat black box theatre, an urban grocery store, restaurants and commercial retail spaces, as well as a 26-story HEART (History, Entertainment, Arts, Recreation, Tower District) Tower housing condominiums, offices, parking garage and related residential features – all at the Civic Center area.

Mr. Osburn then went into a little more detail by explaining the plans and future visions to create a museum and expo; and IMAX 3d and Laser theatre; a Multiplex theatre with one of the theaters being used as a first class multimedia conference meeting center; an interactive arts studio and gallery; the transformation of the Interstate Hotel into an Arts Collective Center; an urban grocery store; and a Performing Arts Center. The major anchor to this area will feature a 24-26 story mixed use tower. This will feature some of the larger restaurants and eateries, smaller upscale boutique retailers, parking, swimming complex, office space, Boutique Hotel including executive rentals, condos with an exclusive private club, a health club, and a wonderful observation deck.

Mayor Worley thanked Mr. Osburn and suggested that he submit to Council a couple of pages regarding the essential facts about the projects including funding sources.

UDO AMENDMENT REVIEWS

City Attorney Oast said that these Unified Development Ordinance amendments are being brought before City Council in order that staff may respond to questions Council may have prior to the public hearings, which have been scheduled on November 12, 2002. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Revise the Threshold for Level II Site Plan Review Projects

Chief Planner Gerald Green said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to review the threshold for Level II site plan review projects.

Several months ago, City Council adopted an ordinance amendment revising the Level II site plan threshold for residential projects. By increasing the range of residential projects identified as Level I site plan projects, this amendment eliminated Level II review for residential projects. Under the current standards, residential projects between 3 and 50 units are reviewed as Level I projects and residential developments with more than 50 units are reviewed as Level III projects. Neighborhood associations expressed concern that residential developments that could have impacts on neighborhoods, physical infrastructure, and quality of life were not subject to public meetings and discussion under the current standards.

In response to these concerns, staff worked with a focus group composed of representatives of the Coalition of Asheville Neighborhoods to develop an ordinance amendment that would assure projects of a size that could impact neighborhoods and/or the community as a whole were subject to public meetings and discussion. In addition to this goal, the focus group and City staff wanted to provide for speedy review of those residential projects that have little potential of impacting neighborhoods. In reviewing the existing standards, the focus group recognized that large non-residential uses permitted in residential districts, such as churches and schools, could impact the residential areas and should be subject to some level of public discussion.

The draft ordinance amendment presented to Council identifies the following as Level II site plan projects:

- Any manufactured housing rental community, camper/trailer park, or other residential development containing 20 to 50 individual dwelling units; and
- Any new non-residential use in a residential zoning district containing more than 10,000 square feet or the expansion of an existing non-residential use in a residential zoning district if the expansion contains more than 10,000 square feet.

As Level II site plan projects, these developments would be reviewed by the TRC (Technical Review Committee) in a public meeting. Notice of the TRC meeting would be provided to surrounding property owners and others as required by the City's public notification standards.

The Planning and Zoning Commission voted 6 to 0 to recommend approval of the wording amendment revising the thresholds for Level II site plan projects. The Planning and Development staff recommends approval of the wording amendment.

Revise the Notification Requirements

Chief Planner Gerald Green said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to revise the notification requirements for public hearings.

The Planning and Development staff has been reviewing the current public hearing notification requirements in an effort to identify improvements. A focus group composed of representatives of the Coalition of Asheville Neighborhoods provided assistance with this task. The task force and staff developed the following goals to assist in developing recommendations:

- Provide improved notification of public hearings;
- Assure that people impacted by proposed projects are aware of the public hearing(s);
- Identify and implement cost-effective methods for notifying affected and interested citizens of public hearings; and
- Identify a variety of methods for notifying citizens of public hearings.

Using these goals as guidelines, the focus group and staff identified several methods for improving the public notifications processes used by the City to inform citizens of public hearings. The improvements in the notification process identified by the focus group include:

- Place a larger sign on sites proposed for rezoning, development, etc.;
- Include location and information about proposed projects on the department's web page;
- Continue to expand the department's list of neighborhood contacts and use this list to notify affected neighborhoods of proposed projects; and
- Decrease the area of notification for public hearings and other meetings requiring notification from 400 feet to 200 feet.

The only identified change that requires an amendment to the City's code is the final one regarding area of notification. The draft ordinance amendment making this change is presented with the Planning and Zoning Commission's unanimous recommendation for approval. An area of notification extending 200 feet from the affected property will assure that all property owners within the immediate area are notified of proposed projects. This change, in combination with the other notification improvements identified above, will ensure that all citizens with an interest in proposed development projects, rezonings, etc. are notified of public hearings and other public meetings.

A minor change being included in this amendment is a statement that fees charged for CA's (Certificates of Appropriateness) are established by the City of Asheville Fees and Charges Manual. This change will bring the process for establishing fees for CA's into compliance with the adopted City policy.

The Planning and Zoning Commission voted 6 to 0 to recommend approval of the wording amendment revising the notification process for public hearings. The Planning and Development staff recommends approval of the wording amendment.

Upon inquiry of Councilman Peterson, a lot of discussion took place regarding the department's list of neighborhood contacts. Councilman Peterson felt that since the Coalition of Asheville Neighborhoods (CAN) does not keep an updated list of neighborhood contacts and the Planning Department doesn't update the list, it's just a façade that the City says they use that neighborhood list to notify affected neighborhoods of proposed projects. He felt the City needs to have a person dedicated to working with civic groups and neighborhoods to get them more involved with the planning process.

Planning & Development Director Scott Shuford said that Ms. Barber Melton, President of CAN, said they would take that effort on of updating the neighborhood list. He stressed that if someone is concerned about something going on in their community, they can call the Planning Department for information or get on the department's web page. He felt if there was a change in the presidency of a neighborhood association, it should be the responsibility of the out-going president to let the incoming president know that they need to contact the Planning Department to be sure that their association is properly represented. Other ways we can try to keep updated lists is to put it in City-Works and run it on the City's Government Channel.

Councilwoman Jones suggested having a receptionist call all the neighborhood representatives once a year and update the list. City Manager Westbrook said he would need other assets if it's City Council's desire for City staff to take on that responsibility.

Councilman Mumpower felt that we should look for ways to reach the neighborhood contacts within our existing framework.

Councilman Ellis felt that staff should make their best efforts to make neighborhood contacts.

Councilwoman Jones felt that the decrease in notification from 400 feet to 200 feet would be appropriate only if there was some extra effort on the part of City staff to update the neighborhood lists.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these public hearings on the next formal City Council agenda.

DESIGNATION OF THE BYNUM HOUSE AS A LOCAL HISTORIC LANDMARK AND SETTING A PUBLIC HEARING ON NOVEMBER 26, 2002

Interim Historic Resources Director Stacy Merten said that this is the consideration of a motion to set a public hearing to designate the Bynum House, located at 200 Macon Avenue, as a local historic landmark.

The Bynum House is located within the Grove Park Neighborhood, at 200 Macon Avenue, .7 miles Northeast of its intersection with Charlotte Street on a 5.7-acre tract of land. The boundaries of the proposed designated property, however, do not include the full tax parcel, but encompass a 1.17-acre parcel. The structure is located along the approach to the Grove Park Inn, nestled on a heavily wooded lot. The property backs up to the Grove Park Inn Country Club, which is located to the west and is surrounded by the Battle house to the north, Longchamps apartments, across the street to the east and single family housing to the south. The grounds slope away steeply from the house and the surrounding landscape had at one time been neglected. Recently, however, an effort has been made to reclaim some of the original landscape design features.

The Bynum House is an outstanding example of early 20th century Tudor Revival style architecture and survives nearly unchanged since its construction in 1923. Architect Ronald Greene designed the House for Curtis and Florence Bynum. Greene is best known for his commercial and civic structures, such as the Jackson Building on Pack Square, the Claxton School and the Longchamps apartments, to name a few. While the Bynum house is not a rare example of the Tudor Revival style in Asheville, the house is significant for its fine architecture, featuring a well-executed and detailed design and high degree of integrity. After nearly 80 years the interior finishes and treatment are consistent with the style of the house and much of the interior remains intact. It is also one of a few Tudor Revival style dwellings constructed of stone in the City.

Designation of this site as a local historic landmark makes the property owner eligible for a 50% reduction in property taxes. Currently the tax appraisal for the structure is $1,470, 800 and the entire 5.77 acre tract of land is appraised at $577,000.

The ordinance designates the Bynum House a local historic landmark. The property included in the designation consists of the Bynum House and 1.17 acres. The designation includes, the exterior of the house, some interior details and landscape features. When a property is designated historic, restrictions are placed on the property, and any modification to the land or structure must receive a Certificate of Appropriateness from the Historic Resources Commission of Asheville and Buncombe County. All improvements must follow the Secretary of the Interior's Standards for Rehabilitation and Illustrated Guidelines for Rehabilitating Historic Buildings.

It is important that properties of local significance are preserved and protected for cultural, historic, and economic reasons and for the benefit of future generations.

The Historic Resources Commission of Asheville and Buncombe County (HRC) by unanimous vote recommends to the Asheville City Council that the Bynum House be designated a local historic landmark. Staff concurs with the recommendation of the HRC for this designation.

Ms. Merten responded to various questions from Councilman Dunn and Councilwoman Jones regarding historic designation and the reduction of property taxes.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this public hearing on the appropriate City Council agenda.

DESIGNATION OF THE GROVE PARK COUNTRY CLUB CLUBHOUSE AS A LOCAL HISTORIC LANDMARK AND SETTING A PUBLIC HEARING ON NOVEMBER 26, 2002

Interim Historic Resources Director Stacy Merten said that this is the consideration of a motion to set a public hearing to designate the Grove Park Country Club Clubhouse located on Country Club Road on the grounds of the Grove Park Golf Course, as a local historic landmark.

The Grove Park Country Club clubhouse is located on Country Club Road, .3 miles north of its intersection with Kimberly Avenue, on the grounds of the Grove Park Golf Course. The proposed designation encompasses 2.56 acres of the golf course parcel. The clubhouse is located on the north side of the golf course, overlooking the 18th green, and just southwest of the Grove Park Inn. The rolling terrain of the eighteen-hole golf course, with its manicured landscape, provides a fitting setting for the clubhouse.

The Grove Park Country Club Clubhouse is significant in the areas of social history, entertainment and recreation, and architecture. The structure was originally built for the Asheville Country Club and is a fine example of the work of New York architect, Harrie T. Lindeberg, one of the foremost architects of the Country House movement. The rambling Grove Park Clubhouse embodies the ideas of the country house on a slightly larger scale and the golf course serves as the landscaped park.

The organizational framework for country clubs, as they spread throughout the United States were based on the gentleman's city clubs of New England. Eventually there was a movement towards a suburban or county club in the 1870's. The typical country club offered its members sporting grounds for hunting, golf and tennis in a pleasant setting and as an exclusive retreat for the wealthiest members of society.

Though the Grove Park Country Club clubhouse was constructed in 1925, the origins of the Asheville Country Club, who erected the building, date back to 1894 with the organization of the Swannanoa Country Club. As an interest in golfing began to increase, the Club's original course in West Asheville was considered inconvenient, thus a new course was established in north Asheville. The new course also proved unsatisfactory, and in 1898 the Club leased 5 acres of land at the end of Charlotte Street from George W. Pack, for the construction of a new clubhouse. The original clubhouse was moved in 1908 to Edgemont Ave. About this time the golf course was expanded and the name of the Club was changed to the Asheville Country Club. The earlier clubhouse was also replaced with a new structure near the 12th tee of the present course. This clubhouse burned in the early 1920's, thus the present structure was commissioned for construction.

190

The Grove Park Inn maintained an interest in the golf course and financial health of the Club, contributing to the Club for the use of its facilities. The existence of the Club and golf course were important to the successful operation of the Inn. In 1976 the Grove Park Inn purchased the 100-acre golf course, clubhouse and pro-shop from the County Club of Asheville.

Designation of this site as a local historic landmark makes the property owner eligible for a 50% reduction in property taxes. The appraised value of the clubhouse is $4,053,200, which excludes the value of the land, golf course improvements and other detached structures.

When a property is designated historic, restrictions are placed on the property. Any modification to the land or structure must receive a Certificate of Appropriateness from the Historic Resources Commission of Asheville and Buncombe County. All improvements must follow the Secretary of the Interior's Standards for Rehabilitation and Illustrated Guidelines for Rehabilitating Historic Buildings.

The ordinance designates the Grove Park Country Club Clubhouse a local historic landmark. It is important that properties of local significance are preserved and protected for cultural, historic, and economic reasons and for the benefit of future generations.

The Historic Resources Commission of Asheville and Buncombe County (HRC) by unanimous vote recommends to the Asheville City Council that the Grove Park Country Club Clubhouse be designated a local historic landmark. Staff concurs with the recommendation of the HRC for this designation.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this public hearing on an appropriate City Council agenda.

OTHER BUSINESS

Councilman Dunn felt City Council needs to look at earmarking $100-200,000 a year for economic development. He felt it was important for the City, possibly working jointly with Buncombe County, to set aside money in order to put in infrastructure on industrial property and have the site ready if industry wishes to locate in Asheville. Mayor Worley felt that would be a good topic at Council's annual retreat.

CLOSED SESSION

At 7:07 p.m., Councilman Mumpower moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City in order to preserve the attorney-client privilege between the City and its attorney. The parties to the lawsuit about which the Council expects to receive advice are: Morris Communications, Inc. d/b/a Fairway Outdoor Communications, Lamar OCI - South Corp., Maple Cove, Inc., and the City of Asheville. - The statutory authorization is contained in G.S. 143-318.11(a)(3); and (2) To establish or to instruct the City's staff concerning the position to be taken by or on behalf of the public body in negotiating the price or other material terms of a contract for the acquisition of real estate - The statutory authorization is contained in N. C. Gen. Stat. 143-318.11(a)(5). This motion was seconded by Councilman Dunn and carried unanimously.

At 8:00 p.m., Councilman Ellis moved to come out of closed session. This motion was seconded by Councilman Peterson and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:00 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – November 12, 2002 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Mayor Worley gave the invocation.

ADDITION TO THE AGENDA

Mayor Worley said that there will need to be Council discussion of current status of water negations with Henderson County including what our responses might be to Henderson County. Since he anticipated that this Council meeting will be lengthy, he will add an item to "Other Business" to ask for a motion to continue the Council meeting until Thursday, November 14, 2002, at 3:00 p.m. in the Council Chamber.

I. PROCLAMATIONS:

A. RECOGNITION OF HOUSING NORTH CAROLINA AWARD FOR MOUNTAIN HOUSING OPPORTUNITIES' WIND RIDGE APARTMENTS

Mayor Worley recognized Mountain Housing Opportunities' (MHO) Executive Director Scott Dedman, MHO Board Chair John Hayes, Chairman of the Buncombe County Commissioners Nathan Ramsey, and Community Development Director Charlotte Caplan for receiving the North Carolina Award for Mountain Housing Opportunities' Wind Ridge Apartments. Each spoke about the cooperation between the City, County and non-profits and the fine example of this development resulting from that cooperation.

B. PROCLAMATION PROCLAIMING NOVEMBER 11, 2002, AS "VETERANS DAY"

Council members Dunn, Ellis and Mumpower, veterans, presented the proclamation, which proclaimed Monday, November 11, 2002, as "Veterans Day" in the City of Asheville. They acknowledged all veterans present in the Council Chamber.

II. CONSENT:

Mayor Worley removed Consent Agenda Item B from the Agenda due to an upset bid being received.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON OCTOBER 22, 2002; THE WORKSESSION HELD ON OCTOBER 29, 2002; AND THE WORKSESSION HELD ON NOVEMBER 5, 2002

B. RESOLUTION AUTHORIZING THE SALE OF PROPERTY OFF BLAKE MOUNTAIN CIRCLE TO RHETT A. GROTZINGER

This item was removed from the consent agenda due to an upset bid being received.

C. RESOLUTION NO. 02-175 - RESOLUTION APPROVING THE BUNCOMBE COUNTY SOLID WASTE MANAGEMENT PLAN

Summary: The consideration of a resolution to approve the Buncombe County Solid Waste Management Plan.

The City of Asheville actively participated in the development of the Buncombe County Solid Waste Management Plan covering the period July 1, 2002, to June 30, 2012, as required by the North Carolina Department of Environment and Natural Resources.

N. C. Gen. Stat. sec. 130 A-309.09A (b) requires each unit of local government to develop a comprehensive 10 year solid waste management plan in cooperation of local governments. The draft report was presented to City Council August 24, 2002, and the public comment period has ended. The changes to the draft report include:

- Buncombe County cardboard recycling figures changed to reflect residential customers only.
- Asheville's recycling program cost correction ($3.00/mo to $2.55/mo)
- Formatting and grammatical edits.
- Comments from private citizens.

City staff recommends approval of the Buncombe County Solid Waste Management Plan.

RESOLUTION BOOK NO. 27 – PAGE 273

D. RESOLUTION NO. 02-176 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A TEMPORARY SERVICES AGREEMENT WITH FORSYTH INITIATIVE FOR RESIDENTIAL SELF-HELP TREATMENT INC.

Summary: The consideration of a resolution to approve the Temporary Services Agreement with the City of Asheville and Forsyth Initiative For Residential Self-Help Treatment Inc. (FIRST) for temporary workers.

The City of Asheville requires temporary workers throughout the budget year for seasonal workloads in the Public Works Department (Sanitation Division), Parks and Recreation Department and Civic Center. The contract is a collective contract for all City Departments.

FIRST is a non- profit organization providing counseling to individuals and provides individuals with opportunities to learn new skills through job placements with various organizations. The City of Asheville utilized FIRST staff last year with excellent results and has expanded the seasonal program with FIRST.

City staff recommends approval of the Temporary Services Agreement with the City of Asheville and Forsyth Initiative For Residential Self-Help Treatment Inc. for temporary workers.

RESOLUTION BOOK NO. 27 – PAGE 274

E. RESOLUTION NO. 02-177 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE U.S. DEPT. OF JUSTICE FOR A COPS IN SCHOOL GRANT AWARD

Summary: The consideration of a resolution entering into an agreement with the U.S. Department of Justice, Office of Community Oriented Policing Services (COPS), to accept a COPS in Schools grant award and adoption of the accompanying budget amendment.

The Asheville Police Department was awarded a $110,912 grant for three years from the U.S. Department of Justice to hire one, full-time police officer through the COPS in Schools program. No match is required for this grant.

The Asheville Police Department has participated in the School Resource Officer program since the early 1990's. Since 1988, ten schools have had contact with a school-based police officer on a regular basis. The program has been very successful in our community. The COPS in Schools grant is a great opportunity for the City of Asheville Police Department to enhance our community policing efforts by adding one full-time officer to the department to work exclusively with one of our city schools. All salary and benefit expenses for the officer are covered through this program for the three-year grant period.

The City of Asheville entered into an agreement with the City of Asheville School System for this School Resource Officer in April 2002. The agreement outlines the duties of the School Resource Officer, which include consulting with school officials on methods to increase student safety, regularly checking on the school facilities when not in use, and initiating and/or assisting with investigations of thefts, fights, drug possession, etc.

City staff recommends the City accept the grant award by entering into an agreement with the United States Department of Justice, and by increasing the budget by $110,912.

RESOLUTION BOOK NO. 27 – PAGE 275

F. ORDINANCE NO. 2968 - BUDGET AMENDMENT FROM COPS IN SCHOOLS GRANT AWARD

Summary: See Consent Agenda Item "E" above.

ORDINANCE BOOK NO. 20 – PAGE 124

G. RESOLUTION NO. 02-178 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE U.S. DEPT. OF JUSTICE FOR A LAW ENFORCEMENT BLOCK GRANT AWARD

Summary: The consideration of a resolution entering into an agreement with the U.S. Department of Justice, Office of Justice Programs, to accept a Law Enforcement Block Grant and adoption of the accompanying budget amendment in the amount of $90,066.

The Asheville Police Department was awarded a $90,066 grant from the U.S. Department of Justice to fund programs designed to reduce crime and improve public safety. A local match of $10,007 is required, which is funded with drug tax refund proceeds.

The Asheville Police Department has received Law Enforcement Block Grants since 1997. Local Law Enforcement Block Grants can be used for a variety of general purposes. These include: hiring new law enforcement officers, paying overtime for current officers, procuring equipment to aid in law enforcement functions, enhance security measures at schools, and establish crime prevention programs. These grants are very helpful for the Asheville Police Department because there are few restrictions on how the funds are spent.

The Local Law Enforcement Block Grant has enabled the Asheville Police Department to hire several new law enforcement officers as well as purchase important small equipment items, including, photographic security equipment, bomb protection equipment, and an equipment transportation trailer.

City staff recommends the City accept the grant award by entering into an agreement with the United States Department of Justice, and by increasing the budget by $90,066.

RESOLUTION BOOK NO. 27 – PAGE 276

H. ORDINANCE NO. 2969 - BUDGET AMENDMENT FROM THE LOCAL LAW ENFORCEMENT BLOCK GRANT AWARD

Summary: See Consent Agenda Item "G" above.

ORDINANCE BOOK NO. 20 - PAGE 126

I. ORDINANCE NO. 2970 - BUDGET AMENDMENT FOR FAIR HOUSING ASSISTANCE PROGRAM

Summary: The consideration of a budget amendment, in the amount of $40,700, to recognize a Fair Housing grant.

The City of Asheville has been awarded a grant of an additional $40,700 from the U.S. Department of Housing & Urban Development for the City's Fair Housing Assistance Program (FHAP).

Staff recommends approval of the budget amendment.

ORDINANCE BOOK NO. 20 – PAGE 129

J. RESOLUTION NO. 02-179 - RESOLUTION AUTHORIZING THE EXECUTION OF AN INSTALLMENT PURCHASE CONTRACT WITH WACHOVIA BANK, NATIONAL ASSOCIATION FOR THREE FIRE ENGINES

Summary: The consideration of a resolution authorizing the installment financing of three fire engines.

The City of Asheville Capital Improvement Plan 2001/02 to 2006/07 included authorization in Fiscal Year 01/02 for the installment purchase of two fire engines and the 2002/03 to 2007/08 Capital Improvement Plan included authorization in Fiscal Year 02/03 for a ladder truck.

The Finance Department sought proposals from 14 firms to finance the purchase of the above listed equipment. Proposals were received from nine firms, the best of which was submitted by Wachovia Bank, N.A. - - 3.06% for ten years.

The proposed resolution authorizes an installment purchase contract between the City of Asheville and Wachovia Bank, National Association for the purchase of the three fire engines and authorizes the City Manager, City Attorney, Finance Director and City Clerk to execute and deliver any and all necessary documents.

City staff recommends City Council adopt the resolution to authorize the installment purchase contract for three fire engines.

RESOLUTION BOOK NO. 27 – PAGE 277

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilman Peterson moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING FOR PROPERTY LOCATED AT THE INTERSECTION OF ARDMION PARK ROAD AND ALEXANDER DRIVE FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL USE, AND ISSUANCE OF A CONDITIONAL USE PERMIT TO ALLOW FOR CONSTRUCTION OF 12 DWELLING UNITS

ORDINANCE NO. 2971 - ORDINANCE TO CONSIDER THE CONDITIONAL USE ZONING OF PROPERTY LOCATED AT THE INTERSECTION OF ARDMION PARK ROAD AND ALEXANDER DRIVE FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL USE

ORDINANCE NO. 2972 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT TO ALLOW FOR CONSTRUCTIONOF 12 DWELLING UNITS

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:20 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Chief Planner Gerald Green submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Green said that this is the consideration of a request to rezone property located at the intersection of Ardmion Park Road and Alexander Drive from RS-8 Residential Single-Family

High Density District to RM-16 Residential Multi-Family High Density District/Conditional Use and of a motion to issue a Conditional Use Permit to allow for construction of 12 dwelling units.

At their October 2, 2002, meeting the Planning and Zoning Commission recommended rezoning of property located at the intersection of Ardmion Park Road and Alexander Drive (City Exhibit 3 – Location Map) from RS-8 to RM-16. The 2.33 acre property is located on Beaucatcher Mountain in an area with a variety of land uses (City Exhibit 3 – Proposed Master Plan). Existing development in the area includes apartments, single family homes, and attached condominiums. An abandoned single family home is located on the property. Topography of the property is steep, with the area subject to the City's hillside area development standards. The standards limit the density of development and the percent of the site that can be graded. The proposed development complies with the limitations of the hillside area development standards, provided the requested rezoning is approved. The site plan calls for the buildings and the parking areas to be located on the upper part of the property in the location of the existing home in order to limit the land disturbance required to develop the site.

The original rezoning request for this property was for a standard reclassification to RM-8 (no conditional use permit requested). This request received a unanimous recommendation for approval from the Planning and Zoning Commission. Prior to being heard by City Council, the request created concern among the neighbors. Neighbors met with the applicant and expressed concern about the proposed development of the property and how this development could impact their property. The developer withdrew the original rezoning request and submitted this request for conditional use rezoning, with a specific site plan and conditions designed to address the concerns of the neighbors. The revised request appears to be supported by the area residents.

The site plan shows the two buildings and parking area located on the upper portion of the lot on the site of the existing home. Access to the 18 space parking area will be directly off Ardmion Park Road. By placing the buildings and parking in this location, grading required for the development will be minimal. Most of the property will remain undisturbed, with tree removal and clearing of vegetation also kept to a minimum.

The two buildings are proposed as 3 stories with a height not to exceed 40'. Daylight basements will be accessible via doors located on the back (downhill) side of the buildings. The first floor elevation of the buildings will be at least 20' below the elevation of the road, reducing the visual impact from the street. Exterior construction materials for the buildings will consist of wood, hardiplank, brick, stone, and/or stucco.

The City's ordinances require a minimum of 500 square feet of open space per unit for multi-family developments. A minimum of 6,000 square feet of open space is required for the Ardmion Park Town Homes development. A great deal more than this will be provided by the development.

Existing vegetation will be used to buffer the development from adjacent uses on the sides and rear. Landscaping must be provided to screen the parking area and buildings from Ardmion Park Road. Existing trees will be used for street trees along the existing street.

Sidewalks are required for any multi-family development with more than 10 dwelling units, so this development is required to provide sidewalks along all street frontage. Given the location and topography of the site, the developer is encouraged to work with the City staff to identify the best option for providing pedestrian amenities for the development.

City Council must take formal action as set forth in section 7-5-5(e) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval for conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case [UDO 7-16-2 (c)]. Staff's opinion is that all seven standards appear to be met.

1. That the proposed use or development of the land will not materially endanger the public health or safety.

   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   The project must comply with all City standards in regards to maximum clearing and grading, erosion control, and stormwater management. The proposed buildings will be located on the upper portion of the property adjacent to the street in order to minimize land disturbance and clearing. The project will also need to demonstrate compliance with the City's Hillside Development Standards for permitted density and clearing and grading.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

   The density of the proposed development will be approximately 5 units per acre, which is in keeping with the overall development pattern in the area. The buildings will be constructed of materials of quality comparable to that of existing development in the area. A condition that is recommended for the project addresses stormwater to assure that it has no negative impact on property located downhill.

4. That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

   The project site is located in a vegetated area containing a variety of residential uses. Residential uses range from single family homes to attached condominiums and large buildings containing several multi-family units. Most of the developed properties in the area have maintained a significant number of trees and smaller vegetation. The proposed development will maintain most of the vegetation on the project site. Only a small percentage of the site will be covered by the development. In addition, the buildings, which are compatible in bulk and scale with other structures in the area, will be at a lower elevation than the street and screened from adjacent properties to minimize any visual impact.

5. That the proposed use or development of the land will generally conform with the Comprehensive Plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

   The proposed development will comply with all applicable UDO and Standards and Specifications requirements. The development also meets the City's goals for providing a variety of housing options and for infill development.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

   The project has received preliminary approval from the City's operating departments and will be subject to detailed review prior to issuance of zoning and building permits.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

   The addition of 12 small dwelling units at this location will not have an adverse impact on traffic in the area. Streets in the area are capable of accommodating the traffic to be generated by the 12 units.

The Planning and Zoning Commission unanimously recommended approval of the request, with conditions, at their October 2, 2002, meeting. This recommendation incorporates comments made by members of the public at that meeting. Staff concurs with the recommendation to approve the conditional use rezoning and to issue the Conditional Use Permit for the proposed use. The recommended conditions are:

- Development of the site shall be in compliance with the conceptual site plan submitted with this application;
- The development shall consist of 12 dwelling units in two buildings (6 units per building);
- Grading and land disturbance shall not exceed the limits indicated on the conceptual site plan;
- No clear cutting of the property shall occur; vegetation removal shall be limited to horticulturally correct thinning and trimming, with advice regarding tree removal provided by the City staff;
- Stormwater management plans shall be developed and implemented with consideration for the neighbors on Carroll Avenue and acknowledging current problems with water runoff and shall comply with the City's standards as set forth in the Stormwater Management Ordinance;
- Exterior building materials shall consist of wood, hardiplank, brick, stone, and/or stucco;
- Maximum building height shall not exceed 40';
- The current sewer line connection that is tapped by the neighbors across the street shall be moved to a legal easement and reconnected to the MSD system; and
- The parking area shall be screened with vegetation from the street.

Mr. Green responded to various questions from Vice-Mayor Bellamy dealing with traffic and erosion. He reiterated that our Traffic Engineer feels that the streets in the area are capable of accommodating the traffic to be generated, however, there was mention at the Planning & Zoning Commission meeting about speeding. He said that the residents were provided with information about how to become involved with the City's traffic calming program. Regarding erosion, Mr. Green said that because the site plan is being submitted as part of the conditional use permit, the limits of grading are pretty much set by the plan shown. The City will require the developer to adhere to this basic plan in terms of land disturbance as well as complying with the City's erosion control and stormwater ordinances.

Mr. Chris Eller, project engineer representing Dean Pistor, reviewed with Council their site plan (Applicant Exhibit 1) showing that they have preserved at least 2/3 of the site. He said there currently exists a private sewer line on the property. They will be relocating that sewer line and tying it into a public manhole which will be extended to serve the new units as well as the adjacent property owner. He felt that erosion control will be easily maintained because of the amount of vegetated buffer that will be between this property and the adjacent property owner and grading will be minimal.

Ms. Jan Howard, resident on Reservoir Road, spoke in favor of higher density development on Beaucatcher Mountain. However, according to Ms. Howard, she feels that Reservoir Road is her private driveway and it should be closed and used for a bike and hiking trail. She felt that Reservoir Road has been at its vehicular capacity for years.

Mr. Jeff Kelley, resident on Carroll Avenue, said that speeding is an existing problem on the narrow Carroll Avenue and doesn't feel that there is enough volume to make it as a traffic calming project. He expressed concern about the hillside development ordinance. By allowing a property owner to buy up adjacent properties and include all the parcels as one to increase the density on one part of the site seems to defeat the whole purpose of the standard. He asked City Council to instruct the Planning staff to begin the neighborhood study on the East Valley area as the study is proposed Asheville City 2025 Plan. The neighborhood wants to work to protect the RS-8 zoning in their neighborhood.

Mr. Dean Pistor, property owner, spoke in support of the project and about how he met with neighbors to try to meet their concerns.

Upon inquiry of Councilwoman Jones, Mr. Pistor said that the units will be approximately under $200,000 and they will try to meet some affordable needs with some of the units.

When Councilman Mumpower asked about what the next step would be for Ms. Howard to take regarding her request, City Manager Westbrook said that when Ms. Howard petitioned the Council to close Reservoir Road several years ago, City Council did not close it because of a public safety issue. If there are any new circumstances Ms. Howard can bring to the City's attention, he, along with the Public Works Director and the Police Chief will be happy to discuss those with her.

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 5:51 p.m.

Councilman Ellis moved to adopt Ordinance No. 2971 to rezone two lots located on Ardmion Park Road from RS-8 Residential Single-Family High Density District to RM-16 Residential Multi-Family High Density District/Conditional Use. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 131

Councilman Peterson moved to adopt Ordinance No. 2972 to issue the conditional use permit to allow for construction of 12 dwelling units, subject to the following conditions: (1) Development of the site shall be in compliance with the conceptual site plan submitted with this application; (2) The development shall consist of 12 dwelling units in two buildings (6 units per building); (3) Grading and land disturbance shall not exceed the limits indicated on the conceptual site plan; (4) No clear cutting of the property shall occur; vegetation removal shall be limited to horticulturally correct thinning and trimming, with advice regarding tree removal provided by the City staff; (5) Stormwater management plans shall be developed and implemented with consideration for the neighbors on Carroll Avenue and acknowledging current problems with water runoff and shall comply with the City's standards as set forth in the Stormwater Management Ordinance; (6) Exterior building materials shall consist of wood, hardiplank, brick, stone, and/or stucco; (7) Maximum building height shall not exceed 40'; (8) The current sewer line connection that is tapped by the neighbors across the street shall be moved to a legal easement and reconnected to the MSD system; and (9) The parking area shall be screened with vegetation from the street. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 133

B. PUBLIC HEARING TO CLOSE A RIGHT-OF-WAY KNOWN AS CAROLINA AVENUE FROM MOUNT CLARE TO ITS DEAD-END

RESOLUTION NO. 02-180 - RESOLUTION TO PERMANENTLY CLOSE A RIGHT-OF-WAY KNOWN AS CAROLINA AVENUE FROM MOUNT CLARE TO ITS DEAD-END

Mayor Worley opened the public hearing at 5:55 p.m.

Mr. Mark Combs, Director of Public Works, said that this is the consideration of a resolution to permanently close the right-of-way known as Carolina Avenue from Mount Clare Avenue to dead end. This public hearing was advertised on October 18 and 25 and November 1 and 8, 2002.

According to N. C. Gen. Stat. sec. 160-299, a City has the authority to permanently close a street or alley without regard to whether it has actually been opened.

To proceed with this process, Walter Christian, Montview Drive resident, on behalf of the Montview Drive Neighborhood, has requested to close the right-of-way known as Carolina Avenue from Mount Clare Avenue to the dead end.

Public Works Department staff has determined that the right-of-way known as Carolina Avenue, beginning at Mount Clare Avenue, and ending at the dead end, is not part of an adopted street plan and is not a City maintained right-of -way. Lots bordering Carolina Avenue are PIN Nos. 9649-09-26-1492, 1531, 0596, 0650, 0605, 1149 and 9649-09-16-8599, 8801, 9792, 9778, 9846, 9966 and 9649-09-27-0013, 0047, 0171, 0217 and 9649-09-17-8176.

Mr. Combs said that after the worksession on October 1, 2002, City staff met with the petitioners and now have no objection to the closing. They feel that any smart growth and density issues can be worked out if there were any future growth plans for the area.

Mr. Ed Subkis and Mr. Lothar Dohse, property owners on Montview Drive, each spoke in support of the closing.

Ms. Betty Lawrence, resident on Hillside Street, agreed with the closing from a historic prospective.

Mayor Worley closed the public hearing at 6:03 p.m.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Vice-Mayor Bellamy moved for the adoption of Resolution No. 02-181. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 279

C. PUBLIC HEARING TO AMEND CHAPTER 7 OF THE CODE OF ORDINANCES TO ESTABLISH A NEW NEIGHBORHOOD CORRIDOR DISTRICT

ORDINANCE NO. 2973 - ORDINANCE TO AMEND CHAPTER 7 OF THE CODE OF ORDINANCES TO ESTABLISH A NEW NEIGHBORHOOD CORRIDOR DISTRICT

On August 27, 2002, City Council continued this public hearing until October 8, 2002. On October 8, 2002, City Council continued the public hearing until November 12, 2002.

City Attorney Oast said that a protest petition was received on Thursday, November 7, 2002, on the proposed amendment to the Unified Development Ordinance (UDO). He reviewed the petition and felt it was not a valid protest petition for the following reasons. One is that the date established for the public hearing (which was August 27, 2002) was the date from which it was continued and the way he interprets the law is that is the date that sets the deadline for submission of protest petitions. Secondly, this is a text amendment. Council is being asked to establish regulations for a particular zoning classification but not to apply that zoning classification to any particular property or any group of properties. It was recently established in the Supreme Court that the protest petitions do apply to text amendments, but he felt that also requires the determination of what the effected property is. In that case, it was a specifically identifiable set of properties that had signs on them and in this case, there is no set of properties that is specifically identifiable to which this would apply. Therefore, the affected property would be the whole City and they do not have 20% of the signatures of the owners of property in the City. For those reasons, he feels the protest petition is invalid. It may be that the protest petition submitted would be sufficient if, and when, this zoning district classification is applied to the Broadway Corridor, which he believes is what their interest is, but it is not before Council yet.

Ms. Betty Lawrence said that she respectfully differs with City Attorney Oast on a couple of the legal points. The reason that they know what property is to be affected is because in August there was a proposal, at the same time as the new proposed Neighborhood Corridor District zoning was proposed, before Council to rezone portions of Broadway to Neighborhood Corridor District. Therefore, those properties are going to be affected by what goes into Neighborhood Corridor District zoning. The signatures are from people that are within 100 feet of what is going to be rezoned. She then explained that they didn't want to submit a protest petition because a lot of people feel that the Neighborhood Corridor District is good. However, after numerous meetings, the way the negotiating procedure ended left a couple key parts of the ordinance being worse than when the ordinance was first given to Council. Therefore, since she felt this is a different ordinance than originally presented, she feels the protest petition was submitted on time.

Mayor Worley said that on the advice of our City Attorney, he would rule the protest petition not valid.

Mayor Worley opened the public hearing at 6:08 p.m.

Planning & Development Director Scott Shuford said that he could caution the audience in that this item does not apply this new zoning district to any property in the City. If Council approves this ordinance, City staff will bring forward the request to apply it to portions of Broadway Avenue at a later meeting.

Mr. Shuford explained that in analyzing our development patterns in terms of our smart growth policy, we have learned that almost all of our commercial corridors are functionally and fiscally underutilized. Problems associated with this underutilization include tax equity and inefficient use of infrastructure. In an area where land is limited due to topography and existing development patterns, it is critical for us to use the available land efficiently. If we are to overcome the problems associated with this development pattern, we will need to take active steps to provide incentives that will promote the redevelopment of our commercial corridors. The steps have to be rooted in the practicality of the local real estate market; it will do no good to create a zoning district that will not be used. Likewise, we must recognize that development of an appropriate scale is important to protect our neighborhoods.

Mr. Shuford said that consequently, his staff has spent countless hours in meetings with developers and neighborhoods in crafting this ordinance. In fact, they completed neighborhood meetings as late as Thursday of last week. All of these meetings have helped shape the ordinance that it before Council tonight. The ordinance represents a balance between the incentives necessary to spur redevelopment and the scale that is appropriate to the community.

Some opposed to the ordinance are concerned about scale of development. Please be aware that the maximum height proposed for most development is actually less than the building height allowed in our single-family zoning districts. The size standards for buildings in this district are human-scale and designed to support a pedestrian experience. The uses are compatible with the neighborhoods that abut most of our commercial areas. The intent of the ordinance is to create new development of this sort. Please note that this development is very similar to historic development in Asheville in terms of architectural style and scale. Also, please be aware that the Planning and Zoning Commission voted unanimously to recommend this ordinance. Since that vote, while there have been modifications to address the concerns of developers, most of the modifications we have made have been to "soften" it from a neighborhood scale standpoint.

We feel we have developed a zoning district that will help us implement a smart growth development pattern and allow us to reclaim our commercial corridors for more productive purposes. We feel the development of this ordinance has been highly public and that the comments received from the public have been carefully accommodated where appropriate to the objectives of the new zoning district. We urge your support of this ordinance.

Chief Planner Gerald Green said that this is the consideration of an ordinance amending the Unified Development Ordinance (UDO) to create a new mixed use in-fill corridor zoning classification called the Neighborhood Corridor District, which incorporates City Council direction for smart growth and sustainable development initiatives as well as input from the community. This public hearing was advertised on August 16 and 23, 2002.

Since the first presentation of the Neighborhood Corridor zoning district to City Council, staff has met with the Coalition of Asheville Neighborhoods, Economic Development Task Force, and the self-named Broadway Coalition (development interests and neighborhood residents). In addition two community forums have been held to share the goals of the district and gather input (West Asheville meeting 11-4-02 and North Asheville 11-7-02). Most of the discussion and changes have centered on uses permitted along the corridor, the scale of the potential structures and some requirements for mixed-use projects. An additional item that staff feels may be useful in the district is drive-through facilities. These facilities are identified as conditional uses in the proposed district to permit their review on a case-by-case basis. Other standards/issues that have been revised include scale and height and design standards. These are discussed below.

Scale and Height:

The community incentives table has been received with support and interest. Several comments have been received to require higher design standards. Staff feels that basic design standards can be written into the ordinance with modifications allowed by a City approved decision-making body. The highlights of the incentives table are presented below:

• Base Density permitted in NCD = 24 units/ acre	Bonus to 32 units / acre
• Building footprint maximum in NCD = 12,000 S. F.	
• Building square foot maximum in NCD = 24,000 S.F.	Bonus to 48,000 S.F.
• Base building maximum height in NCD = 3 stories	Bonus to 4 stories

204

Community Incentive Table

Incentives	Mixed Use	Residential
Density greater than 24 units per acre	Minimum 20 percent of building square feet is retail or office uses	In combination with; 25 percent of units provided are affordable units **OR** a minimum of 25 percent up to a maximum of 50 percent of the units are less than or equal to 700 square feet each **and** 10 percent of the residential units are affordable.
Building square footage greater than 24,000 square feet	Minimum 25 percent of building square feet is retail **OR** minimum 20 percent of square feet is retail and 15 percent of square feet is office uses	In combination with; a minimum of 25 percent of the building square feet is residential uses **and** a minimum of 25 percent of the units are less than or equal to 700 square feet each
Height greater than 3 stories to a maximum of four stories (45')	Minimum of 50 percent of street level square feet is used for retail	In combination with; a minimum of 25 percent of the building square feet are residential units **and** building setbacks adjacent to residentially zoned properties is expanded to a minimum of 40 feet

Design Standards:

To ensure that new projects are in keeping with the scale and bulk of the surrounding neighborhoods a few additional design and operational issues have been included in the language for the district that take their inspiration from the Charlotte Street Overlay District: Where new building facades will be wider than 45 feet the façade surface shall be subdivided into portions not exceeding this distance by varying setbacks, roof forms, or other architectural elements.

We also propose to change the wording in the NCD to require that upper level windows make up at least 25% of the wall surface to allow a fuller range of uses to utilize the upper floors of buildings. The previous ordinance proposed that upper level windows make up 40% of the wall surface.

Finally to allow flexibility to the design standards for situations that would create a difficulty for a developer, modifications to these design requirements may be heard by a City appointed board. At this time we have suggested the Planning and Zoning Commission because of their valuable experience with project review and rezonings.

As a result of a meeting last Thursday evening, Mr. Green submitted to Council a revised ordinance. Said ordinance contained the following additional amendments: (1) amended the development standards for parking/loading to include the underlined language as follows:

"Shared and remote parking is encouraged ..." ; (2) outlined the use districts which recycling collection centers are permitted in; and (3) minor clarifications,

In presenting these changes to City Council, staff does not intend to suggest that all parties are in total agreement with every item in the revised provisions of this district. Some members of the community still have concerns about the height of the structures permitted and some have concerns about the size of the footprint of the structures. What staff has tried to do is reach a compromise that will alleviate the bulk of the concerns that they have heard. Staff feels that the incentive table will do just that and create a healthy mixed use community along our medium sized corridors where this district is applied.

Staff recommends adoption of the proposed ordinance amendment. The Planning and Zoning Commission recommended adoption of the earlier draft of the ordinance.

Upon inquiry of Councilman Dunn, Mr. Green explained that the modification provision applies only to design and operational standards. Regarding the relocation of the footprint in another area on the lot, setbacks can range from zero to 15 feet, although the Planning & Zoning Director can authorize an additional up to 25 foot setback if there are topographical constraints. If the developer wants to put it back 50 feet from the street, that would require a variance from the Board of Adjustment. The basic variances will still be handled by the Board of Adjustment, but only the design and operational standards can be modified by the Planning & Zoning Commission.

In addition, City Attorney Oast explained that there is a provision in the law that allows us, in certain circumstances, to assign the functions of a board of adjustment to a planning agency, and in this case we are assigning the certain functions to the Planning & Zoning Commission. Staff feels the Planning & Zoning Commission is in a better position to judge whether or not a variance was justified from these particular design standards. He suggested adding language to the modification provision which indicates that the Planning & Zoning Commission is designed to perform the duties of a board of adjustment for this purpose. He explained that if we make a reference in the section to the Planning & Zoning Commission performing the functions of a board of adjustment, then whoever is applying for a variance from those design standards would have to demonstrate the same things that anyone applying for a variance would, so we could omit the language "... upon demonstration of practical difficulty in meeting the standards."

Upon inquiry of Councilman Peterson, Mr. Green requested an amendment to the setback standards to read "2. For four story structures, a minimum side and rear setback of 40 feet shall be required, if adjacent to residential development or uses."

Regarding drive-throughs, Councilman Peterson felt that if the goal is to encourage more pedestrian oriented development, having a lot of drive-throughs detracts from that goal and people won't feel safe walking on the sidewalks. He felt that perhaps there should be at least some upper limit on the number of windows. He felt the concern is that people don't want to see a lot of fast food restaurants along Broadway to take away from the pedestrian aspect. Mr. Green responded that City staff would prefer one, but there may be a case where a particular use can't operate with just one single window. This provides the developer with the opportunity to come before City Council, as part of their conditional use permit request, and make their case for the second window.

The following individuals basically spoke in favor of the new district (with some concerns) for various reasons, some being, but are not limited to: limiting fast-food restaurants by a distance limitation; need to strengthen incentives to encourage historic preservation of older buildings; needs to be incentives for making larger apartments affordable; suggestion to have power lines be placed underground during new construction; when redeveloping, the City needs to address deteriorating traffic circumstances; need for long-term affordable housing; concern about the scale of development; need to make sure all standards contribute to a walkable lifestyle; need to increase the housing stock in the community developers should be allowed to build high in order to reduce sprawl; the need for bike lanes; the buildings will be out of scale and character and this may take away from the integrity of the remaining buildings possibly making them ineligible for historic designation; when you sit and idle at drive-throughs there are health impacts from the air quality; and the need for impervious surfaces:

Mr. Tom Gallaher, Community Corridors, LLC
Mr. Andy Reed, resident on Dogwood Road
Ms. Sharon Farr, representing the Preservation Society of Asheville and Buncombe County
Ms. L. Myers, resident on Vermont Court
Mr. Carl Ricker, real estate developer
Ms. Susan Roderick
Mr. Keith Thomson, resident on Bridle Path Road
Ms. Lynn Johnson, Asheville resident
Mr. David Ramsey, developer
Ms. Sophia Long, resident on Magnolia
Mr. Daniel Breen, Asheville resident
Mr. Alan Ditmore, Leicester resident
Mr. Fred English, Haw Creek resident
Ms. Eleanor Patronie, Cumberland Avenue resident
Mr. Walter Plaue
Ms. Betty Lawrence

The following individuals spoke in opposition of the new district for various reasons, some being, but are not limited to: remote parking should not be included in the parking/loading standards as there is just enough parking one block from Merrimon Avenue for residences; four stories is too high; lighting needs to be shielded from the neighborhood;

Mr. Jamie Thomason, Wendover Road resident
Mr. Greg McCoy, Monroe Place resident
Ms. Kathleen McLoughlin, Broadway area resident
Ms. Marilyn Hastings, Starnes Avenue resent

Vice-Mayor Bellamy said that regarding keeping units affordable after the implementation of this ordinance, it will be very important that we look at whom we are working with in partnership on the development side.

Mayor Worley closed the public hearing at 7:37 p.m.

Councilman Peterson said there are a lot of good things in this kind of development and we have had smart growth policies for a long time, but this is a start to say that we want a different kind of development pattern along some of our major corridors. He felt that Council needs to focus on getting that greater financial value on our properties, the commercial corridors. It helps those pay more so that our residential people don't have to pay as much and it helps to be able to provide services. On Broadway we need to ask the N.C. Dept. of Transportation, after some community consensus, to allow on-street parking on the lower part so that people feel safe walking. On Haywood Road, those folks need to figure out what they want to do and reach that consensus and develop some transportation plans. Just having a new district will not change the transportation pattern to allow greater pedestrian traffic. He felt there were benefits for the City and also for the developers and neighborhoods. He explained why he suggested an amendment to the incentive table that the incentive for building square footage greater than 24,000 square feet have the same mixed use requirement as the height greater than 3 stories incentive.

Upon inquiry of Councilman Mumpower regarding historic preservation enhancements, City staff suggested an amendment to the incentives table for existing historic structures. For all three incentives (density, building square footage and height), Planning & Development Director Scott Shuford recommended the following language be added to the incentives table under a new title of "Existing Historic Structures." Said language to read "Compatible adaptive reuse and/or additions to historic structures."

Mr. Green responded to various questions/comments from Council, some being, but are not limited to: application of the district will make some properties non-conforming; impervious surfaces;

Upon inquiry of Councilman Mumpower about underground utilities, Mr. Green said that we do require underground utilities in new primarily-residential subdivisions. He suggested an amendment to our Asheville Standard Specifications and Details Manual to require installation of underground power line conduits to new development and redevelopment.

Upon inquiry of Vice-Mayor Bellamy, Mr. Green said that as the new district is applied to different corridors, public input would be encouraged through the community meeting, the Planning & Zoning Commission public hearing and also the City Council public hearing.

Councilman Ellis felt the new district will serve the City well. He noted that if revisions are needed or something is not working out, City Council can amend the ordinance.

Mayor Worley explained why this ordinance does fit in with the City's smart growth policies.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Peterson moved to adopt Ordinance No. 2973 (with the revisions outlined above by Mr. Green after the Thursday community meeting), with the following amendments: (1) to (f) (5) Setback Standards "2. For four story structures, a minimum side and rear setback of 40 feet shall be required, if adjacent to residential zoning."; (2) to (f) (12) (e) title change to "Variances. Requests for variances of the design and operational standards set forth in this subsection 12 may be granted by the Asheville Planning and Zoning Commission which is hereby designated to perform the duties of a board of adjustment for this purpose. Requests for variances shall be submitted to the Planning and Zoning Department and considered by the Planning and Zoning Commission at their next available regularly scheduled meeting."; (3) to amend the incentive table that the incentive for building square footage greater than 24,000 square feet have the same mixed use requirement as the height greater than 3 stories incentive with the addition of "AND building setbacks adjacent to residentially zoned properties are a minimum of 40 feet"; and (4) to amend the incentive table to include a new title "Existing Historic Structures" and to have all three incentives (density, building square footage and height) include the following language "Compatible adaptive reuse and/or additions to historic structures." This motion was seconded by Councilman Dunn.

Councilwoman Jones felt strongly that this was a unique opportunity to address the affordable housing problem. Since we are asking the community to make these great sacrifices of height and square footage, then we need to at least addressing the community need of affordable housing. Therefore, she moved to amend the main motion to insert, in the incentive table, the following language in both the building square footage incentive and the height incentive under residential: "In combination with: a minimum of 25 percent of the building gross square footage are residential units AND a minimum of 25 percent of the units are less than or equal to 700 square feet each AND 10 percent of the residential units are affordable AND building setbacks adjacent to residentially zoned properties are a minimum of 40 feet."

Mr. Shuford said that the best way to provide for long-term affordability is, as pointed out by Vice-Mayor Bellamy, the partnerships with the City. Another way is making sure that our Housing Trust Funds give great weight to projects that will be built in corridors. He felt that is a much better way of controlling the affordability issue for the long-term. In addition, he felt that a good way to deal with the affordability issue is providing that extra density and this ordinance does that.

After discussion, the motion made by Councilwoman Jones died for a lack of a second.

Vice-Mayor Bellamy said that this is a good place to improve density. Our corridors are transit oriented and need to be developed as such. This new district supports that need.

The motion made by Councilman Peterson and seconded by Councilman Dunn carried unanimously.

City Attorney Oast noted that since the vote for adoption of the ordinance was unanimously, if the protest petition had been valid, it would have been overcome.

At 8:21 p.m., Mayor Worley announced a short break.

ORDINANCE BOOK NO. 20 – PAGE 139

D. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 2360 SWEETEN CREEK ROAD IDENTIFIED AS GIVENS ESTATE RETIREMENT COMMUNITY TO CONSTRUCT 59 SINGLE-FAMILY HOMES AND A 139-UNIT APARTMENT BUILDING

ORDINANCE NO. 2974 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 2360 SWEETEN CREEK ROAD IDENTIFIED AS GIVENS ESTATE RETIREMENT COMMUNITY TO CONSTRUCT 59 SINGLE-FAMILY HOMES AND A 139-UNIT APARTMENT BUILDING

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 8:49 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Mr. Carter Pettibone, Urban Designer, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Pettibone said that this is the request to consider a Level III Conditional Use Permit to construct 59 single-family homes and a 139-unit apartment building as an expansion to the Givens Estates Retirement Community located at 2360 Sweeten Creek Road in the RM-16 Residential Multi-Family High Density District.

On August 30, 2002, the applicant, Givens Estates Retirement Community, submitted development plans for a Level III site plan review. The proposed project consists of 59 single-family cottages along with a 5 story, 139-unit apartment building (City Exhibit 3 – Location Map). The 59 homes, which will be accessed via 3 new private streets, will be almost entirely located on a 55-acre property (PIN No. 9655.07-58-3386) located directly north of the existing Givens parcel, while 3 existing residential buildings will be removed from the existing Givens site to make room for the new apartment building, which will straddle the property line between the existing and new parcels. The Technical Review Committee (TRC) reviewed the plans at its September 16, 2002, and recommended approval with conditions. Some of the TRC comments were addressed in revised plans submitted September 26, 2002. The Planning and Zoning Commission at their October 2, 2002, meeting voted to recommend approval of the plans with the conditions identified by the TRC.

Residential projects greater than 50 units is size are Level III projects, which are conditional uses in the RM-16 District. Conditional uses are uses, which because of their unique characteristics or potential impacts on the surrounding neighborhood and/or city as a whole require individual consideration of their location, design, configuration, and/or operation at the location proposed.

The project site is located within the City limits on Sweeten Creek Road just north of the existing Givens Estates property. There is a mix of development types, land uses, and zoning in the area with residential subdivisions zoned RS-8 and RS-4 to the north, RM-16, Highway Business, Industrial, and Commercial Industrial zoning to the west across Sweeten Creek Road, and unzoned agricultural land to the east.

The site's access is from Sweeten Creek Road through the existing Givens' site. This intersection of the entrance drive and Sweeten Creek contains a stoplight, which is used to maintain an adequate traffic flow in the area. The existing streets within the complex are private streets, as will be the proposed streets. The existing Givens' site is also the terminus point for one of the City's bus lines, Route 30. Parking will be provided for the new apartment complex in the form of off-street parking lots located around the building.

The proposed apartment building will be five stories in height with the parking lot and main entrance level four stories tall expanding to five stories in the rear of the building. The applicant obtained a variance to allow the height of the building to extend six and a half (6.5) feet above the maximum 40 feet permitted by the RM-16 District in the Unified Development Ordinance (UDO). Detailed elevations will need to be submitted that demonstrate compliance with the granted variance.

The UDO requires 500 square feet of open space for every residential unit proposed (City Exhibit 3 – Site Plan). This would result in a total of 2.27 acres for reservation as open space for the new residential units. While the site plan shows large areas of open space, it does not specifically identify which areas are to be used to satisfy the requirement.

Buffering is not required along the boundaries of the site since the proposed number of units results in a low density that would be bordering existing low-density development to the north, vacant property to the west across Sweeten Creek, and unzoned agricultural land to the east. Landscaping is provided in and around the off-street parking areas serving the apartment building.

The UDO requires that new developments provide one large maturing tree (over 35 feet in height at maturity) for every 40 linear feet of property abutting a street. Any proposed street or street that is being realigned would need to lined with these street trees.

The UDO requires sidewalk installation along the frontage of all new streets. The applicant must provide these sidewalks or an alternative pedestrian walkway system as approved by the Engineering Department.

In addition to the development standards for the zoning district in which they are located, conditional uses must meet certain general conditions in order to ensure that the use is appropriate at a particular location and to ensure protection of the public health, safety, and welfare. The general conditions, which apply to all conditional uses, can be found in Section 7-16-2(c) of the UDO. City Council must make seven (7) findings based on the evidence and testimony received at the public hearing or otherwise appearing in the record of the case. The findings are listed below. Following each finding is technical information from staff to assist Council in making these findings. The Asheville City Council shall not approve the conditional use application and site plan unless and until it makes the following findings, based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case:

1. That the proposed use or development of the land will not materially endanger the public health or safety.

   The project received conditional technical approval from the Water Resources Department, the Fire Department, Metropolitan Sewerage District (MSD), Engineering, and other City Departments. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   The project must comply with all City standards in regards to maximum clearing and grading, erosion control, and maximum slope for streets. Development, the density of which is considerably less than permitted, is concentrated to the front of the site and is not proposed to the rear, which is significantly steeper and more heavily wooded. The project will also need to demonstrate compliance with the City's Hillside Development Standards for permitted density and clearing and grading.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

   The density of the single-family portion of the site is comparable to that of the single-family developments to the north of the site. The size of the tract of land also allows room for buffering to alleviate impacts of the size and height of the apartment building. Staff has determined that the additional traffic generated will not adversely impact of the existing road conditions or capacity. The development is also at a density that is significantly lower than what is permitted by the zoning requirements for the property.

4, That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

The property is zoned RM-16, which has no structure size standards and the developer has obtained a variance to allow the height of the apartment building to exceed the maximum 40-foot height permitted by the UDO. The 5-story apartment building also sits in one of the lowest parts of the site and is surrounded by the single-family cottages located at higher elevations. These factors will help mask the apartment building's height and bulk from neighboring low density residential to the north. The density of the single-family cottages of the project is also similar to that of the single-family developments to the north.

5. That the proposed use or development of the land will generally conform with the Comprehensive Plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

The proposed development will comply with all applicable UDO and Standards and Specifications requirements, as well as any of the City's other plans and policies. The development will meet some of the City's Smart Growth policies for transportation through the provision of a transit stop and by preserving areas with steep slopes.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

The project received technical approval from the TRC, which includes representatives of the Water Resources Department, MSD, Engineering, the Fire Department, and Public Works.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The existing Givens site is served by a traffic signal at the intersection of the entrance road and Sweeten Creek. The site is also a terminus for one the City's bus lines and contains a designated a bus stop to serve the residents of the proposed expansion as well as the residents of the existing community. Because of this and the numbers of car trips that will likely be generated by the development, Engineering and Planning and Development Staff feel adequate capacity exists to serve the additional traffic generated by the expansion.

The plan for the expansion was reviewed by the TRC at it's September 16, 2002, meeting. The TRC identified a number of outstanding technical issues and recommended approval with the condition that these issues be addressed prior to final approval. Due to the timing between the TRC meeting and the Planning and Zoning Commission meeting, the applicant was unable to address all the conditions. At it's meeting, the Planning and Zoning Commission, by a vote of 6-0, also recommended approval subject to these conditions. At present, the applicant is working with the various City departments to address these outstanding conditions.

Since all the conditions have not been addressed at this time, City staff recommends approval with the following conditions:

- The applicant submit detailed plans for review by the TRC that address all conditions identified by the TRC at its September 16, 2002, meeting.
- Sidewalks are provided along all new streets within the project or an alternative pedestrian walkway system is designed and constructed to Engineering Department requirements.
- The site plan must demonstrate it meets the requirements for the Hillside Development Standards of the UDO for any portion of the site above 2220 feet in elevation and with an average slope of 15% or greater.
- The site plan clearly identifies areas to be set aside for permanent open space as required by the UDO.
- A transit shelter is located on the property to serve the residents using the City transit system.
- Elevations for the proposed apartment building are provided to insure compliance with the variance granted for building height.

Upon inquiry of Councilman Dunn, Mr. Pettibone said that the Sweeten Creek Road widening is on the N.C. Dept. of Transportation's Transportation Improvement Plan but is not funded and won't be funded for at least seven years. Even though the widening is on the TIP, the applicant is still required to either building the sidewalk along the frontage of the street or pay a fee in lieu of.

Mr. W. Louis Bissette, attorney representing the Givens Estates, spoke in support of the expansion plan. He said that where the property inside the development is not suitable for sidewalks, they have developed greenway trails. He said they are prepared to build the 600 feet section of sidewalk on Sweeten Creek Road that abuts the project, but he has talked with the N.C. Dept. of Transportation and they estimate another 7-8 years before the widening. He said that if a fee in lieu of arrangement would work for the City, he would be happy to consider that.

Mr. Ken Partin, Executive Director of Givens Estate, answered various questions from Council, some being, but are not limited to, are the units sold to individuals or does Givens Estates own them; does Givens Estate have any other long-range plans; could the walking trail system be tied into Ballentree Subdivision; and where is the transit shelter going to be located.

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 9:10 p.m.

Councilman Ellis moved to adopt Ordinance No. 2974 to issue the conditional use permit for property located at 2360 Sweeten Creek Road identified as Givens Estate for a proposed 59 single-family cottages and a 137-unit apartment development, subject to the following conditions: (1) The applicant submit detailed plans for review by the TRC that address all conditions identified by the TRC at its September 16, 2002, meeting; (2) Sidewalks are provided along all new streets within the project or an alternative pedestrian walkway system is designed and constructed to Engineering Department requirements; (3) The site plan must demonstrate it meets the requirements for the Hillside Development Standards of the UDO for any portion of the site above 2220 feet in elevation and with an average slope of 15% or greater; (4) The site plan clearly identifies areas to be set aside for permanent open space as required by the UDO; (5) A transit shelter is located on the property to serve the residents using the City transit system; and (6) Elevations for the proposed apartment building are provided to insure compliance with the variance granted for building height. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 153

E. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO REVISE THE THRESHOLD FOR LEVEL II SITE PLAN REVIEW PROJECTS AND ALSO TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO REVISE THE NOTIFICATION REQUIREMENTS

ORDINANCE NO. 2975 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO REVISE THE THRESHOLD FOR LEVEL II SITE PLAN REVIEW PROJECTS

ORDINANCE NO. 2976 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO REVISE THE NOTIFICATION REQUIREMENTS

Upon request of Chief Planner Green, Mayor Worley said that the two public hearings would be combined but separate votes would be taken on the individual ordinance amendments.

Mayor Worley opened the public hearing at 9:14 p.m.

Regarding the amendment regarding the revision of the threshold for Level II site plan review projects, Chief Planner Gerald Green said the public hearing was advertised on November 1 and 8, 2002.

Several months ago, City Council adopted an ordinance amendment revising the Level II site plan threshold for residential projects. By increasing the range of residential projects identified as Level I site plan projects, this amendment eliminated Level II review for residential projects. Under the current standards, residential projects between 3 and 50 units are reviewed as Level I projects and residential developments with more than 50 units are reviewed as Level III projects. Neighborhood associations expressed concern that residential developments that could have impacts on neighborhoods, physical infrastructure, and quality of life were not subject to public meetings and discussion under the current standards.

In response to these concerns, staff worked with a focus group composed of representatives of the Coalition of Asheville Neighborhoods to develop an ordinance amendment that would assure projects of a size that could impact neighborhoods and/or the community as a whole were subject to public meetings and discussion. In addition to this goal, the focus group and City staff wanted to provide for speedy review of those residential projects that have little potential of impacting neighborhoods. In reviewing the existing standards, the focus group recognized that large non-residential uses permitted in residential districts, such as churches and schools, could impact the residential areas and should be subject to some level of public discussion.

The draft ordinance amendment presented to Council identifies the following as Level II site plan projects:

- Any manufactured housing rental community, camper/trailer park, or other residential development containing 20 to 50 individual dwelling units; and
- Any new non-residential use in a residential zoning district containing more than 10,000 square feet or the expansion of an existing non-residential use in a residential zoning district if the expansion contains more than 10,000 square feet.

As Level II site plan projects, these developments would be reviewed by the TRC (Technical Review Committee) in a public meeting. Notice of the TRC meeting would be provided to surrounding property owners and others as required by the City's public notification standards.

The Planning and Zoning Commission voted 6 to 0 to recommend approval of the wording amendment revising the thresholds for Level II site plan projects. The Planning and Development staff recommends approval of the wording amendment.

Regarding the amendment to revise the notification requirements for public hearings, Mr. Green said that the public hearing was advertised on November 1 and 8, 2002.

The Planning and Development staff has been reviewing the current public hearing notification requirements in an effort to identify improvements. A focus group composed of representatives of the Coalition of Asheville Neighborhoods provided assistance with this task. The task force and staff developed the following goals to assist in developing recommendations:

- Provide improved notification of public hearings;
- Assure that people impacted by proposed projects are aware of the public hearing(s);
- Identify and implement cost-effective methods for notifying affected and interested citizens of public hearings; and
- Identify a variety of methods for notifying citizens of public hearings.

Using these goals as guidelines, the focus group and staff identified several methods for improving the public notifications processes used by the City to inform citizens of public hearings. The improvements in the notification process identified by the focus group include:

- Place a larger sign on sites proposed for rezoning, development, etc.;
- Include location and information about proposed projects on the department's web page;
- Continue to expand the department's list of neighborhood contacts and use this list to notify affected neighborhoods of proposed projects; and
- Decrease the area of notification for public hearings and other meetings requiring notification from 400 feet to 200 feet.

The only identified change that requires an amendment to the City's code is the final one regarding area of notification. The draft ordinance amendment making this change is presented with the Planning and Zoning Commission's unanimous recommendation for approval. An area of notification extending 200 feet from the affected property will assure that all property owners within the immediate area are notified of proposed projects. This change, in combination with the other notification improvements identified above, will ensure that all citizens with an interest in proposed development projects, rezonings, etc are notified of public hearings and other public meetings.

A minor change being included in this amendment is a statement that fees charged for CA's (Certificates of Appropriateness) are established by the City of Asheville Fees and Charges Manual. This change will bring the process for establishing fees for CA's into compliance with the adopted City policy.

The Planning and Zoning Commission voted 6 to 0 to recommend approval of the wording amendment revising the notification process for public hearings. The Planning and Development staff recommends approval of the wording amendment.

Mr. Green said that they have a list of 51 neighborhoods registered and Ms. Barber Melton, President of the Coalition of Asheville Neighborhoods (CAN), said that they have an intern who will update the list and provide that list to the City.

Ms. Barber Melton, President of CAN, spoke in support of the amendment to the notification requirements. She said that neighborhoods are trying to be pro-active in working with the development community and they appreciate notification very early on. She felt that the process may need some revision in the future, but feels at this time, this new process will work.

Mr. Dick Washam felt that what has evolved out of several concerns a few months ago is a positive resolution. He felt this ordinance is a constructive step forward.

Mr. Scott Dedman, Executive Director of Mountain Housing Opportunities, said that he had no knowledge of these amendments and felt that perhaps only a select group of neighborhoods were involved in the process. It feels as if we are asking neighborhoods for their permission to have others move in beside them. He urged the Council to consult with the development community on these amendments if they have not already done so.

Mr. Green said that they did talk to a few developers and did a short presentation at the developer's forum, which at least 50 developers attended.

Mayor Worley closed the public hearing at 9:34 p.m.

Mayor Worley said that members of Council have previously received copies of the ordinances and they would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 2975 to revise the thresholds for Level II site plan projects. This motion was seconded by Councilman Peterson and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 159

Councilman Ellis moved for the adoption of Ordinance No. 2976 to revise the notification requirements. This motion was seconded by Vice-Mayor Bellamy and carried on a 6-1 vote with Councilman Peterson voting "no".

Councilman Peterson said that he did not feel that we would be improving notification by sending out less notification.

ORDINANCE BOOK NO. 20 - PAGE 161

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. ORDINANCE NO. 2977 - ORDINANCE AMENDING THE CITY'S SOLICITATION ORDINANCE

ORDINANCE NO. 2978 – BUDGET AMENDMENT FOR A-HOPE TO PROVIDE SATURDAY HOURS AT THEIR DAY SHELTER

Police Chief Will Annarino said that this is the consideration of an amendment to the City's solicitation ordinance by (1) making it a class three misdemeanor to ask, beg or solicit funds for alms or contributions within certain areas within the City limits boundaries; and (2) making it a class three misdemeanor to urinate in public, sleep on public property and loiter with the intent to obstruct any public street, public highway, public sidewalk or other public place or building by impeding the free uninterrupted passage of vehicle traffic or pedestrians.

City staff has received numerous complaints from residents, visitors and merchants regarding the large amount of panhandling and soliciting occurring in Asheville. In addition, the Asheville Police Department has also witnessed a large increase in panhandling occurring in the City. City staff has determined that such activities are causing a public safety hazard by interfering with the free flow of pedestrian traffic on sidewalks; creating fear and anxiety for persons traveling downtown; and discouraging people from visiting Asheville's downtown and Biltmore Village. In an effort to insure the public safety of pedestrians in high traffic areas and to preserve a pleasant family friendly atmosphere in the downtown area and Biltmore Village, City staff recommends placing a limited ban on solicitation in specified areas based on the volume of pedestrian traffic as well as the impact the location has on tourism. Staff is proposing prohibiting solicitation in the following zones: ZONE 1 - Hilliard Avenue as the southern boundary south, French Broad Avenue as the western boundary, Cherry Street and Woodfin Avenue as the northern boundary and Woodfin and Valley Street as the western boundary and ZONE 2 – the entire Biltmore Village Historic District.

Staff is also proposing prohibiting solicitation throughout the City within a certain distance from bus stops, banks and automatic teller machines, entrances to buildings, and outdoor dining areas. The ordinance will also prohibit soliciting in the evening and prohibit a person from soliciting while under the influence of drugs or alcohol.

In an effort to reduce the amount of street nuisance type activities in Asheville, City staff is also recommending the ordinance prohibit relieving one's self on public, sleeping on public property and loitering that impedes pedestrian or vehicular traffic throughout the City.

Class 3 Misdemeanor – conviction on 1st offense results in a $50.00 fine. 2nd and subsequent convictions can result in fines up to $500.00.

Police Chief Annarino briefed Council on some random reports received over a one month period from the downtown area. An analysis reveals that 230 arrests have been made in the past two years under the current panhandling ordinance.

City staff recommends approval of the ordinance.

Upon inquiry of Councilman Dunn, Police Chief Annarino said that the area can be expanded in the future.

City Attorney Oast said that in response to a couple of concerns raised, he offered the following amendments to the proposed ordinance that will clarify some of the issues raised: (1) Section 11-5 (a) Definitions (1) be amended to read: "Ask, beg or solicit: includes, without limitation, the spoken, written or printed word or such other acts as are conducted in furtherance of the purpose of immediately collecting alms or contributions."; (2) Section 11-5 (a) Definitions (3) be amended to read: "Public Place means any street, alley, highway, parking lot, sidewalk, garage, park, plaza, building, ground, or other property owned or controlled by the City of Asheville, or any portion thereof."; (3) Section 11-5 (b) (1) be amended to read: "It shall be unlawful for any person to solicit in a public place at the following locations and times:"; (4) Section 11-5 (b) (1) (e) be amended to read: "No person shall solicit after dark, shall mean one-half hour after sunset until one-half hour before sunrise."; (5) Section 11-17 (b) be amended to read: It shall be unlawful for any person to loiter, loaf, wander, stand or remain idle alone or in consort with others in a public place with the intent to:"; and (6) Section 11-17 (b) (2) be amended to read: "Commit in or upon any public street, public highway, public sidewalk or any other public place or building any act which is an obstruction or interference to the free and uninterrupted use of property or with any business lawfully conducted by anyone in or upon or facing or fronting on any such public street, public highway, public sidewalk or any other public place or building, all of which prevents the free and uninterrupted ingress, egress and regress, therein, thereon or thereto."

Upon inquiry of Councilman Dunn, City Attorney Oast said that someone engaging in unwanted activity on private property is guilty of a trespass.

Vice-Mayor Bellamy said that she would like the ordinance amended if it prohibits the Salvation Army's Christmas kettle and other types of those activities.

The following residents spoke in support of the ordinance amendments for various reasons, some being, but are not limited to: will make the streets safe; these behaviors are not what people move to Asheville for; small businesses and pedestrians feel physically and financially threatened; if we continue to let these problems exist, we will threaten the viability of downtown which has taken over 25 years to occur; these are tools that will allow the Police Department to address panhandling; and constructive solutions must be found and the City must also be willing to help fund organizations like ABCCM and Hospitality House:

Mr. Fred English, Haw Creek resident
Mr. Mike McCrary, Asheville resident
Mr. W. Louis Bissette, Asheville resident
Mr. Doug Tate, speaking on behalf of the Asheville Downtown Association

The following residents spoke against the ordinance amendments for various reasons, some being, but are not limited to: adoption of the ordinance will not change for the better for the already disenfranchised and there be no less discrimination for the poor, homeless, mentally ill, or people of color; this will widen the door for selective enforcement and will increase police autonomy without increasing police accountability; criminalization of poverty; many do not have a choice but to make their homes on the street; sleeping and performing bodily functions are not chosen activities; we need policies that help people feel safe downtown and protect the viability of local businesses while dealing with the challenges in a constructive and humane way; the ordinance is wrong morally, wrong as a matter of policy and it violates the Constitution of the United States as an infringement on free speech and expressive conduct; there needs to be a strategy for eliminating the wide-spread street harassment of women; people in the community need to support initiatives to help get youth off the street; solutions need to be found that will not be so invasive and not on selectively chosen people; Council is adding one more burden to people who already have more than they can bear; this is institutional abuse; there have been no citizen or focus groups to craft the ordinance; this is an assault on human and civil liberty; adding more legislation is not going to deter criminals from this kind of activity; there needs to be more public restrooms, more room in the shelters, more affordable housing and more high paying jobs and the entire community needs to address this issue; lack of shelter capacity leads to more persons outside; ordinance should distinguish between intentionally disrespectful behavior and life-required bodily functions like sleeping, urination and defecation; state facilities should be held accountable for appropriate and effective discharge planning for persons discharged from various state and regional systems and institutions; more effective use of tax dollars would be to convince the District Attorney to prosecute the aggressive panhandlers and make an example of those folks; there should be solutions for poverty and homelessness rather than aggressiveness towards panhandlers; and this ordinance makes homelessness illegal:

Ms. Allie Morris
Mr. Shawn Gaynor, Asheville resident
Pastor Beth Duttera Newman of First Presbyterian Church and Chair of
Hospitality Board

218

Mr. Bruce Elmore, representing the Western North Carolina ACLU
Mr. Bud Howell, Asheville resident
Ms. Crystal Watley
Mr. Frank Goldsmith
Ms. Melanie Shellor
Ms. Karen Van Ammon, Asheville resident and volunteer with Help-Mate
Mr. Alan Ditmore, Leicester resident
Mr. Jamie Thomason, resident on Wendover Road
Mr. Daniel Castell, Asheville resident
Mr. Christopher Fielden, Liberty Street resident
Ms. Martha Are, Executive Director of Hospitality House of Asheville
Mr. Jim Barrett
Minister Ukiah Morrison
Mr. Scott Dedman

Councilman Mumpower asked if our ordinance is legally defensible. Assistant City Attorney Curt Euler responded said that what we are proposing, in terms of the solicitation, is a valid time, place and manner restriction. We are not regulating the type of speech or singling out one group over another. We have significant government interest in that we want free flow of traffic, we want to promote our local merchants, and we want to promote tourism. The ordinance is narrowly tailored in that we are only restricting this ban to two limited areas where we are experiencing the most problems. Therefore, he felt we have a defensible ordinance.

When Councilman Mumpower asked if the City can amend the ordinance to address some inoculate activities, like charities, Mr. Euler said that if we amend our ordinance to allow those forms of activities, that is where we will get ourselves in the most constitutional trouble -- by allowing certain forms of solicitation to happen in this area, while banning others.

Councilman Mumpower believed that many of the people involved do actively pursue predatory, criminal and destructive behavior and activities and that should not be minimized or ignored at the expense of the common good. We have a responsibility to try to address that. He knows there are many in our community who are not only offended and irritated by these activities, but are frightened and intimated by the acts this ordinance is trying to address. He did not think that we should ignore the symptoms because we do not have the wherewithal to effectively fix the problem. We must attempt to do both. There is a good place being indifferent to a problem and indulging a problem and I believe that our staff has tried to make a reasonable effort to hit the mid-point.

Councilman Peterson felt that the provisions about sleeping on public property are overbroad. City Attorney Oast suggested the following amendment to Section 11-16 (a): "It shall be unlawful for any person to sleep outdoors on any of the streets, sidewalks or public parks in such a way, or in such a manner, as to interfere with pedestrian or vehicular traffic or permitted activities."

Councilman Peterson felt that in Section 11-17 (Loitering), (b) (2) was basically a duplication of (b) (1) and suggested (b) (2) be deleted entirely. City Attorney Oast agreed with this amendment.

Councilman Peterson had concerns expressed that if you drive the panhandlers out of town they will go to other areas of Asheville and why the ordinance is not City-wide. Mr. Euler explained that the downtown area probably has the most heavily pedestrian and vehicular traffic. That is different than other parts of the City and that is why staff is proposing the ban in a limited area to start out with. In the future if other areas grow and start to have those same types of characteristics, City Council can amend the ordinance and add those areas. But, based on the research, the two areas that fit the heavy pedestrian traffic, tourism and vehicular traffic were the Biltmore Village Historic District and downtown area.

Discussion surrounded street performers and whether they would be subject to the ordinance if they just played and had a suitcase open or a hat beside them. Mr. Euler responded this ordinance would prohibit that type of activity. Constitutionally he did not see how we could differentiate between a panhandler asking for money, a musician asking for money, or a charity asking for money. We are trying to have a consistent ordinance, which is no asking for money regardless of your motivation.

Vice-Mayor Bellamy felt a permitting process should be reviewed for a possible amendment to this ordinance at a future date. City Attorney Oast said that it would be possible to have that kind of process, but if we are regulating solicitation, we have to regulate it for anyone who solicits for any purpose. He would research other jurisdictions to see how they handle their permitting process in cases like this and report back to Council.

Upon inquiry of Councilman Jones about street musicians, City Attorney Oast explained that one of the difficulties encountered in ordinances of this type is that we can't, to the extent that solicitation does enjoy some First Amendment protections, regulate one kind of solicitation over another. That is why this regulation affects asking for money for one's self, for a charity or to the accompanying of a musical instrument. Musicians can play, but solicitations cannot be sought.

Councilman Ellis felt that that it's important to have street musicians downtown because they help make Asheville very special and diversified. Even though he is in favor of the ordinance to help the situation, he requested staff to see if there is some way to for this activity.

Councilman Peterson felt Section 11-5 (5) (d) should be clarified to read: "(d) Soliciting money from anyone who is waiting in line for any purpose."

Councilman Dunn spoke in support of the ordinance and did feel, like others, that this is a community problem. He felt that we do need to do more for the helpless, but there is a silent majority of people who are frightened and if City Council doesn't take a first step to try to address these problems, then nothing will happen. He also would like to see if there is a way to have street musicians, however, he does understand the Constitutional issue.

Councilman Jones is very committed and supportive of downtown Asheville with her presence and her pocketbook. There will always be a give and take between individual freedoms and corporate life. To adopt the ordinance is increased regulation of corporate behavior, but she believes that adoption will have an overall positive effect on the downtown district. We will incur the costs associated with enforcement, prosecution, possibly defense, selective enforcement and human costs. All people are of value and homeless people can't be sited away and pretend they are not part of our community. We must find solutions. She felt that the community has begun to understand the complexities of the problems and encouraged by the efforts and commitment of the Downtown Association, the Downtown Commission and the faith communities in those directions. She asked Council to support the following three acts in order to take this conversation to the next level and also support efforts in the community to address the root of homelessness: (1) commit to a conversation about public restrooms and how we can address this need. Specifically if we can ask the Director of Public Works and other appropriate City staff, to do a vast search of what has worked in other cities and other technology; (2) participate in Blue Ribbon Commission or the Social Issues Task Force, but not to necessarily talk about the need, but talk about the solutions and then commit to do something about it; and (3) as a beginning monetary start, to allocate from the Contingency Fund $20,000 to A-Hope to provide Saturday hours at their day shelter.

Vice-Mayor Bellamy supported the three acts requested by Councilman Jones. She said this is a difficult decision about our community and its future. We want everyone to have the opportunity to live in our community, which is a community of givers, but we have to set some rules and some boundaries.

Mayor Worley said this decision is not easy and needs to be a balanced decision. This balance is for the needs of those who are much less fortunate than we are and the safety and welfare of the rest of our citizenry, who are offended when people urinate in public, accosted or feel threatened. City Council is willing to seriously consider ways to find assistance for those in need. He said the Downtown Commission is forming a Social Issues Task Force and feels they would welcome others who would like to participate in that process.

Councilman Peterson moved to adopt Section 11-15 (Public Urination); Section 11-16 (Sleeping on Public Property) with the amendment to (a) as read by City Attorney Oast above; and Section 11-17 (Loitering) with the amendment to (b) as read by City Attorney Oast above and with the entire deletion of (b) (2). This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

Councilman Mumpower moved to adopt Section 11-5 with the amendments to (a) (1), (a) (3), (b) (1) and (b) (1) (e) as read by City Attorney Oast above, with the understanding that City staff will look for ways to possibly permit street musicians, charitable organizations, etc. so they will not be in violation of this ordinance. This motion was seconded by Vice-Mayor Bellamy and carried on a 6-1 vote, with Councilman Peterson voting "no."

ORDINANCE BOOK NO. 20 - PAGE 163

Councilwoman Jones moved to (1) commit to a conversation about public restrooms and how we can address this need. Specifically if we can ask the Director of Public Works and other appropriate City staff, to do a vast search of what has worked in other cities and other technology; (2) participate in Blue Ribbon Commission or the Social Issues Task Force, but not to necessarily talk about the need, but talk about the solutions and then commit to do something about it; and (3) adopt Ordinance No. 2978 which will allocate from the Contingency Fund $20,000 to A-Hope to provide Saturday hours at their day shelter and revisit the appropriation again next Fiscal Year. This motion was seconded by Vice-Mayor Bellamy.

Councilman Dunn wondered if we should allocate the $20,000 now, or wait until a plan is in place perhaps by the Downtown Social Issues Task Force because they may say the best place to allocate the money is for public restrooms.

The motion made by Councilwoman Jones and seconded by Vice-Mayor Bellamy carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 168

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of October 18-24, 2002: Rufus Kendall (Water), Steve McIntyre (Transit Services), William Sibbach (Transit Services), Louise McCauley (Water) and Christine Martin (Water).

The following claims were received during the period of October 25-31, 2002: Berlin Tire Center (Police) and Antonina Tsysan (Transit Services).

The following claims were received during the period of November 1-7, 2002: Donna Tolar (Streets), Carrols Corp. (Water), Jack Roberts (Sanitation) and Paul Campbell (Parking Services).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. William Wynn presented City Council with a petition containing approximately 1,298 signatures. Said petition read "On July 21 two rookie Asheville police officers topped Ismael Hassan, a local youth corrections officer, and his friend Khalid Saadiq, a former Asheville Police Department Officer, in front of Ismael's home for driving while black, in the South French Broad neighborhood. Without provocation the officers proceeded to arrest the two, in the process beating Ismael on the lawn of his residence, while he was in his corrections officers uniform. Help bring justice to this case by making the following demands: (1) Ismael and Khalid's charges be dropped; (2) A full independent investigation of the Asheville Police Department into this incident of racial profiling and police brutality; (3) An end to police brutality and racial profiling; and (4) That officers Breneman badge # 2170, and Maltby badge # 2162, be dismissed from the APD, and that Khalid and Ismael be given a public apology." City Manager Westbrook said that an internal investigation is being done and he would report back to City Council.

At 12:12 a.m., Councilman Dunn moved continue this meeting until Thursday, November 14, 2002, at 3:00 p.m. in the Council Chamber, to discuss the regional water renegotiations with Henderson County. This motion was seconded by Councilman Ellis and carried unanimously.

Thursday – November 14, 2002 - 3:00 p.m.
Council Chamber – City Hall

Continuation of Tuesday, November 12, 2002, City Council Meeting

Present:	Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson
Absent:	None

Mayor Worley said that this is the continuation of the formal meeting of November 12, 2002, for the purpose of focusing on renegotiations with Henderson County, where the City's stands with those renegotiations and how to proceed in the future.

Mayor Worley reviewed with Council the background of the Regional Water Agreement with Henderson County. He then explained in some detail the current agreement difficulties, which include: (1) effort and intent to provide regional solution; (2) Bent Creek property; (3) American Freightways example – which is not consistent with the Agreement; and (4) other issues being the Henderson County "system" and the Hendersonville water distribution system.

Current discussions included an offer at formal renegotiation session to pay Henderson County $2 million and terminate the agreement. Informal discussions include (1) revise the agreement, pay $1 million plus $500,000 over period of time; (2) continue participating in Authority with one seat; (3) provide for needs of Henderson County; and (4) create Regional Infrastructure Council.

Henderson County's responses were to revise the agreement, pay $2 million, be allowed two seats on Water Authority, and create a Regional Infrastructure Council.

Guiding principles are the (1) commitment to regionalism – (a) water is a resource for entire region; and (b) all water producing/distributing entities need to be included; and (2) creation of Regional Infrastructure Council – needed regardless of outcome of discussions with Henderson County.

The following are three proposals to Henderson County:

Option 1
- Continue with present agreement
- Joint commitment to abide by agreement by all parties
- Provide for needs of Henderson County as per the present agreement
- Create Regional Infrastructure Council

Option 2
- Pay Henderson County $1.5 million
- Continue participating in Authority with one seat
- No "regional water lines" but all part of Water Authority system
- Provide for needs of Henderson County on same basis as all other customers
- Create Regional Infrastructure Council

Option 3
- Pay Henderson County $2 million and terminate agreement
- Provide for needs of Henderson County on same basis as all other customers
- Create Regional Infrastructure Council

In summary; he asked that we give Henderson County the option to accept any of the above proposals and to express hope and desire that they opt to continue participating by accepting Option 2.

Regardless of the outcome of Henderson County negotiations we are committed to provide water where needed, as needed on a regional basis. Also, we need to move to create a Regional Water Infrastructure Planning Council made up of all water producing, using, and distributing governmental entities in Buncombe County and Henderson Counties.

The regional approach mission is to plan water infrastructure in the region to provide for planning in the event of shortages, prevent duplication of scarce resources and promote cooperation.

In conclusion (1) Asheville wants to preserve and promote the spirit of regionalism that began in 1994; (2) Asheville recognizes that we are all neighbors in WNC and can only truly succeed by working together; and (3) many more areas where we can all benefit if we work together.

Mr. Mickey Mahaffey supported the Regional Water Infrastructure Planning Council proposal and hoped that the entire water agreement will be examined and that we truly have a regional approach.

Ms. Hazel Fobes said we must have a proper independent Water Authority and we do need regionalism.

Upon inquiry of Councilman Peterson, Mayor Worley said that the Bent Creek property was purchased in the mid-1980's with water revenues. He felt that if the City buys the property back and eventually sells it, the money should go back to the Water Department, thus benefiting all of the water customers.

Councilman Peterson said that we have an agreement with Henderson County to build regional water lines and there is an argument over what a regional water line is, but what obligation does the City have that the Asheville taxpayers should give Henderson County $1.5 or $2 million. Mayor Worley said that money would come from the Regional Water Authority's Water Fund and the benefit to the City would be that we would have the Bent Creek property.

Councilman Ellis said that there is a feeling in Henderson County that when the water processing plant was built in Henderson County, it took a lot of land off of the tax books and their citizens feel they deserve something for that.

Mayor Worley said that part of the agreement with Henderson County would be that they use the funds for sewer and/or waterline extensions. The indicated that they would spend most of it on sewer because that is their biggest need.

Upon inquiry of Vice-Mayor Bellamy, Mayor Worley said that 60% of the water customers are Asheville residents, 40% are Buncombe County residents and about less than 1% are Henderson County residents.

Mayor Worley said that the Regional Water Authority currently has a current Master Plan that, up until now, only covers only Asheville and Buncombe County. We are in the final stages of completing the Master Plan process for northern Henderson County and once that is complete, it will be incorporated into our Master Plan.

Councilman Ellis explained that City of Hendersonville has no desire to be a part of a Regional Agreement.

Councilman Dunn said that sometimes regionalism can be a problem in that you gain a lot by working together, but you lose control. We need to make sure that we remember that Asheville residents are our number one concern.

Councilman Peterson said that we have a regional Civic Center, which Asheville taxpayers pay the full cost and everyone else enjoys it. The regional approach shouldn't be that Asheville taxpayers pay for everyone else's development and infrastructure.

There was discussion about each of the three options and under what circumstances the Bent Creek property would revert back to the City of Asheville.

Councilman Peterson felt that if we provide water for Henderson County at the same rate, we will lock ourselves into the Sullivan Act. If it is our ultimate goal to have a true City Water Department and lower the rates, he felt this is going in the wrong direction.

Mayor Worley stressed that the agreement is not working for both parties. He asked for Council's guidance to allow him and Councilman Ellis to make a formal offer to Henderson County of Options 1, 2 or 3. He stated that there are still more negotiations to take place and the agreement would have to be thoroughly reviewed by City Council.

City Manager Westbrook said that since the agreement is not working, the proper way to reverse things is to back out of the second agreement (with Henderson County) first for several reasons, including financial pledges on bonds If, or when, that agreement is dissolved then the City can work with Buncombe County to renegotiate their contract.

Upon inquiry of Councilman Dunn, Finance Director Bill Schaefer said that our obligations under the current agreement with Henderson County causes great concern in the financial community and we are hesitant to go to market until the matter clears up.

City Manager Westbrook said that we are only using slightly over 50% over our treatment capacity and the more water we sell, the lower our overhead. We have a lot of capacity which is good for regionalism.

Councilman Ellis moved to authorize the Mayor to present the three options to Henderson County and let them decide what is in their best interest. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Councilman Peterson voting "no."

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 4:45 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – November 19, 2002 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

New Street Name of "Moser's Place"

Summary: The consideration of a resolution accepting the new proposed street name "Moser's Place."

Ron Moser Inc., owner of lots off of Maple Avenue, has petitioned the City of Asheville to accept the street name " Moser's Place." The new street will begin at Maple Avenue and end at the cul-de-sac on Moser's Place.

City staff recommends adoption of the resolution accepting the new street name.

New Street Names of "Chamberlain Drive," Longwood Lane," and "Landis Court"

Summary: The consideration of a resolution accepting the new proposed street names of "Chamberlain Drive," "Longwood Lane," and "Landis Court."

Bostic Development LLC, owner of lots off of New Leicester Highway, known as Westmont Commons, has petitioned the City of Asheville to accept the street names of "Chamberlain Drive," "Longwood Lane," and "Landis Court." The new streets will begin at New Leicester Highway and end on Chamberlain Drive. Longwood Lane, and Landis Court.

City staff recommends adoption of the resolution accepting the new street names.

Re-Designation of the State Development Zone

Summary: The consideration of a resolution to re-designate the Asheville State Development Zone.

The State of North Carolina has designated certain census tracts in and around the City of Asheville as qualified for inclusion in a State Development Zone. Development zones were created to provide economic incentives to stimulate new investment and job creation in economically distressed urban areas.

The current State Development Zone for Asheville will expire on December 31, 2002. Application for re-designation is due and, if approved, will take effect January 1, 2003, for a period of two years.

Pursuant to the state-mandated guidelines, City staff has determined the area for inclusion in the new Development Zone. The total zone must have a minimum of 20% population below the poverty level.

226

Staff recommends approval of the resolution defining the State Development Zone to be effective January 1, 2003, through December 31, 2005.

Adoption of the Fiscal Year 2003-04 Budget Schedule

Summary: The consideration of a motion approving the Fiscal Year 2003/2004 budget schedule.

The proposed Fiscal Year 2003/2004 budget schedule identifies specific dates for completion of all phases of the budget process leading to adoption. Key phases of the budget process include submission of departmental requests, presentation of the proposed budget to City Council, a public hearing and formal adoption. Adoption of the Fiscal Year 2003/2004 budget is scheduled for June 24, 2003.

City staff recommends City Council adopt the Fiscal Year 2003/2004 budget schedule.

Vice-Mayor Bellamy asked that consideration be given to the weekend of January 31-February 1 for the Annual Retreat. City Manager Westbrook said that the Retreat Committee would be meeting next week and they would take that request into consideration.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

DOWNTOWN SOCIAL ISSUES TASK FORCE

Chair of the Downtown Commission Carol King said that over the past year, the Downtown Commission has brought in local expert on issues such as homelessness and had discussions about graffiti, loitering and the panhandling downtown. They have come to understand that these problems are very complex and that the state budget cuts to the mental health system, as well as many factors, are contributing to the increase of these problems in our center city.

As a result of their research and discussions, they propose the formation of a Downtown Social Issues Task Force that would bring together stakeholders from a broad range of interested organizations, to deal with these issues in a positive, coordinated, and comprehensive fashion. They have received a great amount of support and interest in this effort and have gathered several letters of support. She presented Council with a list of interested organizations that have been contacted that would be willing to work on such a Task Force. She invited Council members to be a part of the Task Force if they wish.

Ms. King said that a lot of research has been done nationwide on this issue and the Task Force will define the issues and then come up with well-researched and well thought-out solutions for Council consideration. She anticipated approximately six months before coming back to Council with the well-defined problem.

The Task Force will complement the legal tools provided by the recently adopted amendment to the solicitation ordinance.

Upon inquiry of Councilman Mumpower, Ms. King said that City resources needed would be primarily from the City Development Division.

Ms. King responded to various questions from Council regarding a mental health plan for our community and the possibility of merchants putting up boxes in their stores for the homeless.

227

It was the consensus of Council to endorse the Downtown Social Issues Task Force and that the Asheville Downtown Commission take the lead in submitting to Council a suggested list of participants and a leader. Said Task Force can then brainstorm to define what they feel their charge is and then bring that information back to Council for their input and/or approval.

UPDATE ON METROPOLITAN PLANNING ORGANIZATION EXPANSION

Metropolitan Planning Organization Coordinator Dan Baechtold said that this is a presentation to City Council on the expansion of the Metropolitan Planning Organization (MPO).

Metropolitan Planning Organizations (MPOs) are part of a federal process to conduct local transportation planning in urbanized areas. An MPO is required in every urbanized area over 50,000 in population in order to receive federal funding for transportation. The MPO process is a partnership between local and state government to make decisions about transportation planning in urbanized areas and to meet planning requirements established by federal authorizing legislation for transportation funding.

The Asheville Area MPO is made up of two primary committees: a policy-making group of elected officials known as the Transportation Advisory Committee (TAC); and the Technical Coordinating Committee, made up of staff from various agencies. Councilwoman Holly Jones and Councilman Brian Peterson are the City of Asheville representatives on the TAC. The TAC is responsible for making decisions related to transportation plans and improvement priorities in the MPO area. The City of Asheville staff serves as the lead planning agency for the MPO, and receives federal funding to conduct transportation planning and administer the MPO.

Every ten years the MPO boundary must be redefined based on the results of the U.S. Census. In the spring of this year, the Federal Highway Administration and the North Carolina Dept. of Transportation directed the MPO to expand the boundary to include municipalities in Henderson and Haywood Counties based on the results of the 2000 Census. This change is part of an established federal process to redefine urban areas and MPO boundaries that occurs every ten years.

The MPO currently has eight member governments: Asheville, Buncombe County, Biltmore Forest, Black Mountain, Fletcher, Montreat, Weaverville, and Woodfin. At a minimum, eight new member governments will be added to the MPO based on the census results. They are: Haywood County, Clyde, Canton, Waynesville, Henderson County, Hendersonville, Laurel Park, and Flat Rock. In addition, the Town of Maggie Valley is likely to be added. The expansion will involve a restructuring of the MPO and the agreements that establish the MPO. There will be new members of the Transportation Advisory Committee and the Technical Coordinating Committee, a new voting structure, new procedures, and a new name for the MPO.

The North Carolina Dept. of Transportation has asked the MPO to proceed with expansion of the MPO according to the following schedule:

January 2003	-	Establish New MPO Boundary
July 2003	–	Adopt New Memorandum of Understanding (MOU)
August 2003	-	New TAC Members in Place

In order to meet the schedule outlined above, the Technical Coordinating Committee (TCC) established a working group of staff from all of the involved local governments to plan the MPO expansion. The committee cooperatively drew a draft boundary for the expanded MPO.

According to federal guidelines, the draft boundary must include all contiguous areas defined as urbanized, as well as any adjacent areas expected to be urban in the next 20 years.

All of the municipalities and counties in the expanded MPO area will be asked to comment on the draft boundary. The TCC will make adjustments to the boundary based on these comments. In January, the TAC will be asked to adopt the new boundary for the MPO.

No action is required from City Council at this time. City Council may choose to formally or informally provide input on the boundary or other MPO issues directly to the TAC or through the Asheville representatives on the TAC. In the spring of 2003, the Asheville City Council will be asked to sign a revised Memorandum of Understanding between all of the governments in the MPO. The MOU will establish voting procedures and membership of the TCC and TAC. The possibility of weighted voting based on population will receive a lot of discussion. Weighted voting on the TAC may be affected somewhat by the location of the MPO boundary. The process of establishing a new MOU will take place after the new boundary is established in January.

It should also be noted that the State of North Carolina is in the process of establishing Rural Planning Organizations (RPOs) for transportation all across the state. These RPOs will be responsible for transportation planning outside of the metropolitan areas. Currently there is a discussion between Buncombe, Madison, Transylvania and Haywood Counties to form an RPO in this region. Henderson County has also been offered the option to join the RPO. The MPO will work closely with the new RPO on the location of the boundary and other coordination issues.

Upon inquiry of Councilman Peterson, City Engineer Cathy Ball said that the lead planning agency is not being negotiated with this new Memorandum of Understanding.

Councilman Peterson lead the discussion of the draft boundary preferring that the boundary be kept tighter around the municipalities. He felt that having a tighter boundary would lend towards more intensive urbanized planning.

It was the consensus of Council that the boundary be tightened than what is proposed.

BUDGET AMENDMENT FOR FILM FESTIVAL IN NOVEMBER 2003

Mr. David Mitchell, Superintendent of Cultural Affairs, said that this is the consideration of a budget amendment, in the amount of $28,250, to the Parks and Recreation Festival Enterprise fund to allow for the production of the inaugural Asheville Film Festival.

In connection with the Asheville Film Commission, the Cultural Arts Division has been researching the implementation of a film festival for the Asheville area. This event will draw a national audience, have a positive economic impact to the area, and generate revenue for the enterprise fund. The Parks and Recreation Department is requesting an amendment of $28,250 to the Festival Enterprise Fund to begin planning and implementation of this event. Projected initial sponsorship sales of $28,250 will offset this cost by the close of the Fiscal Year 2002-03.

Mr. Mitchell then explained how the film industry directly supports caterers, restaurants, transportation, innkeepers, hotels, motels, pre-production, post-production, advertising, print and television business. Over the last four years, direct revenue from feature film industry totals $20,000,000.

The Asheville Parks and Recreation Department recommends approval of this request and the support of City Council in establishing the Asheville Film Festival.

Upon inquiry of Councilman Dunn, Director of Parks & Recreation Irby Brinson said that we need opportunities like this to make revenue for the Festival Fund to continue with other projects and to work down the in-direct costs.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

BOARDS AND COMMISSIONS

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint Debora Holmes-Young as Chair to the ABC Board and to appoint Thomas R. Bell as a member.

It was the consensus of City Council to have the City Clerk prepare the proper paperwork to appoint Ray Sanow, Michael Rangel, Stephen Lutz and Diedra Smith to the Asheville Film Commission.

CLOSED SESSION

At 4:37 p.m., Councilman Peterson moved to go into closed session to establish or to instruct the City's staff concerning the position to be taken by or on behalf of the public body in negotiating the price or other material terms of a contract for the acquisition of real estate. The statutory authorization is contained in N. C. Gen. Stat. 143-318.11(a) (5). This motion was seconded by Councilman Dunn and carried unanimously.

At 5:25 p.m., Councilman Dunn moved to come out of closed session. This motion was seconded by Councilman Ellis and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 5:25 p.m.

Magdalen Burleson
CITY CLERK

Charles R Worley
MAYOR

Tuesday – November 26, 2002 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Councilman Brian L. Peterson

INVOCATION

Vice-Mayor Bellamy gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF ASHEVILLE PARKS AND RECREATION DEPARTMENT RECEIVING THE GOLD MEDAL AWARD FROM THE NATIONAL SPORTING GOODS ASSOCIATION AND THE NATIONAL RECREATION AND PARKS ASSOCIATION

Mr. Larry Zehnder, Regional Director of the National Recreation and Parks Association (NRPA), Southeast Region, presented Mayor Worley and Mr. Irby Brinson, Director of Parks and Recreation, with the Gold Medal Award. Mayor Worley then recognized Parks & Recreation Director Irby Brinson for receiving the Gold Medal Award from the National Sporting Goods Association (NSGA) and the NRPA on October 16, 2002. He said the Gold Medal is the most prestigious award given through a partnership with NRPA and NSGA's Sports Foundation to honor the nation's outstanding community parks and recreation agencies for excellence in the field of park and recreation management.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON NOVEMBER 12, 2002, AND THE WORKSESSION HELD ON NOVEMBER 19, 2002

B. RESOLUTION NO. 02-181 - RESOLUTION ACCEPTING THE NEW STREET NAME OF "MOSER'S PLACE"

Summary: The consideration of a resolution accepting the new proposed street name "Moser's Place."

Ron Moser Inc., owner of lots off of Maple Avenue, has petitioned the City of Asheville to accept the street name " Moser's Place." The new street will begin at Maple Avenue and end at the cul-de-sac on Moser's Place.

City staff recommends adoption of the resolution accepting the new street name.

RESOLUTION BOOK NO. 27 – PAGE 280

C. RESOLUTION NO. 02-182 - RESOLUTION ACCEPTING THE NEW STREET NAMES OF "CHAMBERLAIN DRIVE," "LONGWOOD LANE," AND "LANDIS COURT" OFF NEW LEICESTER HIGHWAY

Summary: The consideration of a resolution accepting the new proposed street names of "Chamberlain Drive," "Longwood Lane," and "Landis Court."

Bostic Development LLC, owner of lots off of New Leicester Highway, known as Westmont Commons, has petitioned the City of Asheville to accept the street names of "Chamberlain Drive," "Longwood Lane," and "Landis Court." The new streets will begin at New Leicester Highway and end on Chamberlain Drive, Longwood Lane, and Landis Court.

City staff recommends adoption of the resolution accepting the new street names.

RESOLUTION BOOK NO. 27 – PAGE 281

D. RESOLUTION NO. 02-183 - RESOLUTION RE-DESIGNATING THE ASHEVILLE STATE DEVELOPMENT ZONE

Summary: The consideration of a resolution to re-designate the Asheville State Development Zone.

The State of North Carolina has designated certain census tracts in and around the City of Asheville as qualified for inclusion in a State Development Zone. Development zones were created to provide economic incentives to stimulate new investment and job creation in economically distressed urban areas.

The current State Development Zone for Asheville will expire on December 31, 2002. Application for re-designation is due and, if approved, will take effect January 1, 2003, for a period of two years.

Pursuant to the state-mandated guidelines, City staff has determined the area for inclusion in the new Development Zone. The total zone must have a minimum of 20% population below the poverty level.

Staff recommends approval of the resolution defining the State Development Zone to be effective January 1, 2003, through December 31, 2005.

RESOLUTION BOOK NO. 27 – PAGE 282

E. ORDINANCE NO. 2979 - BUDGET AMENDMENT FOR THE FILM FESTIVAL IN NOVEMBER OF 2003

Summary: The consideration of a budget amendment, in the amount of $28,250, to the Parks and Recreation Festival Enterprise fund to allow for the production of the inaugural Asheville Film Festival.

In connection with the Asheville Film Commission, the Cultural Arts Division has been researching the implementation of a film festival for the Asheville area. This event will draw a national audience, have a positive economic impact to the area, and generate revenue for the enterprise fund. The Parks and Recreation Department is requesting an amendment of $28,250 to the Festival Enterprise Fund to begin planning and implementation of this event. Projected initial sponsorship sales of $28,250 will offset this cost by the close of the Fiscal Year 2002-03.

The Asheville Parks and Recreation Department recommends approval of this request and the support of City Council in establishing the Asheville Film Festival.

ORDINANCE BOOK NO. 20 – PAGE 170

F. MOTION ADOPTING THE FISCALYEAR 2003-04 BUDGET SCHEDULE

Summary: The consideration of a motion approving the Fiscal Year 2003/2004 budget schedule.

The proposed Fiscal Year 2003/2004 budget schedule identifies specific dates for completion of all phases of the budget process leading to adoption. Key phases of the budget process include submission of departmental requests, presentation of the proposed budget to City Council, a public hearing and formal adoption. Adoption of the Fiscal Year 2003/2004 budget is scheduled for June 24, 2003.

City staff recommends City Council adopt the Fiscal Year 2003/2004 budget schedule.

G. RESOLUTION NO. 02-184 - RESOLUTION APPOINTING A CHAIR AND MEMBER TO THE ALCOHOLIC BEVERAGE CONTROL BOARD

Summary: The term of Mr. Ralph Morris, as a member and Chair to the Alcoholic Beverage Control Board, expired on November 13, 2002.

On November 19, 2002, it was the consensus of City Council to have the City Clerk prepare the proper paperwork to (1) appoint Debora Holmes-Young as Chair to the ABC Board until her term expires, or until her successor has been appointed; and (2) appoint Thomas R. Bell to serve a three year term, term to expire November 13, 2005, or until his successor has been appointed.

Upon inquiry of Councilman Dunn, Vice-Mayor Bellamy explained that there was an ABC employee embezzling money from one of the stores and the issue has been addressed.

RESOLUTION BOOK NO. 27 – PAGE 283

H. RESOLUTION NO. 02-185 - RESOLUTION APPOINTING MEMBERS TO THE FILM COMMISSON

Summary: Pam Turner, Cindy Pomeroy, Kathleen Bobak and Guy Chancey have resigned as members of the Asheville Film Commission, thus leaving two unexpired terms until November 1, 2003, and two unexpired terms until November 1, 2004.

On November 19, 2002, City Council instructed the City Clerk to arrange the proper paperwork to appoint Ray Sanow and Michael Rangel to each serve until November 1, 2003, and to appoint Stephen Lutz and Diedra Smith to each serve until November 1, 2004. All appointments are until their successors have been appointed.

RESOLUTION BOOK NO. 27 – PAGE 284

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilman Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN ORDINANCE DESIGNATING THE BYNUM HOUSE AS A LOCAL HISTORIC LANDMARK

ORDINANCE NO. 2980 - ORDINANCE TO DESIGNATE THE BYNUM HOUSE LOCATED AT 200 MACON AVENUE AS A LOCAL HISTORIC LANDMARK

Mayor Worley opened the public hearing at 5:18 p.m.

Interim Historic Resources Director Stacy Merten said that this is the consideration of an ordinance to designate the Bynum House, located at 200 Macon Avenue, as a local historic landmark. This public hearing was advertised on November 15 and 22, 2002.

The Bynum House is located within the Grove Park Neighborhood, at 200 Macon Avenue, .7 miles Northeast of its intersection with Charlotte Street on a 5.7-acre tract of land. The boundaries of the proposed designated property, however, do not include the full tax parcel, but encompass a 1.17-acre parcel. The structure is located along the approach to the Grove Park Inn, nestled on a heavily wooded lot. The property backs up to the Grove Park Inn Country Club, which is located to the west and is surrounded by the Battle house to the north, Longchamps apartments, across the street to the east and single family housing to the south. The grounds slope away steeply from the house and the surrounding landscape had at one time been neglected. Recently, however, an effort has been made to reclaim some of the original landscape design features.

The Bynum House is an outstanding example of early 20th century Tudor Revival style architecture and survives nearly unchanged since its construction in 1923. Architect Ronald Greene designed the House for Curtis and Florence Bynum. Greene is best known for his commercial and civic structures, such as the Jackson Building on Pack Square, the Claxton School and the Longchamps apartments, to name a few. While the Bynum house is not a rare example of the Tudor Revival style in Asheville, the house is significant for its fine architecture, featuring a well-executed and detailed design and high degree of integrity. After nearly 80 years the interior finishes and treatment are consistent with the style of the house and much of the interior remains intact. It is also one of a few Tudor Revival style dwellings constructed of stone in the City.

Designation of this site as a local historic landmark makes the property owner eligible for a 50% reduction in property taxes. Currently the tax appraisal for the structure is $1,470, 800 and the entire 5.77 acre tract of land is appraised at $577,000. The approximate tax deferral is $4,684.

The ordinance designates the Bynum House a local historic landmark. The property included in the designation consists of the Bynum House and 1.17 acres. The designation includes, the exterior of the house, some interior details and landscape features. When a property is designated historic, restrictions are placed on the property, and any modification to the land or structure must receive a Certificate of Appropriateness from the Historic Resources Commission of Asheville and Buncombe County. All improvements must follow the Secretary of the Interior's Standards for Rehabilitation and Illustrated Guidelines for Rehabilitating Historic Buildings.

It is important that properties of local significance are preserved and protected for cultural, historic, and economic reasons and for the benefit of future generations.

The Historic Resources Commission of Asheville and Buncombe County (HRC) by unanimous vote recommends to the Asheville City Council that the Bynum House be designated a local historic landmark. Staff concurs with the recommendation of the HRC for this designation.

Upon inquiry of Councilman Dunn, Ms. Merten explained how someone could get his or her property designated as a local historic landmark.

Mayor Worley closed the public hearing at 5:29 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 2980. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 172

B. PUBLIC HEARING TO CONSIDER AN ORDINANCE DESIGNATING THE GROVE PARK COUNTRY CLUB CLUBHOUSE AS A LOCAL HISTORIC LANDMARK

ORDINANCE NO. 2981 - ORDINANCE TO DESIGNATE THE GROVE PARK COUNTRY CLUB CLUBHOUSE, LOCATED ON COUNTRY CLUB ROAD ON THE GROUNDS OF THE GROVE PARK GOLF COURSE, AS A LOCAL HISTORIC LANDMARK

Mayor Worley opened the public hearing at 5:30 p.m.

Interim Historic Resources Director Stacy Merten said that this is the consideration of an ordinance to designate the Grove Park Country Club Clubhouse located on Country Club Road on the grounds of the Grove Park Golf Course, as a local historic landmark. This public hearing was advertised on November 15 and 22, 2002.

The Grove Park Country Club clubhouse is located on Country Club Road, .3 miles north of its intersection with Kimberly Avenue, on the grounds of the Grove Park Golf Course. The proposed designation encompasses 2.56 acres of the golf course parcel. The clubhouse is located on the north side of the golf course, overlooking the 18th green, and just southwest of the Grove Park Inn. The rolling terrain of the eighteen-hole golf course, with its manicured landscape, provides a fitting setting for the clubhouse.

The Grove Park Country Club Clubhouse is significant in the areas of social history, entertainment and recreation, and architecture. The structure was originally built for the Asheville Country Club and is a fine example of the work of New York architect, Harrie T. Lindeberg, one of the foremost architects of the Country House movement. The rambling Grove Park Clubhouse embodies the ideas of the country house on a slightly larger scale and the golf course serves as the landscaped park.

The organizational framework for country clubs, as they spread throughout the United States were based on the gentleman's city clubs of New England. Eventually there was a movement towards a suburban or county club in the 1870's. The typical country club offered its members sporting grounds for hunting, golf and tennis in a pleasant setting and as an exclusive retreat for the wealthiest members of society.

Though the Grove Park Country Club clubhouse was constructed in 1925, the origins of the Asheville Country Club, who erected the building, date back to 1894 with the organization of the Swannanoa Country Club. As an interest in golfing began to increase, the Club's original course in West Asheville was considered inconvenient, thus a new course was established in north Asheville. The new course also proved unsatisfactory, and in 1898 the Club leased 5 acres of land at the end of Charlotte Street from George W. Pack, for the construction of a new clubhouse. The original clubhouse was moved in 1908 to Edgemont Ave. About this time the golf course was expanded and the name of the Club was changed to the Asheville Country Club. The earlier clubhouse was also replaced with a new structure near the 12th tee of the present course. This clubhouse burned in the early 1920's, thus the present structure was commissioned for construction.

The Grove Park Inn maintained an interest in the golf course and financial health of the Club, contributing to the Club for the use of its facilities. The existence of the Club and golf course were important to the successful operation of the Inn. In 1976 the Grove Park Inn purchased the 100-acre golf course, clubhouse and pro-shop from the County Club of Asheville.

Designation of this site as a local historic landmark makes the property owner eligible for a 50% reduction in property taxes. The appraised value of the clubhouse is $4,053,200, which excludes the value of the land, golf course improvements and other detached structures. The approximate tax deferral is $11,957.

When a property is designated historic, restrictions are placed on the property. Any modification to the land or structure must receive a Certificate of Appropriateness from the Historic Resources Commission of Asheville and Buncombe County. All improvements must follow the Secretary of the Interior's Standards for Rehabilitation and Illustrated Guidelines for Rehabilitating Historic Buildings.

The ordinance designates the Grove Park Country Club Clubhouse a local historic landmark. It is important that properties of local significance are preserved and protected for cultural, historic, and economic reasons and for the benefit of future generations.

The Historic Resources Commission of Asheville and Buncombe County (HRC) by unanimous vote recommends to the Asheville City Council that the Grove Park Country Club Clubhouse be designated a local historic landmark. Staff concurs with the recommendation of the HRC for this designation.

Upon inquiry of Councilman Mumpower, Ms. Merten explained that this has a social history associated with Asheville, which makes it primarily significant.

Mr. Christopher spoke about the many needs in Asheville and didn't think Asheville could afford to take it off the tax rolls.

Mr. David Holcombe, Interim Director of the Preservation Society, spoke about the future benefits of designating the Clubhouse as a local historic district.

Mayor Worley closed the public hearing at 5:42 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Bellamy moved for the adoption of Ordinance No. 2981. This motion was seconded by Councilman Ellis.

Planning and Development Director Scott Shuford responded to Councilman Mumpower who did not think that all citizens should subsidize the loss of the property taxes.

Councilman Dunn did have concerns about taking the property off the tax rolls; however, he did feel that it would benefit the citizens of Asheville in the future.

The motion made by Vice-Mayor Bellamy and seconded by Councilman Ellis carried on a 5-1 vote with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 20 – PAGE 176

C. PUBLIC HERAING TO CONSIDER A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 25 RALEIGH ROAD TO ALLOW FOR THE CONSTRUCTION OF A RESIDENTIAL TRIPLEX IN A RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 2982 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 25 RALEIGH ROAD TO ALLOW FOR THE CONSTRUCTION OF A RESIDENTIAL TRIPLEX IN A RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:50 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Mr. Carter Pettibone, Urban Planner, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Pettibone said that this is the consideration of a conditional use permit to allow for the construction of a residential triplex in a RS-8 Residential Single-Family High Density District at 25 Raleigh Road.

On August 30, 2002, the applicant, Henry Mitchell, submitted an application for a conditional use to construct a triplex in an RS-8 District (PIN No. 9657.12-76-6565) on a 0.37-acre piece of property at 25 Raleigh Road (City Exhibit 3 – Location Map). The proposed project consists of a 2,612 square foot, 3-unit residential building with two dwelling units located on the ground floor and one unit above. The Technical Review Committee (TRC) reviewed the plans at its September 16, 2002, and recommended approval with conditions. The applicant has worked with City staff to address these conditions.

Residential triplexes are permitted as conditional uses in the RS-8 District. Conditional uses are uses, which because of their unique characteristics or potential impacts on the surrounding neighborhood and/or city as a whole require individual consideration of their location, design, configuration, and/or operation at the location proposed.

The parcel is located within the City limits at the intersection of Raleigh Road and Onteora Boulevard just north of Interstate 40. The predominant land use and zoning in the area are single-family homes on properties zoned RS-8.

Triplexes in single-family districts must be located a minimum of 300 feet from all other multi-family uses on the same side of the street. There are no multi-family uses located within 300 feet of the property in question along either Raleigh Road or Onteora Boulevard.

The Unified Development Ordinance (UDO) requires that the minimum lot area shall be 150 percent of that required for a single-family residential unit in the respective district. The parcel's 0.37 acre is nearly 300% of the RS-8's minimum lot size (1/8 of an acre).

The UDO requires parking be located in the rear and screened with vegetation from adjacent uses. Parking for the triplex will be in the rear of the lot and screened by a combination of existing and proposed trees and shrubs.

Triplexes are required to have a single front entrance and other entrances as required. Only one entrance is proposed on the building front facing Onteora Boulevard, which will become the front of the lot. Other entrances to the dwelling units are located on the other elevations.

The UDO requires that triplexes must meet the requirements of the North Carolina Building Code. The project has received conditional approval from the Building Safety Department and will need to fully comply with these requirements at the time of building permit application.

In addition to the development standards for the zoning district in which they are located, conditional uses must meet certain general conditions in order to ensure that the use is appropriate at a particular location and to ensure protection of the public health, safety, and welfare. The general conditions, which apply to all conditional uses, can be found in Section 7-16-2 (c) of the UDP. City Council must make seven (7) findings based on the evidence and testimony received at the public hearing or otherwise appearing in the record of the case. The findings are listed below. Following each finding is technical information from staff to assist Council in making these findings. The Asheville City Council shall not approve the conditional use application and site plan unless and until it makes the following findings, based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case:

1. That the proposed use or development of the land will not materially endanger the public health or safety.

   The project received conditional technical approval from the Water Resources Department, the Fire Department, Metropolitan Sewerage District (MSD), Engineering, and other City Departments. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   The project must comply with all City standards in regards to maximum clearing and grading and erosion control. The site is also very level, which reduces the need to perform much clearing or grading. The location of the proposed building is in the center of the parcel in an area where a previous structure once stood and the site plan calls for a significant number of existing trees to be preserved and used to satisfy planting and buffering requirements. These factors help minimize the impact on the natural features of the site.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

   The UDO requirements and the physical design of the structure help to assure that the building fits within the single-family neighborhood surrounding it. Staff has also determined that the additional traffic generated will not adversely impact the existing road conditions or capacity.

4. That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

   Within the surrounding neighborhood there is a range of different building footprint sizes. The footprint of the proposed building falls within this range. The proposed building is two stories in height as are some of the homes in the area, including the neighboring home to the north. The building also contains only one entrance on its front elevation, as required by the UDO and parking for the building is also located to the rear and will be screened by a mix of trees, shrubs, and fencing. These components help mask the multi-family nature of the structure. The actual density of the 0.37-acre parcel with 3 units on it translates to just over 8 dwelling units an acre, similar to what is permitted within the district.

5. That the proposed use or development of the land will generally conform with the Comprehensive Plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

   The proposed development will comply with all applicable UDO and Standards and Specifications requirements, as well as any of the City's other plans and policies. The project will also help meet one of the City's smart growth policies, providing higher density residential infill development. The City's Comprehensive Plan indicates this area as planned for residential development and the proposed density of the project is similar to what is currently permitted in the district.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

   The project received technical approval from the Technical Review Committee, which includes representatives of the Water Resources Department, MSD, Engineering Department, the Fire Department, and Public Works Department.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

   The project was reviewed by the Engineering Department during the TRC process and it was determined that the existing roadway conditions and capacity were sufficient to handle any sort of increase generated by the proposed use.

The plan for the expansion was reviewed by the TRC at it's September 16, 2002, meeting. The TRC identified a number of unresolved technical issues and recommended approval with the condition that these issues be addressed prior to final approval. The applicant has addressed a majority of these conditions and is working with the various City departments to address those outstanding.

Since all the conditions have not been addressed at this time, staff recommends approval with the following conditions:

- The applicant works with Planning and Development staff to determine appropriate entrance features for access points to the building that will help the building further blend in with surrounding buildings;
- The proposed building is constructed according to the North Carolina Building Code for Commercial Structures; and
- The applicant obtains all applicable permits for water, sewer, driveway, stormwater, and erosion control provisions.

Mr. Henry Mitchell, applicant, spoke in support of the conditional use permit.

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 6:02 p.m.

Councilman Ellis moved to adopt Ordinance No. 2982 to issue the conditional use permit for a triplex on property located at 25 Raleigh Road, subject to the following conditions: (1) The applicant works with Planning and Development staff to determine appropriate entrance features for access points to the building that will help the building further blend in with surrounding buildings; (2) The proposed building is constructed according to the North Carolina Building Code for Commercial Structures; and (3) The applicant obtains all applicable permits for water, sewer, driveway, stormwater, and erosion control provisions. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

It was the consensus of City Council to ask the Planning staff to begin the process of amending the Unified Development Ordinance to not require duplexes and triplexes obtain a conditional use permit.

ORDINANCE BOOK NO. 20 – PAGE 180

D. PUBLIC HEARING TO REZONE PROPERTY TWO PARCELS KNOWN AS BILTMORE PARK TOWN SQUARE EAST FROM RS-8 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO URBAN VILLAGE DISTRICT AND TO CONSIDER AN AMENDMENT TO THE BILTMORE PARK TOWN SQUARE MASTER PLAN

ORDINANCE NO. 2983- ORDINANCE TO REZONE TWO PARCELS KNOWN AS BILTMORE PARK TOWN SQUARE EAST FROM RS-8 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO URBAN VILLAGE DISTRICT

Mayor Worley opened the public hearing at 6:03 p.m.

Urban Designer Alan Glines said that this is the consideration of a request to rezone two parcels known as Biltmore Park Town Square East from RS-8 Residential Single-Family Medium Density District to Urban Village District and to consider an amendment to the Biltmore Park Town Square Master Plan. This public hearing was advertised on November 15 and 22, 2002.

On September 30, 2002, Biltmore Farms submitted a request to rezone two parcels from RS-8 to Urban Village in the City's extraterritorial jurisdiction area in the southern part of the City. In conjunction with this, an amendment is required for the Biltmore Park Town Square Urban Village Master Plan.

The rezoning consists of 2 parcels (PIN Nos. 9645.03-21-8311 and 9645.03-31-1212) totaling 11.68 acres. The property is currently zoned RS-8. Thirty single-family homes are proposed for this area of the urban village. In addition, three other areas are being further defined as a part of the Master Plan and will include 4 additional single-family homes and 10 live-work units in a duplex format (twin style housing). These latter areas are already zoned urban village district.

The area surrounding this parcel is zoned RS-4, RS-8 and Urban Village. The rezoning proposal area and the Master Plan amendment will be added to an already approved urban village containing 290 residential units, 350,000 gross square feet of commercial space, 200,000 square feet of office space and 150,000 square feet of other non-defined space.

The site, which is currently wooded, will include several acres of open space counting towards the open space requirements for the entire urban village project. The open space area will be made up of a park near the new housing area and will include a greenway connection that will buffer the existing residential areas in the 'Olmstead' sections of Biltmore Park

The Urban Village zoning is established to create mixed-use higher density development that is economically vital and pedestrian oriented. Urban Village guidelines encourage vibrant streetscapes and a full range of retail and office uses as well as a variety of housing types throughout the development area.

The Planning and Zoning Commission met on November 6, 2002, and voted 6-0 in favor of the rezoning request. Staff also supports the rezoning request and amendments to the project Master Plan.

Councilman Dunn asked about the status of the N.C. Dept. of Transportation widening of Long Shoals Road. Mayor Worley responded that they are in the process of seeking property now.

Mayor Worley closed the public hearing at 6:11 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 2983 and to approve the amendment to the Biltmore Park Town Square Master Plan. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 20 – PAGE 185

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

VI. OTHER BUSINESS:

Henderson County Water Re-negotiations

Mayor Worley updated City Council by stating that the Henderson County Commissioners will defer the water agreement re-negotiations matter to the new Commission members, which will take office in December, 2002.

Violence on Women Worksession

At the request of Councilwoman Jones, it was the consensus of Council that a worksession be held in January, 2003, regarding violence on women. She asked for a presentation by the Police Department on what their statistics are with regard to this issue, e.g., sexual assault, domestic violence, and calls to convictions.

Claims

The following claims were received by the City of Asheville during the period of November 8-21, 2002: Scott Sirkin (Water), Ann Lowder (Water), Barbara Penland (Sanitation), Julio C. Lopez (Water), Robert Carr – Tops for Shoes (Water), 21 Haywood Street (Water), Asiana Grill Buffet (Water), Stanley Gamble (Transit Services), Malvern Hills Baptist Church (Sanitation), Robert L. Harbin (Water) and Michael Fisher (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Mickey Mahaffey, representing Peacemakers, spoke about the recently adopted amended solicitation ordinance. He said that we desperately need adequate public restrooms downtown. He felt that the City should begin discussions with Buncombe County and social service agencies on some form of facility to take severely alcoholic people. In addition, he felt that police officers should, on a regular and consistent basis, have a presence in the 3-5 "hot spots" where most of the problems are occurring.

Mr. Christopher asked Council to stop the dehumanization of the poor and treat them like our neighbors.

Mr. Stewart David felt that the amended solicitation ordinance will be found unconstitutional and when the next ordinance is drafted, he hoped that Council allows community involvement.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 6:26 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – December 3, 2002 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Councilman R. Carl Mumpower

ANNUAL AUDIT REPORT

Finance Director Bill Schaefer said that this is the presentation of the City of Asheville annual audit report for the Fiscal Year Ended June 30, 2002.

City Council retained an independent audit firm, Crisp Hughes Evans LLP of Asheville, N.C., to perform an audit of the City of Asheville for the fiscal year ended June 30, 2002, as required by North Carolina General Statute 159-34. The auditors gave the City an unqualified audit opinion. (The term "unqualified" means that the auditors' opinion that the financial statements present fairly the financial position of the City is not modified by reservations or restrictions.)

Mr. Brian Broom, Director of Crisp, Hughes Evans LLP, gave a brief presentation of their findings. He said their report for the 2002 audit expresses and unqualified opinion (clean) on the fair representation of the general purpose financial statements in all material respects, in conformity with generally accepted accounting principles. The Local Government Commission recommends governmental entities maintain, at a minimum fund balance equal to 8% of expenditures. The City's fund balance for 2002 is about 16%.

Mr. Broom updated Council on the Governmental Accounting Standards Board's new reporting standard.

Mr. Schaefer answered various questions from Council regarding the financial report.

At the request of Councilwoman Jones, Mr. Schaefer said that he would provide her with monthly budget statements and talk with her regarding corporations of the City.

Councilman Dunn found it troublesome that there has only been an increase of $430,000 for streets and sidewalks in the past ten years.

BATTERY PARK PARKING GARAGE

City Engineer Cathy Ball said that the purpose of this presentation is to provide an overview to City Council on the status of the Parking Garage in the Battery Park area.

In 1998, the City of Asheville completed a Parking Study of the Central Business District, Biltmore Village and West Asheville areas. The study indicated that a parking garage was needed in the Battery Park area in order to meet the current, as well as future needs of the area. The original recommended location of the garage was on the existing BellSouth surface parking lot at the intersection of O.Henry Avenue and Haywood Street. It was determined early on that we were unable to acquire this property for various reasons. The second location was adjacent to the Battery Park Apartments. Over the past two and one-half years we have been in the process of acquiring the properties necessary to complete the parking deck.

This project is considered to be a public-private partnership both with parking and development opportunities.

During recent weeks we have received letters of intent or contracts for each of the properties needed to complete the project. The purpose of this presentation is to provide Council with the following information:

- General overview of the project;
- Schedule for completing the project; and,
- Overview of additional action needed by City Council to move forward on the project.

Money for this project was budgeted in the 1999-2000 Capital Projects Budget.

Ms. Ball then outlined the history of the parking study which study was completed in 1998. In 1999 the City contracted with Tessier Associates to purchase property needed for the garage and in 2000 the City contracted with Carl Walker to design the garage. The parking study recommended the parking garage be located on the parking lot adjacent to Battery Park Apartments. The original and current scope of the project is to construct a parking garage to meet the current and future needs of the area. After further review of the proposed site, it was determined that the site may have potential for some private development components to include parking spaces and that the project is a public/private venture.

Next steps include: (1) solicit public comment on the project by holding various public meetings - following public comment, City Council will be asked to approve final design concept; (2) complete the design of the project – requires Council to amend contract with Carl Walker to include expanded scope of work and some additional contracts for soil testing, etc.; (3) develop a Request for Proposals for private sector development component; (4) develop agreements with private sector partners for use of the parking garage – Council action will be needed; (5) close on properties – Council action will be needed; (6) complete final design of the parking deck; (7) contract with private sector for private components of the project – Council action will be needed; (8) bid project; (9) issue Certificates of Participation – Council action will be needed; (10) – award contract – Council action needed; (11) begin construction of parking garage and adjacent infrastructure; (12) complete construction of parking garage; (13) private sector to begin construction of private development component; and (14) private sector to complete construction.

Ms. Ball said that their goal is to begin construction in early fall of 2003 with an 18 month construction period.

Upon inquiry of Vice-Mayor Bellamy and Councilwoman Jones, Ms. Ball said that the City will look favorably to components of affordable housing and affordable housing will be strongly encouraged.

Ms. Ball then answered various questions from Council regarding the proposed parking garage.

Upon inquiry of Councilman Peterson, Ms. Ball said that when the matter comes back to Council, she would bring information showing usage of parking spaces based on the time of day.

It was the consensus of City Council to have staff proceed in soliciting public comment on the project. Following public comment, City Council will be asked to approve the final design concept.

INFORMAL UPDATE ON CIVIC CENTER

Ms. Lilian Fischer and Mr. Crawford Murphy showed City Council sketches of the Civic Center improvements and the Civic Center Arena renovation and upfit. They submitted revised numbers, which consisted of the Civic Center improvements being done in two phases - Phase 1 totaling $41,125,000 and Phase II totaling $38,600,000. They were not interested in participating in the improvements at the Civic Center, only showing Council the possibility of upgrading the facility for $41 million.

They then showed Council sketches of the Birdseye view toward the northeast performing arts center vision and development scheme and the interior study of the performing arts house. They presented Council with the following numbers for the proposed performing arts center. The facility itself totaled $27,000,000 (non-profit) and the development totaled $41,100,000 (for-profit) for a grand total of $68,100,000.

Ms. Fischer introduced Mr. Pittman, Vice-President of Skanska, who would perform the role of general contractor. Mr. Pittman said they are very pleased about working with Mr. Murphy and this exciting concept.

Ms. Fisher said that they would be meeting in the next two days with a group who will be advising them on the feasibility of raising the $27,000,000 locally from foundations, individuals, organizations, etc.

Mr. Murphy stated that the City's portion of the project would be the parking and infrastructure.

Ms. Fischer summarized by saying that they will be going to the private sector and they would like to have Council's concurrence that this is a viable option and would like to be encouraged to move forward.

MISCELLANEOUS

Discussion was initiated by Councilman Peterson regarding the Asheville-Buncombe Community Christian's Ministries' soup kitchen being in violation of the Unified Development Ordinance. Councilman Peterson said that he would bring the matter up again at the formal meeting next week in order to instruct the Planning staff to begin investigating a minor amendment to the Unified Development Ordinance for flexibility in allowing soup kitchens in specific districts. He said that the Planning & Development Director may also be able to give Council some options for achieving this goal.

CLOSED SESSION

At 4:50 p.m., Councilman Peterson moved to go into closed session in order to consult with an attorney employed by the City in order to preserve the attorney-client privilege between the City and its attorney. The parties to the lawsuit about which the Council expects to receive advice are: Carl and Janis Ricker, Asheville Board of Adjustment, Betty Donoho, County of Buncombe, and WNC Regional Air Pollution Control Agency. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

At 5:23 p.m., Councilman Ellis moved to come out of closed session. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 5:23 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – December 10, 2002 - 5:00 p.m.

Regular Meeting

Present:	Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson
Absent:	None

INVOCATION

Councilman Dunn gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF BUTCH KISIAH IN RECEIVING THE DISTINGUISHED SOCIETY FELLOW AWARD FROM THE NORTH CAROLINA RECREATION AND PARK SOCIETY

Mr. Tom Wells, former Deputy Director of the North Carolina Recreation and Park Society, and Chair of the Citations and Awards Committee, presented Mr. Butch Kisiah with the Society Fellow Award. The Fellow Award is the highest award the Society can bestow to one of its members for outstanding service and leadership.

On behalf of City Council, Mayor Worley congratulated Mr. Kisiah on receiving this very prestigious award.

B. PROCLAMATION PROCLAIMING DECEMBER 15, 2002, AS "BILL OF RIGHTS DAY"

Mayor Worley read the proclamation proclaiming December 15, 2002, as "Bill of Rights Day" in the City of Asheville.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON NOVEMBER 26, 2002, AND THE WORKSESSION HELD ON DECEMBER 3, 2002

B. RESOLUTION NO. 02-186 - RESOLUTION ADOPTING THE 2003 SCHEDULED CITY COUNCIL MEETINGS

RESOLUTION BOOK NO. 27 – PAGE 285

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution on the Consent Agenda and it would not be read.

Councilman Ellis moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Mumpower and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER REZONING PROPERTIES IDENTIFIED ON THE BROADWAY CORRIDOR

Mayor Worley announced that the public hearing to consider rezoning properties identified on the Broadway Corridor would be rescheduled until January 14, 2003, due to failure of properly posting the properties.

B. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 26 FENNER AVENUE TO ALLOW THE CONSTRUCTION OF A DUPLEX IN AN RS-8 RESIDENTIAL SINGLE FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 2984 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 26 FENNER AVENUE TO ALLOW THE CONSTRUCTION OF A DUPLEX IN AN RS-8 RESIDENTIAL SINGLE FAMILY HIGH DENSITY DISTRICT

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:17 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Mr. Alan Glines, Urban Designer, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Glines said that this is the consideration of a conditional use permit for property located at 26 Fenner Avenue to allow for the construction of a duplex in an RS-8 Residential Single-Family High Density District.

On October 23, 2002, Bruce MacPhail of Hamilton-Cameron, LLC., submitted an application for a conditional use permit to allow a duplex conversion of an existing house in a single family zoning district in the north area of the City

The property is located at 26 Fenner Avenue (PIN No. 9640.18-30-5137) (City Exhibit 3 – Location Map). The property has an existing circa 1920 home that has been converted for use as a duplex (City Exhibit 3 – Site Plan and Photographs). This property and the surrounding area is zoned RS-8. The RS-8 single family residential district allows up to 8 single family units an acre.

As part of the conditional use permit requirements, the project must meet several conditions for duplexes found in section 7-16-2 (d) (5) of the Unified Development Ordinance (UDO):

- Duplexes must be located a minimum of 300 feet from all other multifamily uses (excluding dwellings with accessory apartments) on the same street in the single family district. **The property is located over 300 feet from other duplexes on the same street.**
- Minimum lot area shall be 125 percent of that required for a single family residential unit in the respective district. **The parcel is .26 acre and is well above the parcel requirement.**
- Parking shall be located in the rear and screened with vegetation from adjacent single-family uses. **The existing house has two driveway points and parking is located in front of the house. Parking will be required to be located at the rear of the structure.**
- The structure shall have a single front entrance and other entrances as required. **The parcel has a single front entrance and a secondary entrance at the side.**
- Requirements of the N.C. State Building Code shall be met. **The project has met building code requirements.**

City Council must take formal action as set forth in section 7-9-9 (c) (4) of the UDO and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2 (c)). Staff's preliminary review, absent the benefit of public input, indicates that all seven standards are met provided certain impacts are mitigated through site design modifications and off site road improvements.

1) That the proposed use or development of the land will not materially endanger the public health or safety.

The proposal was reviewed by the Technical Review Committee for compliance with technical standards of the City of Asheville.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

The site has an existing house that will be used as a duplex. The proposed use is compatible with the site and surrounding neighborhood.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

The duplex will blend into the neighborhood fabric. Values of neighboring properties are not expected to be injured.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

The proposed duplex is an existing building built around 1920. The house is in keeping with the character of the neighborhood.

5) That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

This proposed development supports the smart growth policies of affordable in-fill housing and a mix of housing types within a given neighborhood.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

The proposed duplex is located in an established neighborhood just off of Merrimon Avenue. The property has adequate infrastructure in place.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The proposed duplex will not generate traffic problems.

The Technical Review Committee reviewed this project at their November 18, 2002, meeting and recommended that the project be forwarded to the City Council with a recommendation of approval with conditions, all of which have been met except for the parking location. Review by the Planning and Zoning Commission is not required for this use.

Mr. Bruce MacPhail, petitioner, said that if they had to put a driveway in the back of the property, it will cause more damage to the fabric of the neighborhood since the surrounding neighborhood has parking located in the front. The property has been a duplex before and he feels that there is adequate parking located on the property now, without having to relocate it in the rear of the lot. In addition, the parking slab (which would have to be extended to the back of the property) is very narrow and there is a steep grade to the back of the property, which will cause water run-off to the adjacent lot. He will lose the entire backyard and to build the parking at the rear will be a tremendous cost, thus driving the cost of the affordable apartments ($500 and $600) higher.

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 5:34 p.m.

Discussion surrounding the parking in the rear of the property with Council realizing that a UDO text amendment would be the only way they could allow parking to be located elsewhere than in the rear of the property.

Mayor Worley said that the Planning staff has already been instructed to look at amending the UDO regarding duplexes and triplexes in residential districts and this is a good opportunity to look at a possible amendment to this standard as well.

Vice-Mayor Bellamy moved to adopt Ordinance No. 2984 to issue the conditional use permit for a duplex on property located at 26 Fenner Avenue. This motion was seconded by Councilman Dunn.

Planning & Development Director Scott Shuford generalized his comments (as he was not sworn in) by suggesting to Council that they could approve the conditional use permit subject to the parking being brought into compliance within 120 days. He explained that his department will be bringing back to Council an amendment to the UDO regarding duplexes and triplexes in residential districts within that 120 time period and Council then can then choose to amend the specific requirement regarding parking, thus relieving the applicant from that requirement.

Vice-Mayor Bellamy wished to amend her motion to issues the conditional use permit subject to the parking being brought into compliance within 120 days. Councilman Dunn did not agree with the amendment and withdrew his second. The amended motion by Vice-Mayor Bellamy was seconded by Councilman Mumpower.

Councilwoman Jones wanted to be sure that the Planning staff would not be crafting the ordinance amendment for one specific instance. Mr. Shuford agreed that they would be looking at the amendment from a reasonable standpoint.

The amended motion made by Vice-Mayor Bellamy and seconded by Councilman Mumpower carried on a 6-1 vote, with Councilman Dunn voting "no."

ORDINANCE BOOK NO. 20 – PAGE 187

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

Unified Development Ordinance Text Amendment

As a result of discussion at the December 3, 2002, City Council worksession regarding the Asheville-Buncombe Community Christian's Ministries' (ABCCM) soup kitchen being in violation of the Unified Development Ordinance (UDO) and pursuant to Section 7-2-2 of the Code of Ordinances, Councilman Peterson moved to direct the Planning & Development staff to begin as soon as possible the process for a text amendment to Chapter 7 of the Code of Ordinances to allow greater flexibility in locating social service establishments that dispense dietary essentials to the needy in office/commercial districts. This motion was seconded by Vice-Mayor Bellamy.

Upon inquiry of Vice-Mayor Bellamy and Councilwoman Jones, Councilman Peterson explained this proposed amendment is not identifying a particular district, but identifying generic office/commercial districts and it's not just for this particular case, but also for similar circumstances throughout the City.

Councilman Peterson explained that there isn't anything listed in the UDO called soup kitchens. Staff assumes that a soup kitchen is an accessory use to a shelter, so they are only permitted where shelters are permitted, which is now in the Central Business District, Highway Business District, etc. He suggested we ask staff to get public comment and maybe have soup kitchens clarified or maybe clarify that it's not an accessory use. In the Office and Office II districts a permitted use includes civic, social service and fraternal facilities, so those are already permitted in pretty much all of the office/commercial districts and also restaurants are permitted as a use by right subject to special requirements. He felt we need to add a little flexibility to allow soup kitchens probably not as a blanket permit, but as a use by right subject to special requirements so there would be certain conditions that might have to be met, like kitchen facilities, or a certain size of the property, or parking. Staff should probably get public input about what some of those special requirements should be and meet with neighborhood leaders in various neighborhoods in the City.

Councilman Mumpower felt it might be more appropriate to informally explore the issues surrounding this matter and then make a determination on how Council should proceed.

City Manager Westbrook said that Council could instruct staff to investigate the issue further and bring back a report on what they feel is the best course of action.

Mayor Worley said that he felt all of Council was sympathetic with ABCCM and the mission that they serve. He felt that soup kitchens essentially prepare and serve food and should be on the same footing as restaurants, which are allowed, if they meet certain requirements, in several of the office business districts. He was not inclined to amend our ordinance for a special case for the situation that has arisen. He expected everyone to do their best to comply with our ordinances and meet the requirements of the ordinances. If we make such a change, we are making a change that would affect all similarly situated districts and we have the ordinance as it is for a reason.

Planning & Development Director Scott Shuford handed Council a memo dated December 10, 2002, which updated them on the current status of their investigation into the ABCCM soup kitchen. The following is his interpretation on how such a use (soup kitchen) should be permitted: Soup kitchens are ancillary uses associated with "shelters" as defined in the UDO. The UDO defines "shelter" as "a nonprofit, charitable, or religious organization providing boarding and/or lodging and ancillary services on its premises to primarily indigent, needy, homeless, or transient persons. He understood Councilman Peterson's motion to direct staff to do some basic research on that issue and expand that research broader than the case at hand, seek public input, develop an ordinance and take that ordinance through the public hearing process.

Councilman Dunn and Councilmen Ellis both would prefer more staff research on this matter before they would be prepared to vote on this motion.

Mr. Shuford said that this is an issue fairly complicated and it needs a more complex study of it. It is an issue that has some potential side effects that need to be addressed. There are ways to do that and we will bring those ideas forward for Council's consideration and then get further direction.

The following individuals spoke in support of an amendment to the UDO to allow the flexibility to allow soup kitchens in special districts:

Brother Christopher
Ms. Rachel Pope
Rev. Scott Rogers
Ms. Sharon Martin

In response to Councilwoman Jones, Rev. Rogers said that they have been operating the ABCCM soup kitchen at 24 Cumberland since October 11, 1985. Their primary mission is to give food to people.

The motion made by Councilman Peterson and seconded by Vice-Mayor Bellamy failed on a 3-4 vote, with Vice-Mayor Bellamy, Councilwoman Jones and Councilman Peterson voting "yes" and Mayor Worley, Councilman Dunn, Councilman Ellis and Councilman Mumpower voting "no."

It was the consensus of City Council to instruct the Planning staff to gather more information about the existing situation and in light of that, and in light of the overall needs of the City, to come back to Council with anything further that is recommended or needed in the way of a change. Said report should come back to Council at its January 21, 2003, worksession.

City Attorney Oast noted that just because Councilman Peterson's motion failed does not preclude Council from ultimately adopting the same language at a later date if appropriate.

VI. OTHER BUSINESS:

Mutual Aid Assistance

City Manager Westbrook advised City Council that, through the mutual aid assistance agreement, the Town of Hillsborough has requested, and the City of Asheville has sent, a

252

kunkleboom truck and one operator from the City of Asheville to assist them in the cleaning up the effects of the December 5, 2002, ice storm.

Claims

The following claims were received by the City of Asheville during the period of November 22 – December 5, 2002: Ray Imhoff Ent. (Water), BellSouth (Water), Max Haner (Sanitation), Nancy Alenier (Water), N. C. Dept. of Transportation (Police) and Zambra (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Cecil Bothwell thanked the Mayor and Council for proclaiming December 15, 2002, as "Bill of Rights Day" in the City of Asheville.

Mr. Cliff Turner, owner of the Exxon Station by the Biltmore House, asked for Council's assistance in getting on the City's wrecker rotation list.

Brother Christopher urged Council not to discriminate against the poor.

Mr. Rachel Pope felt the poor should be respected too and was interested in the Downtown Social Issues Task Force.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 6:56 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – December 17, 2002 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

MINORITY BUSINESS PROGRAM ANNUAL REPORT

Ms. Brenda Mills, Director of the Office of Minority Affairs, presented Council with the Minority Business Program Annual Report for Fiscal Year 2001 - 2002.

In May of 1998, City Council adopted the Asheville-Buncombe Minority Business Plan. The Plan was subsequently amended in November 1998, December 1999, December 2001 and October 2002, to clarify provisions of the Plan and to reduce the Minority Business Commission from thirteen members to eleven.

The Plan requires the Office of Minority Affairs to present to the City Council and County Commissioners an Annual Report on the effectiveness of implementation of the Plan. The Report shall include, but not be limited to: the number of minority businesses; percentage of minority businesses contracting with the County and City either as a prime contractor or as a subcontractor; percentage of overall reported contracts awarded to minority businesses; percentage of contractors complying with good faith efforts; and percentage of goals achieved and goals waived.

The Annual Report for Fiscal Year 2001 – 2002 has been reviewed by the Minority Business Commission and approved at its meeting on November 14, 2002.

Ms. Mills responded to various questions and comments from members of Council.

On behalf of City Council, Mayor Worley thanked Ms. Mills, her staff and the entire Minority Business Commission for their hard work on this important Commission.

RESOLUTION NO. 02-187 - RESOLUTION AUTHORIZING THE CITY TO PURSUE CREATION OF A CORPORATION FOR THE ADMINISTRATION OF ITS SELF-FUNDED HEALTH CARE BENEFIT PROGRAM

Mr. John Miall, Director of Risk Management, said that this is the consideration of a resolution authorizing the creation of a corporation for administration of group health plans.

Creation of a corporation will allow a buffer between the City of Asheville and group claims administration; allow for the recovery of portion of commissions paid by the City for aggregate and specific stop-loss coverage annually; and will allow a mechanism by which other entities may, if they choose, access medical care in the region through fee schedules negotiated by the corporation.

Approval shall be obtained from the State Insurance Commissioner's Office prior to initiation of operations.

Approval of this resolution will result in no expense to the City other than the legal costs of chartering a corporation and applicable fees for State filing, and licensure. Anticipated fees are budgeted in the current year health care budget.

Through the formation of this entity, the City will recapture some of its present health care costs on an annual basis. Other participating employers, if any, will be able to do the same with collective recoveries being retained by the corporation and used for the administration of claims and negotiation of future fees.

Further, the lack of competition among providers in the health care field in the community has resulted in an expensive and cumbersome process of messengering fee schedules to providers on an ongoing basis through provider owned PPO networks in the region. An employer-owned network, through the proposed corporation, will allow for quicker and more efficient establishment of fee schedules because the corporation created will not be provider-owned.

The City has enjoyed much success in the current environment with its health care system and the proposed corporation will allow other employers in the region to access fees through City negotiation with providers. The City will be in a leadership position to effect lower health care costs in the region and the corporation will be able to recover partial commissions for itself and ultimately for members participating through the corporation.

City staff recommends City Council adopt the resolution authorizing the creating of a corporation for administration of group health plans at its December 17, 2002, worksession.

Mr. Miall responded to various questions and comments from members of Council regarding Buncombe County's invitation to participate.

Vice-Mayor Bellamy moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilwoman Jones and carried unanimously.

Councilman Mumpower moved for the adoption of Resolution No. 02-187. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 286

WESTERN CAROLINIANS FOR CRIMINAL JUSTICE WOMEN AT RISK PROGRAM

Ms. Ellen Clarke, Executive Director of the Western Carolinians for Criminal Justice, and Ms. Brenda Carlton, Director of the Women at Risk Program, explained that the Women at Risk Program is a community-based treatment alternative for women at risk of going to jail or prison. They presented Council with a fact sheet of the Program and a list of services in the program. She reviewed with Council the weekly schedule for the Program and presented activity reports, referral sources, demographics data of clients served, their Fiscal Year 2001-02 operating budget and a cost analysis of the Program.

Ms. Clarke briefed Council on their capital campaign to purchase the building the program is located in at 218 Patton Avenue.

On behalf of City Council, Mayor Worley thanked Ms. Clark and Ms. Carleton for this very important program.

PUBLIC ART BOARD

Mr. Kenn Kotara, Chair of the Public Art Board, said that in September of 1999, the Public Art Board was established by Asheville City Council to oversee the education, maintenance, acquisition and deaccessioning of public art within the City of Asheville. The Public Art Board has worked tirelessly on the development of the Public Art Master Plan, which was approved August 28, 2001.

Mr. Kotara then updated City Council on the Public Art Board's accomplishments of the Board over the past year by saying that the W.C. Reid Mural project is a component of the Cultural Renaissance Program of the Parks & Recreation Department's Cultural Arts Division and is unique because it gave at-risk youth an opportunity to participate in a public art project of major significance. The Mural Project (1) showed at-risk youth they can be artistic and potentially become professional artists; (2) developed knowledge of and appreciation for art of the past and present and the interpretative impact it can have on the community; (3) taught youth about visual arts skills using math/graphing, tools and equipment, research and critiquing art work; (4) provided a strong sense of pride and self-esteem through the final display of their work; and (5) ultimately facilitated the increased understanding of the importance of public art and its place in preserving history in visual form.

Postcards from the Ledge is their annual fundraising project.

The first of three public arts projects in the West End/Clingman Avenue (WECAN) Art and Garden Project was a kinetic sculpture by artist Julia Burr and was installed in November of 2002. After installation, WECAN residents, friends, and business owners installed a garden of perennials enclosed by an evergreen hedge at the base of the sculpture. The garden, hedge and sculpture together emulate gardening traditions in the area and enhance the existing neighborhood sign. The two remaining projects, a signature neighborhood tile and sculptural bus shelter bench, will be installed this winter followed by an exhibit in spring of 2003.

The Public Art Board developed a task force with the Pack Square Conservancy Board and formed an agreement for preservation procedures, and incorporation and acquisition of public art works in the Pack Square Area.

The Public Art Board worked with the Mosaic Vortex and other artists to develop an arts program focusing on the creative work of "Underground Artist" in Asheville. And they have attended meetings of the Graffiti Board to dialogue about the challenges of graffiti in Asheville.

Mr. Kotara shared with Council future projects that the Board will be working on towards the implementation of the Master Plan.

On behalf of City Council, Mayor Worley thanked Mr. Kotara and the entire Public Art Board for their hard work and dedication to public art.

RESOLUTION NO. 02-188 - RESOLUTION ENTERING INTO A REGIONAL EARLY ACTION COMPACT FOR IMPROVING AIR QUALITY

Mr. Dan Baechtold, MPO Coordinator, said that this is the consideration of a resolution to enter into a regional Early Action Compact (EAC) for improving air quality.

The federal Clean Air Act sets standards for acceptable levels of air pollution in order to ensure public health. Monitoring stations throughout the region monitor the levels of pollutants in the air. Recent monitoring data in Buncombe County suggests that Buncombe will be in violation of the federal clean air standards for ozone pollution. Under the normal process, this means that the EPA will designate Buncombe County, and potentially surrounding counties, as a "non-attainment" area beginning in 2004.

A designation of "non-attainment" would mean that the area would be subject to additional restrictions for permitting new polluting industry and we would be required to prove that new transportation projects will conform with the State's plan to improve our air. The requirements placed on transportation planning are known as transportation "conformity." In addition, there may be a negative stigma associated with the non-attainment status, as it will put us on an official list of places with dirty air.

Local governments are considering an option that would delay or avoid "non-attainment" status. This option is known as an Early Action Compact (EAC). The EAC is a pro-active plan developed locally, with a goal of meeting clean air standards sooner than under non-attainment status. The EAC would be an agreement between local governments, the State, and EPA. This option requires a signed EAC agreement by December 31, 2002.

It remains somewhat unclear which local governments must sign by the December 31st deadline. At a minimum, any counties that would be a part of the non-attainment designation must sign the agreement. Since the extent of the non-attainment area is not known, all potential counties must sign; namely: Buncombe, Henderson, Madison, and Haywood. The EPA is also asking for the municipalities of Asheville and Hendersonville to sign the agreement, but it is not clear if the municipalities absolutely must sign by the December 31st deadline.

State and federal regulatory agencies are urging our area to enter into the EAC. The pros and cons of entering into the EAC are listed below:

Arguments for the EAC

- The EAC has the potential to improve air quality sooner than if we waited for non-attainment designation, which could mean cleaner air for citizens to breathe. The citizens most impacted by these pollutants are children and the elderly.
- Healthcare costs, emergency room visits, and lost productivity due to breathing problems carry a significant annual economic cost.
- The air quality improvements from the EAC could exceed the basic clean-air standards required by the EPA.
- Under non-attainment, we would have to prove that the entire transportation plan is in conformity with clean air standards, including the I-26 Connector project. Although delay of the connector project is not likely, it is possible under non-attainment.
- Provides some local control over air quality strategies, and puts forth a proactive approach to addressing the problem.
- The EAC keeps options open. Our region can always default to non-attainment designation.
- EAC avoids the stigma of being on the "dirty city" list with the related implications for tourism and business recruitment.
- Our region may be able to head off pollution problems associated with fine particulate matter. In the future, we may be designated as non-attainment for fine particle pollution.
- Funding to implement control strategies is limited under either scenario.

Arguments Against the EAC

- There is no funding source to develop the EAC plan for improving air quality. The EAC will require staff time and resources to develop the plan and collaborate with other local governments.

- There is no funding source to implement the strategies identified in the plan. Many of the strategies identified in the plan are likely to be the responsibility of the City of Asheville. So, this plan may require additional City resources to develop and implement the strategies.
- With no funding source, and a very limited time frame, it will be challenging to meet the goals of the EAC.
- The EAC is vulnerable to legal challenge because it is not specifically provided for in the Clean Air Act
- Environmental groups will seek ensure that the local plan meets or exceed the same stringent standards that would be applied under non-attainment – especially in the area of transportation conformity.
- Most of the strategies that will be effective in our area are specific to transportation, which means we are likely to include air quality modeling in our transportation planning with our without the EAC.
- Our area would not be available for federal CMAQ funds under the EAC. These funds could total up to 1 to 2 million dollars per year for transportation improvements. If all potential non-attainment areas in North Carolina enter into an EAC, it will guarantee that the $20 million in statewide CMAQ funds will be spent exclusively in Charlotte, Raleigh, and the Triad.
- Uncertainties exist. In contrast, non-attainment designation is well tested. It may be difficult to back out of a regional agreement if it does not work as expected.
- Our area may be designated as non-attainment for the pollutant "fine particulate matter" which is not addressed in the EAC.

In summary, the primary argument offered in favor of the EAC is that it avoids the regulatory requirements of non-attainment and has the potential to achieve clean air sooner. Also, if the EAC doesn't work, we will automatically revert to the "non-attainment" track. The prevailing argument in favor of the EAC seems to be that it is preferable to non-attainment and that we have "nothing to lose" by entering into the agreement. However, there are some potential costs and drawbacks associated with the EAC that need to be considered. Specifically, the EAC is a process that has no funding source. The development of the plan and implementation of the strategies in the plan would require staff time and resources. Entering into the EAC would also prevent us from receiving federal CMAQ funds, which, under "non-attainment" could provide up to 1 to 2 million dollars per year for transportation projects.

City staff recommends City Council consider a resolution to enter into an "Early Action Compact."

Mr. Baechtold responded to various questions and comments from Council.

Discussion surrounded how the strategies will be developed and enforcement of those strategies.

Vice-Mayor Bellamy moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilwoman Jones and carried unanimously.

Councilman Ellis moved for the adoption of Resolution No. 02-188. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

Councilwoman Jones said that in the event everyone is not in agreement with the Compact, she hoped that City staff would still begin identifying our strategies.

RESOLUTION BOOK NO. 27 – PAGE 287

BOARDS/COMMISSIONS

It was the consensus of City Council to have the City Clerk prepare the proper paperwork to appoint Dr. James Mullen to the Community Relations Council and to also arrange for interviews for the other vacancy on the Community Relations Council.

It was the consensus of City Council to have the City Clerk prepare the proper paperwork to (1) reappoint Chuck Pickering and William Byrne and to appoint Peter Alberice and J. Patrick Whalen to the Asheville Downtown Commission; (2) reappoint Lloyd Williams to the Firemen's Relief Fund; (3) reappoint Gerry Hardesty and Linda Giltz to the Greenway Commission; (4) reappoint Stacy Anderson and Ruth Chaet and appoint James Gardner Jr. to the Transit Commission; and (5) reappoint Kasty Latven and Peter Gentling and appoint Joseph Carney to the Tree Commission.

It was the consensus of Council to require all School Board candidates be City residents and that they live in the Asheville School District.

It was the consensus of Council to reduce the at-large membership, through attrition, on the Educational Access Channel Commission, from three members to two members.

It was the consensus of Council to instruct the City Attorney to prepare a brief educational meeting on the Open Meetings Law, etc. for all our Board and Commission members.

MISCELLANEOUS

It was the consensus of City Council to instruct the City Attorney to provide Council with a report in the near future regarding towing and parking in the downtown and Biltmore Village.

Councilman Dunn said that since we appoint members to the ABC Board, he asked for a report from the ABC Board on the details of the embezzling incident.

CLOSED SESSION

At 5:57 p.m., Councilman Mumpower moved to go into closed session to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Betty Donoho, County of Buncombe, Western North Carolina Air Pollution Control Agency, City of Asheville, and Buncombe County School Board. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

At 6:42 p.m., Councilman Peterson moved to come out of closed session. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 6:42 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – January 7, 2003 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

Contribution from Irene and Dick Covington Foundation

Summary: The consideration of a resolution recognizing the contribution made by the Irene and Dick Covington Foundation that will result in the construction of a tennis museum and clubhouse at Aston Park.

In the early 1990's, a Foundation was established in honor of Irene and Dick Covington, both now deceased. The Covingtons contributed greatly to the growth of tennis in Asheville and Western North Carolina. The Foundation resulted in a total of $278,336.17, and the majority of this amount was derived from the sale of their estate. The goal of the Foundation was to develop a tennis clubhouse at Aston Park, which would benefit the tennis community and display the archives from Dick Covington's tennis career. The Foundation has been working with a local architect to develop plans, which were approved in September, 2002. The Foundation approved giving the above funds to Buncombe County who will oversee the construction of the proposed Aston Park Tennis Clubhouse. The County Commissioners have already approved a resolution accepting the funds and agree to maintain the building as long as Buncombe County has control of the Aston Park property. In the event the property is reverted back to the City of Asheville, all unused funds will be transferred to the City to continue development of the clubhouse or for perpetual maintenance. Buncombe County has agreed to construct the facility to meet the requirements of the Unified Development Ordinance, and the facility should be completed as early as July, 2004.

The Asheville Parks and Recreation Department requests City Council recognize the contribution made by the Irene and Dick Covington Foundation that will result in the construction of a tennis museum and clubhouse at Aston Park.

Parks and Recreation Director Irby Brinson responded to various questions from Vice-Mayor Bellamy regarding the construction of the tennis museum and clubhouse.

Budget Amendment for Reimbursement for Bulletproof Vests

Summary: The consideration of a budget amendment, in the amount of $11,362, to reimburse the Asheville Police Department for bulletproof vests from a grant by the U.S. Dept. of Justice, Bureau of Justice Assistance.

In July of 2002, with the approval of the City Manager, the Asheville Police Department applied for partial reimbursement for bulletproof vests through the Bureau of Justice Assistance. The Asheville Police Department was notified that it would receive the funds and, in September, received 50% ($11,362) of the funds it expended for bulletproof vests through the Bulletproof Vest Partnership Grant Act of 1998.

Staff recommends adoption of a budget ordinance amendment appropriating $11,362 to the Police Department budget.

Budget Amendment for Urban Trail

Summary: The consideration of a budget amendment, in the amount of $12,347.95, to appropriate additional donated funds for the maintenance and upkeep of the Urban Trail.

The Parks and Recreation Department has been responsible for the maintenance of the Urban Trail for a number of years. Periodically, funds are secured from interested donors to the Urban Trail. This budget amendment will appropriate additional revenue into an existing account, which will continue the maintenance and upkeep of the stations.

The Parks and Recreation Department requests City Council approval of a budget amendment for upkeep of the Urban Trail.

Grant for French Broad River Park IV

Summary: The consideration of a resolution authorizing the Mayor to apply for and enter into an agreement with the N.C. Dept. of Environment and Natural Resources to assist with the development of the French Broad River Park IV.

Funds are available through the N. C. Dept. of Environment and Natural Resources, Division of Parks and Recreation in the North Carolina Parks and Recreation Trust Fund, to assist with the development of parks and greenways. If awarded, grant funds will be used to assist with the next phase of construction at French Broad River Park IV.

French Broad River Park IV represents the City of Asheville's next phase of a major greenway and park system being developed along the French Broad River on Amboy Road. The next phase includes a picnic pavilion, wetland interpretive/education area, river overlooks, a boat landing, trails and parking.

The Parks and Recreation Department, the Asheville Parks and Greenways Foundation and RiverLink are in partnership to implement a fundraising plan to raise approximately $800,000 to build the next phase of the park.

The Parks and Recreation Department is requesting $250,000 in grant funds from the North Carolina Parks and Recreation Trust Fund, which requires a dollar for dollar cash match. The cash match is available through a partnership with RiverLink, and in funds allocated by the City of Asheville.

The Parks and Recreation Department recommends the City of Asheville to apply for and enter into an agreement for grant funds through the North Carolina Parks and Recreation Trust Fund to assist with the construction of the French Broad River Park IV.

Parks and Recreation Director Irby Brinson responded to questions from Councilman Mumpower regarding the dollar cash match.

Grant for Azalea Road Park Phase I

Summary: The consideration of a resolution to apply for and enter into an agreement with the N. C. Dept. of Environment and Natural Resources to assist with the development of Azalea Road Park Phase I.

Funds are available through the N. C. Dept. of Environment and Natural Resources, Division of Parks and Recreation, for funds through the Land, Water and Conservation Fund to assist with the development of outdoor recreation facilities. If awarded, grant funds will be used to assist with the construction of the first phase of Azalea Road Park.

Azalea Road Park represents the City of Asheville's first phase of a major greenway and park system being developed along the Swannanoa River on Azalea Road. This first phase will include the development of two fields of the four field soccer complex, restrooms, concession, kayak launch, two picnic shelters, a large playground, disc golf, fitness and greenway trails, river observation decks, restoration of the Thomas Wolfe cabin, and parking areas.

The Parks and Recreation Department, Western North Carolina Soccer Foundation and RiverLink are in partnership to implement an ambitious fundraising plan to raise $3 million to build the first phase of the park.

The Parks and Recreation Department is requesting $500,000 in grant funds from the Land, Water and Conservation Fund, which requires a dollar for dollar cash or in-kind match. The cash match is available through the Western North Carolina Soccer Foundation, and the in-kind match is available in labor, equipment, and project management in the Parks and Recreation Department.

The Parks and Recreation Department recommends the City of Asheville to apply for and enter into an agreement for grant funds with the Land, Water and Conservation Fund to assist with the construction of Azalea Road Park Phase I.

Parks and Recreation Director Irby Brinson answered various questions from Council.

Contract with Network Data Systems to Provide Security Services

Summary: The consideration of a resolution to approve a contract with Network Data Systems (NDS) to provide security services at the North Fork Water Treatment Facility.

The City of Asheville requires a security system at the North Fork Treatment Facility. Proposals for a security system were received on November 15, 2002, and NDS was the lowest bidder.

NDS's system will provide secure access to and from gated areas and buildings. It will also provide security outside of buildings and in parking areas through close-circuit cameras. The equipment installed and card entry system will be compatible with current system(s) used at Asheville City Hall, Water Resources Water Maintenance Facility, and the Mills River Water treatment Facility.

The contract will be completed within 45 days from notice to proceed and will not exceed $60,600.

City staff recommends approval of the contract with NDS to provide security services at the North Fork Facility.

Councilman Mumpower wondered if it would be a good idea to have a comprehensive presentation on terrorism, homeland security and related issues.

Councilman Peterson suggested a joint City/County meeting be arranged to discuss areas in which we are cooperating together on and where we can improve communication.

Financing for Upgrade of Existing Radio System Equipment

Summary: The consideration of a resolution authorizing the installment financing of the upgrade of existing radio system equipment.

In 1990 the City purchased and installed an 800 MHz radio system to serve as the City's primary mobile communications system. The existing radio equipment has been in service for approximately ten years. Maintenance is no longer possible on the radios being replaced due to the fact that the manufacturer, or any other sources, no longer makes replacement parts and the proprietary software programming is no longer supported by anyone. The City of Asheville Capital Improvement Plan 2001/03 to 2006/08 included authorization in Fiscal Year 02/03 for the installment purchase of replacement equipment for the City's 800 MHz Radio System.

The Finance Department sought proposals from ten firms to finance the purchase of the above listed equipment. Proposals were received from five firms, the best of which was submitted by SunTrust Leasing Corporation - - 2.63% for five years.

The proposed resolution authorizes an installment purchase contract between the City of Asheville and SunTrust Leasing Corporation for the purchase of the radio system and authorizes the City Manager, City Attorney, Finance Director and City Clerk to execute and deliver any and all necessary documents.

City staff recommends City Council adopt the resolution.

Finance Director Bill Schaefer responded to various questions from Councilman Dunn regarding enhancing the City's communication with Buncombe County.

Councilman Mumpower felt the issue of the two different communication systems should be placed on an upcoming worksession for discussion.

Support for Increased Congestion Mitigation Air Quality Funding and Revised Eligibility Criteria

Summary: The consideration of a resolution supporting increased Congestion Mitigation Air Quality (CMAQ) funding and revised program eligibility requirements.

At the December 17, 2002, meeting, Council adopted a resolution authorizing the City to enter into an Early Action Compact with other local governments in the Greater Asheville Basin to take voluntary steps to reduce pollution in an effort to delay or avoid designation by the EPA as a non-attainment area, which would trigger the imposition of mandatory pollution control measures.

At that meeting, it was suggested that Council should consider adopting a resolution supporting amendments to various laws that would make federal funding available to assist in the implementation of the voluntary measures emerging from the EAC. Currently, federal funding is only available after the non-attainment designation has been made. This resolution is similar to one adopted by the Central Texas Clean Air Coalition.

If Council approves of the resolution, its adoption is recommended.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

HOUSING TRUST FUND LOANS

Community Development Director Charlotte Caplan said that this is the consideration of a resolution allocating $587,000 in Housing Trust Fund loans for affordable housing development.

The City's 2003 budget included an appropriation of $500,000 for the Housing Trust Fund (HTF). In addition, there has been $87,000 in repayments received from prior years' loans. The application process for the third annual offering of HTF loans was opened on October 23, 2002, and seven applications were received by the November 27 deadline. The applications were evaluated by a panel of city and outside professional staff and then reviewed by the Housing and Community Development Committee. The HCD Committee has recommended funding six projects by five developers, as follows:

WNC Housing, Inc. (4 rental units for special needs)	$75,000
Ron Moser Inc. (21 units for sale)	$230,000
Neighborhood Housing Services (10 units for sale)	$150,000
Tim & Wendy Vorst (4 rental units in two projects)	$100,000
Villas at Cedar Hills, LLC (30 units for sale)	$32,000
Total	$587,000

Staff estimate that within two years of the loans closing, approximately $245,000 will be repaid to the trust fund.

This will be the third year of the HTF program.

City staff recommends City Council approve the HTF loans listed above.

Councilwoman Jones, Chair of the Housing & Community Development Committee, noted that these allocations reflect the balance of the different housing needs in Asheville.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

ASHEVILLE SCHOOL BOARD

City Council narrowed the questions to be sent to eligible School Board candidates.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 4:25 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – January 14, 2003 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Councilman Ellis gave the invocation.

I. PROCLAMATIONS:

II. CONSENT:

At the request of Councilman Mumpower, Consent Agenda Items "E" and "F" were removed from the Consent Agenda for individual discussion.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON DECEMBER 10, 2002; THE WORKSESSION HELD ON DECEMBER 17, 2002; AND THE WORKSESSION HELD ON JANUARY 7, 2003

B. RESOLUTION NO. 03-1 - RESOLUTION RECOGNIZING THE CONTRIBUTION FROM THE IRENE AND DICK COVINGTON FOUNDATION

Summary: The consideration of a resolution recognizing the contribution made by the Irene and Dick Covington Foundation that will result in the construction of a tennis museum and clubhouse at Aston Park.

In the early 1990's, a Foundation was established in honor of Irene and Dick Covington, both now deceased. The Covingtons contributed greatly to the growth of tennis in Asheville and Western North Carolina. The Foundation resulted in a total of $278,336.17, and the majority of this amount was derived from the sale of their estate. The goal of the Foundation was to develop a tennis clubhouse at Aston Park, which would benefit the tennis community and display the archives from Dick Covington's tennis career. The Foundation has been working with a local architect to develop plans, which were approved in September, 2002. The Foundation approved giving the above funds to Buncombe County who will oversee the construction of the proposed Aston Park Tennis Clubhouse. The County Commissioners have already approved a resolution accepting the funds and agree to maintain the building as long as Buncombe County has control of the Aston Park property. In the event the property is reverted back to the City of Asheville, all unused funds will be transferred to the City to continue development of the clubhouse or for perpetual maintenance. Buncombe County has agreed to construct the facility to meet the requirements of the Unified Development Ordinance, and the facility should be completed as early as July, 2004.

The Asheville Parks and Recreation Department requests City Council recognize the contribution made by the Irene and Dick Covington Foundation that will result in the construction of a tennis museum and clubhouse at Aston Park.

RESOLUTION BOOK NO. 27 – PAGE 288

C. ORDINANCE NO. 2985 - BUDGET AMENDMENT FOR REIMBURSEMENT OF BULLETPROOF VESTS

Summary: The consideration of a budget amendment, in the amount of $11,362, to reimburse the Asheville Police Department for bulletproof vests from a grant by the U.S. Dept. of Justice, Bureau of Justice Assistance.

In July of 2002, with the approval of the City Manager, the Asheville Police Department applied for partial reimbursement for bulletproof vests through the Bureau of Justice Assistance. The Asheville Police Department was notified that it would receive the funds and, in September, received 50% ($11,362) of the funds it expended for bulletproof vests through the Bulletproof Vest Partnership Grant Act of 1998.

Staff recommends adoption of a budget ordinance amendment appropriating $11,362 to the Police Department budget.

ORDINANCE BOOK NO. 20 - PAGE 192

D. ORDINANCE NO. 2986 - BUDGET AMENDMENT FOR THE UPKEEP OF THE URBAN TRAIL

Summary: The consideration of a budget amendment, in the amount of $12,347.95, to appropriate additional donated funds for the maintenance and upkeep of the Urban Trail.

The Parks and Recreation Department has been responsible for the maintenance of the Urban Trail for a number of years. Periodically, funds are secured from interested donors to the Urban Trail. This budget amendment will appropriate additional revenue into an existing account, which will continue the maintenance and upkeep of the stations.

The Parks and Recreation Department requests City Council approval of a budget amendment for upkeep of the Urban Trail.

ORDINANCE BOOK NO. 20 – PAGE 194

E. RESOLUTION AUTHORIZING THE MAYOR TO APPLY FOR AND ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES TO ASSIST WITH THE DEVELOPMENT OF THE FRENCH BROAD RIVER PARK IV

This item was removed from the Consent Agenda for individual discussion.

F. RESOLUTION AUTHORIZING THE CITY TO APPLY FOR AND ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES TO ASSIST WITH THE DEVELOPMENT OF THE AZALEA ROAD PARK PHASE I

This item was removed from the Consent Agenda for individual discussion.

G. RESOLUTION NO. 03-2 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH NETWORK DATA SERVICES FOR SECURITY SERVICES AT THE NORTH FORK WATER TREATMENT FACILITY

Summary: The consideration of a resolution to approve a contract with Network Data Systems (NDS) to provide security services at the North Fork Water Treatment Facility.

The City of Asheville requires a security system at the North Fork Treatment Facility. Proposals for a security system were received on November 15, 2002, and NDS was the lowest bidder.

NDS's system will provide secure access to and from gated areas and buildings. It will also provide security outside of buildings and in parking areas through close-circuit cameras. The equipment installed and card entry system will be compatible with current system(s) used at Asheville City Hall, Water Resources Water Maintenance Facility, and the Mills River Water treatment Facility.

The contract will be completed within 45 days from notice to proceed and will not exceed $60,600.

City staff recommends approval of the contract with NDS to provide security services at the North Fork Facility.

RESOLUTION BOOK NO. 27 – PAGE 290

H. RESOLUTION NO. 03-3- RESOLUTION AUTHORIZING AN INSTALLMENT PURCHASE CONTRACT BETWEEN SUNTRUST LEASING CORPORATION AND THE CITY OF ASHEVILLE TO FINANCE THE UPGRADE OF EXISTING RADIO SYSTEM EQUIPMENT

Summary: The consideration of a resolution authorizing the installment financing of the upgrade of existing radio system equipment.

In 1990 the City purchased and installed an 800 MHz radio system to serve as the City's primary mobile communications system. The existing radio equipment has been in service for approximately ten years. Maintenance is no longer possible on the radios being replaced due to the fact that the manufacturer, or any other sources, no longer makes replacement parts and the proprietary software programming is no longer supported by anyone. The City of Asheville Capital Improvement Plan 2001/03 to 2006/08 included authorization in Fiscal Year 02/03 for the installment purchase of replacement equipment for the City's 800 MHz Radio System.

The Finance Department sought proposals from ten firms to finance the purchase of the above listed equipment. Proposals were received from five firms, the best of which was submitted by SunTrust Leasing Corporation - - 2.63% for five years.

The proposed resolution authorizes an installment purchase contract between the City of Asheville and SunTrust Leasing Corporation for the purchase of the radio system and authorizes the City Manager, City Attorney, Finance Director and City Clerk to execute and deliver any and all necessary documents.

City staff recommends City Council adopt the resolution.

RESOLUTION BOOK NO. 27 – PAGE 291

I. RESOLUTION NO. 03-4 - RESOLUTION SUPPORTING INCREASED CONGESTION MITIGATION AIR QUALITY FUNDING AND REVISED ELIGIBILITY CRITERIA

Summary: The consideration of a resolution supporting increased Congestion Mitigation Air Quality (CMAQ) funding and revised program eligibility requirements.

At the December 17, 2002, meeting, Council adopted a resolution authorizing the City to enter into an Early Action Compact with other local governments in the Greater Asheville Basin to take voluntary steps to reduce pollution in an effort to delay or avoid designation by the EPA as a non-attainment area, which would trigger the imposition of mandatory pollution control measures.

At that meeting, it was suggested that Council should consider adopting a resolution supporting amendments to various laws that would make federal funding available to assist in the implementation of the voluntary measures emerging from the EAC. Currently, federal funding is only available after the non-attainment designation has been made. This resolution is similar to one adopted by the Central Texas Clean Air Coalition.

If Council approves of the resolution, its adoption is recommended.

RESOLUTION BOOK NO. 27 – PAGE 292

J. RESOLUTION NO. 03-5 - RESOLUTION APPROVING THE HOUSING TRUST FUND LOANS

Summary: The consideration of a resolution allocating $587,000 in Housing Trust Fund loans for affordable housing development.

The City's 2003 budget included an appropriation of $500,000 for the Housing Trust Fund (HTF). In addition, there has been $87,000 in repayments received from prior years' loans. The application process for the third annual offering of HTF loans was opened on October 23, 2002, and seven applications were received by the November 27 deadline. The applications were evaluated by a panel of city and outside professional staff and then reviewed by the Housing and Community Development Committee. The HCD Committee has recommended funding six projects by five developers, as follows:

WNC Housing, Inc. (4 rental units for special needs)	$75,000
Ron Moser Inc. (21 units for sale)	$230,000
Neighborhood Housing Services (10 units for sale)	$150,000
Tim & Wendy Vorst (4 rental units in two projects)	$100,000
Villas at Cedar Hills, LLC (30 units for sale)	$32,000
Total	$587,000

Staff estimates that within two years of the loans closing, approximately $245,000 will be repaid to the trust fund.

This will be the third year of the HTF program.

City staff recommends City Council approve the HTF loans listed above.

K. RESOLUTION NO. 03-6 - RESOLUTION FIXING DATE OF A PUBLIC HEARING ON JANUARY 28, 2003, ON THE QUESTION OF THE VOLUNTARY ANNEXATION OF PROPERTY LOCATED EAST OF PISGAH VIEW ROAD AND IDENTIFIED AS THE PISGAH VIEW ROAD AREA

RESOLUTION BOOK NO. 27 – PAGE 294

L. RESOLUTION NO. 03-7 - RESOLUTION APPOINTING MEMBERS TO THE DOWNTOWN COMMISSION

Summary: The terms of Chuck Pickering, William Byrne and Kim MacQueen expired on December 31, 2002. Mr. Pickering and Mr. Byrne have requested reappointment. Ms. MacQueen has resigned as a member of the Downtown Commission to take the President of the Downtown Association appointment.

Mr. Tim Fierle has resigned as a member from the Downtown Commission, thus leaving an unexpired term until December 31, 2003.

On December 17, 2002, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to (1) reappoint Mr. Pickering and Mr. Byrne to each serve an additional three year term respectfully, terms to expire December 31, 2005, or until their successors have been appointed; (2) appoint J. Patrick Whalen to serve a three year term, term to expire December 31, 2005, or until his successor has been appointed; and (3) appoint Peter Albence to serve the unexpired term of Mr. Fierle, term to expire December 31, 2003, or until his successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 296

M. RESOLUTION NO. 03-8 - RESOLUTION APPOINTING A MEMBER TO THE FIREMEN'S RELIEF FUND

Summary: The term of Lloyd Williams, as a member on the Firemen's Relief Fund Board of Trustees, expired on January 1, 2003.

On December 17, 2002, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint Mr. Williams to serve an additional two year term, term to expire January 1, 2005, or until his successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 297

N. RESOLUTION NO. 03-9 - RESOLUTION APPOINTING MEMBERS TO THE GREENWAY COMMISSION

Summary: The terms of Gerry Hardesty and Linda Giltz, as members on the Greenway Commission, expired on December 31, 2002.

On December 17, 2002, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint Gerry Hardesty and Linda Giltz to each serve an additional three year term, terms to expire December 31, 2005, or until their successors have been appointed.

RESOLUTION BOOK NO. 27 – PAGE 298

O. RESOLUTION NO. 03-10 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE TRANSIT COMMISSION

Summary: The terms of Stacy Anderson, Ruth Chaet and Robert Potter, as members on the Asheville Transit Commission, expired on December 31, 2002.

On December 17, 2002, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to (1) reappoint Stacy Anderson and Ruth Chaet to each serve an additional two year term respectively, terms to expire December 31, 2004; and (2) to appoint Mr. James F. Garner Jr. to serve a two year term, term to expire December 31, 2004. All terms are until their successors have been appointed.

RESOLUTION BOOK NO. 27 – PAGE 299

P. RESOLUTION NO. 03-11 - RESOLUTION APPOINTING MEMBERS TO THE TREE COMMISSION

Summary: The terms of Kasty Latven, Peter Gentling and Sofia Mannos, as members on the Asheville Tree Commission, expired on December 31, 2002.

On December 17, 2002, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to (1) reappoint Kasty Latven and Sofia Mannos to each serve an additional three year term respectively, terms to expire December 31, 2005; and (2) to appoint Joseph Carney to serve a three year term, term to expire December 31, 2005. All terms are until their successors have been appointed.

RESOLUTION BOOK NO. 27 – PAGE 300

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Vice-Mayor Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Ellis and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL DISCUSSION

It was the consensus to deal with both resolutions at the same time.

RESOLUTION NO. 03-12 - RESOLUTION AUTHORIZING THE MAYOR TO APPLY FOR AND ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES TO ASSIST WITH THE DEVELOPMENT OF THE FRENCH BROAD RIVER PARK IV

Parks & Recreation Director Irby Brinson said that this is the consideration of a resolution authorizing the Mayor to apply for and enter into an agreement with the N.C. Dept. of Environment and Natural Resources to assist with the development of the French Broad River Park IV.

Funds are available through the N. C. Dept. of Environment and Natural Resources, Division of Parks and Recreation in the North Carolina Parks and Recreation Trust Fund, to assist with the development of parks and greenways. If awarded, grant funds will be used to assist with the next phase of construction at French Broad River Park IV.

French Broad River Park IV represents the City of Asheville's next phase of a major greenway and park system being developed along the French Broad River on Amboy Road. The next phase includes a picnic pavilion, wetland interpretive/education area, river overlooks, a boat landing, trails and parking.

270

The Parks and Recreation Department, the Asheville Parks and Greenways Foundation and RiverLink are in partnership to implement a fundraising plan to raise approximately $800,000 to build the next phase of the park.

The Parks and Recreation Department is requesting $250,000 in grant funds from the North Carolina Parks and Recreation Trust Fund, which requires a dollar for dollar cash match. The cash match is available through a partnership with RiverLink, and in funds allocated by the City of Asheville.

The Parks and Recreation Department recommends the City of Asheville to apply for and enter into an agreement for grant funds through the North Carolina Parks and Recreation Trust Fund to assist with the construction of the French Broad River Park IV.

When Councilman Mumpower asked how much City money is involved in the French Broad River Park IV grant, Mr. Brinson said that the match would be $185,000. He explained that the grant requires a $250,000 match but we currently have $25,000 from a grant that we have secured from Progress Energy and a $40,000 contribution from RiverLink. This resolution would give City staff the authority to proceed with the grant application. He said staff would be requesting the $185,000 as part of the budget process, with or without the grant, since we want to continue the development of that park. If Council decides at budget time not to allocate those funds we would go back and readjust that grant application based on the amount of dollars that we do have that are secured. In addition, staff is still looking at other opportunities to match the $250,000 with non-City money so that it gives us an opportunity during that period of time for applying for that grant to show where that match comes from.

Upon further inquiry of Councilman Mumpower regarding timing, Mr. Brinson said there are only two grant cycles for this particular grant and if we don't apply this cycle, we won't be able to apply until later, which will push us in trying to use the funds to complete the park in the fall of 2004. Again, he explained that the $185,000 match is flexible and we are only trying to keep our options open.

Mr. Brinson said that with the Azalea Road Park, the City is not committing any funds toward the match. That match would come from the $400,000 Tourism Development grant that the City will receive. Plus, we have another match from the Lewis Trust Fund that was established. He said the City has the option to use in-kind match, but we have enough cash already to make that match, so we would not necessarily have to use the in-kind. If we do use the in-kind, it allows us to use the flexibility of using that cash for other matches.

City Manager Westbrook said that the $185,000 match will be programmed for that year's budget in compliance with the Master Plan, which City Council approved. Regardless of whether the grant was there, we were going to try to do some work with $185,000 and Mr. Brinson has found a way, through a grant, to leverage that additional funding from the state. He felt it was good business to try to do that.

Councilman Mumpower felt that money we spend for parks and recreation are good dollars, however, his discomfort with this is a timing matter. He said Council just spent a difficult summer balancing our budget and we even raised taxes. He was a little uncomfortable with Council stepping forward this quickly in view of the recent budget crisis and the possible budget crisis next summer. He did understand we are trying to keep our options open and that the budget may look better in the summer. If the budget outlook is good, he will be happy to vote to approve the match, but if not, then he would be against spending money for the match because we have other priorities.

Upon inquiry of Councilman Peterson, Mr. Brinson said the French Broad River Park IV is without a doubt the most heavily used park.

Councilman Dunn was concerned about the lack of playground facilities at the Hall Fletcher School Park. Mr. Brinson said that over the past 4-5 years, there has been a concentration to upgrade playgrounds. He said the Hall Fletcher School Park is in our Capital Improvement Budget request and will be forwarded to Council through the budget process.

Upon inquiry of Councilwoman Jones, Mr. Brinson said that revenue brought in from the French Broad River Park was approximately $30,000-$40,000 last year from concessions and in-line hockey, which he hoped would grow. He also noted that expenditures for last year were approximately $30,000-$40,000.

Vice-Mayor Bellamy felt that that this is a long-term investment in that Council needs to invest in good venues for our children now than invest in police enforcement later.

Mr. Brinson said that the total cost to date, including the property, for the French Broad River Park is $2,135,000 and the City of Asheville has put in $200,000, which is less than 10% of that cost.

RESOLUTION NO. 03-13 - RESOLUTION AUTHORIZING THE CITY TO APPLY FOR AND ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES TO ASSIST WITH THE DEVELOPMENT OF THE AZALEA ROAD PARK PHASE I

Summary: The consideration of a resolution to apply for and enter into an agreement with the N. C. Dept. of Environment and Natural Resources to assist with the development of Azalea Road Park Phase I.

Funds are available through the N. C. Dept. of Environment and Natural Resources, Division of Parks and Recreation, for funds through the Land, Water and Conservation Fund to assist with the development of outdoor recreation facilities. If awarded, grant funds will be used to assist with the construction of the first phase of Azalea Road Park.

Azalea Road Park represents the City of Asheville's first phase of a major greenway and park system being developed along the Swannanoa River on Azalea Road. This first phase will include the development of two fields of the four field soccer complex, restrooms, concession, kayak launch, two picnic shelters, a large playground, disc golf, fitness and greenway trails, river observation decks, restoration of the Thomas Wolfe cabin, and parking areas.

The Parks and Recreation Department, Western North Carolina Soccer Foundation and RiverLink are in partnership to implement an ambitious fundraising plan to raise $3 million to build the first phase of the park.

The Parks and Recreation Department is requesting $500,000 in grant funds from the Land, Water and Conservation Fund, which requires a dollar for dollar cash or in-kind match. The cash match is available through the Western North Carolina Soccer Foundation, and the in-kind match is available in labor, equipment, and project management in the Parks and Recreation Department.

The Parks and Recreation Department recommends the City of Asheville to apply for and enter into an agreement for grant funds with the Land, Water and Conservation Fund to assist with the construction of Azalea Road Park Phase I.

Vice-Mayor Bellamy moved to approve Resolution No. 02-12 and Resolution No. 02-13. This motion was seconded by Councilwoman Jones.

Councilman Mumpower felt City staff does an excellent job of levering money. He hoped, and was encouraged to believe, that other departments will have the same opportunity and be equally creative in their efforts to maintain our streets, building new sidewalks, replace sidewalks that need replacement, keep police well-equipped and maintain our equipment.

The motion made by Vice-Mayor Bellamy and seconded by Councilwoman Jones carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 301

RESOLUTION BOOK NO. 27 – PAGE 302

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER REZONING PROPERTIES IDENTIFIED ON THE BROADWAY CORRIDOR

ORDINANANCE NO. 2987 - ORDINANCE TO REZONE PROPERTIES IDENTIFIED ON THE BROADWAY CORRIDOR SOUTH OF MAGNOLIA STREET

ORDINANCE NO. 2988 – ODINANCE TO REZONE PROPERTIES IDENTIFED ON THE BROADWAY CORRIDOR NORTH OF MAGNOLIA STREET

Mayor Worley said that this matter was tabled from the August 28, 2002, agenda. On December 10, 2002, the matter was rescheduled until this date due to failure of properly posting the properties to be rezoned along the Broadway corridor. This public hearing was advertised on January 3 and 10, 2003.

Mayor Worley opened the public hearing at 5:32 p.m.

City Attorney Oast said that a protest petition has been filed with respect to the rezoning portion of this request. The law requires that in the case of a valid protest petition, the rezoning can only pass by favorable vote of ¾ of the entire Council. In this case, however, after investigation by Urban Planner Carter Pettibone and himself, it is their determination that it is not a valid protest petition. He said that the reason is that, as calculated, they don't believe they have met the minimum 20% threshold of one of the qualifying areas you have to meet. In particular, when you have a case like this where you have a large irregularly shaped parcel, the law is unclear and some judgment calls had to be made. He did consult with attorneys at the Institute of Government, attorneys on his own staff, and reviewed similar situations from his own career on where to draw the lines to divide the areas. It was their belief that we applied what rules there are in a reasonable manner. Again, it is his opinion that the petition is not valid.

Upon inquiry of Councilman Peterson, City Attorney Oast used a copy of the corridor to explain how he made the calculations and how the lines for each area were drawn (which were done before he knew where the property owners were that had that signed the protest petition), noting that he followed property lines or extensions of zoning lines. If the area were considered as a whole, it would not qualify for a valid protest petition. And, in drawing the four lines, none of the four areas drawn met the percentages necessary for a valid protest petition.

When Councilman Peterson said that there was no clear state law on where the lines should be drawn, City Attorney Oast agreed that the lines could be drawn in a number of areas, but his lines were drawn in a reasonable way.

Upon inquiry of Vice-Mayor Bellamy, City Attorney Oast explained why any lines were drawn at all.

Councilman Peterson explained why he felt the application of the law by City Attorney Oast that the total acreage of the entire lot that touches within 100 feet is included in the calculations is incorrect. He said that case law is that only that part of the property that is within 100 feet of the boundary of the zoning district that is to be changed should have been calculated. City Attorney Oast agreed that the law is not clear on that, but the way that he applied it is that it includes the area of the lot that is in within 100 feet, not just so much of it as is within the 100 feet.

Vice-Mayor Bellamy suggested that Council divide the rezoning area up into two areas and vote on them separately since it seems there is not a lot of dispute in rezoning the south area.

Ms. Betty Lawrence, attorney, said that the petitioners tried very hard to get an opinion from the City Attorney as to, in this situation with these irregular boundaries, what a side would be so that they would have some amount of clarity as to how many property owners they would need on the protest petition. She explained how the lines could have been drawn differently in order to have a valid protest petition. In addition, she agreed with Councilman Peterson in that only 100 feet of the boundary of the zoning district should have been calculated. She stated that she does have authorizations to withdraw the protest petition if there are changes made in the boundary.

Planning and Development Director Scott Shuford said that first, this zoning change would implement the development pattern proposed in the Broadway Corridor Plan that Council adopted last year. In addition, staff feels the zoning will help the implementation of the greenway project proposed for the west side of Broadway. The proposed zoning is consistent with the recommendations of the Sustainable Economic Development Task Force for missed use development and redevelopment. Finally, your smart growth policies would be implemented by this change in zoning, including the first three land use policies: (1) mixed use developments and buildings should be encouraged; (2) compatible, higher density commercial and residential infill development should be encouraged; and (3) new development should promote a sustainable land development pattern.

Secondly, the Broadway corridor's zoning over the past 6-7 years has impeded its redevelopment. In the single family zoned area north of Five Points, the only development has been a church, one of the few non-residential uses allowed in an RS-8 Residential Single-Family High Density District (RS-8) zoning. Virtually nothing has changed south of Five Points despite the suburban commercial zoning. Staff does not find the level of development activity in either area acceptable, given Council's charge to staff to create a smart growth development pattern that effectively and sustainably uses our resources. If we want the corridor to change, the zoning also needs to change. We have local developers waiting to build to the provisions of the Neighborhood Corridor District (NCD).

Mr. Shuford said that Broadway is a corridor having great potential to meet the future needs of our community. It is a critical link between downtown and UNC-Asheville. It is largely a "fresh palette," allowing the City to create a vision for future mixed-use development of the smart growth variety that Council has said it wants. Council and staff is asked daily to demonstrate our support for development that reverses the road-building and air quality impacts of a sprawl development pattern. Staff believes this proposed rezoning will be a step in the right direction to achieving these objectives.

Urban Planner Carter Pettibone said that this is the consideration of an ordinance to rezone a 40.9-acre area located along Broadway Street from Community Business II (CB II) and RS-8 to NCD.

The Planning and Development Department has proposed the rezoning of 40.9 acres along Broadway Street to NCD as the next step in the Broadway Corridor Area planning process, following the development of the Broadway Corridor Action Plan and the adoption of the Neighborhood Corridor District as a new zoning district. Following the future zoning action steps outlined in the Corridor Plan of revising zoning standards to encourage mixed use development and identifying appropriate zoning designations to promote those mixed uses, Staff has identified an area for the implementation of this zoning district.

The proposed area is made up of 92 parcels and their associated rights-of-way. The area essentially runs one property deep along both sides of Broadway from I-240 north to its intersection with Magnolia Street, and also includes the two city blocks between Broadway and Marcellus south of Maxwell Street. The area then proceeds north along the eastern side of Broadway one lot deep until it reaches the southern edge of UNCA property. Along the western edge of Broadway north of Magnolia only eight lots near the intersection of Broadway and Cauble Street are included.

Several of the properties on the west side of Broadway north of Five Points were purposely not considered for the proposed rezoning area because they are to be used for the planned greenway along the creek to the west of Broadway. Staff also considered the impact of possible commercial vehicular traffic on the surrounding neighborhoods and limited the depth of the rezoning area to mainly one property deep along Broadway.

The existing land uses in the area include a variety of commercial uses and vacant properties and buildings in the southern portion of the proposed area, which is currently zoned CB II. North of the Five Points area in the RS-8 section, the majority of the properties are vacant, with a few residential homes, a church, and a gas station interspersed between. Over the past few years the City has seen little development activity in the corridor, but has recently received interest from various groups about possibilities for mixed-use redevelopment opportunities. In rezoning this area, staff believes the Broadway Corridor Plan's goals of providing a pedestrian friendly, mixed-use area that provides connection and neighborhood services to adjoining communities and a gateway to the Downtown area can be achieved.

The Planning and Zoning Commission voted 3-2 to recommend approval of the rezoning of the Broadway Corridor Area to NCD. The Planning and Development staff recommends approval as well.
